By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40s. ; and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, &c., in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907, the Local Government Board has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease; nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairy-men must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied

by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that whitewashing, &c., would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c., the same.

WILLS, TESTATORS AND EXECUTORS.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers, but has to be shared with a distant cousin of her husband's. Negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed; that is, signed by the testator in presence of two witnesses, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the

testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And I hereby appoint the said — sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this — day of —, 19—."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be], in **THOMAS SMITH** the presence of us, both present [Signature at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses. **Testator,**]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him,

in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. See *PUBLIC TRUSTEE, post*.

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the

following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY.—A minor cannot make a will. A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (x)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1866, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 37.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated

briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged on *all* property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will: to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained,

but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Registry.	Registrar.	District.
Bangor.....	G. H. Reid (£350)	Carnarvon and Anglesey.
Birmingham	John Glaisyer (£800)	Warwickshire.
Blandford	H. F. C. de Crespigny (£250)	Dorsetshire.
Bodmin ...	W. H. L. Shadwell (£500)	Cornwall.
Bristol.....	Arthur Frederick Nepean (£600)	Bristol & Bath, County Court Districts.
Bury St. Edmunds	Ronald Southey (£200)	Suffolk, West.
Canterbury	H. Mapleton Chapman (£350)	Kent, East, and Canterbury.
Carlisle ...	E. L. Hunt (£700)	Cumberland and Westmoreland.
Carmarthen	H. M. Fraser (£400)	Carmarthen, Cardigan, Pembroke, with the Deaneries of East and West Gower (including the town of Swansea) in the county of Glamorgan.
Chester ...	H. A. Jenner (£800)	Chester.
Chichester	W. B. F. Freeland (£200)	Sussex, West.
Derby	C. T. E. Wilde (£600)	Derbyshire.
Durham	W. J. Maynard (£500)	Durham.
Exeter	O. H. Hardy (£3,000)	Devonshire.
Gloucester	E. S. Hartland (£400)	Gloucestershire (except Bristol County Ct. Dist.).
Hereford...	H. C. M. Nolan (£400)	Herefordshire, Radnor, and Brecknock.
Ipswich ...	G. Pritchard, B.A. (£450)	Suffolk, East, & Essex, North.
Lancaster	Frederic Upton (£700)	Co. of Lancs. except the Hundreds of Salford and West Derby, and the City of Manchester.
Leicester...	H. Pickering Clarke (£500)	Leicester and Rutland.
Lewes	J. W. Heisch (£350)	Sussex, East.
Lichfield...	H. G. Faussett-Osborne (£800)	Staffordshire.
Lincoln ...	E. Forbes Lankes-ter, K.C. (£500)	Lincolnshire.
Liverpool	J. C. Bromfield (£750)	W. Derby Hund.
Llandaff ...	Raymund Allen (£350)	Glamorgan (except Deaneries of East and W. Gower), Monmouth.
Manchest'r	R. S. O. Mais (£800)	City of Manchester and Hundred of Salford.

<i>Registry.</i>	<i>Registrar.</i>	<i>District.</i>
Newcastle-on-Tyne	H. E. Edwards (£500)	Northumberland.
N'th'mpton	W. Young (£250)	Northants, S'th, and Beds.
Norwich ...	Charles H. Wilkin-son (£700)	Norfolk.
Notting'm	Dr. F. Oswald (£400)	N'tinghamshire.
Oxford	John T. Lewis (£500)	Oxon, Berks, and Bucks.
Peterboro'	C. S. Magee (£400)	Northants, N'th, Hunts, & Cambs.
St. Asaph	J. P. Lewis (£350)	Flint, Denbigh, & Merioneth.
Salisbury...	J. F. M. Fawcett (£350)	Wiltshire.
Shrewsb'ry	R. K. A. Green (£500)	Salop and Montgomery.
Taunton ...	E. T. Alms (£350)	Somerset, West.
Wakefield	B. H. H. Thomson (£1,200)	Yorks, West Riding.
Wells	V. F. Egleheart (£300)	Somerset, East, except Bath C. C. District.
Winchester	G. G. Phillimore (£500)	Hampshire.
Worcester	G. F. Adams (£500)	Worcestershire.
York	G. L. Simpson (£1,000)	Yorks, N. & E. Riding (including York).

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. Since 1857 this depository has been provided by the State under sect. 92 of the Act 20 & 21 Vic. c. 77; but the provision has been almost a dead-letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will, once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar. (*See also PUBLIC TRUSTEE, post.*)

TRUST FUNDS AND INVESTMENTS.

The Act of 1893 enacts that Trustees may invest in any Parliamentary Stocks or Government Securities of the United Kingdom: on real or heritable Securities in Great Britain or Ireland: in Bank of England Stock: Bank of Ireland Stock: India 3½ per cent. and 3 per cent. Stocks: any Stock hereafter issued by authority of Parliament charged on revenues of India: any Securities having interest guaranteed by Parliament: Metropolitan Board of Works or London County Council Stocks: Debenture Stock created by Metropolitan Police District Receiver: Debenture, Rent-charge, Guaranteed or Preference Stocks of any railway in Great Britain or Ireland that has paid not less than 3 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment: any railway or canal Stock in Great Britain or Ireland leased for 200 years or more at a fixed rental to any railway specified above: Indian Railway Debenture Stocks of companies with interest paid or guaranteed by Indian Council: "B" Annuities, Eastern Bengal, East Indian, and Scinde, Punjab, and Delhi Railway, "C" and "D" Annuities of the East Indian Railway, and any like annuities

of any other railway hereafter created: any Indian railway with fixed or minimum dividend paid or guaranteed by Indian Council: any Debenture, Guaranteed or Preference Stocks of any incorporated or chartered Water Company in Great Britain or Ireland that has paid not less than 5 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment: any Corporation Stock of any borough having 50,000 inhabitants: any County Council Stock authorised by Act of Parliament or Provisional Order: any Water Stocks issued by incorporated Commissioners levying compulsory rates over areas containing 50,000 inhabitants, such rates not having exceeded 80 per cent. of authorised amount for 10 years: and in any Securities authorised by order of the High Courts of Justice of England or Ireland. Provided Stocks redeemable within 15 years are not purchased at a premium over the redemption price or at more than 15 per cent. premium over such redemption price if redeemable after 15 years.

The Rule of the Supreme Court, 1888, authorises investment in:—Debenture, Preference, Guaranteed, or Rent-charge Stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on Ordinary Stock or Shares, and in like Stocks if guaranteed by Railway Companies of the same description and in Nominal Debentures or Nominal Debenture Stock under the Local Loans Act, 1875, or under the Isle of Man Loans Act, 1886, provided such Stocks are not liable to redemption within fifteen years from the date of investment.

The Trusts Amendment Act, 1884 (Scotland only), excludes Irish real or heritable Securities or Stocks, and British Railway contingent Preference and Waterworks Stocks; admits all Railway Debenture Stocks and Guaranteed Stocks of railways that have paid Ordinary Dividends for the past ten years, and all Municipal Loans, and East India Stocks, and registered Colonial Stocks if approved by Court of Session.

The Colonial Stock Act, 1900, permits Trustees, both English and Scottish, to invest in certain Colonial Stocks registered in the United Kingdom which the Treasury publishes a list of in the London and Edinburgh Gazettes, but subject to the clause as to Redeemable Stocks in the Trustee Act, 1893.

THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The Office has proved a great success. The value of the trusts accepted up to March 31, 1908, was £114,821,170, while the value of the future estates represented by the applications of 7,213 intending testators which have still to mature, was £103,802,853. Official figures give the total value of the business, present and future, negotiated to date, at £218,624,023.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee. He can act solely or jointly with others.

In the case of a Will about to be made, the appointment may be effected with even greater simplicity. All that the testator need say is,

"I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while his success ensures that he is highly skilled in his duties.

The large funds placed in his care, and his official position, give him manifest advantages in respect of investment; he not only endeavours to ensure that the capital shall be preserved intact, but also to invest as productively as is prudent under his powers.

The Public Trustee is not, as such, limited in his powers of investment to trustee securities, but, like a private trustee, he is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts.

The success of the Department may doubtless be ascribed to the wide public need for such an office; secondly, to the State guarantee which accompanies the remedy provided; and thirdly, to the energy and efficiency with which the Department is administered. The Public Trustee makes a point of giving the personal attention of himself and of his senior officials to the personal details of any trust. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The fees are devised to pay the expenses and no more, so that the Office is a mutual one in that those using it are intended to have their estates administered at cost price.

The principal fees are of two kinds—a fee on capital and a fee on income. The fees on capital are taken in two instalments—half at the beginning, and half at the end of the trust—each instalment being calculated at the following rates:—On the first £1,000, fifteen shillings per cent. On the excess of £1,000 to £20,000, five shillings per cent. On the excess of £20,000 to £50,000, 2s. 6d. per cent. On the excess of £50,000, 1s. 3d. per cent.

The fee on income is 1 per cent. If, as is usual, the income be paid direct from its source to the person entitled; or any income in excess of £2,000 a year the fee is only $\frac{1}{2}$ per cent. Where the income is paid through the Department then the fee is 2 per cent. up to £500 a year, and 1 per cent. on any excess of £500 a year, and $\frac{1}{2}$ per cent. on income in excess of £2,000 a year. The fee on investment is $\frac{1}{2}$ per cent.; the Public Trustee, out of the fee, paying the brokerage.

An interview with the Public Trustee or with either of his senior officers can be arranged by letter or telephone, and a pamphlet giving full information can be obtained post free on application to the Office of the Public Trustee, Kingsway, W.C. (tel., Holborn 2,400), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester. (For list of Officers, see p. 220.)

Intestates' Estates.

PERSONAL PROPERTY, INCLUDING LEASEHOLDS.

TABLE of Succession applicable to England and Scotland, and showing persons entitled to administer.

The persons entitled to administer are shown in brackets.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* Where this is prefixed the Regulation applies to Scotland only.]

By the Intestates' Estates Act, 1890, the widow of a man dying in England, Wales, or Ireland intestate and without issue is entitled to the whole estate both real and personal if under £500 in value; if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act. The provisions of this Act are now applied to Scotland by the Intestate Husband's Estate (Scotland) Act, 1911.

If the Intestate die, leaving

His representatives take in the proportions following:—

Widow only	Half to widow. Half to the Crown. [Widow.]
Widow and child or children	One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow and father	*One-third to widow. One-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate during life must collate the advances). One-third amongst living children <i>per capita</i> and issue of deceased children <i>per stirpes</i> . See NOTE A, next page.
Widow and mother, no father	Half to widow. Half to father. [Widow.]
Widow, brothers or sisters	Half to widow. Half to mother. [Widow.]
	*Half to widow, one-sixth to mother. Two-sixths to Crown.
	Half to widow. Half equally amongst brothers and sisters, whether of the whole or half blood; if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share. [Widow.]

Widow, mother, nephews or nieces	Half to widow. One-fourth to mother. One-fourth to nephews and nieces <i>per stirpes</i> . [Widow.]
Husband, with or without children	*Half to widow. One-sixth to mother, two-sixths to nephews and nieces <i>per stirpes</i> . All to husband. [Husband.]
Father, brothers, and sisters	*Half to husband. Half to wife's next-of-kin. [Husband.]
Mother, brothers, and sisters	All to father. [Father.]
Mother, but no other kin	One-half to father. One-half equally amongst brothers and sisters.
Children, and grandchildren by deceased children	All equally. [Mother.]
Brother or sister, and nephews or nieces	*Mother one-third. Brothers and sisters two-thirds equally.
Brother or sister, and grandfather	All to mother. [Mother.]
Brother or sister, and uncles or aunts	*One-third to mother. Two-thirds to the Crown.
Grandfather, no nearer relation	Amongst children in equal shares, the grandchildren taking amongst them their deceased parent's share. [Any number of children not exceeding three.]
Father's father, and mother's mother	*Half to children in equal shares, the other half amongst children in equal shares, the grandchildren taking amongst them their deceased parent's share.
Grandmother, uncles, and aunts	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share. [Brother or sister.]
Great-grandfather, uncles, and aunts	All to brother or sister. [Brother or sister.]
Uncles and aunts	All to brother or sister. [Brother or sister.]
Uncle, and deceased uncle's child	All to grandfather. [Grandfather.]
Uncle by mother's side, and deceased uncle or aunt's child	Equally to both. [Either or both.]
Aunts, nephew, and niece	All to grandmother. [Grandmother.]
Cousins	*All to uncles and aunts if paternal.
Nephew by brother, and nephew by half-sister...	Equally <i>per capita</i> . [To either or any number not exceeding three.]
	All equally. [To either or any number not exceeding three.]
	All to uncle. [Uncle.]
	All to uncle. [Uncle.]
	*Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
	All equally. [Either not exceeding three.]
	*Nephew and niece.
	Equally <i>per capita</i> . [Any number not exceeding three.]
	Equally <i>per capita</i> . [Any number not exceeding three.]
	*All to nephew by brother.

NOTE A.—Taking *per capita* is taking by head individually. Taking *per stirpes* is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, *i.e.*, *per capita*. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, *i.e.*, *per stirpes*.

NOTE B.—By English Law, brothers and sisters of the half blood share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father only) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother only) and their issue.

NOTE C.—Posthumous children take equally with those born in the lifetime of their father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. The Dower (*viz.*, widow's thirds) of widows married since 1833 is in the majority of cases barred.

In each instance it is supposed that there are no nearer relations than those named.

If Intestate die, leaving

Real Property would descend to—

Wife only, no blood relations..... { One-third to wife for life, rest to Crown; copyholds to lord of manor.

Wife and child or children, and children of a deceased child	One-third to wife for life in any case. Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter. One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will.
Wife and father	One-third to wife for life; rest to mother, there being no heirs on father's side.
Wife and mother	One-third to wife for life in any case, rest to eldest brother or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.)
Wife, brother, or sister, and children of a deceased brother or sister	Sister and children of deceased sister, rest equally between sister and nephew (eldest). Sisters and nieces, only, children of deceased sister, rest equally between sisters and nieces, nieces taking <i>per stirpes</i> . One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son.
Wife, mother, nephews, and nieces	One-third to wife for life in any case, rest to eldest brother. Rest to nieces, equally, if children of elder brother deceased.
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	Lineal ancestor paternal, males of whole blood first.
No wife or child or issue of a deceased child	All to eldest son, or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.)
Children by one or more wives, and the issue of deceased children	Daughters equally. Husband for life (provided the wife, or the husband in her right, was at some time during the coverture solely seized in possession of the legal or equitable estate); afterwards to only child or to eldest son or issue of a deceased eldest son. If all daughters, to them equally.
Husband and child or children	All to mother in default of lineal ancestor on the father's side, or issue of such ancestors.
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father	All to eldest brother.
Mother, and brothers and sisters	All to sisters.
Father, and brothers and sisters	All to father.
Child and grandchild by deceased child	See above, "Rest to eldest son or his issue," under head "Wife and child," &c.
Brother and grandfather	All to brother.
Brother's grandson, and brother or sister's daughter	All to great nephew, if eldest brother's grandson. All to brother's daughter, if eldest eldest daughter.
Brother and two aunts	Brother, all.
Brother and wife	One-third to wife for life; rest to father.
Grandfather (no nearer)	All to grandfather.
Father's father & mother's mother	All to father's father.
Grandmother & uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
Uncle, and deceased uncle's child	Uncle, unless deceased uncle was elder brother, when his child takes all.
Uncle by mother's side, and deceased uncle or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
Two aunts, nephew, and niece, children of deceased brother	Nephew.
Uncle or aunt's children, and brother's grandchildren through a son	Eldest brother's grandson, or if granddaughters between them equally.
Nephew by brother, and nephew by half sister	Nephew by brother.
Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

NOTE A. —By the Land Transfer Act, 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate; but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir-at-law, if not one of the next-of-kin, shall be equally entitled to the grant with the next-of-kin.

ARCHITECTS.

The custom is to charge 5 per cent. on the cost of new work, if exceeding £1,000. Below that sum, an increased scale is usual. An increased charge is also made for alterations to existing buildings, and for designs for decorations, fittings, and furniture. If PLANS, &c., are prepared for works which are never carried out, the charge is one-half the above, with a further half per cent. if tenders have been invited and received. These charges do not include negotiations for purchase of site, &c., nor settlement of difficulties with adjacent owners and public authorities, nor taking out quantities. For repetitions a modified charge is usually arranged. The minimum charge per day is three guineas. In all cases, travelling and other out-of-pocket expenses are paid by the employer in addition to the fees. For furnishing or checking a Schedule of Dilapidations and Estimate the usual charge is 5 per cent. on the estimate, but in no case less than two guineas. For valuing and negotiating the settlement of claims under the Lands Clauses and similar Acts the charge is on Ryde's Scale.

QUANTITY SURVEYORS.

A fee of $\frac{1}{2}$ per cent. upon the amount of the lowest tender received for the contemplated building, or upon its estimated cost should the work be abandoned before tenders are received, is charged by Quantity Surveyors for preparing Bills of Quantities.

FOR MEASURING AND ADJUSTING VARIATIONS the fees are $\frac{1}{2}$ per cent. on the amount of additions, and $\frac{1}{4}$ per cent. on the amount of omissions brought into account.

FOR SERVICES IN CONNEXION WITH LITIGATION OR ARBITRATION, a charge per day (dependent upon the Surveyor's professional position) is made.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

1. Sales by Auction.

Freehold, Leasehold, and Copyhold Properties, including the preparation of particulars, and advising as to reserves:—On the first £100, 5 per cent.; on the next £4,900, $\frac{1}{2}$ per cent.; on the residue, $\frac{1}{4}$ per cent.

In addition to the above charges:—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber*, and *Tenant-right* under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and $\frac{1}{2}$ per cent. on residue, to include inventory and valuation

Sale before Auction.

After issue of advertisements, the same scale as by auction.

Non-Sale.

Charge equivalent to one-fourth of the commission which would have been earned on a sale up to £5,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

Furniture, Trade Stocks, and Chattels.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Live and Dead Farming Stock (except Horses and Pedigree Cattle).— $\frac{1}{2}$ per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

Horses and Pedigree Cattle.—5 per cent. on the amount realised.

On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor.—One half the commission on sale, calculated on the amount of reserve or buying-in price.

2. Private Treaty Sales.

Freehold and Copyhold Estates and Houses, and Ground Leases.—On the first £100, 5 per cent.; on the next £4,900, $\frac{1}{2}$ per cent.; on the residue, $\frac{1}{4}$ per cent.; and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber*, and *Tenant-right*, of 5 per cent up to £500, and $\frac{1}{2}$ per cent. on the residue, to include inventory and valuation.

3. Purchases.

Freehold, Copyhold, or Leasehold Property.—One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5s.

4. Lettings.

Business Premises, Unfurnished Houses, Flats, &c., or on *Disposing of all Leases (other than Ground Leases) by assignment or otherwise*.—Where the term is for three years or less, 5 per cent. on one year's rent; where the term is for more than three years, $7\frac{1}{2}$ per cent. on one year's rent, and upon the premium or consideration, 5 per cent. up to £1,000, and $\frac{1}{2}$ per cent. on the residue; and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of 5 per cent. up to £500, and $\frac{1}{2}$ per cent. on the residue. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent.—5 per cent. on the first year's rental, and $\frac{1}{2}$ per cent. for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects.—A minimum fee of two guineas per day, exclusive of expenses.

On Letting Land on Building Lease.—One year's ground rent on first £50; three quarters ditto on next £50; half ditto on next £900; quarter ditto on residue.

5. Collections or Receiverships.

10 per cent. upon gross rental of weekly property; 5 per cent. upon gross rental of other property or tithes; $\frac{1}{2}$ to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

6. Laying Out or Development of Estates.

For Road Construction, 5 per cent. upon the outlay, exclusive of expenses.

7. Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties.*—A guinea per cent. on the first £1,000; half a guinea per cent. on the next £9,000; and a quarter of a guinea per cent. beyond on the value of the property, subject to a minimum fee of five guineas.

2. *Of Property taken under Compulsory Powers.*—The charge is on Ryde's Scale. The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3. *Valuing for Annual Rental.*—(a) *Agricultural Property*—5 guineas per cent. up to £500, and $\frac{1}{2}$ guineas per cent. beyond. (b) *Urban and Residential Property*—5 guineas per cent. up to £100, and $\frac{1}{2}$ guineas per cent. beyond.

4. *Valuation of Furniture, Fixtures, and Effects.*—5 per cent. up to £500, and $\frac{1}{2}$ per cent. on the residue.

5. *Valuation of Plant, Machinery, and Trade Stocks.*—5 per cent. up to £500, and $\frac{1}{2}$ per cent. on the residue.

6. *Valuation of Live and Dead Farming Stock.*—5 guineas per cent. up to £500, and $\frac{1}{2}$ guineas per cent. on the residue.

7. *Valuation of Hotel and Public House Furniture, Fittings, and Stock.*—5 guineas per cent. up to £1,000, and £3 3s. per cent. on the residue.

8. *Valuation for Probate and Estate Duty Purposes.*—(a) *Freehold, Copyhold, and Leasehold Property.*—One guinea per cent. on the first £1,000, and one quarter-guinea per cent. on the remainder of the amount of the valuation of each property. Minimum fee, £5 5s. on each property.

(b) *Of Furniture and Effects.*— $\frac{1}{2}$ guineas per cent. on the first £500, and $\frac{1}{4}$ guineas per cent. of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9. *Valuations under the Finance (1909-10) Act, 1910.* For Survey, Completion of Government Returns, Valuation, and Report.

Country Residential Properties, Agricultural Land, and Undeveloped Land.—One half-guinea per cent. up to a "total value" of £20,000, and one quarter-guinea per cent. on the balance above that amount.

Urban Properties.—One quarter-guinea per cent. on a "total value" of £20,000, and one-eighth guinea per cent. on the balance above that amount. Minimum fee, £3 3s.

10. *Preparing Specification of Dilapidations and settling the amount if required.*—5 guineas per cent. on the amount. Minimum fee, £5 5s.

11. *Valuation or Sale of Timber.*—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £100, and $\frac{1}{2}$ guineas per cent. on the residue.

12. *Valuation of Tenant-Right.*—5 guineas per cent. on the first £100, and $\frac{1}{2}$ guineas per cent.

on the next £900, and $\frac{1}{4}$ guineas per cent. on the residue.

Where one valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

ACCOUNTANTS' CHARGES.

For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, £1 is, to £5 5s.

Chief clerk's time, 10s. 6d. to £1 11s. 6d.

Other clerks' time, per day of seven hours, 7s. 6d. to 1s.

These charges to include stationery, except the forms used.

MEDICAL FEES.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

GENERAL PRACTITIONERS.	RENTALS.			
	£10 to £25	£25 to £50	£50 to £100	£100 to £200
Ordinary Visit	2s. 6d. to 5s. 3s. 6d. to 7s. 5s. to 10s. 6d.			
Night Visit	Double an ordinary visit.			
Mileage beyond two miles from Home	1s. 6d.	2s.	3s. 6d.	4s. 6d.
Detention per hour	2s. 6d. to 5s. 3s. 6d. to 7s. 5s. to 10s. 6d.			
Letters of Advice	Same charge as for an ordinary visit.			
Attendance on servants	2s. 6d.	3s. 6d.	4s. 6d. to 5s.	
Midwifery	11s.	21s. to 63s.	63s. to 105s.	
Administ'g. Chlfm.	10s. 6d.	21s.	42s.	
CONSULTANTS.				
Advice or Visit alone	21s.	21s.	21s.	
Advice or Visit with another Practitioner	21s.	21s. to 42s.	21s. to 42s.	
Mileage beyond two miles from Home	10s. 6d.	10s. 6d.	10s. 6d.	

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a

negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor *negotiates* the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

STREETS AND FOOTPATHS.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

BANK HOLIDAYS.

ENGLAND AND IRELAND.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day, and Boxing Day. The Stock Exchange is closed on Good Friday, Christmas Day, and Bank Holidays, and on Jan. 1, May 1, and November 1. There is a special Bank Holiday for Ireland on St. Patrick's Day, March 17.

SCOTLAND.—New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

SCOTLAND has also special Term (Quarter) Days, and there are Spring and Autumn holidays in Edinburgh and Glasgow. The Scottish Quarter Days are Candlemas, 2 Feb.; Whitsun, 25 May; Lammas, 1 Aug.; and Martinmas, 11 Nov.

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

THE entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present in force will be found in detail under "Estate Duty."

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the "District Probate Registries" (q.v.) application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

THE DERBY.

The Distance of the Derby is 7 miles 4 furlongs 20 yards. (See Notes below.) Including 1882, Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. The Duke of Portland, Lord Rosebery and Mr. Bowes have won twice consecutively. The late King Edward VII. won three times twice before his accession. Lord Falmouth, Mr. W. I. Anson, Mr. Merry, Sir F. Johnstone, Sir J. Miller, and Mr. Fairie twice. Lady James Douglas was the first lady to win the Derby.

NOTES.—1865—Gladiator, first French-bred horse that won; 1867—snow fell during the day; 1869—Kisber, the first 300 sovs. and the third 100 sovs. out of the stakes; 1872—start altered to New Level Post; 1876—Kisber, the first Hungarian-bred horse that won. 1913—Mr. C. Bower Lamy's Cragmar J. Reiff finished first, but was disqualified for boring. 1903—The Derby was made a stake of £5,500, with at least £400 to the second and £200 to the third, according to the subscriptions. 1905—Owing to the War the race was reopened to those originally nominated. It was decided over the Suffolk Stakes Course, 13 miles at Newmarket, and called the New Derby. The value was altered on this occasion, and the second received only 200 sovs. In 1916, 1917 and 1918, owing to the continuance of the War, the same venue and conditions applied as in 1915. * Including £1,000 given by Lord Derby. † Starting gate first used. ‡ In a thunderstorm. a Also won the 2,000 Gs. b the 1,000 Gs. c Won the St. Leger. d Record time; previous best, Spearmint's, in 1906. e Won the Oaks.

ECLIPSE STAKES OF £10,000. (SANDOWN PARK.)—(1¼ miles.)		OAKS. Derby Course.	ST. LEGER,† 2m. 6f. 132yds.	2,000 GUINS. Now 1 mile.	1,000 GUINS. Now 1 mile.

* New Oaks, Suffolk Stakes Course, at Newmarket.
† Established in 1776, received name in 1776 out of compliment to Col. St. Leger, and run on Doncaster Town Moor. In 1915 there was no St. Leger. A race with similar conditions, called the September Stakes, was decided at Newmarket, and won by Pommern, but the entry was a new one, not confined to animals originally qualified, and was the case with the New Derby and the New Oaks. The same state of affairs prevailed in 1916, 1917 and 1918, when the winners of the September Stakes were Hurry On, Gay Crusader and Prince Chimay, respectively.
‡ Mr. Fairie's Lemberg, 3y 9st 2lb, and Lord Rosebery's Neil Gow, 3y 9st 2lb (6 runners).
§ Stony Ford finished first but was disqualified.

1913	E. Barry b. H. Pearce.
1914	E. Barry b. Jas. Paddon.

After Trickett had carried off the Championship to Australia in 1895, a Championship of England Cup was instituted, which, after being held in turn by R. W. Boyd, J. Higgins, and W. Elliott, was finally won by Haden, when he defeated the latter in 1899. A second cup was finally won outright by E. Barry when he beat Durnan in 1912, that race carrying with it both World and English Championship titles. In Australia. In New Zealand. In the Zambesi, South Africa. b First race for a third cup. The title of English Champion was also included. c English Championship also included.

OLD BILLIARD CHAMPIONSHIP.

Yr.	Winner.
1872	W. Cook b. J. Roberts, jr.
1874	W. Cook b. J. Roberts, jr.
1875	J. Roberts, jr. beat Cook.

1881	J. Bennett beat T. Taylor.
1885	J. Bennett beat J. Cook.
1886	J. Roberts, jr. b. J. Bennett.

† Bennett resigned. Cooked 1893.
† Roberts made the largest break of these matches—155. This and the previous match were 3,000 up; the others, saving the first, 1,000 up.
1899, 1st champion Billiard Association rules, C. Dawson; then H. W. Stevenson. In 1905 H. W. Stevenson defeated C. Dawson several times. In 1906 and 1907 there was no match.
In 1908 M. Inman challenged, and became champion by default of any answer. In 1909, 1910 and 1911 there was no match. In 1912 M. Inman beat T. Reeve for the title. There was no challenge in 1913, 1914, 1915, 1916, 1917 nor 1918. M. Inman also holds the Billiards Control Club Championship.

LAWN TENNIS CHAMPIONSHIPS.

1910	A. F. Wilding (G).
1911	Mrs. Lambert Chambers (L).
1912	A. F. Wilding (G).
1913	Mrs. Lambert Chambers (L).

1911	Sir R. W. E. Jardine, Jabbercock.	
1912	Mr. J. W. Fullerton, Tide Time.	
1913	Mr. E. Hill Woods, Hung Well.	
1914	Mr. A. E. Pave, Dilwyn.	
1915	Sir Thomas Dewar, Winning Number.	
1916	Mr. E. Hulton, Harmonicon.	
1917	Not decided. War.	
1918	Not decided. War.	

Athletics.—Jas. Ed. Meredith ran 1,320 yds. in 3 mins. 3 secs., Long Island, U.S.A., May 30, 1913.
John Paul Jones ran 1 m., Cambridge, Mass., U.S.A., in 4 mins. 15.25th secs., May 31, 1913. Abel R. Kilduff ran 1,320 yds. in 3 mins. 0.75th secs., Cambridge, Mass., in 1912, in 2,500 metres race, which he won in world's record time of 3 mins. 55.45th secs.
London to Brighton Walk.—Record by H. V. L., Ross, 8 hrs. 11 mins. 14 secs., Sept. 4, 1900. London, Brighton and back record T. E. Hammond, 18 hrs. 33 mins. 37 secs., 1907.
Record in a six days' professional contest, 623 m. 1,320 yds., by G. Littlewood, New York, Dec. 8, 1898.
Trotting.—Fastest m., in America, 1 min. 54.2 secs., by Uhlan, 1913. Fastest pacing m., 1 min. 55 secs., Ivan Patch, at St. Paul, U.S.A., Sept. 8, 1906.

MISCELLANEOUS RECORDS.

Cricket.—Highest score, A. E. Stoddart, 485, Hamstead v. Stour, 1896; A. E. J. Collins, 193, 628 in horse match at Clifton College, 1909. English largest gross score, Orleans Club v. Brick, 1047 Green 920, Aug. 10th, 1882. In a first class match, Yorkshire, 519, v. Warwickshire, May 8, 1896. Also in first class cricket, highest individual score, A. C. MacLaren 424, for Lancashire v. Somerset, at Taunton, July, 1895. Lowest score in an innings, 12, by Oxford University, one man absent, v. C.C. and Ground, at Oxford, May, 1877. Most runs made in a year in England, 3518 by T. Hayward in 1905 in 61 innings 8 times not out, aver. 60.37; previous best, 3309 by Abel, 1901, in 68 innings 8 not out, aver. 55.75. Also T. Hayward in 1906 equalled C. Fry's record of 13 centuries in one season. England v. Australia matches, 52 in Australia, 42 in England, England has won 40, Australia 35, drawn 10. Total 104. In 1912 a Triangular Tournament was held in England. England won 4 and drew 2 matches; Australia won 2, drew 3, and lost 1; and South Africa drew 1 and lost 5 games.

BILLIARDS.

Best "sped-in" break (exhibition match) 3,594, by W. J. Paul, 1890; much for money 2,921, by W. J. Paul, 1883. Best snookered break, 1,202, by J. Roberts, 1894, and 1,497, by T. Taylor, 1897. Greatest number of spot hazards in succession, 633, by W. J. Paul, 1886. Successive nursery cannon record of 20 is held by W. Cook, on Jan. 21, 1905. Largest number of successively scored balls, 12, by J. Roberts, 1894. 1 shot 1,000 in time, all in, W. J. Paul, 1894, 44 min. Fastest 100, 2 min. 40 sec., J. Roberts, 1894, 52 min. Under Billiard Association Rules, Mr. "Graham" is the amateur champion. The highest breaks are 2,555, 324, and 1,200 off the red, by Geo. Gray, March 17 and 18, 1911, in London; 1,066 by H. W. Stevenson (under Billiards Control Club Rules), in London, Oct. 11, 1912; best break with ivory balls, under B.C.C. rules, 2,874 by George Gray; 802 by H. W. Stevenson, Feb. 16, 1905, recorded in the B.A. and B.C. by John Roberts, Jan. 23, 1905, in Scotland. By means of the now abolished snook cannon, W. Cook, in June, 1907, scored 42,746.

1 Balls jammed in mouth of pocket. 5 Both the break and the number scored off the red are records, though not under B.A. rules. Geo. Gray was 19 years old.

a Made in America. *b* On grass. *c* In New Zealand. *d* Made in Australia. *e* British amateur records. *f* Not Music Hall exhibitions, but all doubtful. *g* With ankles tied. *h* On the same day Ross walked 21 m. in 2 hours, 58 mins. 16 secs., and 21 m. 247 yds. in 3 hours. *i* A. W. Sinclair walked 100 miles in 19 hrs. 41 mins. 50 secs. in 1887, in a match against time. The A.A.A. have no 100 miles record on their books. *j* Made in Canada. *k* Made in Athens. *m* This record was not passed until late in 1914, when previous figures to Goulding were disallowed. *n* In London, in 1890, Tom Griffith walked 20 miles in 2 hr. 47 mins. 52 sec. in a match against time. Late in 1914 the International Athletic Federation approved the record. *o* Straight track. *p* Made in South Africa.

Special Note.—In the autumn of 1918 one or two athletic records were reported from America but they had not been officially passed at the time of going to press.

BRITISH AMATEUR RECORDS.

100 yds., 9.45th secs., by A. F. Drury (U.S.A.), 1901, on grass.
 W. A. Schick (Harvard), 1904, and W. R. Applearth, 1914
 120 yds., 12.3-5th secs., R. E. Walker (1909), 120 yds. hurdles,
 25 secs., by F. C. Smithson (Olympic Games, 1908), 150 yds.,
 14.3-5th secs., by R. E. Walker (1909), 200 yds., 19.2-5th secs.,
 by W. R. Applearth (1912), 220 yds., 21.1-5th secs., by W. R. Apple-
 garth, 1912 (equals World's record), 250 yds., 24.4-5th secs., by E. H.
 Polling, 1888, 300 yds., 31.1-5th secs., by W. Halswelle, 1908, 300
 yds. hurdles, 36.3-5th secs., by O. Greenings, 1907, 440 yds., 48.2-5th
 secs., by W. Halswelle, 1908, 440 yds. hurdles, 50.4-5th secs., by
 G. R. L. Anderson, 1910, 500 yds., 53.1-5th secs., by E. C. Brown,
 1895, 600 yds., 1 m. 11 secs., by E. H. Montague, 1903, 880 yds.,
 1 m. 54 secs., by M. W. Sharp, 1906, 1,000 yds., 2 m. 14.4-5th
 secs., by W. E. Lutons, 1893, 1,200 yds., 3 m. 0.5-5th secs., by E. W.
 Hutson, 1914, 1 mile, 4 m. 20.4-5th secs., Lord Buns, 1902. Other
 British Amateur records: from a mile to 100 yds. to be found in table
 of "Best on Record." High Jump, 6 ft. 4 in., by P. J. Leahy,
 1898. Throwing the Hammer, 170 ft. 4 in., by J. J. Flanagan,
 1908. Putting the Weight, 165 lb., 7 ft. 8 in., 48 ft. 2 in., by P.
 Moran, 1897. Pole Jump, 12 ft. 6 in., C. Harleman, 1913.
 Putting the Weight, 16 lb., 21 ft. 8 in., 51 ft., by Ralph Rose, A.
 1909, 50 lb., 43 ft., 1 m. 10.1-5th secs., America, 1917 (world's
 record). Throwing the Hammer (16 lb.), 9 ft. 6 in., P. J. Ryan,
 1896 ft. 6 in., 1913, in New York; J. Flanagan, 184 ft. 4 in., 1910, in
 Canada, from 7 ft. circle. A. F. Wells was handicapped with 100 lbs.
 The British record is 170 ft. 4 in., by Flanagan, 1908. A. R. Lapelle
 holds the Discus Throwing, 1 record: 153 ft. 4 in., Copenhagen,
 1913. His British record is 144 ft. 6 in., London, 1914. Javelin,
 126 ft. 4 in., E. Niklander, Tampere, Finland, 1913. Javelin
 Throwing, 211 ft. 11 in., by U. Peltinen, Helsingfors, 1916.
 British record, 195 ft. 11 in., by M. Korzan, London, 1914.
 The pole-jumping record is held by an American amateur, Mark
 B. Wright, 33 ft. 2 in., in America, 1912.

Cycling—Road Records.

12 Hours. Tandem (H. Bird and G. Nutt), 224 miles, 1910. 12 Hours.—Safety, 245 miles (F. R. Goodwin, 1899).

24 Hours.—Safety (F. R. Goodwin, 1898), 428 miles paced; unpaced, 394 miles in 1901. Tandem safety (M. A. Holbert and J. A. Beunett), 397½ miles, 1895.

50 Miles.—Safety, 1 h. 55 m. 50 s. (A. E. Walters, 1895) paced; 1 h. 1 m. 25 s. (H. Green, 1909) unpaced. Tricycle, 1 h. 26 m. 35 s. (H. G. Cook, 1911) unpaced; 2 h. 22 m. 52 s. (F. T. Bidlake, 1911) paced. Tandem Tricycle (unpaced), 2 h. 23 m. 35 s. (H. Holbert and J. E. Patmore, 1913). Tandem bicycle, 1 h. 58 m. 33 s. (F. J. Parker and V. J. Viel, 1914).

100 Miles.—Safety 4 h. 16 m. 35 s. (A. A. Chase, 1897, paced); tandem safety 4 h. 36 m. 29 s. (R. J. and A. F. Hsley, 1902). Tricycle (unpaced), 5 h. 31 m. 9 s. (H. G. Cook, 1911).

1,000 Miles.—3 d. 15 h. 57 m. (H. Welsh, 1909). The Land's End to John o' Groat's record (about 900 miles): safety (H. Green), 2 d. 19 h. 50 m., 1908. London to Brighton and back: safety (S. H. Grubb), 5 h. 9 m. 41 s., 1912; tandem safety (G. H. Briault and A. E. Ward), 4 h. 53 m. 28 s., on Aug. 12, 1909. York to Edinburgh (J. W. Kitch), 11 h. 14 m., 1912; tricycle (E. W. Martin), 13 h. 54 s., Oct. 12, 1911. London to York (F. R. Goodwin), 10 h. 16 m. Edinburgh to London, unpaced (R. Shirley), 23 h. 43 m., Oct. 14, 1905. Bath to London and back (F. W. Barus), 11 h. 48 m. 42 s., 1897.

Eng. 1 Hour Records (Path).—Safety, W. T. Hall, C.T., April, 1905 (45 m. 210 yds.); tandem safety (E. James and G. A. Nelson, 1897), 32 m. 1,660 yds.

25 Miles (in a Championship), C. B. Kingsbury, 1 hr. 0 min. 7½ s., 1911.

Amateur Tandem Paced Record by H. C. Akers and F. W. Wells:—4 hrs. = 105 m. 1300 yds.

Path Motor Paced Records.—10 miles (W. T. Hall, 1905), 13 min. 34 s.; 12 miles (H. E. Ellis, 1911), 21 min. 31 s.

At the Stadium, on July 3, 1909, J. H. Bishop established an amateur record riding 513 miles 1430 yards in 24 hours.

On Sept. 17-18, 1897, M. Cordang, at The Hague, Holland, rode 640 miles 196 yards in 24 hours, but owing to his suspension at the time by the U.V.F. the record is not recognised. At Madison Square Gardens, New York, December, 1898, Charles Miller rode 2,007 miles 4 laps in 142 hours. In Oct. 1913 at Berlin M. Weiss covered 904 kilometres in 24 hours, without paced starts.

At Munich, on Sept. 25, 1909, Paul Guignard rode 201 kilos 623 metres 63 miles 255 yards in 1 hour. He was paced by Holman on a three-cylinder machine with a wind shield.

On July 22, 1911, W. J. Bailey, Polytechnic Cy. C. beat his own quarter-mile flying start record of 25.4-5th secs. by a sec. Bailey's new record being 24.4-5th secs. This beats the professional world's record of 25.2-5th secs., made by T. J. Gascoyne, at Catford, on May 5, 1900.

The record attendance at a football match in England is 110,820, when Tottenham Hotspur and Sheffield United first met in the Final Tie for the F.A. Cup in 1901.

On April 14, 1900, in a football match between Sunderland and Manchester City, at Sunderland, Charles Williams (M.C.) kicked a ball from goal to goal, and scored.

1888	Camb.	14 min. 37 sec.	1,000 metres	Pittsburg	Mar. 28, 1911

BRITISH WEIGHTS AND MEASURES.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for the United Kingdom, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

Acts of 1889 and 1904 deal with the verification of weights and measures; and Board of Trade regulations of 1907 with the inspection and stamping of same.

The Yard and the Pound are the only two independent standards for weights and measures. The Gallon, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

For the use of Apothecaries and for selling drugs retail.

Measures of Weight.

20 grains	=	1 scruple (ʒi).
3 scruples	=	1 drachm (ʒi).
8 drachms	=	1 Apothecaries' ounce (ʒi).

(i.e., Apoth.).

Measures of Capacity.

60 minims	=	1 fluid drachm (ʒi. dr.).
8 fluid drachms	=	1 fluid ounce (ʒi. oz.).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois drachm, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to two Avoirdupois drams.

Avoirdupois Weight.

(a) For minute weighments—

7000 grains (gr.)	=	1 pound (lb.).
-------------------	---	----------------

(b) Retail—

16 drams (dr.)	=	1 ounce (oz.).
16 ounces	=	1 pound.
28 pounds	=	1 quarter (of a cwt.).

The quarter is halved into stones.*

(c) Bulk—

4 quarters	=	1 hundredweight (cwt.).
20 hundredweight	=	1 ton (2,240 lb.).

A quarter loaf = 4 lb.; a peck of flour = 2 gallons = 14 lb.; a firkin of butter = 56 lb.; a firkin of soft soap = 64 lb.; a box of fish, about = 90 lb.; a barrel of gunpowder = 100 lb.; a barrel of raisins = 112 lb.; a seam of glass, 24 stones of 5 lb. = 120 lb.; a barrel of butter, 4 firkins = 224 lb.; a faggot of steel = 120 lb.; a pig of ballast = 56 lb.; a fodder of lead, London and Hull = 10½ cwt.; Derby = 22½ cwt.; Newcastle = 27½ cwt.; a cask of blacklead = 11½ cwt.; a sack—potatoes, 168 lb.; flour, 280 lb.; coals, 224 lb.; a ton of coals, 10 sacks.

Troy Weight.

For gold, silver, and precious stones. The ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains in weight.

* The Smithfield stone for dead meat is 8 lb. only.

Jewellers' Weight.

By an Order in Council of Oct. 14, 1913, the metric carat of 200 milligrammes is ordained the legal standard of weight for precious stones and pearls.

Measures of Capacity.

(a) Retail and Liquid—

2 gills	=	1 pint.
2 pints	=	1 quart.
4 quarts	=	1 gallon.

(b) Wholesale—

8 gallons	=	1 bushel.
8 bushels	=	1 quarter.

A measure of 2 gallons is called a peck.
A chaldron is 36 bushels = 4½ quarters.

Cereals.

Wheat and other cereals are commonly sold by weight, the bushel being the reckoned unit.

Wheat, English, 60 lb. Foreign, 62 lb.
Barley, English, 50 lb. Foreign, 52 lb.
Mediterranean, 50 lb.
Oats, English, 39 lb. Foreign, 38 and 40 lb.
Rye and Maize, 60 lb. Buckwheat, 52 lb.
The U.S. barrel of flour is 195 lb.

NOTE.—A *quarter* is a heaped measure of 8 bushels. A bushel of English wheat is reckoned as 60 lb. weight, and a *quarter* is 480 lb.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (10 September 1871), 60 lb.
Load, 36 Trusses—Straw, 11 cwt. 2 qrs. 8 lb.;
Old Hay, 18 cwt.; New Hay, 19 cwt. 1 qr. 4 lb.

Liquid Measure.

Size of Barrels.

	gals.
Firkin or Quarter Barrel	9 = 9 × 1
Kilderkin, Rundlet, or 1 Barrel	18 = 9 × 2
Barrel	36 = 9 × 4
Hogshead (12 barrels)	54 = 9 × 6
Puncheon (2 barrels)	72 = 9 × 8
Butt of Ale (3 barrels)	108 = 9 × 12

Other barrels—

Anker	10
Tierce	42

Pipe of Port or Madeira, 115 gals. Tunable
= 100 gals.; Marsala = 93 gals. Madeira and Cape = 92 gals.; Sherry and Port = 108 gals.; Butt of Lishon and Buckles = 117 gals.; A tun of Hock and Rhineish = 90 gals.; Bordeaux of Claret, 46; Port, 57; Sherry, 54; Marsala, 46 gallons.

Bottle Measure.

The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26⅔ fluid ounces.

In the drug trade two large bottles are used:—
Cochyn. = 40 fluid oz. (quart).
Winchester quart = 80 " (2 gallon).

Water.

The British Ton is the weight of a pure British Meter (the ancient Balne yard, as it has come down to us) of pure water at the temperature of melting ice, very nearly. At present the following relations hold good:—

1 cubic inch	=	252.458 grains.
Gallon (277.274 cub. in.)	=	10 lb. (distilled).
Cubic foot	=	62.321 lb.
35.943 cubic ft. (224 gals.)	=	1 ton.

Water for Ships: Tun, 210 gals.; Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.
Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lb. in addition to its own weight.

Measures of Length.

(a) Trade and Manufacture—

12 inches (in.) = 1 foot (ft.).
3 feet = 1 yard (yd.).

Any of the above units may be used singly, and as a prime unit, to be divided fractionally or decimally, as required, to any necessary extent.

(b) Travellers' Measure—

220 yards = 1 furlong.
8 furlongs = 1 mile.
3 miles = 1 league (seldom used).

(c) Surveyors' Measure—

100 links = 1 chain (22 yards).
10 chains = 1 furlong.
8 furlongs = 1 mile.

A pole of $\frac{5}{8}$ yards is merely a name for a quarter of a chain.

Nautical Measures.

6 feet = 1 fathom.

100 fathoms = 1 cable length.

15 feet, or 5 yards, is called a chain; and 1,000 fathoms make a nautical mile, or knot, in practical navigation.

Birmingham Gauge.

The Weights and Measures Act of 1878 makes standards on and after Nov. 1, 1914, certain new divisions of an inch. The equivalent of an inch is $\frac{15}{16}$ B.G. The numbers proceed by units down to $\frac{1}{16}$ B.G., which = 0.0625 inch. Thereafter, from 1 B.G. ($\frac{1}{32}$ inch) by units to 52 B.G. (0.00095 inch).

Square or Surface Measure.

(a) Trade and Manufacture—

144 square inches = 1 square foot.
9 square feet = 1 square yard.

(b) Travellers' Measure—

Square miles and fractions or decimals are sufficient for all practical purposes.

(c) Surveyors' Measure—

Either in links and square chains when :—
10 square chains = 1 acre.
640 acres = 1 square mile.

Note.—The Anglo-Saxon acre's-length is the furlong, and the acre's-breadth the chain.

Or, for legal and civil purposes :—

$30\frac{1}{2}$ square yards = 1 square rod or perch.
40 rods = 1 rood.
4 roods = 1 acre.

Surveys being usually made with the chain of 100 links, the only difficulty presented by the above table lies in the reduction of the balances of rods into square yards.

Circular Measure.

60 seconds (") = 1 minute (').

60 minutes = 1 degree (°).

30 degrees = 1 sign.

12 signs = 1 circumference.

Diameter of circle $\times 3.1416$ = circumference.

Diameter squared $\times .7854$ = area of circle.

Diameter squared $\times 3.1416$ = surface of sphere.

Diameter cubed $\times .5236$ = solidity of sphere.

One degree of circumference $\times 57.3$ = radius.

Diameter of cylinder $\times 3.1416$; product by length or height, gives the surface.

Diameter squared $\times .7854$; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

This relationship is of great importance in the laying out of railway curves, in range-finding, &c., since the relationship between diameters in multiples of 7 yards, and circumferences in chains, holds good for circles of any size.

Cubic Measure.

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement. The principal units are as follow :—

As a unit of resistance, the international OHM, which is based upon the ohm equal to 10^9 units of resistance of the C.G.S. system of electro-magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14.4521 grammes in mass, of a constant cross-sectional area, and of a length of 106.3 centimetres.

As a unit of current, the international AMPERE, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units, and which is represented sufficiently well for practical use by the unvarying current which when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0.001118 of a gramme per second.

As a unit of electro-motive force, the international VOLT, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere, and which is represented sufficiently well for practical use by $\frac{1}{1000}$ of the E.M.F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15°C , and prepared in the manner described in a certain specification.

As a unit of quantity, the international COULOMB, which is the quantity of electricity transferred by a current of one international ampere in one second.

As a unit of capacity, the international FARAD, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the JOULE, which is 10^7 units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampere in an international ohm. In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals 3,600 joules.

As the unit of power, the WATT, which is 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B.O.T.U.) is 1,000 watt-hours, or 3,600,000 joules, or $1\frac{1}{2}$ horse-power hours.

As the unit of induction, the HENRY, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampere per second.

Builders' Measurements.

Stock or kiln bricks.....	8¾ inches	× 4¾	× 2¾
Welsh fire-bricks.....	9	„	× 4¾ × 2¾
Paving bricks.....	9	„	× 4¾ × 1¾
Square tiles.....	9¾	„	× 9¾ × 1
„	6	„	× 6 × 1

Dutch clinker bricks ... 9¾ „ × 3 × 1½
 A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11½ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar. The rod being 5 British meters, a rod of brickwork is 25 square meters 1½ bricks thick = very nearly 10 cubic meters.
 Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton 11 cwt. 1 qr.

A Piece of Wall Paper is 12 yd. long × 21 in. wide (English), and 9 yd. × 12 in. (French).

Timber and Wood.

40 cubic feet unhewed, 50 cubic feet squared = 1 load.
 50 superficial feet of planks = 1 load. (Load.)

100 superficial feet = 1 square of flooring.
 A standard hundred of deals contains 120 pieces. The Petersburgh standard consists of 165 cubic feet, or 120 pieces 1½ in. × 11 in. × 12 ft., or 120 pieces 3 in. × 11 in. × 6 ft.

A Batten is not more than 7 inches wide; a Deal not more than 9 inches; Planks are 2 to 4 inches thick, and 10 inches and up in width.
 A Cord of Wood is 2½ tons, or 128 cubic feet.

Sizes of Slates.

	in.	in.		in.	in.
Empress	26	× 16	Ladies	16	× 10
„ Small	26	× 14	„ Small	16	× 8
Princesses	24	× 14	„ Large	14	× 12
Duchesses	24	× 12	„ „	14	× 8
Marchionesses	22	× 12	Plantation	13	× 11
„ Small	22	× 11	Doubled	13	× 10
Countesses	20	× 10	„	13	× 7
„ Wide	20	× 12	Small	12	× 8
Viscountesses	18	× 10	Ditto	12	× 6
„ Small	18	× 9	Ditto	11	× 5½

Specific Gravities.

Weight of following substances compared with the weight of a similar quantity of water.

Alcohol	0.79	Milk	1.03
Aluminium	2.67	Olive Oil	0.92
Basalt	2.86	Petroleum	0.88
Beer	1.02	Platinum	21.45
Blood	1.06	Portland Stone	2.00
Brandy	0.84	Sand, river	1.90
Brass	8.00	„ pit	1.80
Chalk	1.08	Shingle	1.60
Cider	1.02	Silver	10.51
Clay	1.90	Sodium	0.97
Coal, Welsh	1.60	Steel	7.75
„ Newcastle	1.24	Thames ballast	1.80
Copper	8.64	Tin	7.29
Cork	0.24	Turpentine	0.87
Earth	1.60	Urine	1.01
Glycerine	1.26	WATER	1.00
Gold	19.32	Wine, Bordeaux	0.99
Gravel, coarse	1.85	Wood: -	
Iridium	22.38	Beech	0.85
Iron, cast	7.20	Cedar	0.61
„ wrought	7.79	Cherry	0.72
Lead	11.35	Ebony	1.33
Limestone	2.50	Poplar	0.38
Marble	2.70	Walnut	0.67
Marl	1.90	Zinc	7.19
Mercury	13.60		

To find the weight of a cubic foot, multiply 62.321 lb. by the specific gravity. To find the number of cubic feet in one ton, divide 35.943 by the specific gravity.

Yarn Measures.

Cotton and Spun Silk Count.—
 Thread = 1½ yards.
 Lea or Skein, *skn.* = 120 yards.
 Hank, *hk.* = 7 Skeins, or Leas = 840 yards.
 Spindle, *spdl.* = 18 Hanks.
 Counts = the number of Hanks in 1 lb.
 Bundle Hanks, either of 5 lb. or 10 lb.
 Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.

Bundles of Cotton are chiefly made up for export.
 Worsteds Count.—Wrap, 80 yards; Hank = 560 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

Wests of England Count.—The Hank is 320 yards, and the number of hanks in 1 lb. is the count of the yarn.

Temperature Measures.

Variations of temperature are measured by thermometers, which are graduated on three different systems, viz. :—

The Fahrenheit thermometer,
 The Centigrade, or Celsius thermometer,
 The Réaumur thermometer.

In the Fahrenheit thermometer the distance from the freezing point of water to the boiling point is divided into 180 degrees. The freezing point is marked 32°, and the boiling point 212°.

In the Centigrade thermometer the freezing point is marked 0°, and the boiling point 100°.

In the Réaumur thermometer the freezing point is marked 0°, and the boiling point 80°.

To convert Centigrade degrees to Fahrenheit, multiply by $\frac{9}{5}$ and add 32°.

To convert Réaumur degrees to Fahrenheit, multiply by $\frac{9}{4}$ and add 32°.

For example :—

20° Centigrade = $20 \times \frac{9}{5} + 32 = 68°$ Fahrenheit.

20° Réaumur = $20 \times \frac{9}{4} + 32 = 77°$ Fahrenheit.

To convert Fahrenheit degrees to Centigrade, subtract 32° and multiply by $\frac{5}{9}$.

To convert Fahrenheit degrees to Réaumur, subtract 32° and multiply by $\frac{4}{5}$.

For example :—

68° Fahrenheit = $\frac{4}{5} (68 - 32) = 20°$ Centigrade.

77° Fahrenheit = $\frac{4}{5} (77 - 32) = 20°$ Réaumur.

To convert Centigrade degrees to Réaumur degrees, multiply by $\frac{4}{5}$.

To convert Réaumur degrees to Centigrade degrees, multiply by $\frac{5}{4}$.

For example :—

20° Centigrade = $20 \times \frac{4}{5} = 16°$ Réaumur.

20° Réaumur = $20 \times \frac{5}{4} = 25°$ Centigrade.

Time Measures.

Measurements of time are based on the time taken by the earth to revolve round its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. As these motions are not exactly commensurable with one another, it has been necessary to adopt average or mean intervals of time for ordinary use.

Of these the first is the Day, which com-

mences at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds.

The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight.

The 24-hour clock has been brought into use throughout the British Army from midnight, Sept. 30 Oct. 1 1918. The "time of origin," that is, the time at which a message or dispatch is sized by the originator, will always be represented by four figures, the first two figures, or to 23, representing the hours from midnight to midnight and the second two figures, or to 59, representing the minutes of the hour. For example:

12.10 a.m. will be written.....	0010
3.25 a.m. " " " " " " " "	0325
11.0 a.m. " " " " " " " "	1100
Noon " " " " " " " "	1200
3.25 p.m. " " " " " " " "	1525
11.40 p.m. " " " " " " " "	2340

0000 and 2400 will not be used, but the message or dispatch will be timed 2359 or 001.

The *Astronomical Day* commences at noon, and is counted up to 24 hours at the following noon.

With the *Jews* and *Mohammadans* the day begins, not at midnight, but at sunset on the previous day. It is important to remember this when comparing dates in different calendars, as the hours between sunset and midnight belong to the *previous* day in the ordinary calendar, and to the *succeeding* day in the Jewish and Muhammadan calendars.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the length of the different months varies as follows:—

January, March, May, July, August, October, and December have each 31 days.

April, June, September, and November have each 30 days.

February has 28 days, except in leap year, when it has 29 days.

The *Jews* and *Mohammadans* use the lunar month, based on the length of time that the moon takes to revolve round the earth. The month commences, not at true new moon, but at sunset of the day when the new moon is first seen after sunset. The length of the lunar month varies: so the Jewish and Muhammadan months have sometimes 30 and sometimes 29 days.

The *Year* is the length of time that the earth takes to complete one revolution round the sun, which is 365.2422 mean days. The ordinary year is taken as 365 days, and every fourth year, called *Leap Year*, has 366 days. Every year the date of which is divisible by 4, without remainder, is leap year. But the last year of each century that is not divisible by 400 without remainder is not a leap year. For example, the year 1900 had only 365 days.

The Muhammadan year always consists of twelve lunar months, and is sometimes 354 and sometimes 355 days in length.

Time and Watch on Board Ship.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds;

then two more strokes with a second's interval apart, then a rest of two seconds; thus "Seven Bells" is sounded:—

BELL, ONE SECOND; B., TWO SECS.; B. S.; B. SS.; B. S.; B. SS.; B.

The bell is struck every half hour. In the morning 1 bell sounds at 12.30 a.m., and every half hour the number increases until 8 bells at 4 a.m.; then 1 bell again at 4.30 a.m. to 8 bells at 8 a.m.; 1 bell at 8.30 a.m. and 8 bells at noon. In the afternoon 1 bell sounds at 12.30 p.m. and 8 bells at 4 p.m., after which is the *First Dog Watch* (1 bell 4.30, 2 bells 5.0, 3 bells 5.30, 4 bells 6.0) and the *Second Dog Watch* (1 bell 6.30, 2 bells 7.0, 3 bells 7.30, 8 bells 8.0), and thence 1 bell at 8.30 to 8 bells at midnight.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the *Starboard* (rightside, looking forward) and the *Port* (left). The day commences at noon, and is thus divided:—

Afternoon Watch	noon to 4 p.m.
First Dog " " " "	4 p.m. to 6 p.m.
Second Dog " " " "	6 p.m. to 8 p.m.
First " " " "	8 p.m. to midnight.
Middle " " " "	midnight to 4 a.m.
Morning " " " "	4 a.m. to 8 a.m.
Forenoon " " " "	8 a.m. to noon.

This makes seven WATCHES, which enables the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into *two* Watches.

Fish.

In Scotland, and at certain places in England and Wales at which the *Cran Measures Act*, 1908, has been put into operation, fresh herrings must be sold by the *Cran*, containing 37½ imperial gallons, or *Quarter Cran* of 9½ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Maze*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 20 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 26½ imperial gallons, or in half-barrels of 13½ gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles.

These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads = a Tun of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the *Ton-register* used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

Net tonnage is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead-weight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q.v.*).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.v.*).

Load-water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

Speed of Ships.

The *Knot* is a measure of speed of ships; the expression "15 knots" indicates that the vessel in question is capable of steaming or sailing 15 nautical miles in one hour. The *Nautical Mile* = 6,080 feet (the *Statute Mile* being 5,280

feet and the *Geographical Mile* 6,082·66 feet). The following table shows the equivalents of 1 to 33 knots in statute miles:—

Knots	Miles.	Knots	Miles	Knots	Miles
1	1·1515	12	13·8181	23	26·4848
2	2·3030	13	14·9696	24	27·6363
3	3·4545	14	16·1212	25	28·7878
4	4·6060	15	17·2727	26	29·9393
5	5·7575	16	18·4242	27	31·0908
6	6·9090	17	19·5757	28	32·2424
7	8·0606	18	20·7272	29	33·3939
8	9·2121	19	21·8787	30	34·5454
9	10·3636	20	23·0303	31	35·6969
10	11·5151	21	24·1818	32	36·8484
11	12·6666	22	25·3333	33	37·9999

Paper and Book Measure.

Writing Paper.

24 sheets = 1 quire.
20 quires = 1 ream.

Printing Paper.

516 sheets = 1 ream.
2 reams = 1 bundle.
5 bundles = 1 bale.

Sizes of Printing Paper.

Foolscap	=	17	×	13½	inches.
Crown	=	20	×	15	"
Post	=	20	×	16	"

Sizes of Type.

All Founders cast their type to one uniform height ("type high"), though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ems.

A very minute type, used only occasionally, is—*Brilliant*. A column the size of this in the Almanack if set in Brilliant would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures.

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

METRIC WEIGHTS AND MEASURES.

Tables for the conversion of British and Metric Weights and Measures will be found on page 396, headed: "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in the United Kingdom in 1897.

In the Metric system, the standard of length is the Metre, the standard of weight is the Kilogram, and the standard of capacity is the Litre. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

The names of the sub-divisions and multiples of each of the standard measures of the Metric system are as follows.

For the sake of comparison, the equivalent value of the nearest British measure is given.

1.—MEASURES OF LENGTH.

10 millimetres = 1 centimetre	= 0.3937 inch.
(mm.) (cm.)	
10 centimetres = 1 decimetre	= 0.328084 foot.
(dm.)	
10 decimetres = 1 METRE (m.)	= 1.093614 yard.
10 metres ... = 1 dekametre	= 1.093614 poles.
(dam.)	
10 dekametres = 1 hectometre	= 0.4971 furlong.
(hm.)	
10 hectometres = 1 kilometre	= 0.6214 mile.
(km.)	

2.—MEASURES OF WEIGHT.

10 milligrams = 1 centigram	= 0.1543 grain.
(mg.) (cg.)	
10 centigrams = 1 decigram	= 1.5432 "
(dg.)	
10 decigrams = 1 gramme	= 15.4323 "
(gm.)	
10 grammes = 1 dekagram	= 5.6438 drams.
(dag.)	
10 dekagrams = 1 hectogram	= 3.5274 oz.
(hg.)	
10 hectograms = 1 KILOGRAM	= 2.204622 lb.
(kg.)	
10 kilograms = 1 myriagram	= 1.5747 stones.
10 myriagrams = 1 quintal (q.)	= 1.9684 cwt.
10 quintals ... = 1 tonne (t.)	= 0.9842 ton.

3.—MEASURES OF CAPACITY.

10 millilitres = 1 centilitre	= 0.0704 gill.
(ml.) (cl.)	
10 centilitres = 1 decilitre (dl.)	= 0.1759 pint.
10 decilitres = 1 LITRE (lit.)	= 0.8799 quart.
10 litres = 1 dekalitre	= 2.1997 gals.
(dal.)	
10 dekalitres = 1 hectolitre	= 2.7497 bushels.
(hl.)	

4.—MEASURES OF LAND.

100 sq. metres = 1 are (a.)	= 0.0988 rood.
100 ares = 1 hectare (ha.)	= 2.4711 acres.
100 hectares = 1 sq. kilometre	= 0.386 sq. mile.

NOTES.

1 hectolitre.....	= 2.75 bushels.
1 hectolitre per hectare	= 1.11 bushels per acre.
1 quintal	= 3.67 bushels.
1 quintal per hectare ...	= 1.49 bushels per acre.
1 franc a hectolitre	= 3.6 pence a bushel.
1 " a quintal	= { 4.3 " a cental.
7 " " (duty).....	= 128. 6d. " a quarter.

THE UNITED STATES.

The weights and measures are those of the United Kingdom, with the following differences:—*Weight*.—In the short ton of 2,000 lb., the

Cental of 100 lb. takes the place of the Cwt. in the long ton. There are TWO tons, therefore, the one of 2,240 lb., the other of 2,000 lb.

Capacity.—For corn, the old bushel of 2,150·42 cubic inches; its gallon = 268·8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the Imperial gallon and = 58·3178 grains of water. It is divided into 8 pints = 7,289·7 grains of water = 16·6 Imperial ounces. In medicine the pint is divided into 20 fluid ounces = 455·6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DEPENDENCIES

Channel Islands.

Vergée (Normandy)	usually =	44 acre	Guernsey.
rood)			4 acre.
Bushel		8·9 gallons	5·8 gallons.
Pound		7,561 grains	7,623 grains.
Cwt.	(104 lb.)	112·3 lb.	(100 lb.) = 108·9 lb.

British India.

Gaz, usually 33 inches; also the yard.	
Bigha (Benгал)	usually = 625 acre.
Cawny (Madras)	= 1·33
Tola (rupee-weight)	= 180 grains.
Seer, 80 tolas	= 2 lb. 1 oz.
Mauud, 40 seers	= 82·28 lb.
" (Madras)	= 24·68 lb.
Canly	= 500 lb.
Visham = 3 lb.; Patnali	= 3 pints.
Parah	= 15 gallons.
Catty (Singapore)	= 1½ lb.
Pikul	100 catties = 133 lb.

South Africa.

Money, Weights, and Measures.—The coins and the standard weights and measures are British, but the following old Dutch measures are still used:—**Liquid Measure:** Leaguer = about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. **Capacity:** Muud = 3 bushels. The general surface measure is **Morgen**, equal to 2,116,5402 acres; 1,000 Cape lineal feet are equal to 1,033 British imperial feet. The short ton of 2,000 lb. is used. Recently a Bill was introduced to provide for the standardisation of the metric system for weights and measures, with the optional use of imperial standards, except in the case of chemists, who are compelled to use the metric system.

FOREIGN WEIGHTS AND MEASURES.

The **Metric System** has been adopted by the whole of Europe (except the *United Kingdom and Russia*) and is *permissive* in all countries.

Russia.

The standard of length is the **Sachine**, which is equal to seven British feet; the standard of weight is the **Pound**, equal to 9 roths of the British lb.

1.—MEASURES OF LENGTH.

16 vershok	= 1 archine.
3 archine	= 1 sachine.
500 sachine	= 1 verst = 0·663 mile.
100 verst	= 0·44 sq. mile.
1 dessiatine	= 2·7 acres.

2.—MEASURES OF WEIGHT.

3 zolotnik	= 1 loth.
32 loth	= 1 pound.
40 pounds	= 1 pood (36·11 lb.).
10 poods	= 1 berkovatz.

3.—MEASURES OF CAPACITY.

1 vedro (8 shloffs)	= 2·705 imperial gallons.
1 chetvert (8 chetveriks)	= 5·771 imperial bushels.

Greece.

1 ökque	= 2·84 lb.	1 livre	= 1·1 lb.
1 quintal	= 132·2 lb.	1 drachme	= 0·11 oz.

Egypt.

Pic (textiles)	= 22·83 inches.
Feddán (land)	= 1·038 acres.
Oke	= 2·75156 lb.
Chantar	= 99·05 lb.
Arleb of wheat or maize	= 118 oaks = 324·66 lb.
Arleb of barley	= 88 oaks = 242·12 lb.
Arleb of rice	= 152 oaks = 418·21 lb.

China.

Fael weight	= 1·33 oz.
Catty	= 1·33 lb.
Pieul	= 133·33 lb.
Tsun	= 1·41 inches.
Chih	= 1·75 feet.
Chang	= 11·75 feet.
Li	= 2,115 feet.

Japan and Formosa.

Ri	= 2·4403 miles.
Square ri	= 5·9553 sq. miles.
Cho	= 5·423 chains.
Square cho	= 2·4507 acres.
Ken	= 1·9884 yards.
Fusho	= 3·9538 sq. yards.
Liquid koku	= 39·7033 gallons.
Dry koku	= 4·9629 bushels.
Koku of capacity	= 0·1 ton.
Liquid sho	= 1·5881 quarts.
Dry sho	= 0·1985 pecks.
Kwan	= 8·2673 lb.
Kin	= 1·3228 lb.

OLD MEASURES.

Old British Measures.

Cubit	= 18 inches.
English Ell	= 45 inches.
Scottish Ell	= 37·2 inches.
The hand (still used in measuring horses)	= 4 inches.
Scottish mile	= 1,984 yards.
Irish mile	= 2,240 yards.
Scottish acre	= 6,150·4 sq. yards.
Cunningham acre	= 6,250 sq. yards.
Irish acre	= 7,840 sq. yards.
Cheshire acre	= 10,240 sq. yards.
Hide	= 120 acres (average).
Yard of land	= ¼ of a hide.

Old French Measures.

Toise of 6 feet; Foot = 12·789 in.	
Aune (ell) of 4 Roman feet = 46·77 in.	
League, 3,000 toises = 3·6 miles.	
Perch, 22 feet or 6 aunes = 23·44 feet.	
Arpent, 100 sq. perches = 1·26 acres.	
Pound = 7,554 grains. Setier = 34·317 gallons;	
Boisseau (½) = 2·86 gallons. Pinte = 1·76 pints.	

Old Hebrew Measures.

Common Egyptian Cubit	= 18·24 in.; Cubit of Talmud = 21·914 in.
Cubit of Ezekiel	= 25·26 in.; Reed = 15·6 in.
Kikkar (Alexn. talent) = 50 minas of 60 shekels.	
Shekel = ¼ oz., of 8 gerah, or (Shekel of the Sanctuary) of 2 beka, 4 reba, 20 gerah.	
Bath (fluid), Ephā (corn) = 7·776 U.S. gallons, of 6 hin, 18 cab, 72 log.	
Cor or Homer (10 ephas) = 8·351 bushels.	
The Talmudic cubit is exactly 1/10 millionth of the Equatorial circumference.	

N. B.—The Egyptian royal cubit, = 20·64 inches, appears to have been the common cubit increased in the ratio of a degree of latitude to one of longitude in Lower Egypt at 29° N. It was divided into 7 palms. The (Persian) Cubit of Ezekiel was divided into 8 palms.

A TABLE SHOWING THE PROFITS UPON INVESTMENTS IN THE FUNDS OR IN STOCKS AND SHARES AT THE UNDERMENTIONED PRICES.

Examples.—To ascertain the yield of Consols at a price of £73 15s. 6d. look in the column headed 2½ Pr. Ct. for 73½, and it will be seen that the yield (column headed Return Per Cent.) is £3 7s. 10d. Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £98, will yield £6 2s. 5d. per cent.

Return Per Cent.	2½ Pr. Ct.	3 Pr. Ct.	3½ Pr. Ct.	4 Pr. Ct.	4½ Pr. Ct.	5 Pr. Ct.	5½ Pr. Ct.	6 Pr. Ct.	7 Pr. Ct.	7½ Pr. Ct.	8 Pr. Ct.	9 Pr. Ct.	10 Pr. Ct.

PRESENT VALUE OF A LEASE, FREEHOLD ESTATE, OR ANNUITY. 387

In the following Table, compound interest at the rates of 3, 4, 5, 6 and 7 per cent. is reckoned.

Years.	3%	4%	5%	6%	7%	Years.	3%	4%	5%	6%	7%

43	23 98	20 37	17 55	15 31	13 51	33 33	25 00	20 00	16 66	14 28	

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER:—£14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER: Looking at the Table of Expectation of Life, &c., it will be seen that the expectation for age 54 is about 17 years; and

from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 14 years' purchase. The present payment required would therefore be £1,427 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

Expectation of Life.

THE following table is compiled from a supplement to the Registrar-General's Annual Return, which refers to England and Wales only. The figures are based upon the mortality in the ten years 1891-1900.

AGE.	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-DEATH (EXPECTATION OF LIFE).		AGE.	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-DEATH (EXPECTATION OF LIFE).

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 2½ per cent. for 25 years, take 26 years, £36'012, and deduct £1—£35'012.

REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1858, and examined by the actuary of the National Debt Office. It gives the sums needed

as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

Years.	3 per Ct.	3½ per Ct.	4 per Ct.	4½ per Ct.	5 per Ct.

Mint Marks. The design adopted for gold coins are identically the same in the Mints of London, Sydney, Melbourne, and Perth, with minute "Mint Marks" immediately above the date on the reverse—viz., the latter (S, R, M, and P) (Sydney, Melbourne, and Perth). The letter C is borne on Imperial gold coins struck at the branch Mint at Ottawa, Canada, and on sovereigns struck at the branch of the Royal Mint, which was set up at Bombay in 1918; otherwise, all Imperial gold coins are of identical design.

The authorised coinage of the United Kingdom consists of the following pieces, those marked* only being issued on special occasions; the issue of crowns and double florins has been discontinued for several years:—

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
GOLD:	Grains.	Grains.	Grains.
*Five Pound	616.37239	612.500	1.00
*Two Pound	246.54805	245.000	0.40
Sovereign	123.27447	122.500	0.20
Half-Sovereign	61.63723	61.125	0.15
SILVER:			
Crown	436.36363	—	2.000
Double Florin	349.09090	—	1.678
Half-Crown	218.18181	—	1.264
Florin	174.54545	—	0.997
Shilling	87.27272	—	0.578
Sixpence	43.63636	—	0.346
*Groat or 4d.	29.09090	—	0.262

*Twopence	14.54545	—	0.144
*Penny	7.27272	—	0.087
BRONZE:			
Penny	145.83333	—	2.916
Halfpenny	87.50000	—	1.750
Farthing	43.75000	—	0.875

STANDARD GOLD contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy; fineness, 916.66, or 22 carats. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, intrinsically worth £3 17s. 10d., and one ounce of pure gold, on the same basis, £4 4s. 11½d.

STANDARD SILVER consists of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness

11 oz. 10 dwt. (958.33), is practically obsolete. It is occasionally used, however, for high-class plate.]

†BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

THE "REMEDY" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

TREASURY NOTES of the value of £1 and 10s. are now issued, and are legal tender to any amount.

BANK POST BILLS can be obtained at the Bank of England for amounts of £20 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn: they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, and Treasury notes are legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

† It may be noted that the legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois. Further, the halfpenny is one inch in diameter.

PRICE OF SILVER, 1908-1917. *The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—*1908, 24½d.; 1909, 23½d.; 1910, 24½d.; 1911, 24½d.; 1912, 28½d.; 1913, 27½d.; 1914, 25½d.; 1915, 23½d.; 1916, 31½d.; 1917, 40½d.

In the United States the price of silver is quoted in cents per troy ounce fine. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2.192; to express a United States price on the English system, multiply the cents by 0.456.

COINAGE STATISTICS.—During 1917 the number of coins struck at the Royal Mint was 243,472,926, of which 242,550,712 were Imperial and 922,214 Colonial. As is shown in the above table, the value of bronze coin issued was nearly £100,000 greater than that of any former year.

Currency of British Dominions and Colonies.

IMPERIAL sterling coins are the sole legal metallic currency in the following British Colonies:—

UNION OF SOUTH AFRICA AND SOUTH AFRICA GENERALLY.

FALKLAND ISLANDS.

Fiji.

GIBRALTAR.

NEW ZEALAND.

ST. HELENA.

WEST INDIAN ISLANDS.

In the following Dominions special coins are current in addition to the Imperial series:—

AUSTRALIAN COMMONWEALTH. — Special florins, shillings, sixpences, and three-pences in silver, and pence and half-

pence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs.

BRITISH GUIANA.—A special groat or four-pence.

GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY.—Special pence, halfpence, and farthings.

MALTA.—One-third of a farthing.

NIGERIA, NORTH AND SOUTH.—Silver, 2s., 1s., 6d., and 3d. One penny, one halfpenny, and one-tenth penny (nickel-bronze).

COLONIES POSSESSING SPECIAL METALLIC CURRENCIES.

COLONY.	MONETARY UNIT (Standard Coin).	VALUE.		GOLD COINS.	SILVER AND OTHER SUBSIDIARY COINS.

Nov. 1, 1917—Nov. 11, 1918.

(1917.) **Nov. 1.** Count Hertling succeeded Herr Michaelis as German Imperial Chancellor. Comprehensive statement on the naval position made by Sir Eric Geddes. **2.** Whole line of the Chemin des Dames abandoned by Germans, who retreated N. of the Ailette. E. bank of the Tagliamento, from its junction with the Fella in Carnia to the Adriatic, reached by Austrians. British naval success in the Kattegat: German aux. cr. *Marie* and 10 armed patrol craft sunk. **3.** French troops arrived in Italy. Fort Vaux, Verdun, again held by French. New Spanish Ministry formed with Marquis Alhucemas, Prime Minister and Foreign Affairs. **4.** Passage of the Tagliamento, N. of Pinzano, forced by Austro-Germans. French reached the Ailette. British troops in Italy: Prince of Wales with first regiment. Mr. Lloyd George, M. Painlevé, Gen. Robertson and Gen. Smuts left for Italy. **5.** Turks defeated on the Tigris before Tekrit. Italian retreat from the Tagliamento towards the Piave. **6.** Canadians captured Passchendaele. Fall of Tekrit. Pacifist motion in the House of Commons defeated by 282 votes to 33. **7.** Fall of Gaza. Italian army reached the Livenza: part cut off between Tolmezzo and Gemona: Livenza forced: Italians retiring to the Piave: enemy claimed to date 250,000 prisoners and 2,300 guns. *Coup d'état* in Petrograd by Bolsheviks under Lenin: M. Kerensky and his Provisional Government deposed. **8.** U.S. Mission, under Col. House, arrived in London to take part in the Inter-Allied War Conference. Air Force (Constitution) Bill introduced in the House of Commons. **9.** Austro-Germans in Trentino: ruins of Asiago taken. Gen. Favolle in command of French in Italy. Gen. Diaz succeeded Gen. Cadorna as Italian Generalissimo, Supreme political council for the Allies for the Western Front, to be assisted by a permanent representative Military Committee, resolved on by the Allied Conference at Rapallo. Retreat of Turks from Wadi Hesi and Ascalon on Hebron and Jerusalem, with loss of 70 guns and 10,000 casualties. **10.** Arrest of M. Kerensky and Gen. Korniloff ordered by Petrograd Soviet: loyal troops occupied Tsarkoe Selo and reported marching on Petrograd. Austrians attacked Italians on the Upper Piave: Belluno occupied. **11.** Repulse of enemy attacks from Asiago Plateau behind Italian positions on the Piave. **12.** Mr. Lloyd George in Paris spoke of the absolute necessity of the Allied War Council: the Serbian, Rumanian, and Italian disasters caused by absence of real unity of action. Fonzano and part of the Val Sugana evacuated by Italians. Return to London of Lord Northcliffe, and British War Mission to the U.S. **13.** Mr. Lloyd George, accompanied by M. Venizelos, arrived in London. Defeat of M. Painlevé in French Chamber by 279 votes to 186. Bridgehead established by Germans at Zenson across the Lower Piave. Summary of dispatches from Gen. Allenby on the fighting in Palestine issued by War Office; 5,894 prisoners, including 285 officers, to Nov. 11. Kerensky's forces defeated by Bolshevik army at Tsarkoe Selo: flight of M. Kerensky. **14.** Terms of agreement between Western Allies for a Supreme War Council read by Mr. Lloyd George to the House of Commons. **15.** Italian retreat in the Val Sugana: Cismon occupied by Austro-Germans.

British captures since the beginning of the war, 166,000 prisoners, 800 guns; on the Western front since July 1, 1916, 101,534. **16.** New French Ministry formed by M. Clemenceau as Premier and War Minister. Strong Austro-German attack on a 20-mile front from the Lower Alps to Querb on the Piave: Monte Prasolan captured: retirement of Italians towards Monte Grappa: Lower Piave crossed by enemy at Fagare and Follia, where they were checked: fierce fighting at Zenson. **17.** Jaffa (Joppa) entered by Australian and New Zealand troops. Allied reinforcements arriving daily in Italy. Italians holding out strongly on the Lower Piave: failure of enemy to break down the Italian defence in the Asiago district. Eight cruisers engaged in naval fight in the North Sea: Germans chased into Helligoland Bight, one enemy patrol sunk, a light cruiser set on fire, another damaged, and 5 U-boats sunk. **18.** Debate in the House of Commons on Allied War Council: Mr. Lloyd George successfully defended his Paris speech. Message from Pres. Wilson to Col. House, head of the U.S. Mission, emphasizing the essential necessity for unity of plan and control between the Allies and the U.S. to achieve a just and permanent peace. Death of Sir Stanley Maude, K.C.B., in Mesopotamia. Grand Cordon of the Order of the Nile conferred by the Sultan of Egypt on Gen. Allenby. **20.** British 3rd Army, Sir Julian Byng, attacked the Hindenburg line on a 10-mile front, facing Cambrai, to a depth of four to five miles, English, Scottish, Welsh and Irish Rgt.s, supported by Tanks, captured Bonavis, Lateaux, La Vacquerie, Welsh Ridge, Havrincourt, and other important positions, and advanced to within five miles of Cambrai. Historic conference held at 10 Downing-street, between the War Cabinet and members of the American Mission. **21.** British continued their advance and captured ground on the E. bank of Scheldt Canal, took several villages and part of Bourlon Wood and Mœuvres, and entered Fontaine Notre Dame $2\frac{1}{2}$ miles from Cambrai: 8,000 prisoners to date, including 180 officers. Italians repulsed enemy attacks on the lines of Monte Pertica, north-west of Monte Grappa. Germany announced widening of war zone barred to shipping. Nebi Samwil Ridge (Mispah) taken by Gen. Allenby. Proclamation issued by Lenin and Bolsheviks, informing all the nations involved in the war of their intention to make a formal offer of armistice to open *pourparlers* for the conclusion of a "democratic peace." **22.** Fontaine Notre Dame retaken by Germans. **23.** The King conferred an earldom on Viscount Reading and a Viscounty on Lord Northcliffe for services in their respective missions to the United States. **24.** Further British advance W. of Cambrai. Gen. Plumer appointed to command British in Italy, and Lt.-Gen. Marshall the troops in Mesopotamia. **25.** French N. of Verdun carried first two lines of German defence: 800 prisoners. Announced that a bronze star, with tricoloured ribbon, was to be granted to all who served with B.E.F. in France and Belgium between Aug. 5 and Nov. 23, 1914. **26.** King's congratulations to Sir Douglas Haig, Gen. Byng, and troops engaged in Cambrai operations. Lord Rothermere appointed Pres. of the Air Council. **27.** Advance of British line, after beating off enemy counter-attack towards Bourlon Village and Fontaine Notre

Dane. **28.** Admiralty announced the formation of the Women's Royal Naval Air Service, with distinctive uniform. *Liner Apapa* torpedoed and sunk; **79** lost. **29.** Allied Conference opened at Paris. Count Hertling in the Reichstag announced Germany prepared to treat with Bolsheviks respecting peace. Lord Lansdowne's letter to the *Daily Telegraph* on the duration of the war, and suggesting a revision of British war aims. Settlement of railway crisis: advance granted to men. **30.** Strong German attack under Gen. von der Marwitz on new British line before Cambrai. British positions as far as La Vacquerie, Gonnelleu and Gouzeaucourt penetrated, and Lateau Wood, S. of Masnières taken: La Vacquerie regained by British counter-attack: enemy driven from Gouzeaucourt with great slaughter: Germans claimed 4,000 prisoners and 60 guns. Lord Lansdowne's letter strongly repudiated by Government: war policy declared unchanged. 50,000 men and women at aircraft works, Coventry, out on strike.

Dec. 1. Gonnelleu retaken by British. German E. Africa reported clear of Germans: Gen. von Lettow Vorbeck in flight across the Rovuma in Mozambique. Permanent Inter-Allied Council to sit at Versailles inaugurated. **2.** Meeting of Russo-German plenipotentiaries at Brest-Litovsk to negotiate an armistice. **3.** Surrender of Russian General Staff at Mohileff to Bolshevik troops under Kريلento: murder of Gen. Dukhonin, Commander-in-Chief. 26,869 prisoners, 221 guns captured by British on all fronts in Nov. **4.** Sakaltutan Pass taken by British, who, the following day, drove the Turks out of Kara Tepe. Pres. Wilson, in his message to Congress, declared "our object is to win the war," the American people "deeply and indignantly impatient" with those desirous of peace by compromise: Gen. Weyand appointed to represent France on the Allied Council at Versailles: Gen. Foch remaining Chief of Staff. **5.** British evacuated Boulton Wood. Austro-German progress in the Asingo salient: Monte Zomo and Monte Castelgomberto stormed, 11,000 prisoners and 60 guns claimed. **6.** Strong enemy attacks on British new positions south of Boulton Wood repulsed with heavy loss. German losses since the beginning of the battle for Cambrai, Nov. 20, estimated at 100,000. Monte Sisemol captured by Austrians. Insurrection at Lisbon against Portuguese Government. Provisional Government formed under Dr. Sidonio Paes. Raid on London and S.E. counties by 25 enemy Gothas: five or six machines penetrated into London and dropped explosive and incendiary bombs: seven killed, 22 injured, two raiders brought down. **7.** State of war between U.S. and Austria-Hungary declared. Hebron occupied by Gen. Allenby. **8.** Standard of revolt against the Bolsheviks raised on the Don and in the Urals. Appeal to the Russian people to crush the Cadets issued by the "Lenin Government." Ecuador broke off diplomatic relations with Germany. "Tank Bank" campaign, Trafalgar Square, Nov. 26 to date, realized £3,423,264. Armistice signed with the enemy by troops on the Rumanian front. **9.** Fall of Jerusalem. Two Austrian battleships in Trieste port torpedoed by Italians, one, the *Wien*, sunk. **10.** Germans strongly reinforced by men and guns from the Eastern war zone reported to be massing on the Western front. Panama declared war on Austria-Hungary. **11.** Convention between Great Britain and Italy, subjects resident in either country to return

home or serve in respective armies. Statement by Mr. Balfour in the House of Commons that the German Government had in Sept. made a communication to the British Government relative to peace. Raid by British airmen on Germany between Metz and the Rhine. Entrance into Jerusalem of Gen. Allenby, accompanied by military attachés of France, Italy and the U.S. Message of congratulation from the King. Order restored in Lisbon: Revolutionary Government remaining in power, affirmed its solidarity with the Allies. Opening of Russian Constituent Assembly at Petrograd: Cadets and Revolutionary Socialists attended: boycott by Bolsheviks: Senate forcibly dissolved by extremist soldiers. Cuba declared war on Austria-Hungary. **12.** Inquiry ordered by the Government relative to British surprise by Germans at Cambrai. Italian Chamber by 274 votes to 63 voted confidence in Signor Orlando. Four German destroyers attacked a convoy of five neutral and one British vessels escorted by two destroyers and four armed trawlers: *H.M.S. Partridge* and all the trawlers and merchant vessels sunk, *H.M.S. Pelton* disabled. Vote of Credit for £550,000,000 moved by Mr. Bonar Law. Funchal, Madeira, shelled by Germans. **13.** Members of Russian Constituent Assembly dispersed by Bolsheviks. Statement on the shipping position by Sir Eric Geddes: "submarine menace held but not mastered." **14.** French cruiser *Châteaurenault* torpedoed and sunk, ten killed: U-boat destroyed. **15.** Russo-German armistice for month's truce from Dec. 17 signed at Brest-Litovsk. Recall of Gen. Sarraill, succeeded in the Salonika command by Gen. Guillaumet. **16.** Gen. Allenby awarded the G.C.M.G. Positions lost on Col. Caprile regained by Italians. **17.** Ultimatum to Ukraine by Bolsheviks demanding a free passage for their troops. **18.** Austro-German attack east of the Brenta from Col. Caprile to Monte Pertica: Monte Asolone captured. Air raid by six groups of Gothas which passed over Essex and Kent and dropped bombs: five machines reached London: ten killed, 75 injured, two enemy machines destroyed, one by gunfire and one in the Channel. Full text of the Russo-German armistice published. **19.** Recognition of Ukrainian Republic by Bolshevik "Government" demanded. **20.** Mr. Lloyd George on the situation caused by the collapse of Russia and the Italian defeat, emphasized the increased obligations on Great Britain, and stated that measures to increase man-power would be introduced in the next Session of Parliament. **21.** Advance of Gen. Allenby up the Damascus railway and along the Jerusalem-Jericho Road. Monte Asolone recaptured by Italians. **22.** Russo-German peace negotiations opened at Brest-Litovsk: Herr von Kuhlmann presiding. Two enemy air raids on Kentish coast: one machine forced to descend and crew captured: no casualties. **23.** *H.M.S. Stephen Furness* announced by Admiralty to have been torpedoed and sunk by U-boat in the Irish Channel: six officers, 95 men lost. Three British destroyers mined off the Dutch coast: 193 lost. Val Bella and Col del Rosso, in the Frenzela Valley captured by Austrians. **24.** German reply to Bolshevik peace proposals, demanding that Russia's Allies should recognize and carry out "conditions binding all nations in the same manner if the suppositions of the Russian *exposé* are to be fulfilled." **25.** The King sent a Christmas message to his Navy and Army

throughout the Empire. **26.** Vice-Adm. Sir Rosslyn Wemyss appointed First Sea Lord in succession to Adm. Sir John Jellicoe. **27.** Determined attack by Turks, aided by Germans, to retake Jerusalem ended in complete defeat: British counter-attack the following day penetrated enemy lines on a 9-mile front to depth of 2½ miles. Retreat of Germans before British forces into Mozambique. **28.** Advance of Gen. Allenby: capture of Ramal and Beitunia. Labour Memorandum on War Aims accepted without amendment at a Special Conference of British Labour Movement. **29.** Capture of Birsh on the Shechem Road, 9 miles north of Jerusalem. **30.** Further British advance and capture of more villages, including Bethel. **31.** Padua bombarded for the third time: façade of the cathedral blown down, and the basilica of the "Santo" destroyed.

(1918.) Jan. 1. Mr. Lloyd George in a New Year's Message to the Nation emphasized the duty and importance of everyone to increase his holding of National War Bonds. Exchange of New Year's Messages between the King and President Wilson. Austrians driven from Zenon, west of the Piave. **2.** German "peace" conditions denounced by Bolsheviks as a policy of annexations. **4.** Hospital ship *Rewa* torpedoed and sunk by U-boat in the Bristol Channel; all the wounded saved. **5.** Pronouncement by Mr. Lloyd George on War Aims, after conference with Mr. Asquith, Viscount Grey and the Labour Party. Mr. Ronald Storr, with temporary rank of Lt.-Col., appointed Governor of Jerusalem. Compulsory Military Service Bill upheld by U.S. Supreme Court: power given to Congress to declare war, included power to compel citizens to render military service at home and abroad. **8.** Important Message to Congress by President Wilson: 14 conditions were specified by which in his opinion a world's peace was possible. **9.** Despatch of Gen. Maude, dated Oct. 15, giving an account of the Mesopotamian Expeditionary force from April 1 to Sept. 30, 1917, and Sir Douglas Haig's despatches covering operations in 1917 to the eve of the battle of Cambrai, published by War Office. H.M.S. *Raccoon* lost with all hands off the north coast of Ireland during a storm. **10.** Russo-German peace negotiations continued at Brest-Litovsk: Ukraine Republic recognized by Petrograd delegates and enemy representatives. **11.** Changes in the Admiralty announced: R.-Adm. Freemantle succeeding Sir H. Oliver as Deputy-Chief of the General Staff; R.-Adm. Hope, Sir R. Wemyss, as Deputy First Sea Lord, and V.-Adm. Bacon, commanding Dover Patrol, transferred to Ministry of Munitions. War Office announced that three columns of British troops were in pursuit of German forces escaped into Mozambique. Message from Mr. Gompers, President of the American Labour Federation, to Trade Unions and other Labour organizations, that U.S. Labour supported the War Aims of President Wilson and Mr. Lloyd George, and declaring for "no Labour International Conference." **12.** British column disembarked at Port Amelia, Portuguese East Africa. **14.** Italians advanced in the Asolone East of the Brenta. New Man Power Bill introduced in the House of Commons. Result of inquiry into the attack, by Germans, on the Scandinavian convoy, Dec. 12, announced: escorting vessels exonerated from blame. Yarmouth bombarded by German destroyers: 6 killed, 10 injured. Attempted assassination of

Lenin at Petrograd. **15.** Announcing in the House of Commons the result of the Cambrai inquiry, Mr. Bonar Law stated that the War Cabinet was of opinion that the Higher Command was not surprised by the German attack on Nov. 30, and proper and adequate dispositions had been made to meet it, but deprecated public discussion of "break down which undoubtedly occurred." **16.** Officially stated an independent committee of business men was to be appointed by Government to inquire into expenditure of the great War Departments in particular, and of all Government Departments generally. **18.** Russian Constituent Assembly met at Petrograd: it declared its intention not to submit to the Bolshevik minority. **19.** Constituent Assembly forcibly dissolved by Bolsheviks. Appointment of Sir Herbert Lawrence as Chief of Staff to Sir Douglas Haig announced. **20.** German battle cruiser *Goeben* and light cruiser *Breslau*, and destroyers coming out of the Straits, engaged by British Naval forces off Imbros; H.M.S. *Raglan* and small monitor M. 28, sunk by enemy: *Breslau* sunk, *Goeben* escaping with 4 enemy destroyers, and an old Turkish cruiser, struck a mine and was beached at Nagara Point, Sea of Marmora, where Naval aircraft attacked her. **21.** Resignation of Sir Edward Carson from the War Cabinet. Man Power Bill passed through Committee in the House of Commons. Germans announce agreement, for peace treaty, between delegates of the Central Powers and those of the Ukrainian Republic. Admiralty reported 132 survivors of H.M.S. *Raglan* and M. 28, out of total 320: rescue of 172 survivors of the *Breslau*. **22.** Resignation of Dr. von Seidler, Austrian Premier. Aliens Advisory Committee held its first sitting. **23.** Decision of War Office to employ officers of the new army to a far greater extent than before in the higher ranks. New Public Meals Order establishing two meatless days a week. Mr. Bonar Law stated average national expenditure during the seven weeks ended Jan. 19, was £7,517,000: average daily expenditure from the Vote of Credit, £6,386,000. Mr. W. F. Purdy in his presidential address at the Labour Party Conference, at Nottingham, challenged the German democracy to declare their war aims. **24.** Reply in the Reichstag of Count Hertling, German Imperial Chancellor, to the speeches of Pres. Wilson and Mr. Lloyd George on war aims: no cession of Alsace-Lorraine; no interference with Germany in Russian peace; Belgium to be dealt with at a Conference; Great Britain to give up Gibraltar, Malta, &c.; restoration of German Colonies demanded. National food distribution outlined by Lord Rhonda: compulsory rationing inevitable. **26.** More of the French front announced to have been taken over by the British, extending their line south of St. Quentin. **27.** Spanish vessel *Giraldá* looted and sunk by a German submarine: 56th Spanish vessel illegally sunk by Germans. The *Goeben* refloated. Argentine steamer, *Ministro Iriando*, torpedoed off Toulon. **28.** Italians attacked between Asiago and the Brenta Valley and captured Col del Rosso, and 1,500 prisoners. Bolshevik Red Guards reported to have captured Helsinki: Finnish Senate overthrown. Great strikes in Berlin, and other places in Germany. Enemy air raid on London by 15 machines in three groups: five penetrated the defences: in a subsequent attack one machine reached London,

and dropped bombs, killing 58, and injuring 173, including 30 killed and 91 injured in a single building used as an air raid shelter. 70 British airmen attacked the raider which was brought down in flames in Essex. 29. Air raid on S.W. and N.W. outskirts of London: ten killed, ten injured. Monte di Val Bella taken by Italians. 30. Paris raided by enemy aeroplanes: 49 killed, 206 injured; one raider brought down. H.M. Submarine E. 14, sunk by Turks off Kum Kale. 31. Italians repulsed Austrian counter-attacks on Monte di Val Bella.

Feb. 1. Statement by Sir Eric Geddes that British Navy now sinking U boats as fast as Germany could build them. Ukraine Republic recognized by Central Powers. Mutiny of Greek troops at Lamia quelled: arrest of MM. Lambros and Skouloudis and other adherents of ex-King Constantine. Diminution of German strikes. 3. Return of Mr. Lloyd George and Gen. Sir W. Robertson from Versailles. Official statement of the Supreme War Council held Jan. 30-Feb. 2. Council decided in view of the speeches of Counts Hertling and Czernin that its immediate task was the vigorous prosecution of the war, and particularly the closer and more effective co-ordination of all the Allied Powers: complete agreement was arrived at on the policy to be pursued and on the measures for its execution: enlargement of Council's powers announced. U.S. troops stated to be occupying certain points on the battle front. 4. Between 180 and 190 German divisions reported to be concentrated on the Western front. Trial of Bolo Pasha begun in Paris. Leadership of Don Cossacks renounced by Gen. Kaledin in favour of Gen. Alexeieff advancing against Bolsheviks towards Moscow with 30,000 men. 5. Anchor liner *Tuscanian*, with U.S. troops on board, torpedoed off the coast of Ireland: 166 missing, 2,233 saved. 6. Officially stated that reprisals would be taken by British Government should Capt. Sholtz and Lieut. Woolley not be released by Germans. Resignation of M. Bratiano and Rumanian Cabinet. 8. Gen. Giardina succeeded by Gen. Cardona as Italian member of the Versailles Military Committee. Repulse of German attacks on French positions north of the Chemin des Dames and in the Woeuvre. 9. Peace signed between Central Powers and the Ukraine: borders of new State determined. New Rumanian Cabinet formed with Gen. Averescu as Premier. Opening of sittings of the Inter-Allied Council in London for economic co-ordination. 10. Announcement by M. Trotsky that "while desisting from signing a formal treaty of peace, the state of war with the enemy Powers is ended": Russia out of the war. Lord Beaverbrook succeeded Sir Edward Carson as Minister in Charge of Propaganda. Death of Abdul Hamid II, ex-Sultan of Turkey. 11. Pres. Wilson in an address to Congress replied to the speeches of Counts Hertling and Czernin, and restated American war aims. Metz raided by French airmen. Arrival in America of Lord Reading as High Commissioner and Ambassador Extraordinary and Plenipotentiary on a Special Mission to the U.S. 12. New Session of Parliament opened by the King, accompanied by the Queen and Prince of Wales. In the House of Commons Mr. Lloyd George interrogated by Mr. Asquith as to the enlargement of the powers of the Versailles Council, refused in the interest of the Allies and of national security, to give specific information: the enormous German re-

inforcements had caused a complete change in the situation: the decisions arrived at by the Versailles Conference were unanimous. 13. British line in Italy considerably lengthened east of the Montello Ridge along the Piave, and extended some miles east of Nervesa. French, with Americans co-operating, won the German salient between Tahure and Butte du Mesnil, Champagne, on a front of 1,200 yards, and penetrated to the German third line. Gen. Alexeieff defeated by Bolsheviks: reported suicide of Gen. Kaledin. Pacifist group defeated in the House of Commons on the Versailles debate by 159 votes to 28. 14. Bolo Pasha condemned to death for high treason. Resignation of M. Kucharszewski, Premier, and Warsaw Cabinet. 15. Enemy U-boat shelled Dover, killing a child and injuring seven people. 16. London raided by six German machines: one penetrated defences and dropped bombs in the S.W. district: 21 killed, four injured. Subsequent air raid on Dover driven off, and a Gotha destroyed. Resignation of Sir William Robertson, Chief of Staff, succeeded by Gen. Sir Henry Wilson. 17. Another air raid on London by six or seven machines, one penetrated the defences; 19 killed, 34 injured. 18. Termination of armistice and recommencement of hostilities between Germany and Russia: the Dvina crossed by Germans, and Dvinsk and Lutsck occupied: advance south towards Kovel by German troops invited by the Ukraine. Armenia evacuated by Russians. All South Finland reported to be in the hands of Russian and Finnish Bolsheviks, who were spreading terror and devastation. 19. Advance of German armies from Riga to Volhynia into the interior of Russia: they captured many guns and 2,500 prisoners. Mr. Lloyd George in the House of Commons defended the Versailles arrangements, and the action of the Government with respect of the resignation of Gen. Robertson: appointment of Gen. Sir Henry Rawlinson to Versailles announced. 20. British advanced up the Euphrates and occupied Khan Abu Rayat. Germans continued their advance towards Revel, Moscow, Petrograd and Kieff: Hapsal and Minsk occupied. 21. Fall of Jericho. German statement of peace conditions to Russia: surrender of Poland, Lithuania, Baltic Provinces, Ukraine, and Finland: demobilization of the army: disarmament or internment of warships, including those of the Allies: resumption of Russo-German Commercial Treaty of 1904. 22. Retreat of Turks north of Jericho and beyond the Jordan. 23. Italian Chamber of Deputies by 304 votes to 44 passed a vote of confidence in Signor Orlando. 24. Terms of surrender: military, territorial, and economic, presented to Germany, accepted by Lenin and the Central Executive Committee of Soviets. Trebizond recaptured by Turks. Return of German auxiliary cruiser *Wolf* to Pola after a 15 months' voyage; 11 vessels of 32,844 tonnage sunk by that cruiser in the Atlantic, Pacific and Indian Oceans. 25. Continuous and practically unresisted advance of German armies in the north, centre and south of Russia: fall of Revel and Pskoff, and defeat of Bolsheviks in the Ukraine. Venice, Castelfranco, and Mestre bombarded by Austrian airmen: considerable material damage done in Venice. Compulsory rationing of meat, butter and margarine came into force in London and the Home Counties. 26. Hospital ship *Glenart Castle* torpedoed and sunk by Germans in the Bristol Channel: 38 saved, 162 missing. 27. 36 bombing raids into

Germany carried out by British airmen Dec. 1 to Feb. 19. 28. Message from King read in both Houses of Parliament recommending a grant of £25,000 to Lady Maude in recognition of her late husband's important services to the nation. Resignation of M. Pastitch, Prime Minister, and the Serbian Cabinet. Joint military action in Serbia proposed by Japan to Entente Powers to save the vast quantities of supplies at Vladivostok and along the Siberian railway.

March 1. German troops spreading all over the Ukraine: Austro-Hungarian troops taking part in the Eastern invasion. H.M. armed merchant cruiser *Calgarian* torpedoed and sunk off the Irish coast; 21 officers, 46 men lost. 2. Peace signed at Brest-Litovsk between Russia and Central Powers: enemy demanded the detachment of Ardahan, Kars, and Batoum in the Caucasus. Agreement by Rumania to peace negotiations in reply to ultimatum of Central Powers. 3. Germans claimed since the new invasion of Russia 6,000 officers, 57,000 men, 2,600 guns, 3,000 machine-guns. Kiev captured by Germans: cessation of military movements in Great Russia. 4. Progress of Austrian operations in the Ukraine reported: 770 guns, 1,000 machine-guns, and a vast quantity of war material taken. 5. Sir Eric Geddes, making his statement on the Naval Estimates, solemnly appealed to the shipbuilding industry to increase the output, and referred in the gravest terms to the recent falling off in shipbuilding in this country. Preliminary Treaty of Peace signed between Central Powers and Rumania: conditions included the cession of the whole of the Dobruja and loss of territory on the Transylvanian border to Austria-Hungary: "economic measures corresponding to the situation" to be imposed on Rumania. German troops landed in the Aaland Island at the request of the Finnish Government. 6. Death of Mr. John Redmond, M.P., leader of the Irish National Party. 7. Vote of credit for £500,000,000 moved by Mr. Bonar Law. Treaty of Peace signed between Germany and Finland. Air raid on N.W. and N. London by seven or eight enemy machines: two penetrated the defences, 20 killed, 45 injured, some damage done to residential buildings; one Gotha brought down. 8. Night aerial attack on Paris, 13 killed, 50 injured; a Gotha brought down in the Forest of Compiègne. French Chamber of Deputies, after a magnificent speech by M. Clemenceau on "Victory by holding out," voted confidence in the Government by 400 votes to 75. 9. G.C.B. conferred by the King on King Alexander of Greece. Hit, on the Euphrates, occupied by Gen. Marshall advancing from Ramadide. Further progress of British in Palestine reported. Total takings of National War Bonds and War Savings Certificates, "Business Men's Week" throughout the country, £138,870,240 (London, £75,000,000). 10. Hospital ship *Guildford Castle*, with 450 wounded from E. Africa, torpedoed in Bristol Channel, but reached port. 11. Erzeroum retaken by Turks and city set on fire. Paris raided by 60 enemy aeroplanes in seven squadrons; four Gothas brought down. Repulse of Germans raiding on a large scale—Passchendaele Ridge, Armentières and Portuguese, near Laventie. Statement by Mr. Lloyd George on the connexion between the Government and the Press. Select Committee on National Expenditure reported un-

favourably on the excessive cost of munitions and war contracts. 12. Landing of German expeditionary force to Finland at Abö from the Aaland Island. Raid by three Zeppelins on the Yorkshire Coast; one bomb dropped on Hull. 13. Odessa occupied by Germans: Petrograd evacuated. Zeppelin raid on Hartlepool; eight killed, 22 injured, some material damage. Lieuts. Scholtz and Cooley reported to be released by Germans. 14. Severe aerial fighting between British and German formations on Western front. Total enemy machines accounted for by Allies in March 223; total on all fronts destroyed or disabled since Jan. 1, 787. Congress of Russian Soviets of 923 delegates met at Moscow, and decided by a majority of 453 to ratify the Brest-Litovsk Treaty; meeting packed with Bolsheviks. 15. Publication by Swedish *Politiken* of document written by Prince Lichnowsky, former German Ambassador to St. James's for private circulation: a telling indictment of the German policy which led to the war. Fresh outbreak of strikes in Austria-Hungary reported. 17. Nikolaief, chief Russian naval yard on Black Sea, occupied by Germans. 18. Important Note issued by Prime Ministers and Foreign Ministers of the Entente on German crimes against the Russian people, and refusing recognition of the Brest-Litovsk Treaty. Germans, after a heavy bombardment, made four powerful attacks on the entire Belgian front, but were driven back with heavy losses. 19. Information given by Sir Eric Geddes of the losses of British and neutral tonnage and also the figures of shipping construction. Appointment of Lord Pirrie as Controller-General of Merchant Shipbuilding. Result of ballot on Miners' votes on the "comb-out"—28,754 majority against Government proposals. Resignation of Prince Lichnowsky's Ambassadorial rank announced. 20. Seizure of Dutch ships in U.S. Ports authorised by Pres. Wilson; 38 vessels taken over by naval authorities. M. Marghiloman appointed Roumanian Prime Minister. 21. Great German massed attack by some 40 enemy divisions on British 3rd and 4th Armies on a 50-mile front between the Scarpe and the Oise. British outward positions broken through, and our battle positions penetrated in certain parts of the front. German losses exceptionally heavy. British destroyers *Botha* and *Morris*, with French destroyers *Mehl*, *Hagon*, and *Bouclier* sank two German torpedo boats in the N. Sea, and engaging five enemy destroyers, which had been bombarding Dunkirk, sank one and damaged two. 22. German attack continued on the whole front: British positions W. of St. Quentin broken through: enemy endeavour to turn British right: British fell back eight miles to the line of the Somme, inflicting heavy losses; violent enemy attack S.E. of Arras and other points. Jordan crossed by Gen. Allenby, and advance made towards the Hedjaz railway. New Spanish Coalition Cabinet formed under Señor Maura, Premier, and Señor Dato, Foreign Minister. 23. British took up new positions S. and W. of St. Quentin, making a retirement of 15 miles since the opening of the battle. Attempt by Germans to turn the British right defeated at Jussy. The line to Péronne held; French entered the struggle at Noyon on British right; German losses again enormous. Peace Treaties read a third time again in German Reichstag without debate, and adopted *en bloc*, together with the Supplementary Treaties.

Paris shelled by a long-range gun from a distance of about 74 miles. **24.** Fall of Péronne and Ham: Germans crossed the Somme but were driven back: fall of Bapaume, Nesle, Guiscard, and Chauny: French repulsed enemy attacks E. of Lunerville. Cologne bombed by British airmen. **25.** Momentum of the German onslaught mainly between Arras and Péronne: at points near Maricourt Germans reached their old trenches of 1916; French evacuated Noyon in the Oise Valley; left bank of the Oise held Es Salt taken by Gen. Allenby. **26.** S. of the Somme, Chaumes and Roye evacuated by British under heavy German attacks. N. of the Somme British line ran from S.E. of Arras to S.W. across the Ancre and S. to Albert and Bray. Old defences of 1916 from Albert to Bray lost. British, French, and Americans fought shoulder to shoulder; Prussian Guard and Brandenburgers brought into the battle. Turkish army at Khan Baghdadi defeated by Gen. Marshall; 3,000 prisoners. **27.** British battle line N. of the Somme held and Germans thrown back at Moriancourt and Chippelly. Albert taken by Germans, who advanced up the Valley of the Ancre to within 12 miles of Amiens. Mondidier, between Amiens and Compiègne, gained by enemy; repulse of German attacks near Lassigny and Noyon. **28.** Strong enemy attacks in the Scarpe Valley E. of Arras were beaten off, and in the Bucquoy sector S. of the Scarpe also repulsed; further German advance towards Amiens as far as Hamel. **29.** Germans progressed between Albert and the Avre nearer Amiens; Mezières taken. **30.** Enemy repulsed with great loss N. of the Somme in the Boiry-Boyelles region; French recaptured Morcuil. Appointment of Gen. Foch to co-ordinate action of Allied armies in France announced. German long-range gun bombarded Paris; a church shelled while the congregation were worshipping on Good Friday—75 killed, 90 injured. **31.** Message to Sir Douglas Haig from the King on his return from a visit to the Western front warmly praising his Army for their endurance and bravery.

April 1. British and French successes near Moreuil and Hangard: U.S. battalions brigaded with French and British units. R.N.A.S. and R.F.C. merged into one, the "Royal Air Force." Pres. Wilson's attitude to German Power reaffirmed at the launching of the third Liberty Loan, "a thing without a conscience, honour, or capacity for a covenanted peace, and must be crushed." **2.** Capt. McCudden, D.S.O., with 54 enemy machines to his credit, awarded the V.C. **3.** German naval force, some 40,000 strong, landed at Hangö in S. Finland; Tammerfors taken by Finnish White Guard. Prince of Wales appointed Cadet Colonel-in-Chief of the Cadet Corps of the U.K. **4.** Germans with 20 divisions made a great assault along the roads to Amiens, and advanced 7,000 yards to a depth of 2,000 yards on either side of Moreuil. French surrendered Morisel and Mailly-Raineval: they advanced N. of Orvillers Sorel. Germans claimed to have taken since March 21, 90,000 prisoners, 1,300 guns. **5.** S. of the Somme Germans, with 20 divisions, and with ten divisions to N. of river beyond Bucquoy, attacked with small results and heavy losses, the French and British defences. British and Japanese marines, under command of Adm. Kato, landed at Vladivostok. Greetings from the King to Pres. Wilson on the anniversary of America's entrance into the War.

6. Ardahan, in the Caucasus, occupied by Turks. **7.** Kerak, Turkish headquarters, E. of the Dead Sea, occupied by Arabs. **8.** Great bombardment by Germans on the whole British battle front, and N. to the region of La Bassée and Armentières. French retired further S. of the Oise from the Lower Forest of Courcy, and from Courcy le Château. **9.** British and Portuguese driven back, by massed German attack, between Armentières and La Bassée, on a front of ten miles; enemy penetrated British lines about Neuve Chapelle and Fauquiosant and in the centre through Richebourg and Laventie. Red Sea Coast occupied for 800 miles, and 40,000 Turks accounted for by King of the Hedjaz Arabs since the declaration of his independence. New Military Service Bill introduced by Mr. Lloyd George who made a full statement of the position on the Western front. Queen assumed the position and title of Commandant-in-Chief of the W.A.A.C.s. to bear the name of "Queen Mary's Army Auxiliary Corps." **10.** Battle in the North of France spread across the Belgian border to Messines Ridge; British pressed back to top of Ridge, and south to Ploegsteert. Germans in the Armentières sector crossed the Lys between Estaines and Bac St. Maur: Armentières evacuated by British: enemy driven back after crossing the Lawe at Lestrem. **11.** Second big battle for Messines Ridge on the front Wytscheete-Hollebeck: enemy repulsed with great loss by British 6th Division. Germans in the centre pushed on from Bailleul, and stood over seven miles forward from their original lines, east of Armentières: British pushed back by massed German attack to north of Estaines and Steenwerck, and behind the Lys surrendered Merville: in the Ploegsteert region our troops were compelled to give ground: enemy now in low country south of Messines Ridge and Mount Kemmel area, and facing the low hill in front of Bailleul: German attempt to force the Lawe covering Béthune severely defeated, 20,000 prisoners, 200 guns in northern battle claimed by Germans to date. Report to Parliament by Government Committee on the treatment of British prisoners of war behind the firing-line in France and Belgium. **12.** Germans south of the Messines Ridge fighting their way forward over the Lys plain, west of Armentières, towards the coast; British pressed back slowly in continuous fighting towards Bailleul: Neuve Eglise and Messines entered by enemy. Germans in the centre forced the passage of the Lawe, threatening St. Venant: 110 German divisions stated to have been engaged since offensive of Mar. 21. German official report stated that the English garrison of 50 officers and 3,000 men at Armentières surrendered after a brave resistance. French army stated to be moving rapidly and in great force to British support. Raid over the East Coast by four Zeppelins: one reached the Eastern and Midland districts: 5 killed, 15 injured. **13.** Germans driven out of Neuve Eglise, and attacks from Meteren to Wulverghem repulsed. National Assembly at Prague, of representatives of Jugo-Slavs, Croats, and Slovenes, took a solemn oath of solidarity until national independence was attained. Batoum, and 3,000 prisoners, and 50 guns captured by Turks. **14.** Gen. Foch appointed Generalissimo of the Allied Armies in France. British withdrawal from Neuve Eglise. Helsinki occupied by Germans. Maj.-Gen. F. H. Sykes appointed Chief of the Air Staff in succession to Gen. Sir H. M. Trenchard. **15.**

Resignation of Count Czernin, Austro-Hungarian Foreign Minister following M. Clemenceau's publication of Emperor Karl's letter referring to the "just claim of France to Alsace-Lorraine." In the House of Commons, Mr. Lloyd George stated that Gen. Foch and our Generals considered we had lost nothing vital on the Western front. Bailleul and Wulverghem taken by Germans. **16.** British withdrew east of Ypres, in the Paschendale region. **17.** *The Times* Fund reached £10,025,310. King sent a message of congratulation. Withdrawal again of British from Wystchaete and Meteren in face of massed enemy attacks. French taking part in the great battle on the low hills to the south of Ypres. Belgians near Bixschoote, north of Ypres repulsed Germans, and took 700 prisoners. Baron Burian appointed successor to Count Czernin. **18.** Unsuccessful massed attacks by Germans: on a front of 11 miles from Givenchy to the Lys: severe enemy losses: new German attack south of Kemmel repulsed. French attack on both sides of the Avre Valley, ten miles south-east of Amiens between Thermes and Mailly-Raineval: French line carried to outskirts of Castel. Resignation of Sir David Henderson, K.O.B., as Vice-Chairman of the Air Council. Military Service Bill passed. Cabinet changes announced: Lord Milner, Secretary for War, in succession to Lord Derby, appointed Ambassador to Paris in place of Lord Bertie: Mr. Austen Chamberlain joined the War Cabinet. **19.** British recovered their advanced trenches in Givenchy and Festubert area. **20.** German advance north-east of Ypres stopped by British artillery fire. At close of month of battles German thrust against British Armies held. **21.** Message of thanks from King to munition workers: all losses of guns and munition expenditure during German onslaught made good. **22.** Budget statement by Mr. Bonar Law: New taxation proposed, including increase of Income Tax. Under cover of artificial fog, night attack, by specially equipped British naval force, under V.-Adm. Sir Roger Keyes, carried out a daring raid, after an intensive bombardment by monitors, on enemy bases at Zeebrugge and Ostend: cruiser *Vindictive*, Comm. Carpenter, and auxiliaries *Iris* and *Daffodil* running alongside the Mole at Zeebrugge landed storming parties, while three obsolete cruisers filled with concrete entered the harbour: two, the *Iphigenia* and the *Intrepid*, were successfully sunk at the entrance of Bruges Canal, an obsolete submarine was run against the piling of the Mole, was blown up, making a clear break of 20 yards wide: greater part of the fairway blocked up: two other block ships run ashore at Ostend. **23.** Maj.-Gen. Bridges appointed principal Military Advisor to Lord Reading, and head of all Military Missions in the U.S. Germans stated by Sir Douglas Haig to have used 102 divisions, many of them two or three times, against the British alone during enemy's great offensive. Baron von Richthofen, the most famous of German airmen, brought down killed in Somme Valley. Guatemala declared war on Germany. **24.** Germans attacked again on the Amiens front, at the junction of the British and French Armies: British after defeating first attack, afterwards compelled to yield the village of Villers-Bretonneux, regained the following day: failure of enemy attacks in the Avre Valley. **25.** Resignation of Lord Rothermere from the Air Ministry. Red Cross sale at Christie's realised

£151,000. Renewed heavy German offensive against Kemmel Hill, and then forming S.W. support of Ypres position: British withdrawal: 6,500 prisoners claimed by enemy, who recaptured Hangard. **26.** German attacks on Loere and Voormezele defeated. Sir William Weir appointed Minister of Air Service. **27.** Capture of Kars by Turks reported. **29.** 13 divisions of Germans defeated on a ten-mile front from Mebelen to Voormezele: British held northern section, and French at Scherpenberg and Monte Rouge recovered the greater part of their line penetrated by enemy. Viborg taken by White Guards. Mr. Ian Macpherson, M.P., appointed Vice-President of the Army Council; Maj.-Gen. Sir B. D. Whigham to an appointment in France, Maj.-Gen. C. H. Harrington to be his successor as Deputy Chief of the Imperial Staff. **30.** Tank River in Mesopotamia reached by Gen. Marshall: 12 guns, 1,800 prisoners taken.

May 1. U.S. troops on the Amiens front near Montdidier. Es Salt, and midway between the Jordan and Hedjaz railway taken by Australians. Military dictatorship established in the Ukraine by the Germans, who also established a military government at Kieff. Sebastopol occupied by Germans. **2.** Zeebrugge Channel reported to be still blocked: three heavy bombs dropped by British airmen on the lock gates. Plans, approved by Pres. Wilson, presented to Military Affairs Committee for increase of U.S. Army; its size only limited by transport. **3.** Germans reported to have pushed their advance east from Odessa and entered the Donetz region of the great coalfields and occupied Tanagerog. Withdrawal of British from Es Salt behind the Jordan: 900 Turks captured. Return of Mr. Lloyd George from meeting of Supreme War Council, Versailles, bringing a message from British troops at the front to the nation: "Be of good cheer, we are all right." **4.** Germans opened an intense bombardment of French and British positions from Loere to south of Ypres. **5.** Severe defeat of Gen. von Vorbeck, 15 miles west of Manunga, 160 miles south of Lake Nyassa, by part of Gen. Northey's column. Another of the three German long-range guns bombarding Paris put out of action by a direct hit of French artillerymen. Field-Marshal Viscount French, K.P., appointed Lord-Lieut. of Ireland, and Mr. E. Shortt, K.C., M.P., Chief Secretary for Ireland. **6.** Admiralty announced conditions of award to members of R.N. and other marine services of chevrons for services at sea or overseas since Aug. 4, 1914. **7.** "Peace of Bucharest" signed between Roumania and the Central Powers. Kirkup, 120 miles south-east of Mosul, entered by Gen. Marshall. Letter to the Press from Maj. Gen. F. Maurice impugning the replies of Mr. Bonar Law in the House of Commons (April 23) as to the extent of the British front in France. **8.** Rostoff on the Don occupied by Germans. Nicaragua declared war on Germany. **9.** Operation designed to close the ports of Ostend and Zeebrugge successfully completed by sinking the damaged cruiser *Vindictive* filled with concrete between the piers and across the entrance to Ostend Harbour. Mr. Asquith's motion in the House of Commons to refer the charges of inaccuracy made by Gen. Maurice against Ministers to a Select Committee defeated by 293 votes against 106. **11.** Vice-Adm. Sir Roger Keyes warmly thanked by War Cabinet for the

work of his command in blocking Ostend, "the finishing touch to the gallant achievement at Zeebrugge." Further successful advance of Gen. Marshall on the Baghdad-Mosul road. Regiment of U.S. new army, 2,700 strong, under Col. Whitman, marched through London, and were reviewed by the King: an autograph letter from His Majesty presented to each soldier. 12. Return to London of Mr. Montagu, Secretary for India, from his six months' mission to India. Lord Reading, addressing a gathering of some 300 Washington correspondents, representing 25,000,000 U.S. readers, paid a warm tribute to the swift response of the U.S. by land and sea to the call of the Allies for aid. 14. Announced at Washington, first 1,000,000 tons of ships delivered to the U.S. Government had been put on the high seas. 15. Official narrative of raid on Ostend Harbour issued by Admiralty. French advanced their line north of Kemmel. Conclusion of agreement between China, Japan, and the Entente Powers to preserve peace in the East and frustrate German penetration. End of *Bonnet Rouge* trial: Duval condemned to death by court-martial, his accomplices sentenced to various terms of imprisonment with hard labour. Overman Bill passed by House of Representatives. Successful sea raid by Italians into the strongly fortified Austrian port of Pola: numerous torpedoes fired into a large Austrian cruiser. Anti-Government propaganda by means of apparent advertisements in newspapers exposed by Dr. Addison. Enlargement of new Meat Order. 16. American delegates visiting London received by King and Queen at Buckingham Palace. Saarbrücken raided by British airmen. German airmen dropped bombs on the Belgian hospitals at Hoogsblade, and at Calais: ten killed, 20 injured. Important speech in the House of Commons on the Emperor Karl's letter, and on the general question of the German peace offensive. 17. Text of Sir George Cave's Bill to denaturalize dangerous foreign aliens issued. Discovery of German-Irish plot: many Sinn Feiners arrested, including de Valera, Count Plunkett, Countess Markievicz, and other leaders. Third U.S. Liberty Loan for minimum of £600,000,000 stated to have exceeded £800,000,000. 18. Daylight raid on Cologne by British airmen. Irish Nationalist Anti-Conscription Fund reported to amount to £135,000. Proclamation by Lord-Lieut. of Ireland posted denouncing the pro-German plot, and calling upon all loyal Irishmen to aid in its suppression. 19. Austrian advanced positions at Capo Sile stormed by Italians. Air raid on large scale on London by 20 or 30 enemy machines, including large Gothas of a new type: many bombs were dropped, and 44 killed, 179 injured in London district: five hostile machines destroyed, two others reported to have fallen into the sea in flames. Group of British hospitals at Etaples, outside French battle area, bombed by German airmen: 300 casualties. 21. Occupation of Fathah on the Tigris by British announced. Attempted raid by two Gothas on Paris: three killed, one Gocha brought down; 1,000 German aeroplanes since March offensive brought down or destroyed; 2,000 tons of bombs dropped on enemy's lines. Lord Rhonda withdrew his resignation as Food Controller. 22. Paris again raided by 30 German machines, one got through the defences: one killed, 12 injured. British air raid on Zeebrugge: German destroyer sunk. Sedition Bill giving the U.S. Government wide powers to punish dis-

loyal acts or utterances, signed by the President. Additional estimates submitted to the House of Representatives: £300,000,000 for ordnance for next fiscal year: authorization for over £1,423,000 to be issued at War Department's discretion for ordnance. 23. Correspondence between Mr. Balfour and the Anti-Conscription Conference published. Under far-reaching regulations by U.S. Provost-Marshal every man of draft age must either fight or work after July 1. *Moltaria*, British armed mercantile cruiser, with 500 U.S. troops on board, torpedoed in the Channel: 56 killed by explosion. Mr. Lloyd George at Edinburgh to receive the freedom of the City, declared his firm but sober confidence in victory. Prince of Wales at Rome to represent the King on the third anniversary of Italy's entrance into the war. Costa Rica declared war on the Central Powers. 24. Empire Day celebrated in England: messages received from Allies reaffirming solidarity of interest and action. Statement issued by Government of the evidence in their possession of the active connexion between the leaders of Sinn Fein and Germany. 25. Telegram from King Albert to Pres. Wilson expressing the gratitude of the Belgian people for the generosity of the Americans to Belgian Army and civil population. 26. H.M. transport *Leasowe Castle* torpedoed and sunk in the Mediterranean: 13 officers, 79 men missing. Monticello Pass and peaks commanding it in the Adamello region taken by Italians. 27. British divisions holding a front of 15 miles across the Aisne towards Rheims between Craonelle and Bermécourt attacked in great force by 25 German divisions supported by Tanks, as well as the French line along the Chemin des Dames: British right held, but the left was forced back to a second line of prepared positions. Along the Chemin des Dames enemy masses pushed forward regardless of losses to the Aisne Valley: some parties reached the valley at Pont Arcy: Chemin des Dames lost, and later the Germans crossed the Aisne on an 18 mile front between Vailly and Berry-au-Bac, and advanced towards the Vesle. French repulsed an attack between the Locre and Voormezele, south of Ypres. 28. Battle continued between the Aisne and the Vesle: passage of the Vesle forced by Germans 12 miles from their old line. Allies held their ground at Vregny Plateau and heights of St. Thierry: south of Ypres Allied position restored. Further revelations of the brutal treatment of British prisoners in German camps. 29. Vregny Plateau and Soissons taken by Germans, who progressed on the right towards Rheims and south of the Vesle towards the Marne. In reply to questions by Lord Devonport in the House of Lords, respecting the exchange of prisoners, Lord Newton stated that negotiations had been entered into with the German Government. 30. French official reports of the great battle between Soissons and Rheims showed that Allies were holding the German rush more firmly, and that reserves were arriving in good numbers: Fère-en-Tardenois reached by Germans. U.S. daily war expenses for May officially stated to be £10,000,000. Bulgarians and Germans defeated by Greeks at Skra di Lezen, west of the Vardor. 31. Marne reached by Germans on a 10 mile front from Chateau-Thierry to Dormans: enemy claimed to date 45,000 prisoners, including one British and one French general, 400 guns, and thousands of machine-guns. U.S. transport *President Lincoln*

torpedoed and sunk in European waters: U.S. war casualties to date: 6,463, including 800 killed in action. Officially stated 120,213 combatant Germans held by British: number of British held in Germany approximately 124,000 of all ranks.

June 1. German attacks between the Oise and the Marne towards Paris held generally by the Allies, but enemy advanced down the valley of the Ourcq to the borders of Villers-Cotterets Forest, 40 miles from Paris. German air raid on Paris, the sixth on successive nights; 24 persons injured. **2.** Strong German attacks on both sides of the road from Château-Thierry checked by the French to the S.E. of Boursches; French also successfully counter-attacked between the Ourcq and the Marne, and advanced in several places. U.S. stated to have 150 war vessels, with 30,000 to 40,000 men in European waters. **3.** N. of the Aisne Germans with fresh forces delivered a violent attack between Soissons and Noyon; Choisy Hill, near Noyon, recaptured for the fifth time by French; Germans took Pernant, but were checked between the Aisne and the Ourcq. Prime Ministers of Great Britain, France and Italy, at sixth session of Supreme War Council at Versailles, agreed to declaration of the creation of a united and independent Polish State with free access to the sea, and sympathy with the Czechoslovak and Jugo-Slav national aspirations. **4.** Proclamation by King under Military Service (No. 2) Act, 1918, withdrawing, with some exceptions, all certificates of exemption held by men born 1895 to 1899. Renewal for another five years of Anglo-American Arbitration Treaty originally signed 1908. German Federal Council adopted Peace Treaty between Central Powers and Rumania. Recognition of the Ukraine Government by Germany and Austria-Hungary reported. Resignation of Baron de Broqueville, Belgian Premier, succeeded by M. Cooreman, former President of the Chambers. **5.** German attack at Longpont, Forêt de Retz repulsed, and an attempt to cross the Oise near Vingre frustrated. Debate in the House of Lords on the Madsen machine-gun introduced by Lord Beresford. Gen. Sir W. R. Robertson, G.C.B., appointed Com.-in-Chief of the Home Forces. Hospital ship *Konntigen Regentes* torpedoed off the English coast; all saved but four by *Sindoro*, in which were the British delegates to the Hague Prisoners' Mission. **6.** French, British and U.S. troops counter-attacked Germans and inflicted a series of reverses on them, chiefly in the Veully La Poterie-Bussières region, the nearest point to Paris reached by the enemy. **7.** French, British and U.S. troops holding the flanks of the Aisne-Marne-Rheims salient again reacted against enemy's lines N. of the Aisne; village of Le Porte taken; British between the Marne and Rheims regained the village of Bligny; Vinly and Veully-La Poterie retaken by French and Americans. **8.** Resignation of Sir Alan Anderson, Controller of the Navy. First meeting of Conference of British and German delegates on prisoners of war held at the Hague. Arrival in London of Sir Robert Borden, Premier of Canada, and of Mr. W. F. Massey, Prime Minister of New Zealand, to take part in the meetings of the Imperial War Cabinet and Imperial War Conferences. **9.** New German offensive in mass formation on a front of 22 miles from Montdidier to Noyon, after a bombardment with gas shells. Austrian Dread-

nought, the *Szent Istvan*, and another Dreadnought torpedoed off the Dalmatian Coast by Com. Luigi Rizzo, Italian Navy. **10.** Germans, strengthened by new reserves, advanced in the direction of Estrees St. Denis, eight miles W. of Compiègne, and Ribécourt, five miles S.W. of Noyon; French resisted tenaciously; enemy took by repeated assaults, and at heavy sacrifices, Mery, Belloy, and St. Maur, a fresh advance of two miles. French fell back on Ribécourt; fierce fighting on Belloy Plateau; enemy attacks broken between Courcelles and Rubescourt by French, who held their positions; E. of the Oise German attempt to retake Le Port failed. Officially stated that from May 15 to June 1 hospitals had been bombed by Germans on seven occasions—total casualties, 248 killed, 693 wounded. **11.** French on a seven-mile front from Rubescourt to St. Maur regained village of Belloy. Arrival in Berlin of delegates of Russian Soviet Government to complete the Brest-Litovsk negotiations. Bill introduced into Finnish Diet to establish a monarchy. **12.** Over 700,000 United States soldiers already sent over to France. Same recognition granted by French and Italian Governments to the Czechoslovak movement given by British Government. New German attack towards Compiègne between the Aisne and the Forest of Villers-Cotterets; violent enemy onslaught on the Boursches-Belleau front, broken up by United States troops, inflicting severe losses. 5,950 persons officially stated to have been appointed to the Order of the British Empire since its institution. **13.** Germans held on all the new front between Montdidier and Noyon. Capture of Belloy Wood completed by Americans; enemy thrust at Compiègne brought to a halt at Valley of the Matz, where on previous day Germans were across and captured Mélicocq and neighbouring hill La Croix Renard. Italians defeated Austrians at the Tonale Pass. **14.** Gen. Guillaumont, Commander of the Army of the Orient, appointed Military Governor of Paris. 55 raids on German towns by British airmen during May. Capture of Tabriz by Turks announced. 16 counties and boroughs proclaimed in Ireland. **15.** New Austrian offensive on a front of about 90 miles against Italian positions from the Asiago Plateau E. to the sea; enemy in the Montello sector and between Fagare and Musile crossed the Piave. German air raid on Paris; several killed and some damage done. Public meetings and processions in Dublin metropolitan area proclaimed until further notice. Decision of War Cabinet to set up a Committee of Ministers of Home Affairs announced. **16.** Capo Sile taken by Austrians. **17.** Failure of Austrian offensive, except on the middle and lower reaches of the Piave, and on the Montello heights from Ciano to a point further E.; ground gained by Allies in the Grappa region. Grave political and economic unrest in Austria reported. **18.** Recapture of Capo Sile by Italians; Austrian attempts to cross the Piave, in flood and many bridges swept away, again repulsed. Resignation of M. Radoslavoff, Bulgarian Prime Minister, succeeded by M. Malinoff. **19.** Austrian lines on the Montello driven back. Reports of a counter-revolution in W. Siberia and capture of Tomsk. **20.** Between the Astico and the Bronta Italians completed the conquest of Costalunga Redoubt, retook most of the Montello and the Fagare and Zenson sectors. Serious food riots in Vienna reported. Proposal of Mr.

Lloyd George to give his personal attention to the question of the treatment of both naturalised and unnaturalised aliens. **21.** Austrian counter-attacks in the Montello and Grappa regions defeated; 12,000 prisoners and many guns taken by Italians to date. In the House of Lords Lord Curzon announced the abandonment for the present of both conscription and Home Rule for Ireland. "Pacifist" group in the House of Commons, who sought an assurance from the Government to settle the war by "agreement" and a "revision of secret treaties," severely censured by Mr. Balfour. **22.** Austrians began retreat across the Piave opposite the Montello, much impeded by the river in flood. British on the Lys battlefield carried out a successful operation against German salient S.W. of Meteren, and advanced their line; enemy attack on Mt. Bligny, near Rheims, repulsed. **23.** Great Austrian defeat; Piave crossed by disordered enemy, closely pursued by Italians; the Montello, and all the right bank of the Piave, except a small portion opposite San Dona di Piave, recovered. Proposal for a permanent Anglo-American Union for the preservation of the liberties of the world put forward by Lord Reading. **24.** Italians for the first time for months again on the left bank of the Piave; pursuit of part of Austrian forces lower down the river by Italian cavalry; 20,000 prisoners to date. Mr. Lloyd George reviewing the war situation stated that the position, although anxious, was gradually improving; the Allied generals felt confident of the issue. **25.** Austrian bridgehead at Capo Sile captured by Italians. German defeat in a brilliant local operation by United States troops near Belleau Wood, N.E. of Chateau-Thierry. British air raid on Karlsruhe, 15 killed, 30 injured. Mr. Shortt in the House of Commons made a statement on the completion of Ireland. **26.** German strong position W. of Vieux Berguin captured by British. House of Lords adopted a motion approving of a League of Nations. Return of Ministry of National Service showed that 48 per cent. of the Civil Service had been released for active war service. Peace Treaty between Germany and Finland ratified. Labour Conference opened in London. **27.** Gotha raid on Paris, 12 killed, 14 injured; considerable material damage done. Hospital ship *Llandevory Castle* torpedoed by German U boat 116 miles S.W. off the Fastnet, and sank in 10 minutes; Germans deliberately shelled boats containing survivors to "leave no trace"; 234 out of total of 258 missing. **30.** Italians with Allied troops carried the Austrian position on Monte di Val Bella in the Asiago Plateau, and later Col del Rosso; 2,000 prisoners captured.

July 1. Austrian naval base at Cattaro bombed by five British aeroplanes; one ship set on fire, and a bomb dropped in the middle of the enemy submarine quarter. Works at Mannheim again attacked by British airmen; raids made on Coblenz, Thionville and Trèves. U.S. transport *Corrington* torpedoed and sunk, six of crew missing, no troops or passengers on board. On the western front French took St. Pierre Aigle, and the Americans carried the village of Vaux and the heights near Chateau-Thierry. Serious explosion at a national shell-filling factory in the Midlands: 200 lives lost, 150 injured. Five M.P.'s appointed by the Prime Minister to make a thorough investigation of the enemy alien problem, and to advise him what action

should be taken to allay public anxiety. **2.** Italians on the Lower Piave gained ground, heavily defeated the Austrians, and took 1,900 prisoners: important points on Monte Grappa captured: their gains held against vigorous counter-attacks of the enemy. Pres. Wilson announced that 1,029,115 U.S. troops had been embarked for France, the total in June being 276,372: only 291 men had been lost at sea. International Parliamentary Commercial Conference opened in London. Largely attended conference of 27 London City and Borough Councils to discuss the enemy alien question, held at Westminster City Hall, passed a resolution calling upon the Government to intern all enemy aliens, and naturalized British subjects of alien origin. **3.** Death of Viscount Rhondda, P.O., Food Controller. French attacked German positions between Autréches and Moulin-sous-Touvent, advancing to a depth of 1,300 yards on a front of 3 miles and took 1,066 prisoners. Germans reported to have a force of 50,000 men in Finland, and to be preparing to advance on the Murman railway. U.S. Senate without debate passed Senator King's Bill revoking the charter of the National German-American Alliance. Text issued of a Proclamation declaring Sinn Féin a dangerous organization. Text of the address of the Dublin Mansion House Conference to President Wilson made public. Death of Mohamed V., Sultan of Turkey. **4.** Austrians and Americans captured Hamel, advancing to a depth of 2,000 yards. Further Italian progress in the delta of the Piave, and on the Grappa front. Independence Day celebrated in the U.S.; 100 U.S. ships launched. Pres. Wilson in a speech at Washington's tomb, Mount Vernon, declared there could be but one issue to the war, "the settlement must be final... there can be no compromise." The Day, also, celebrated in Paris, Rome, the Dominions, and London. Ratifications of the Peace Treaty and the supplemental treaty between Austria-Hungary and the Russian Soviet exchanged in Berlin. Proclamation of the new Sultan of Turkey, Vahid Ed-din, at Constantinople. **5.** Australian line advanced on a front of 2,000 yards north-east of Villers-Bretonneux. Dutch convoy to the Dutch East Indies set sail: the British Government waving, on this occasion, its immemorial right of search. Peace treaty and supplementary treaties with Rumania finally passed by the Reichstag. **6.** The whole of the Piave delta cleared of Austrians by 23rd Italian Army Corps, who drove the enemy back over the new Piave: 523 Austrian officers and 20,911 men, 63 guns, 65 trench mortars, 1,234 machine-guns, and large quantities of material taken by the Italians since 15 June. First aerial super-Dreadnought, the U.S. "giant" aeroplane "launched" at New York. French and Italian offensive in south Atlantic between the coast and Tomorica Valley: 1,000 prisoners captured. Murder of Count Mirbach, German Ambassador at Moscow. Publication of the Report on Indian Constitutional Reforms, signed by the Viceroy and Secretary of State, as the result of their recent conferences. Silver wedding of their Majesties: King and Queen attended a Thanksgiving Service at St. Paul's Cathedral. At the Guildhall the Lord Mayor, on behalf of the citizens, requested their Majesties acceptance of a cheque for £53,000. Czechoslovaks under the command of Gen. Ditericho, reported to be in control at Vladivostok. **7.** Further advance of Australians on 3,000 yards' front in the hills on

each side of the Somme. Ambulance park near La Pausse, behind the Yser front, bombed by German aircraft; 50 girls killed. **8.** Italians, with the cooperation of British monitors, won the passage of the Vojussa, north of Avlona, Albania. Strong offensive opened by French and Italian troops working down the valleys of the Dravet and Tamorisa threatened Berat and captured over 1,000 prisoners. Czechoslovaks occupied Irkutsk. M.P.s asked by the Government to make recommendations for dealing with the alien question made their report to the Premier. Debate in the House of Lords on the alien question on the motion of Lord Beresford. In the Commons Sir Auckland Geddes announced certain concessions in the grading of men of the older classes. In both Houses of Parliament, addresses were moved congratulating the King and Queen on their silver wedding. House of Commons, without a division, accepted the Government Bill prolonging the life of Parliament for another six months, to Jan. 30, 1919 (the fifth extension of its life). **9.** Rt. Hon. J. R. Clynes, Parliamentary Secretary of Ministry of Food, appointed Food Controller. Resignation announced of Herr von Kuhlmann, German Foreign Minister, succeeded by Adm. von Hintze. Officially stated in the House of Commons that the ships lost homeward bound to the U.K. since Jan. 1, 1918, were rather more than 1 per cent. Martial law reported to have been proclaimed at Moscow by Bolshevik "Government." Dominion ministers and representatives attending the Imperial War Cabinet and the Imperial War Conference entertained by the King and Queen at Buckingham Palace. In the House of Commons, Lord Robert Cecil defended the action of the British Government in veiling its right of searching the Dutch convoy. **10.** Courcy, north of the Ouse, captured by the French. Formation of a new Siberian Government at Grodekovo by Gen. Horvath announced. Unpard liner *Cypriot* torpedoed in Atlantic; five lost. **11.** 74 raids by British Independent Air Force in Germany during June announced. Daring raid by Australians near Meers in the northern front, enemy lines deeply penetrated and a number of machine-guns captured. Debate in the House of Commons on the alien question: Sir Geo. Cave, Home Secretary, announced the Government's proposals. U.S. supply ship *Westover* torpedoed and sunk; ten missing. **12.** Retirement of Austrians in Albania. Allied forces on Murman coast announced. Japanese battleship *Kawachi*, of the Brazenbought class, blown up in Tokuyama Bay and sunk; over 500 casualties. Czechoslovak troops in control of most of the Trans-Siberian railway east of Peiza and as far as Vladivostok. **13.** British Nationality and Status of Aliens Bill passed its second reading in the House of Commons by unanimous consent. French Gen. Gramat appointed Chief of Staff to Greek Army. British positions covering the passages of the Jordan and north of Jericho attacked by Turks. **14.** Great demonstration in Trafalgar Square to protest against the German aliens and demanding their immediate internment. **15.** Third great German offensive launched on a front of 50 miles east and west of Rheims in two parts: the first against French sector on a 35 mile front between Chateau-Thierry and Vreigny; the other east of Rheims between Punnay and Maisons de Champagne on a front of 25 miles. On the front west of Rheims the Germans penetrated to an average depth of

2 to 3 miles on a 20 mile front into the French line and took Chery and other villages. On the east enemy was held on practically the whole front. The Marne crossed at Fosseux and other points. Hayti declared war on Germany. British and German delegates to the Hague Conference reported to have reached an agreement, subject to ratification. **16.** Franco-American troops regained ground south of the Marne north of the front St. Azan-la Chapelle, again reaching heights overlooking the Marne Valley. F. M. Conrad von Hotzendorf, Austro-Hungarian Commander-in-Chief, retired. Attack on Emperor Nicholas II. by Bolsheviks. Trial of M. Mavy begun in Paris. **17.** C.M.C. conferred on Gen. Pershing, Commander-in-Chief of U.S. Expeditionary Force in France; the meeting on Chass, Bliss and March. Over 30 German divisions took part in battle; armies of Gers, Moselle and von Boehm, and reserves from Prince Rupprecht's troops; force under the titular command of German Crown Prince. Austrians again advanced their line E. of Villers-Bretonneux on a front of 2,000 yards; Germans progressed to Epernay and reached Montreuil and Chateau de Reims, subsequently lost; E. of Rheims Germans defeated S. of Ponnay. **18.** Brilliant counter-stroke by Gen. Foch on a 27 mile front, from Fontenoy to Belleau. French Army Corps, under Gen. Mangin, in the N. reached the Mont de Paris, near Soissons, and to the S. the valley of the Crise, five miles E. of Bazancourt, advancing to depth of eight miles, taking 5,000 prisoners, 30 guns; S. French, and U.S. troops co-operating, under Gen. Degoutte, advanced five miles and took over 20 villages; Germans S. of the Marne again pushed to the St. Azan-la Chapelle. Monthodon line, but were held in the Rheims district; Ponnay retaken by French under Gen. Gouraud, who defeated attack of Prussians Guards N. of Prosnes. **19.** French, by hard fighting on the Soissons-Thierry line, increased their gains on a 20 mile front and depth of a mile, giving them the command of the main road from Soissons to Chateau-Thierry; total prisoners 20,000, 400 guns. Montvassier, S. of the Marne, retaken by Allies; French held Magazine de Paris, captured Neuilly, and extended their gains further north. U.S. armoured cruiser *Salt Dog* sunk near Fire Island, 50 miles off New York; 1,183 survivors, six missing. Arrival in London of Mr. H. C. Hoover, U.S. Food Controller, to attend Conference of Allies on food supplies. C.M.C. conferred on Vice-Adm. Sims, U.S. Navy. Houdins declared war on Germany. **20.** Germans recrossed the Marne. White Star liner *Justitia* torpedoed and sunk off N. coast of Ireland after 24 hours' sub-born fight with U-boats; one sunk by British destroyer *Mormo*; 10 lives lost. **21.** Recapture of Chateau-Thierry by French; British, French and Italians between the Marne and Rheims captured the Bois de Comton and advanced down the valley of the Aisne. Mass meeting of munition workers, held at Birmingham, passed a resolution to "down tools" on the 24th, unless the embargo placed by the Ministry of Munitions was removed. Notice to workers issued by Ministry of Munitions posted at Coventry, Manchester and Birmingham, appealing to the patriotism of the men. Reply of Mr. Balfour to Count Hertling's "Belgium a pawn." **22.** Passage of the Marne forced by Allies at Chassins and Passy, near Dormans; Germans in retreat to N. and S. of Fere-en-Tardenois, five or six

miles beyond Château-Thierry: powerful German counter-attacks between the Ourcq and the Marne repulsed, and Gen. Dégoutte's forces pressing forward, passed La Croix and Epieds; E. of Rheims Gen. Gouraud reoccupied all his former positions between the Suippes and Massignes. Resignation of Lord Lee, Director-Gen. of Food Production. Threatened strike at Coventry postponed; visit of the King to the Grand Fleet. **23.** Forced retreat of Germans in the Marne salient; N. of Ourcq enemy pressed back on a front of two miles to W. outskirts of Taux; S. of the Ourcq Germans defeated in a heavy battle, and French line well pressed forward towards Fère-en-Tardenois. French advance on a 4 mile front between Montdidier and Amiens towards the Arve Valley; Mailly-Raineral, Saurillers, and Aubvillers taken. Resignation of Dr. von Seidler and Austrian Cabinet. Armed cruiser *Marmora* torpedoed, 100 lives lost. Strike of 12,000 men at Coventry in defiance of the local Joint Committee. **24.** Franco-Americans N. of Château-Thierry drove the Germans another two miles towards Fère-en-Tardenois; progress along the Marne in the Forest of Fère between Chartèves and Jaulgonne. French and Italian troops fighting in Albania during two months occupied the whole of mountainous region overlooking the banks of the Derolf. Colonial Secretary announced that War Cabinet had decided on a scheme of preference within the Empire. New scale of separation allowances sanctioned by War Cabinet. **25.** Forest of Fère and La Croix Farm, Oulchy-le-Château, and Villemontoire taken by Allies. Gen. Garcia Rosada appointed Commander-in-Chief of Portuguese army in France. Conference of National Engineering and Allied Trades Council in Leeds decided on a general strike on July 30. **26.** General retreat of Germans on the Marne towards Epernay; capture of Bazancourt by Scottish division. Conclusion of the Empire War Conference; delegates received by King at Buckingham Palace. **27.** Spread of enemy retreat and pursuit by Allied cavalry. **28.** Advance of Allies on a 20 mile front, and depth of 4 miles: the Ourcq forced: capture of Fère-en-Tardenois. **29.** German positions N.E. of Oulchy-le-Château stormed by French: Grand Rozoy captured. **30.** Stubborn German resistance: Allies captured Remigny and St. Gemme in the centre, and Australians, Merris on the Meteren front. **31.** Fierce hand-to-hand struggle between U.S. troops and Prussian Guards and Bavarians for the possession of Seringes and positions to the S.E.: Seringes surrounded and captured by Americans.

Aug. 1. Officially stated that since July 15, the date of the German offensive, to July 31, the enemy lost in prisoners 33,400 men, including 674 officers. Allies on all fronts during July brought down 844 enemy machines: the Germans claimed 310. Advance of British and French north of the Ourcq; ridge between that river and the Aisne taken, and progress of two miles made along the Fère road, 600 prisoners captured: Clèrges, further east, also won. In the House of Commons, Mr. Bonar Law introduced a Vote of Credit for £700,000,000: particulars given of the indebtedness of our Allies: total £1,402,000,000. **2.** Germans again in full retreat in the salient south of the Aisne, from which he began to retreat July 31, with the Allies in full pursuit. Soissons, evacuated by French May 29, taken: due of the Crise held by the Allies: farther south

Arcy and Coulonges captured: between the Arde and the Vesle, they held Gueux and Thillois, advancing six miles and recapturing 50 villages. Enemy's whole line north of Hartennes to Soissons rolled up. Japanese Government decide, in concert with the U.S. Government, to land troops at Vladivostok. British and French, naval and military, landed at Archangel. **3.** British ambulance transport *Warilda* torpedoed: 112 wounded men drowned. Germans driven across the Vesle: Allied advance on a front of 30 miles to Fismes. Enemy withdrew behind the Ancre, and surrendered Hamel and Dermancourt. British troops landed at Vladivostok. **4.** The King and Queen, with both Houses of Parliament, and representatives of the Dominion Government, attended a Special Service of Thanksgiving and Intercession, at St. Margaret's, Westminster, on the occasion of the fourth anniversary of the war. Messages to and from the Allies passed between the King and their respective rulers. "British Day" observed in the United States. U.S. Anniversary Message to the British Empire "Hold fast." Fismes taken by U.S. troops. Vesle crossed by French light troops. Prisoners taken on the Marne front, to date over 40,000. **5.** Five German airships over the East Anglian coast: no bombs dropped, and one, the most valuable of the German Zeppelins, brought down in flames, and their best commander, Capt. Strasser, killed. Arrival at Kingston of 13 U.S. Congressmen, members of the Committee of the Naval Forces of the House of Representatives, on a tour of inspection. Notice given by the Home Office that under D.O.R.A. any person not a natural born subject is prohibited from making any change of name, except by permission of the Secretary of State. Bill introduced in the U.S. Congress for the extension of the draft age downwards from 21 to 18, and upwards from 32 to 45. Title of "Citizen of Honour and Friend of the Belgian Nation" conferred by King Albert on Mr. Hoover, U.S. Controller. **6.** Gen. Foch made a Marshal for his victorious conduct of the second battle of the Marne. Attack on British front south of Morlancourt by Germans, who retook part of the ground recently gained by the Australians. Visit to the U.S. Fleet in British waters by the King and Queen of the Belgians. Arrival of the Earl of Reading from the U.S. **7.** British holding the sector south-west of Morlancourt attacked and regained all the more important part of the ground won by the Germans on the 6th. French in co-operation with U.S. troops crossed the Vesle between Braine and Fismes. French advance north of Rheims between Rethel and Laon. Reviewing the war position by sea and by land, Mr. Lloyd George, in the House of Commons, stated that "before the battle of March 21 was over, in a fortnight's time, 268,000 men were thrown across the Channel. In a month's time 355,000 men had crossed. The army in France had now more guns and machine-guns than it ever had." **8.** 4th British Army, Sir H. Rawlinson, and the 1st French Army, Gen. Dénabeney, aided by Tanks, stormed the German lines on a 20 mile front east of Amiens, from region of Morlancourt, north of the Somme, south to Braches, on the Arve, 2½ miles south of Moreuil. Allied line being carried forward to Plessier, Beaucourt, Caix, and Framerville: greatest depth of advance seven miles: 100 guns, and 7,000 prisoners captured. British aeroplane

squadron co-operated with other arms in the battle. Parliament adjourned to Oct. 15. Important speech by Mr. Balfour on German militarism, the obstacle to peace. Labour delegates refused passports, by the Government, to visit M. Troelstra, the leader of the Dutch Socialist Party. 9. Rapid progress made by Franco-British Armies on the front east of Amiens. French striking south captured Pierrepont, $4\frac{1}{2}$ miles north of Montdidier, and advanced to Arvillers. French, Canadian, and Australians south of the Somme took Maharicourt and carried the Allied line by Arvillers to Rosières, which was captured bringing their line within two miles of Chaumes. 24,000 prisoners and over 200 guns taken. French 3rd Army struck south-east on the German flank near Montdidier. On the Lys, further north, more positions won by the enemy in the April offensive evacuated: British advanced from west of Merville to Locon. Fismettes, on the Vesle, taken by U.S. troops. Simultaneous raids on a large scale made by British troops in Italy, with the vigorous co-operation of Italian and French artillery; southern fringes of Asiago town reached. A "Declaration to the Peoples of Russia," issued by the British representatives at Vladivostok, Murmansk, and Archangel, declaring that they had come to save them from the Germans, and had no intention of acquiring territory or imposing any political system on Russia. Appeal of the executive of the Miners' Federation of Great Britain to miners to increase the output of coal by avoiding all unnecessary absenteeism from work. 10. Advance of Allied Armies continued over the whole front S. of Montdidier to the Ancre: La Tronquoy, Le Fretoy and Assauvillers and Montdidier captured. Bouchoir, Méharicourt and Lihons taken by Canadians and Australians, who also entered Raincourt and Proyard. Boulogne la Grasse massif carried and Allied lines advanced E. of Bus; Halu, on the railway from Roye to Chaumes captured. 11. Allies gained ground between the Avre and the Oise in spite of strong resistance by the enemy. S. of the Avre Marquenvillers and Grivillers were occupied, and the line Armancourt-Thilleloy reached. Encounter between British naval light forces and aircraft reconnoitring the W. Frisian coast and enemy aircraft: a German airship brought down in flames, six British motor-boats lost. First Japanese contingents arrived at Vladivostok. 12. French took Belval, S. of Lassigny; severe fighting for the Bois des Loges. 80,000 prisoners taken since July 18. Return of King George to England after a nine days' visit to the front. Czecho-Slovaks recognised as an Allied nation by the Government. Japanese Foreign Office announced that Japan and China had agreed on a course of action to check enemy menace on the Manchurian frontier. 14. Evacuation by Germans of positions on the Ancre front; they abandoned Beaumont Hamel, Serre, Puisieux and Bucquoy. French took Ribecourt on the Oise. 15. Lassigny massif completely captured by the French. 34,000 prisoners and 700 guns taken since Aug. 8. The Ancre crossed by British, who progressed to the N. between Beaucourt-sur-Ancre and Puisieux. U.S. Government severed all relations with the Bolshevik Government of Russia. Air raid on Paris by German aeroplanes: many bombs dropped and some casualties. Spanish Note to Berlin announced that any further losses to Spanish shipping through German submarines, Spain

would compensate herself by confiscating an equal amount of German tonnage in Spanish ports. Announced that British held the road from Baghdad, through Persia, to Enzeli, on the Caspian Sea, and that detachments had been sent to Baku. 16. Strong German attack on new British position at Dammy, repulsed with great enemy loss; British and French pushing forward in this sector made substantial progress towards Fresnoy-les-Roye and Fransart, and W. of Roye penetrated deeply into Loges Wood, an important part of the enemy's defensive positions between Roye and Lassigny. Gen. Obani, Japanese Commander-in-Chief of the Vladivostok force arrived at Vladivostok. Sir Charles Eliot appointed British High Commissioner in Siberia. War Bonds attained a total of £1,000,000,000. 17. Attack on a nine mile front by Gen. Mangin on German positions in the angle between the Oise and the Aisne with Soissons on the right and Lassigny on the left: advance at some points about two miles. Arrival in London of six U.S. Congressmen on their way to the front to investigate the American war effort in Europe. Arrival of U.S. troops at Vladivostok. Conclusion of the trial at Chicago of 101 leaders of the Industrial Workers of the World, who were found guilty of conspiring to disrupt the nations' war programme. Capture of Irkutsk by the Czecho-Slovaks assisted by Siberian troops. 18. British advanced on a front of four miles, and 1,000 to 2,000 yards depth between Vieux Berquin and Bailleul. Oulstersteene captured and 400 prisoners. Visit to E.-M. Sir Douglas Haig by President Poincaré, who conferred on him the Médaille Militaire. Official statement that each Dominion is to have a resident or visiting Minister in London who will be a member of the Imperial War Cabinet. 19. British advanced and entered Merville. Le Hamel taken by French. 20. Between the Oise and the Aisne Gen. Mangin further advanced to the depth of three miles and reached Lombray, 8,000 prisoners. Names of the new Committee of Representatives established by the Inter-Allied Food Council, consisting of the Food controllers of the U.K., France, Italy and the U.S., published. 21. Third British Army, under Gen. Byng, attacked N. of the Ancre on a 10 mile front and reached successively Beaucourt, Bucquoy, Ablainzeville, Moyenneville, Achiet-le-Petit and Courcelles. The French, under Gen. Mangin, advanced to Cuts, Camelin and Pontoise; Noyon outflanked and Laval nearer Soissons captured. 22. S. of the Oise to Quierzy Gen. Mangin progressed and took St. Aubin and Pommiers. Between the Ancre and the Somme, on a front of six miles from N. of Bray to Albert and to a depth of two miles, the British struck anew at the enemy. 23. British fighting on a 30 mile front from Mercatel, five miles S. of Arras to Lihons: they captured Gomiécourt, Ervillers, Hamelincourt, Boyelles and Boiry-Becquerelle, on the left, Achiet-le-Grand, Bhaumont and the ridge commanding Ires carried on the left centre, S. of the Somme they took Herleville, Chuignes and Chuignolles, penetrating the German lines to a depth of over two miles and capturing thousands of prisoners; Bray taken by Australians. 24. S.E. of Albert British captured Thiepval Ridge, La Boisselle, Orvillers, Mouquet Farm, Thiepval and Grandcourt, outflanked Miraumont, carried Loupart Wood and Biefvillers, and reached the outskirts of Bapaume at Avesnes: Henin-sur-Cojeul and St. Leger also taken.

25. Further British advance: Neuville Vitasse and Favreuil carried, and the whole of the road from Albert to Bapaume, with Martinpuich, Le Sars, Warlencourt, Le Barque, Mametz and Mametz Wood captured with 17,000 prisoners.

26. British attack spread northwards along both banks of the Scarpe. German first line carried S. of Gavrelle; outskirts of Roeux reached; S. of the Scarpe, Orange Hill, Wancourt and Monchy were captured with the high ground between Croiselles and Kemmel. Suzanne and Cappy on the Somme taken.

27. Roy captured by French under Gen. Débeney, after repulsing the previous day vigorous enemy counter-attacks. Progress made on the British front N. of the Scarpe. Gavrelle was captured; in the centre Beugnatre, N.E. of Bapaume was reached; in the S. Maricourt was taken. Many other places also captured in the advance, including Longueval, Delville Wood, and Bernafay Wood, Chérisy, Sart Woods, Roeux and Gavrelle. Admiralty announced during the period Aug. 19-25 numerous enemy naval bases were heavily bombed by R.A.F. contingents operating with the Navy, including Zeebrugge and Bruges Docks. Mr. Ryan appointed U.S. Asst. Sec. of War, with the title and functions of Director of Air Service.

28. German retreat from most of their positions on the Scarpe to above the Aisne; Canadians S. of the Scarpe took Boiry-Notre Dame, Pelves and Croiselles; Hardecourt and Curlu on the N. Bank of the Somme carried; Chaulnes, Nesle, Pont l'Évêque, Suzoy, Vaucherelles and Porquericourt taken by the French. Order of the Day issued by Gen. Pershing praising the exploits of the 1st and 3rd Army Corps on the Marne. Retirement of Mr. Page, U.S. Ambassador in London (April 1913-Aug. 1918), announced by Foreign Office. Arrival in England of Mr. Samuel Gompers, President of the American Federation of Labour. Dispatch from V.-Adm. Sir Roger Keyes, commanding the Dover Patrol, dealing with the second blocking operation against Ostend on the night of May 9-10, when the *Vindictive* was sunk between the harbour piers, with a list of officers distinguished by their gallantry, and awards including three V.C.'s.

29. Bapaume entered by New Zealand troops, and Noyon taken by the French after severe fighting. Gen. Mangin across the Ailette. British troops fighting on the general line—Comblès, Beaulencourt, Fremicourt. Committee on revocation of naturalised aliens appointed by the Home Secretary. Soviet decree published ordering the arrest of all British and French subjects in Russia between the ages of 18 and 40. First dispatch of Gen. Marshall issued, covering six operations from Oct. 1, 1917, to Mar. 31, 1918. British Embassy at Petrograd attacked by Bolshevik troops. Capt. Cromie, D.S.O., the Naval Attaché, killed. Princess Mary appointed Col.-in-Chief of the Royal Scots (Lothian Regt.).

30. Somme S. and W. of Péronne crossed by British, who entered Bailleul. Haucourt taken by Canadians. French crossed the Canal du Nord and entered Chevilly: E. of Noyon they captured Mt. St. Siméon. Strike of London policemen.

31. German retreat extended on almost his whole front from S. of Ypres to Soissons, except between La Bassée and Lens, and along the Somme S. of Péronne and Canal du Nord to N. of Noyon: Mt. St. Quentin taken by Australians: Campagne, on the Canal du Nord, captured by French: above Soissons, Gen. Mangin captured Juvigny and other impor-

tant positions. Mt. Kemmel, Douliu-le-Verrier and Steenwerk evacuated by Germans. End of police strike: resignation of Sir E. Henry, Chief Commissioner, succeeded by Maj.-Gen. Sir C. Macready.

Sept. 1. Enemy in retreat on almost his whole front from S. of Ypres to Soissons, except between La Bassée and Lens. Allies progressed and captured Péronne and Saily-Saillisel: Bouchavesnes and Rancourt taken by British: recapture of Bullecourt and Heudecourt: capture of Neuve Eglise on the Lys front. 57,318 prisoners, including 1,223 officers, and 657 guns, 5,750 machine guns, 1,000 trench mortars taken by British in France during August. Maj.-Gen. G. F. Ellison appointed Q.M.G. to Forces in Great Britain.

2. Great German system of defences, the Drocourt-Quéant line, covering Douai and Cambrai, broken through on a front of six miles by Canadians: capture of Dury, Cagnicourt, Villiers, Le Transloy and St. Pierre Vaast Wood. French, under Gen. Mangin, advanced and took Neuilly and Torny Sorny.

3. English, Scottish and Naval force, under Gen. Fergusson, penetrated Hindenburg defences of Quéant and Prouville: Drocourt taken: advance on Inchy and Moeuvres: Baralle, Rumancourt and Léluse captured. The Somme crossed by French at Epenancourt. Germans evacuated Lens.

4. British still advancing E. on a wide front between the Scarpe towards Cambrai: enemy fighting rearguard actions: Moeuvres and Ecourt taken by British: Ruyaulcourt taken by New Zealand troops: N., capture of Ploegsteert and Hill 62. Supplement on agreements to Brest-Litovsk Treaty signed by German and Bolshevik Governments.

5. French under Gen. Humbert advancing N.E. from Noyon to St. Quentin. The Aisne between Condé and Vieil-Arcy reached by French. Khabarovsk, Bolshevik base against Vladivostok, taken by Japanese.

6. French between Somme Canal and the Oise captured the whole of the Autrécourt massif, Ham, and railway junction of Chauny. Germans in rapid retreat from the line of the Somme, from Péronne S. to the Hindenburg line, from which they opened their offensive Mar. 21.

7. Hurried retreat of Germans continued on a wide front towards St. Quentin, La Fère and Laon before the armies of Gens. Débeney, Humbert and Mangin. Publication by Admiralty of commanders' names of 150 U-boats disposed of by Navy.

8. 150,000 prisoners taken since the Allied counter-offensive of July 18.

9. Crozat Canal crossed by French: strong counter-attacks by Germans near Laffaux, between Soissons and Laon, repulsed.

10. Special Order of the Day issued by Sir Douglas Haig on the completion of a month's most successful fighting: 75,000 prisoners and 750 guns captured in four weeks.

11. Attilly, Verdun and Vendelles, between Cambrai, taken by British. Arrival in Archangel of U.S. troops to assist Allies in restoring order in N. Russia.

12. Gen. Pershing, with 1st U.S. Army, co-operating with French Army, supported by Tanks, attacked Germans on both flanks of St. Mihiel salient: on the S. on a front of 11 miles they carried Thiancourt, captured Pannes and Nousard and gained Bois de Gargantua: W. Combres carried. British S.W. of Cambrai captured Havrincourt, Trescault, Gouzeaucourt Wood and Moeuvres. Union Castle liner *Galway Castle*, with over 1,000 on board, including many women and children, torpedoed without warning: 154 passengers and

crew missing. Important speech by Mr. Lloyd George at Manchester—"the worst is over, but the end not yet; casualties one-fifth of those in the advance over same ground in 1916." 13. Registration in U.S. of 13,000,000 citizens between 18 and 21 and 32 and 35 for military service. Reign of terror in Petrograd reported: many anti-Bolsheviks put to death. 14. Turks attacked Baku: evacuated by British. Germany stated to have made an offer of "peace" to Belgium: reversion to neutrality; maintenance of old commercial treaties; "Flemish question" to be dealt with; no indemnities, no reparation. 15. German retreat between the Meuse and Moselle continued; enemy after evacuating the St. Mihiel salient retiring towards the Conflans-Metz-Longwy railway on a 33-mile front, closely pursued by Americans and French. Note addressed by Austro-Hungarian Government to all belligerent and neutral Powers, communicated in special form to the Holy See, proposing a conference between representatives of the States at war to discuss in a "non-binding" manner, but secretly, the general conditions of peace. 16. President Wilson's reply to the Austrian Note. Offensive by French and Serbians in the Balkans: first Bulgarian position on the Dobropolje front carried. Air raid on Paris: six killed, 15 injured, two enemy machines brought down. Mr. Balfour in a speech described the Austrian "peace" proposal as a cynical attempt to divide the Allies. Recognition by Japan of the Czecho-Slovaks as an Allied and belligerent army. 17. Austrian "peace" conference proposal contemptuously rejected by French Government. 18. Outer defences of the Hindenburg line stormed by British 3rd and 4th armies: Lempire captured. French on a six-mile front and depth of 1½ miles advanced and took Saxy Wood and Fontaine-les-Clères. Bulgarians in retreat before Serbian cavalry. Blagoveshtchensk and Alexievsk occupied by Japanese. 19. Moeuvres recaptured. Appointment of Mr. John Davis, U.S. Solicitor-General as U.S. Ambassador to London announced. 20. Nazareth occupied. Benay, S. of St. Quentin, taken by French. Dr. Page, U.S. ex-Ambassador presented with the freedom of Plymouth, enclosed in a silver model of the *Mayflower*. 21. Further advance of Gen. Allenby in Palestine. Franco-Serbian armies reach the Vardar. 22. 7th and 8th Turkish armies *hors de combat*. 23. Withdrawal of 4th Turkish Army towards Amman: Colonial and Jewish troops in pursuit reached Es Salt: Capture of Acre and Haifa: Maan occupied by King Hussein's Arabs. Prilep entered by French cavalry: Bulgarians fleeing in disorder N. from Monastir to Veles harassed by Allied troops. 24. Francilly-Selenay captured by French. Resignation of Japanese Cabinet announced. Congratulations from the citizens of London to Gen. Allenby on his splendid victories in Palestine. Spread of S. Wales railway strike. 25. "Italy's Day" celebrated in London. Armistice proposed by Bulgaria. Ishtip and Veles captured by Serbians: British enter Bulgaria opposite Kosturino: 10,000 prisoners, 200 guns taken. Selency captured by British: Tiberias on the Sea of Galilee, and Amman on the Hedjaz railway occupied by Gen. Allenby: 45,000 prisoners, 265 guns to date. 26. French and U.S. armies attacked enemy in the Argonne on a front of 40 miles and captured Montfaucon, Varennes and numerous villages. Strumnitza entered by British. 27. Hinden-

burg line in front of Cambrai broken by British, who took Beaucamp, Graincourt and other important enemy positions: Bourlon Wood carried by Canadians: Franco-Americans progressed in the Champagne: 23,000 prisoners captured. 28. British and Belgians under King Albert, attacking from Dixmude to Ploegsteert on a front of 23 miles, captured Houthulst Forest and numerous prisoners: British warships and many aeroplanes co-operated on Zeebrugge and vicinity. Further French advance in Champagne and on the Aisne: withdrawal of Germans to the Ailette. Armistice with view to peace negotiations asked for by Bulgaria. 29. Anglo-Belgian armies progressed and occupied Dixmude, Passchaendale, Gheluvelt and Messines: outskirts of Cambrai reached by British, who broke the Hindenburg line between Cambrai and St. Quentin: 22,000 prisoners to date. New Japanese Cabinet formed with Mr. Kei Hara as Premier. 30. Surrender of Bulgaria: Allied terms accepted. "Feed the Guns Campaign" to raise second War Loan of £1,000,000,000 opened by the Chancellor of Exchequer.

Oct. 1. Resignation of Count Hertling, German Imperial Chancellor, and all German secretaries, announced. Damascus entered by British: 7,000 prisoners. Fall of St. Quentin. Advance of Gen. Gouraud towards Challerange in the valley of the Aire: Aure and Marfaux taken; further progress and capture of Binarville, Condé, Autry and Vaux. British flag hoisted at Ebeltoft Harbour, Spitzbergen. 2. Rumilly-Beaurevoir-Fonsome, enemy line of defences between Cambrai and St. Quentin, broken through by Australians: swift retreat of Germans between the Vesle and the Aisne as far east as Rheims; enemy withdrawal from Armentières, La Bassée and Lille: British cross the Lys between Wervicq and Comines. Italian and British warships attacked Durazzo, sank an Austrian t.b.d., and completely destroyed the base. 3. Prince Max of Baden appointed successor to Count Hertling. British infantry, with Tanks, attacked on an 8 mile front and advanced some 3 miles north of St. Quentin. Gen. Moirer appointed Military Gov. of Paris. 4. German Note by Prince Max sent to Pres. Wilson proposing an armistice to open peace negotiations on the basis of Pres. Wilson's 14 points of Jan. 8; Germany now to have a "People's Government"; offer to join the League of Nations. Advance of British on a 20 mile front east of Armentières and Cambrai; French and U.S. troops advanced between Rheims and Verdun; in Champagne they captured Challerange. Abdication of King Ferdinand of Bulgaria in favour of his son Prince Boris. Japanese steamer *Hirano Maru*, torpedoed off the Irish coast: 28 saved out of total 320. 5. Gen. Gouraud's left wing and centre and the 5th Army on their left, north of Some-Py, east of Rheims, flung back the enemy on a 25 mile front, freeing Rheims and capturing Brumont and Nogent l'Abasse; capture by Gen. Berthelot's army of the old French line of the Aisne-Marne Canal; German retreat on a front of 30 miles to the line of the Suippe, surrendering without a fight Morouvillers Ridge. British, east of the breach in the Hindenburg line, advanced and captured Montbrehain, Beaurevoir, and high ground to the north: 1,000 prisoners taken; Germans forced to retire from the Scheldt Canal. Germans in their retreat towards Lille set Douai in flames, and were systematically laying waste the country. Capture of Vrange by Franco-Serbian

troops. **6.** Solemn warning to Germany issued by French Government "that the authors and directors of German crimes on French territory, such as the treatment of refugees, and the destruction of towns, will be held responsible, morally, judicially and financially. . . . The account with them is opened and will have to be settled." Fresnoy, north of the Scarpe, taken by British; by its capture, enemy now definitely on a 100 mile front from Dixmude down to the Oise, behind the line from which he started for the "Kaiser's Battle" of March 21. Sir Douglas Haig awarded the American Cross of Honour. H.M. armoured mercantile cruiser *Otranto* carrying U.S. troops lost by collision: 431 drowned, including 251 soldiers; 367 rescued. Purchase of the *Daily Chronicle* by Sir Henry Dalziel, M.P. **7.** Berry-au-Bac taken by French, and north-east of St. Quentin, Remancourt, Oppy and Blache St. Vaast captured by British. Rapid advance from Damascus of Gen. Allenby, who reported that he, with the King of the Hedjaz, had since Sept. 18 taken 79,000 prisoners. Sidon occupied by British, and Beirut by French. German Armistice and Peace Note, with its Austrian appendix, received in Washington. Evidence confirming the non-democratic sympathies of Prince Max brought to light by a letter to a relative Jan. 18, in which he mocked at "parliamentarisation," and demanded that Germany should "take the enemy by the throat," and exact as much as possible from the Allies. **8.** Full text of Pres. Wilson's reply to the German Peace Note published; President firmly refuses an armistice until all the territories occupied by Germans have been evacuated by them, before the discussion of peace terms. New Turkish Cabinet; Tewfik Pasha appointed Grand Vizier in place of Talaat Pasha, and Izzet Pasha, War Minister, in place of Enver Pasha. British, French and Americans delivered a strong attack on a 21 mile front from Cambrai to St. Quentin towards Le Cateau and Guise. **9.** Attack resumed on the whole front of the 3rd and 4th Armies; 23 German division defeated between Cambrai and St. Quentin; Cambrai taken by Canadians of the 1st Army. Grand Ham and Laupon in the valley of the Aisne captured by French. **10.** Fall of Le Cateau to British, who pushing north-east reached Solesmes-Le Cateau road; great progress made between Lens and the Scarpe towards Douai. Line of the Oise, east of St. Quentin, reached by French. Prince Friedrich Karl elected King of Finland by Finnish Lapland. Death of Gen. Alexieff, ex-Commander-in-Chief of Russian Army. Irish mail boat *Leinster* from Kingstown torpedoed: 650 passengers, 70 crew; 527 lost, 193 saved. **11.** Germans forced by British thrust beyond Le Cateau to retreat on the whole front between Soissons-Laon road and Grand Pré, they evacuated the Chemin des Dames, left the Suipe, and the main pass through the Argonne; enemy in Champagne forced to retreat on a front of 37 miles, pursued by French cavalry and infantry; the Suipe crossed and enemy first positions captured by French. British east of Cambrai won the high ground at St. Aubert; north of the Scarpe they advanced through the north stretch of the Drocourt-Quéant line. Big raid by Allied troops on Austrian positions north of Monte Grappa. King sent a message of congratulation to Sir Douglas Haig. **12.** U.S. troops overseas numbered over 1,900,000. Nish occupied by Allies and the direct line Berlin-Constantinople

broken. **13.** Laon and La Fère occupied by French; retreat of Germans on a front of 100 miles from the Oise east of St. Quentin to the Argonne; St. Gobain fort evacuated; whole of the bend of the Aisne from Rethel, west bank of the Semois Canal captured by British near Douai. Tripolis occupied. Capture of 50,000 prisoners and over 2,000 guns by Allies in the Balkans since Sept. 19. **14.** Belgium, British and French forces, acting under King Albert, resumed the offensive on a front of 28 miles from Dixmude on the north to Wervicq in the south, the British fleet co-operating off the Belgian coast; Merion, Rostelen and Isenghien, taken. Sissonne, on the Hindenburg line, captured by French. Durazzo occupied by Italians. **15.** Pres. Wilson's reply to Germany. The Allies and U.S. must judge about "the process of evacuation and conditions of an armistice." Germany warned to expect no armistice while German outrages on sea and land continue. The ruling power in Germany, too, is an arbitrary power. Haute Deule Canal, south-west of Lille, crossed by British. **16.** Wavre, Combrès, Halluin and Welveghien captured by 2nd British Army, under Gen. Plumer, fighting east of Ypres in the Valley of the Lys; northern half of Cambrai and river bank to Bavienva secured. Ingelhamster and Lichtervelde taken by French, who also entered Kortenaak. In three days Gen. Plumer advanced 8 miles, took 4,000 prisoners, and 150 guns. **17.** Germans in retreat on the whole of the Flanders front, and south as far as Douai; Ostend evacuated; Vlissingen. Sir Roger Keyes landed from the Fleet, and Belgian troops entered; visit of King and Queen of Belgium. British troops of 5th Army, Gen. Greenwood occupied Lille, and breaking German resistance on the Haute Deule Canal entered Douai. British and French carried the line of the Selle and part of Le Cateau. **18.** Allied troops operating east of Ostend captured Blankenberghe. British crossed the Semois north of Coutrai. British-Americans continuing their offensive from Le Cateau to Belgium, co-operating with French, took Ribemont and Wassy. Operations against the Turks on the Tigris by three columns under Gen. Marshall. Bolshevik force, between 2,000 and 3,000, defeated in North Russia by British troops on the Dvina; Allied troops in Murson region reported advancing on Samara, south-west of White Sea. **19.** Reply of Pres. Wilson to the Austrian Note published; new autonomy for Czech-Slovaks and Jugoslavs no longer an adequate basis for peace. Zeebrugge and Bruges occupied by Belgians; Dender taken by 1st British Army. Hunting line on a front of 3 miles broken through by French operating between the Oise and the Seme. **20.** Belgians east cleared of Germans, retreating east towards Antwerp and still retiring from Dutch frontier to south of Valenciennes; British 2nd Army close to the Scheldt. Enemy on the Selle attacked by English, Scottish and Welsh troops from Dinain to Le Cateau, and passage of river forced; 3,000 prisoners. Franco-Serbian troops close to flanking near Roumanian border. **21.** Reply by German Government to Pres. Wilson dealing with the evacuation of North France and Belgium, and the charges of illegal and inhumane actions against the German sea and land forces, and the status of the German Government. Germans find temporary refuge behind a line of rivers and canals from the Dutch frontier to St. Amand, north of Valenciennes, the Lys Canal, the Lys

and the Scheldt and its canals. Resignation, on account of illness, of Lord Beaverbrook, Minister of Information. **22.** French and Belgians attacked along the line of the Lys Canal towards Ghent; Canal crossed and 1,100 prisoners taken. French advance on the Serre front. West suburb of Valenciennes entered by 1st British Army. Lord Northcliffe, in a speech to a large gathering of U.S. officers, uttered a warning that the great German peace offensive, now in progress, might prove more dangerous than the offensive in the field earlier in the year: "no haggling with Germany about peace terms." Despatch from Sir Douglas Haig published, dealing with the reasons for the retirement of the 5th Army. **23.** Great attack opened by 3rd and 4th British armies east and north-east of Le Cateau on a 20 mile front to a depth of 4 miles; between Valenciennes and Tournay, 1st British Army pushing through Ralsmer Forest captured Bruay, Bicharies and Espain. The Souche crossed by French, overcoming stubborn resistance of the enemy. Mr. Balfour, speaking in London, said "that in no circumstances was it consistent with the safety, security and unity of the British Empire that the German colonies should be returned to Germany." The House of Commons, voting on non-party lines, by 274 votes to 25 affirmed that a Bill should be passed forthwith that women should be eligible as M.P.s. **24.** 3rd and 4th British armies extended their advance beyond the Oise-Sambre Canal and the Scheldt, a distance of 17 miles; 7,000 prisoners, 100 guns taken; Landrecies approached and the Forest of Mormal. Offensive opened on a wide front by Italians, French and British against Austrians on the Trentino front and Middle Piave; bitter fighting on Monte Grappa region; Monte Solarolo taken by Italians, and Sisemol by French; 84 officers, 2,791 men prisoners. Reply of Pres. Wilson to Germany, demanding "extraordinary safeguards, because the present war is not under the German peoples' control." **25.** British 1st Army north of Valenciennes advanced through Ralsmer Forest into the Condé loop of the Scheldt. 3rd Army south won eight miles of the Valenciennes-Avesnes Railway; 9,000 prisoners, 150 guns taken in two days' fighting. Between the Oise, Serre, Souche and Aisne rivers French attacked on a front of 25 miles. Piave crossed by Anglo-Italian 10th Army, under Lord Cavan. **26.** Aleppo taken, completing the conquest of Syria, and cutting the Baghdad Railway. South of Valenciennes, Artnes, Famars, and Englefontaine captured by British. Resignation of Gen. Ludendorff. **27.** Austrian reply to Pres. Wilson, accepting his Note of Oct. 18 (refusing to accept mere autonomy for the Czecho-Slovaks) and stating readiness to negotiate peace, and an immediate armistice on all the Austro-Hungarian fronts. Germans retreated between the Oise and the Serre towards Hirsov. Port of Alessio taken by Italians. Mr. Lloyd George and Mr. Balfour with their naval and military advisers, and Col. House, U.S., in Paris for Conference of Allies. **28.** Conference, at Versailles, of Allied Chiefs. Prof. Lammasch appointed Austrian Premier in succession to the Hussarck Cabinet resigned. Piave, in Montello region, crossed by Italians. Kalat Shergat, on the Tigris, taken by Gen. Marshall. Count Andrássy, new Austro-Hungarian Foreign Minister, applied to Mr. Lansing asking him to use his influence with Pres. Wilson, to effect an immediate armistice. **29.** Further progress of great Italian advance

begun Oct. 24 extending from the Brenta to the sea: enemy's successive lines of resistance on the mountain front being overcome: the Allied line carried across the Piave well north of Valdobbiadene and of Conegliano as far as Vittorio; Lower Piave crossed at St. Donà di Piave and Zenson: Austrian Trentino line threatened: 33,000 prisoners and hundreds of guns taken since 26th Oct. Turks heavily engaged by Gen. Marshall five miles north of Kalat Shergat, 50 miles south of Mosul, and routed: 7,000 prisoners. Conclusion of Tigris campaign. Desperate fighting by French for ancient castle of Guise. Important debate in the House of Commons on the treatment of British prisoners at the hands of the Germans. **30.** Czecho-Slovak State proclaimed at Prague: independence of Croatia and all the Southern Slav territories proclaimed in Agram Diet. Surrender of Turkish army on the Tigris. Turkey out of the war: unconditional surrender: armistice signed to take effect from noon next day. Great activity of British air squadrons on the Western front: 82 German machines down: 18 British missing. Mr. Bonar Law joined Mr. Lloyd George at Versailles. National Debt to date £6,875,000,000. **31.** British captures Aug., Sept., Oct., in series of successful battles fought in France: 172,659 prisoners, including 3,957 officers, 2,378 guns, 17,000 machine-guns, 2,750 trench mortars. Austrian Army occupying the Trentino separated and isolated from occupying the Venetian Plains: enemy's only line of communications down to the Piave Gorge from Bellona and along the Val Sugana, 50,000 prisoners to date. Austrians chased back across the Livenza towards the Tagliamento, in the mountainous Asiago, and the whole of strong positions between the Brenta and Piave regained. Austrian Dreadnought *Viribus Unitas*, flagship of the Austrian fleet, sunk by Italians at Pola. End of Dual Monarchy; revolutionary outbreaks at Vienna and Budapest: demonstrations against the Hapsburgs: Hungarian National Government, at Budapest, took over the Government and proclaimed a Republic. Bosnian National Council, at Sarajevo, proclaimed the amalgamation of Bosnia and Herzegovina with the kingdom of Serbia. Austrian commander-in-chief on Italian front applied to Gen. Diaz for an armistice. King and War Cabinet sent a warm message of thanks to Gen. Allenby: the G.C.B. conferred. Nancy bombed by Germans: severe casualties and damage. *The Times* fund to date £11,594,384.

Nov. 1. Versailles Conference opened: naval delegates present. English and Canadians forced the passage of the Rhonelle, captured villages of Maresches and Aulnoy, and, attacking on a 6-mile front, reached S. outskirts of Valenciennes. British, French, and U.S. troops E. of the Lys forced their way to the Scheldt as far as Gavere, 10 miles S. of Ghent: combined push of U.S. and French from the Aisne to the Meuse. Continued retreat of Austrian armies on the whole front of the Venetian Alps and Plain. Imperial decree issued handing over the Austrian Fleet to S. Slav Council at Agram and Pola: Danube flotilla transferred to Hungarian Government. Count Tisza shot at Vienna. **2.** British at Valenciennes: capture by French of Semuy and S. bank of the Canal des Ardennes from Semuy to Neuville. Mass meeting of Trade Unionists, to consider Labour's part in the Peace, held at Albert Hall. **3.** Surrender of Austria, accepting all conditions: armistice signed by Gen. Diaz,

Italian Comm-in-Chief, to take effect at noon, Nov. 4. Mutiny of sailors of German Fleet at Kiel. Advance of French and Americans 8 miles on a front of 30 miles: Neuville, Les Aileux, Noiral, Buzancy, Bois de Tilly, and woods N.W. of Dun, on the Meuse, taken; the Aisne completely cleared of Germans. Italian military and naval forces landed at Trieste: Italian troops in Trent and Udine. Belgians advanced S. of Dutch frontier and took Buncelde and Sleydinx. Prof. Larumach handed over to the Austrian State Council the agreement "so far as it relates to German localities." Hungarian National Council, with Count Károlyi at its head, in power at Budapest. 4. French reached the line of the Ardennes Canal: La Chesne captured: Americans on the right near Beaumont and Stenay: 17 German divisions defeated 5,000 prisoners, 200 guns taken: Great offensive by the 1st, 3rd and 4th British Armies with Army of Gen. Debeney on the right on a front of 30 miles, E. of Valenciennes to Oise: Landreville taken: British half-way through the Forest of Mormal: over 20,000 prisoners, 200 guns captured. The defences of the Sambre-Oise Canal broken through by 1st and 3rd British Divisions operating on the right N. of Oise: several miles E. of Le Quesnoy after fierce fighting. German retreat towards the Meuse, followed by Allies. Sentari entered by Italians. Spread of revolution to Hamburg and other parts of Germany. 5. Rapid retreat of Germans on wide sections of the Western Front: Forest of Mormal occupied by British: Le Quesnoy captured with its garrison of 1,000 men. French advance between the Oise and Aisne towards Hirson. French over the Ardennes Canal: Beaumont taken by Americans. Germans still retreating between the Aisne and the Meuse. In the House of Commons Mr. Lloyd George announced that the Versailles Conference had reached complete agreement as to the terms of armistice with Germany, which the Premier read to the House: Gen. Foch placed in supreme direction of all the forces operating against Germany on all fronts "in the last and decisive phase of the war." Allied reply to Germany through President Wilson: "Germany must apply for the conditions of the armistice to Gen. Foch in the usual military form." Arrived in Paris of Gen. Townshend. 6. Sedan reached by U.S. troops: main lateral line of German communications cut. French captured Verdun and Toul. Ministerial changes: Sir Asquith decides appointed President of the Local Government Board in addition to present office: peerage conferred on Rt. Hon. W. Hayes Fisher, appointed Chancellor of the Duchy of Lancaster. Great German

retreat continued and became general from the Scheldt N. of Valenciennes to the Meuse, 1st, 3rd and 4th British Armies continued their pursuit towards Mons, Mauberge and Avesnes. German delegates left for Western Front to receive Allied terms of armistice from Gen. Foch and Adm. Sir R. W. Keiser. 7. Formal entrance into Valenciennes by 1st British Army: Dun taken N.: Avesnes entered S.: Hammet to the Sambre Valley, reached. Kiel and Hamburg reported to be in the hands of Committees of Workmen and Soldiers: their demand accepted by the German Government: part of the German Fleet, "flying the Red flag" Adm. W. C. Barker, D.S.O., a Canadian, brought 60 enemy aeroplanes, brought down 20, and returned to the British Front severely wounded. Approximate number of German prisoners detailed on the Western Front, Jan. 7, Nov. 5: British, 220,000; French, 140,000; U.S., 50,000; Belgians, 15,000. 8. Resignation of Prince Max of Baden, Imperial Chancellor. Spread of revolution early in Vienne over Germany. Bavaria proclaimed a Republic. Further progress of British W. part of Flanders captured: the Scheldt crossed to the S.: Condé captured: advance towards Mons on both sides of the Aisne Canal: Mauberge taken: 18,000 prisoners, 800 guns taken since Nov. 2 by British. French continued their progress towards Metz and Charville: 3,500 prisoners captured. 9. German envoys received by General Foch. "Armistice" of the Kaiser announced. Revolution in Berlin: flight of King of Bavaria: Kaiser Wilhelm, staying in the Netherlands, announced, "Hesse and other countries report they are suppressing their Governments." "The Emperor, at the head of his army, has decided on the abdication of his Kaiser and such a Government as was desired." Flight of the Kaiser to Holland. 10. French captured 10,000 surrendered Mexicans and crossed the Meuse: few German troops remaining on the front. U.S. troops pushed forward towards Verdun and the Briery basin. Battle of Herfais and Herfais of the Hamburg-Ansicht Line. 11. News received at dawn by Americans. Surrender signed by German plenipotentiaries. 11.15. Armistice signed on all fronts. Allies' terms included the giving up of 6 battle-cruisers, 20 battleships, 5 light cruisers, 50 destroyers, and all submarines, specified number of military guns, 200,000,000,000 evacuation of all invaded countries, release of British prisoners, and the cessation of all sales of the left bank of the Rhine. Messages of congratulation and appreciation sent to Gen. Foch to the Navy, Army, and Air Force. Scenes of great rejoicing in London and the provinces.

THE BANKERS' CLEARING HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31st, 1917, was £16,121,100,000, an increase of £3,415,000,000 as compared with the year 1916. The Town Clearing in 1917 amounted to £2,000,288,000, an increase as compared with 1916 of £3,370,000,000; the Metropolitan Clearing to £1,177,475,000, an increase of £103,451,000; and the Country Cheque Clearing to £2,944,150,000, an increase of £371,730,000. The establishment is managed by a Committee of Bankers—Chairman, Walter Leat; Deputy Chairmen, Laurence Currie; Hon. Secs., R. Holland-Martin, &c.; Acting Managers, P. W. Matthews (Chief Inspector); A. E. Salt (Deputy Inspector).

By G. SIDNEY PATERNOSTER,

Author of "The Great Gift," "Gutter Tragedies," etc.

Definition of Pelmanism.

Pelmanism may be tersely defined as the art of thinking scientifically. More liberally interpreted, the term may be said to denote a practical exposition of mental development at the point of fullest efficiency which has been secured through the scientific training of mind and will-power. Thus the Pelmanist is one who, having passed through a course of mental training, has attained not only a knowledge of his own capabilities, but also a knowledge of how to utilise them to the best advantage, coupled with the power so to utilise them automatically in any and every direction.

The Origin of Pelmanism.

About the origin of the term there is no obscurity. It owes its derivation to the Pelman Institute, which supplies the practical training in the principles of Pelmanism. From this Institute there has indeed arisen the most remarkable educational movement which has been recorded in this or any other country for many generations. Pelmanism is to-day a household word, its principles practised by hundreds of thousands of people, and the enormous vogue to which it has attained can only be explained on the ground that it supplied an adequate response to a conscious educational impulse manifesting itself simultaneously in all grades of society for greater power of self-expression and self-realisation in thought, word, and action.

This impulse was undoubtedly born of the War. The paramount need for efficiency in every department of activity—military, naval, and industrial, became so obvious that many men and women inevitably asked themselves the question whether they personally were as efficient as they might be. To the majority of citizens of the British Isles in pre-war times there could be only one answer to this question. The defective educational methods general only trained the mind fortuitously, while easy conditions of existence were not calculated to awaken dormant capabilities or even to bring awakened powers to full fruition. To those, however, who were brought up against the fact that they were not in a position to get the best out of themselves, the reason why was less important than an efficient remedy. They had the will, and they only needed to be shown the way.

"Truth" and Pelmanism.

At this juncture "Truth" was invited to make an investigation of the training given by the Pelman Institute and of the results of that training. The investigation was undertaken, and the conclusions arrived at were published in an exhaustive report of eight pages which was in effect a whole-hearted recommendation of the Pelman Course of Mind Training as an important means of securing, not only individual, but national efficiency. The reason for this recommendation was found in the general conclusions that the Pelman training "was of the highest educational value, valuable to the well-educated, but still more valuable to the half-educated or the superficially educated, and that there are few

people who would not find themselves mentally stronger, more efficient, and better equipped for the battle of life by a Pelman Course.

This opinion was formed on the following specific conclusions based on the evidence examined:—

- (1) That the course of training is founded on a scientific basis of natural law.
- (2) That it is the product of expert psychological knowledge combined with acquaintance with everyday affairs.
- (3) That it is taught by experienced tutors.
- (4) That it is devoid of technicalities, is adapted to everyday needs, and provides instruction for securing physical as well as mental well-being.
- (5) That there is overwhelming testimony from men and women in all ranks of life to the value of the training, backed up by innumerable specific instances of personal success directly attributable to such training.

The Progress of Pelmanism.

The effect of this recognition of the intrinsic merits of Pelmanism was immediate. Pelmanism was revealed as a national want, and by a strenuous publicity campaign, which has been described by a prominent educationist as "a crusade against ignorance and inefficiency," the possibilities of Pelmanism were made widely known. Up to the publication of this article, some three years ago, the Pelman Institute had for the twenty years of its existence been making sure but steady progress, but the value of its services had been recognised by the few rather than the many. The dramatic nature of the change may be gathered from the fact that to-day over 300,000 students have been enrolled on the books of the Pelman Institute, 70,000 of these being men in the Army and Navy, including amongst them ninety-six generals and twelve admirals. Nor does there seem to be a likelihood of any decrease in the force of the movement, since in the first eight months of the current year (i.e., from January, 1918, to August, 1918, inclusive, close upon 60,000 students, civilians and military, have been enrolled, amongst them being an archbishop and various other Church dignitaries, several judges and Privy Councillors, several M.P.'s, commanders and captains of famous institutions, many of the famous public schools, and many medical men.

The Catholicity of Pelmanism.

These distinguished Pelmanists show the catholicity of the appeal which Pelmanism makes. It is in that respect truly democratic. To every student it offers the means of increasing his mental girth and stature. The clergyman and the mechanic, just as much as the financier and the manufacturer, the sailor on the lower deck equally with the admiral, the private soldier in the same measure as the general, can share in the advantages of a Pelman training. They need not necessarily have the same objective. The ambitious young man who becomes a Pelmanist usually has a more or less material

end in view. He is aware that efficiency spells success, whether in the counting house or workshop, on the lower deck or in the gun-room, behind the counter or in the trenches. Pelmanism is his open door to success in life, and that it has proved to be such there is abundant proof. In the archives of the Pelman Institute are to be found thousands of letters giving direct testimony to material advancement due to Pelman training, such as increased salaries, higher positions, improved business results, and so forth. Many such instances have been published from time to time, though these represent not a tithe of those which could be published.

The Intellectual Appeal of Pelmanism. But it must be manifest that an archbishop or a Privy Councillor, an admiral or a Member of Parliament, cannot become a Pelmanist in order to obtain financial advancement. In such cases the animating motive is the certainty of obtaining a higher intellectual development through the training provided by the Pelman Institute. There is indeed no class, however highly placed or expensively educated, the members of which cannot profitably adopt Pelmanism, and the recognition of this fact is shown by the large number of members of what in previous days was the leisured class who are studying Pelmanism in ever-increasing numbers. Distinguished Pelmanists are many. All ranks of the Peerage, the Bench, and the Bar—in fact, eminent men in all the professions, soldiers, sailors and diplomatists, leaders in society and social service—are finding through Pelmanism a wider intellectual horizon.

The Essence of Pelmanism. Why this result has been attained can be best realised by a knowledge of the underlying principles of Pelmanism. Briefly the central aim of the training given at the Pelman Institute is to develop all the mental faculties in unison. The mind is recognised to be a unit, though exercising a variety of functions. The Pelmanist learns, therefore, to observe things, how to concentrate his attention, then to associate the facts observed and retained in his memory through the concentration, and from the association and reassociation of stored impressions, to develop new ideas by logical process. This is not a mere system of training to develop either the memory power, or will power, or reasoning power separately. Pelmanism realises that all these powers are interdependent, and that one power cannot be developed in isolation from the others. For example, in developing the perceptive faculty, the power of concentrating the mind is *ipso facto* increased. The increased power of concentration automatically strengthens the memory. With an improved memory the imagination is brought into fuller play, and hand in hand with the development of the imagination goes the gift of sympathetic insight. But Pelmanism is more than a system for the development of the perceptive, retentive, and reasoning faculties. The bedrock principles of Pelmanism are, first, the awakening of dormant powers, and, secondly, the focussing of them on a life purpose. It is in this respect that Pelmanism is differentiated from any other system of education. It is the successful method by which these

principles are embodied in the training given by the Pelman Institute which gives it the unique value as a character builder which has been commented on by so many of the eminent men who have made a study of the system.

The Teaching of Pelmanism.

The system of training may be described in scientific terms as psychosynthesis. The method, too, has, in fact, just as sound a psychological basis as the teaching, for it is individually imparted to each student. The course consists of twelve text-books and twenty-two exercises in specific mental training, and by a carefully graded series of physical exercises in which brain and body are exercised in unison and co-operation, a valuable means of obtaining swift physical response to a mental decision. Both text-books and exercises are practical expositions of applied psychology, though they are absolutely free from technicality, and present not the slightest difficulty to anyone of ordinary intelligence who can read the English language. The tutors, too, who pilot each student through the course, correct his exercises and smooth away his difficulties, are men and women who have devoted their attention to the study of psychology. In this respect the Pelman Institute is as well equipped as any psychological institution in the world. As an institution of applied psychology it is undoubtedly the greatest, if it is not absolutely unique.

Weighty Opinions on Pelmanism.

To the position which Pelmanism has already achieved there is a wealth of testimony to be found in the already considerable literature which has grown up on the subject. Pelmanism has attracted the attention of eminent men and women, particularly those interested in education from the ethical point of view, to a remarkable degree, and no review of the movement would be complete without taking into account conclusions which have been arrived at by such authorities after close investigation and mature consideration. The following excerpts taken from much more voluminous studies of Pelmanism and its actual effect are therefore given under the name of the writers:—

Admiral Lord Beresford, G.C.B., G.C.V.O.

"The Pelman system teaches how consciously to develop and employ reserve powers. It teaches, first of all, that their existence is a fact, then how to call upon them, and then how to make their use habitual. Again, it is a part of the very remarkable ingenuity of the system that it is applied to the uneducated and the educated alike. The man of slow intellect will, naturally, find the course more difficult than the man who owns a high degree of mental capacity, but both will use the same methods."

Major-Gen. Sir F. Maurice, K.C.M.G., C.B.

"Now, the Pelman system provides mind-drill on scientific principles, and taught by experienced instructors. It claims to produce not only a good memory, but concentration, self-confidence, self-control, initiative, and observation, and the thousands of letters received from soldiers who have taken the course, both before and during the War, show that it makes no empty claim. . . . The Pelman system is not cram or trick, but a scientific method of training which has proved its value to the soldier in war, and it would, I am certain, be of the greatest benefit if it were adapted to Army training generally."

Sir Harry Johnston, G.C.M.G., D.Sc.

"Pelmanism, it seems to me, is not so much an education in itself as the preparation of the mind for education elsewhere; for the education of the street

and shops and countryside; education by home reading, by foreign travel by secondary schools, and above all, by universities. So far from being inimical to these and educational institutions, with schools and colleges, it is a powerful ally ground for them. Its intention is that its pupils shall be enabled henceforth to assimilate and coordinate to the utmost advantage all the education they receive or seek to.

Sir James Yoxall, M.P.

[illegible]

Sir Arthur Quiller-Couch.

"The Pelman system is a real 'system,' and not a

It, so far, is not patterned upon the 20 countries, but rests upon known and tried laws of procedure.

"The system is a 'flat' system.

"It is at once a 'rest' and a 'dust' line. It saves time in some ways almost amazingly—but it demands concentration and constant watching."

Its process is at once 'educative.' It draws out the student's own faculties, helping him to help himself—and constructive. It builds habits of mind as of character.

"Its 'exercises' are searching, and the answers to the questions have to be written down succinctly, which in itself is an exercise, and a valuable one, in mental training."

"The staff of the Institute appears to consist of enthusiasts, who thoroughly believe in the system and take great pains.

"The system does not claim a province of its own in education to be cultivated separately. It is not a storehouse of knowledge, but offers itself as an instrument ancillary to students in all branches.

"Its methods, being sound and alive, are still in the growth, and seem to me capable of being used by the State to its great advantage."

Sir William Robertson Nicoll, Editor of
"The British Weekly."

"The Pelman Institute carries out its programme of training upon the basis of a strict analogy between physical and mental development. But the work goes much farther than training upon a common principle; the individual need of each student of the course is the ultimate goal, and it is never lost sight of. Attention is bestowed on helping men and women in their individual and special difficulties, and on becoming the best that is in each. Interest and aim are therefore made

"Life implies accomplishment and accomplishment necessitates intelligent and sustained effort. What the nature of our accomplishment may be is not so long as it is an accomplishment. The point is that we must justify ourselves as human beings unless we all some more in the universal scheme of things, and it is because Pehumanism is so manifestly helping thousands of men and women to recognize this, and inspiring them to appropriate action, that I have departed from the usual practice in regard to Pehumanism. I again affirm

E. F. Benson.

"I cannot hesitate about recording my confidence in the soundness of the system and in the results of anyone who honestly and consistently follows it. It is entitled to expect from it. These results, I believe, will be excellent, but most emphatically the last word I should apply to them would be miraculous. The training is entirely based on simple and well known facts and the results, therefore, may be deduced in the most accurate manner."

Sir H. Rider Haggard.

"The net result is that, so far as my humble judgment goes, I am convinced that not only can the Pelman system do no harm to any human being who adopts the method, but it will actually help to improve the mental and even the moral condition of great numbers of men and women in all lands and fit them better to cope with the vicissitudes of a difficult world. Also, and to this should be one of the chief objects of all that it teaches the student how to teach himself."

Lucas Malet (Mrs. Mary St. Leger Harrison).

"Pelmanism rounds its whole system on psychology. It has realised the existence of that narrow yet important line—so dear to the dramatist and novelist—where the physical and moral meet. Its object is to straighten out that line, unpick the knots in it tied natural disabilities or defective training; making taut where it shows a disposition to sag.

"... To sum up, the main objects of Pelagianism, in as far as I can pretend to grasp and to define them, are initiative, accuracy, liveliness of apprehension and of thought, mental fearlessness, hospitality to new ideas, the harmonious action of mind and body which makes for sanity, for the perfection of moral and physical health."

George R. Sims.

"Just as the professors of physical culture continue by the exercises through which they put their pupils in condition to develop his physical powers and to keep his body in condition so the professors of mental culture are asked to the Institute teach the student how to develop his mental powers and to keep his mind in condition. Condition is everything. A horse out of condition cannot be expected to win a race. A pugilist out of condition is likely to be exhausted long before he finds himself in the presence of the enemy.

"To make the horse fit to compete in a race, it is trained; to make the pugilist fit to stand up against an opponent in the ring, he is trained; to bear the fatigues of a campaign, he is trained."

"Yet thousands of men and women who want to be successful in life, which is at once a race, a fight, and a campaign, are satisfied with the desire for success. They hope to be successful, and with hope for their quiver they struggle along the rough and broken path which too often lies between them and their goal, only to fall exhausted by the way, because they have not been trained to overcome the difficulties and surmount the hardships of their journey.

"Polmanship not only develops the powers and the faculties which enable you to surmount the difficulties and to prove the value of less apparent ones, but may lie between you and the goal of your ambition, but it endows you with the trained sense which enables you to enjoy the journey and finds new points of interest in it at every turn of the road."

Mr. Arthur Machen.

"Felmanism furnishes the method, the general guide to knowledge and perception. It separates the various objects from the general mass, distinguishes between them, one from another, shows how they are related to each other, shows how the unmittelbare signs of the page of Homer—are really words in a great language conveying a great message."

"The Pelmanist, then, is the man who has found a guide. He has the clue to the maze."

"Sapper."

"What is this thing which Pelmanism teaches, and which its students wish to be taught? It is well-nigh impossible to sum up the course in a phrase; it is altogether too big a thing. And yet perhaps it can be done, more or less. Pelmanism, as I see it, teaches human nature—your own and the other man's."

"There is no catch in it. It is a system developed along perfectly common-sense lines, which leads to a definite goal. That goal is efficiency."

"Pelmanism trains the untrained mind; that is its *raison d'être*. But from an intellectual point of view the thing can be put in a nutshell. It is not good to go through life blind, and yet thousands do so. Their brains are blighted; they see, and do not appreciate; they hear, and do not understand. Pelmanism brings that appreciation and that understanding. Therefore it would seem worth while to Pelmanise, for it is certainly worth while to understand."

Max Pemberton.

"Already it has forged a bond of learning whose links intellectually are of steel. It has founded a great fraternity of the mind, and this fraternity will add thousands to its numbers every week."

"And it stands for more than a mere system of education. Rather let us say that it makes for national regeneration—for a new spiritual and intellectual birth which must write a memorable page in the story of man's progress."

C. Steenbuck, B.A., B.D.

"The Pelman System of Mind and Memory Training, dealing, as it does, with Thought, Feeling, and Will, is something infinitely higher than any ordinary system of mnemonics, and this largely accounts for the phenomenon that the formal title is now being gradually abandoned in favour of a word recently coined to describe it more adequately, viz. PELMANISM. It is not a term invented by the staff of the Pelman Institute, but one which has grown up spontaneously—no one knows how—in the same way as other words grow up when a need is instinctively felt for a more adequate term than has hitherto been used. The suffix 'ism' implies something beyond a mere system, a mere department of knowledge, or a mere science; it implies a permeating spirit, a principle, and thus it elevates the Pelman system to what it really is, but what modesty has hitherto prevented its own promoters from claiming for it, namely, a Philosophy of Life, but a practical application of the highest principles of life as it is lived in this world, in whatever sphere this may be, from the highest to the lowest. All human beings are, or ought to be, workers; they all share in the principle of life; and therefore Pelmanism is applicable to all and needed by all."

Thomas Pellatt, M.A.

"Pelmanism is based upon those great and eternal principles which underlie the art of all genuine education, and which are just as permanent as the principles which underlie the art of painting, or of architecture, or of any other art."

"The system, therefore, being built upon a rock foundation, is not of the nature of a quack medicine and needs no quack device to recommend it. It makes no claim whatever to transform human nature; to change the carthorse into the racehorse, or so to metamorphose the elephant that he will 'amble nimbly in a lady's chamber to the lascivious pleasing of a lute'; but it does claim this—success for all who follow the directions given; success in the sense that, after they have been through the course, they will find themselves re-born, as it were, with aims, objects, possibilities—nay, certainties—in front of them such as they never dreamed of before."

"And this claim is verified by the verdict of thousands and thousands of people who have proved its truth. That is why I call the Pelman system sound."

The National Importance of Pelmanism. The foregoing excerpts from the writings of men and women who view life from such widely different angles can lead only to one conclusion. Pelmanism in action—in other words, the production of the highest degree of efficiency in the individual—is a matter of just

as great import to the community as it is to the individual. The deduction that the efficiency of the nation is dependent upon the multiplied efficiency of each citizen will be apparent even to the un-Pelmanised mind. In any form of society the community can only be the sum of the units composing it. A community of block-heads will of necessity be wooden, unprogressive. A community of trained thinkers will be vital, progressive. Hence the Pelman movement is something more than many Pelmanists have realised. The student may embark upon a course of Pelmanism for merely personal motives, but he or she can no more help contributing thereby to the improvement of the whole community than an apple tree which produces a full crop of apples. It is this side of Pelmanism which has won for it such universal commendation from all those interested in the national welfare and national progress who have given its principles and its methods their consideration. No man or woman who does well for himself on sound ethical principles can fail to do well for others. That is a concrete result of Pelmanism.

But, apart from these concrete results, there is one further point which stamps Pelmanism as a movement of the highest national importance. Who would venture to question to-day, or for the to-morrow of reconstruction of national life, the value of action based upon thought instead of passion or prejudice? Never more requisite was the deliberate mind in dealing with national affairs. Essentially the deliberate mind is the product of training in the principles of Pelmanism. The Pelmanist is taught to act upon reason, not upon impulse, and if action is based upon reason, the period of reconstruction need have no terrors for the most easily affrighted.

The Future of Pelmanism. The Pelmanist, therefore, is the exponent of a force which is as yet incalculable. Pelmanism increases the reasoning powers in the individual and in the community. It demands the why and the wherefore of every problem, and insists upon an answer. The fact, therefore, that Pelmanists already number over 300,000 is a matter of more than ephemeral interest. It is a national insurance policy of which the premium has been paid. But the 300,000 are only a beginning. Already in educational circles is the demand being made that the broad principles of Pelmanism shall receive in the national educational system the attention which they deserve, and which hitherto they have not received. Meanwhile Pelmanism remains for individual attainment—the highway to the intellectual land of promise.

"Mind and Memory" (in which the Pelman Course is fully described, with a Synopsis of the lessons) will be sent, gratis and post free, together with a full reprint of "Truth's" famous Report on the Pelman System, and a form entitling readers of "WHITAKER'S ALMANACK" to the complete Course for one-third less than the usual fees, on application to the Pelman Institute, 66, Pelman House, Bloomsbury Street, London, W.C.1.

Overseas Addresses: 46-48, Market Street, Melbourne; 15, Toronto Street, Toronto; Club Arcade, Durban.

PRINCIPAL EVENTS, Nov. 1, 1917—Oct. 31, 1918.

THE BRITISH ISLES.

THE KING AND COURT.—(1917) **Nov. 1.** Their Majesties and members of the Royal Family present at the funeral of H.R.H. Prince Christian, K.G. Prince of Wales left Buckingham Palace on his return to the Front. Death of the Very Rev. Dr. Eliot, K.C.V.O., Dean of Windsor. **8.** The King and Queen visited Bristol, Bath, and district. **13.** His Majesty made a tour of inspection in the Home Counties and visited various munitions works. **16.** Members of the American Mission entertained by Their Majesties at Buckingham Palace. **Dec. 6.** The King sent a message of sympathy to the Governor-General of Canada in respect of the explosion at Halifax. **10.** Lt.-Com. Dudley Ward, M.P., appointed Vice-Chamberlain of the Household. **11.** Message of congratulation sent by His Majesty to Gen. Allenby on the capture of Jerusalem. **15.** Their Majesties and Queen Alexandra present at the Choral Commemoration of the First Seven Divisions at the Albert Hall. **18.** His Majesty was graciously pleased to assume the office of Ranger of Windsor Park. **19.** Lady Maude received by the King, who handed to her the K.C.B. awarded to her late distinguished husband. **25.** Their Majesties spent Christmas at Sandringham, and sent their cordial greetings to the officers and men of the Services. (1918) **Jan. 1.** Special title of "Faithful Ally of the British Government" and style of "His Exalted Highness" conferred on the Nizam of Hyderabad. **3.** Exchange of courtesies between the King and the Emperor of Japan, each monarch accepting the rank of F.-M. in the other's Army. **9.** The King received in audience Vice-Adm. Sims and Lord Reading, on their appointments respectively as U.S. Naval Attaché and H.M. High Commissioner and Ambassador Extraordinary on a special mission to the U.S. **11.** His Majesty was represented by Lord Sandhurst at the Thanksgiving Service of the Order of St. John for the deliverance of Jerusalem. **Feb. 19.** Prince of Wales took his seat in the House of Lords as a peer of the realm. Gen. Sir William Robertson received in audience by the King on relinquishing his appointment as Chief of Imperial Staff. **25.** Prince of Wales returned to London on the conclusion of his tour in South Wales, Devon, and Cornwall. **Mar. 4.** Prince of Wales at Glasgow on a visit to the Clyde industrial area. **9.** The G.C.B. conferred by the King on King Alexander of Greece. **13.** His Majesty received at Buckingham Palace the Siamese Military Mission, and conferred the K.C.M.G. on the Chief, Maj.-Gen. Phya Bhijai Janridi. **14.** Prince of Wales succeeded the late Prince Christian as High Steward of Windsor. **30.** Return of the King to Buckingham Palace after a visit to his troops in France. **April 3.** Prince of Wales appointed Cadet Col.-in-Chief of the Cadet Corps of the U.K. **9.** Visit of King and Queen to Lincoln to inspect war material and Tank works, and wounded men in the hospital. Queen assumed the position and title of Commandant-in-Chief of the Queen Mary's Women's Army Auxiliary Corps. **30.** Their Majesties visited the officers and men at Chatham wounded at Zeebrugge and Ostend. **May 11.** His Majesty at Buckingham Palace reviewed a regiment of U.S. troops proceeding to the Front. **14.** Death of the Duke of Northumberland, K.G. **16.** Reception by Their Majesties of the American

Delegation. **18.** Capt. the Prince of Wales gazetted temporary major, G.S.O. Lord Wimborne created a Viscount. **20.** Their Majesties visited the exhibition for the after-care of disabled sailors and soldiers. The Queen and Princess Mary visited some of the raided London districts. **21.** Lord Hylton appointed Capt. of the Yeomen of the Guard, and the Rt. Hon. Lord Sommerleyton, K.C.V.O., appointed Lord-in-Waiting in Ordinary. **23.** Prince of Wales visited Rome. **25.** Open air Investiture by the King at Buckingham Palace. **27.** Prince of Wales visited the Pope at the Vatican. **31.** Leeds visited by Their Majesties. **June 3.** New decorations for airmen instituted by His Majesty. **5.** The King in residence at the Royal Pavilion, Aldershot. **10.** Lt.-Col. R. A. Sanders, M.P., appointed Treasurer of the Household. **12.** The King and Queen inspected Queen Mary's Army Auxiliary Corps at Aldershot. **17.** Their Majesties returned to Buckingham Palace. **18.** H.R.H. the Duke of Connaught celebrated the jubilee of his entrance into the Army. **19.** Mr. W. Hughes, Premier of Australia, and Rt. Hon. W. F. Massey, Prime Minister of New Zealand, received in audience by the King. Queen Alexandra's "Rose Day." **20.** Maj.-Gen. the Maharajah of Patiala received in audience by His Majesty, who invested him with the G.B.E. **22.** Visit of the Queen and Queen Alexandra to the Red Cross Pearl Necklace Exhibition. **24.** Duke of Connaught opened the Washington Inn for U.S. officers in St. James's Square. **26.** Royal visit to Bradford. **July 4.** Their Majesties attended the U.S. baseball match at Chelsea; the King handed the umpire a baseball inscribed "George R.I." **6.** Royal Silver Wedding: the King and Queen attended a Thanksgiving Service at St. Paul's Cathedral. At the Guildhall the Lord Mayor, on behalf of the citizens of London, asked Their Majesties' acceptance of a cheque for £53,000. The Lord Mayor received the honour of a baronetcy and the Sheriffs knighthoods. The King and Queen of the Belgians arrived at Buckingham Palace. **8.** Their Majesties received at Buckingham Palace a number of deputations, who presented loyal addresses of congratulation on their Silver Wedding. **9.** Silver Wedding gift from the women of India accepted by the Queen. **11.** The King and Queen of the Belgians concluded their visit to London. **13.** Their Majesties present at the special service in St. Paul's Cathedral for the munition workers of Woolwich. **15.** The Prince of Wales elected a Governor of Wellington College. **16.** The Earl of Athlone took his seat in the House of Lords. **17.** G.C.B. conferred on Gen. Pershing by the King. **20.** Dr. Inge, Dean of St. Paul's, received in audience by the King, who invested him with the C.V.O. **21.** Mr. Herbert Hoover, U.S. Food Controller, received by the King at Buckingham Palace. **24.** Return of His Majesty to London on the completion of his visit to the Grand Fleet. **25.** The King, Queen, and Queen Alexandra and members of the Royal Family present at a Requiem Service for the late ex-Tsar at the Russian Embassy Chapel. **Aug. 3.** Australia House opened by the King, who decorated certain officers of the Australian Imperial Force on leave from the Front. **4.** Their Majesties, with both Houses of Parliament, attended St. Margaret's, Westminster, at the Special Service of Thanksgiving and Intercession on the fourth anniversary of the war. **5.** Lord

Bertie, ex-Ambassador at Paris, created a Viscount. **13.** Return of the King from a nine days' visit to the Front. **19.** Prince of Wales arrived at Buckingham Palace. **28.** Retirement of Dr. Page, U.S. Ambassador, succeeded by Mr. John Davis. **29.** Princess Mary appointed Colonel-in-Chief of the Royal Scots (Lothian Regt.). **Sept. 2.** Prince of Wales left Windsor Castle to return to the Front. **11.** Lord Elphinstone appointed a Lord-in-Waiting. **24.** Hon. H. J. Stonor, C.V.O., Groom-in-Waiting, appointed Deputy-Master of the Household. **Oct. 4.** King's Fund for Disabled Officers and Men opened by the King with a donation of £78,000, the amount of the Imperial Silver Wedding Fund and £25,000 from the Privy Purse. **13.** American journalists visiting England entertained by Their Majesties at Sandringham. **21.** M. Venizelos, Greek Premier, received by the King at Buckingham Palace. **29.** Adm. Prince Yorihito, on a special mission from the Emperor of Japan, presented to the King, at Buckingham Palace, the sword and badge of a F.-M. in the Imperial Japanese Army.

IMPERIAL POLITICS.—(1917) Nov. 7. Debate in the House of Lords on industrial unrest introduced by Lord Salisbury. **8.** Redistribution schedule to the Reform Bill passed the Committee stage of the House of Commons. Air Force (Constitution) Bill introduced by Mr. Walter Long. **13.** Bill prolonging the life of Parliament (4th Bill) passed its second reading by 222 votes to 18. **19.** Debate in the House of Commons on the Allied War Council: Mr. Lloyd George defended his scheme and his speech at Paris. **20.** House of Commons made several important changes in the Reform Bill, giving the vote to the wife of a Local Government elector, if 30 years of age, and enfranchising every sailor and soldier serving in the war who has attained the age of 19. **22.** Proportional representation rejected by the House of Commons by 202 votes to 126. **Dec. 12.** Vote of Credit for £550,000,000 moved by Mr. Bonar Law. **13.** Government announced that it would contribute £1,000,000 for the relief of sufferers of the Halifax (N.S.) explosions. Sir G. Cave defended the action of the Government in suppressing the issue of pacifist literature. **15.** Select Committee of the House of Commons on Treasury Control of Public Expenditure presented its second Report. **19.** Reform Bill passed its second reading in the House of Lords. Constitution of the new Department of the Board of Trade and the Foreign Office announced, Sir William Clark, K.C.S.I., Comptroller-Gen. **(1918) Jan. 1.** New Year's honours included 1 Viscount, 4 Barons and 6 Privy Counsellors. Gen. Plumer awarded a G.C.B. Mr. Lloyd George addressed a New Year's Message to the Nation. **2.** Constitution announced of the new Department of the Air Council by Order of Council: Lord Rothermere appointed Secretary of State and President of the Council. **10.** Constitution of new Board of Admiralty and Naval General Staff announced: Mr. Arthur F. Pease appointed a Lord Commissioner with the title of Second Civil Lord. **14.** New Education (No. 2) Bill introduced in the House of Commons by Mr. Fisher, conferring more power on the local authorities and removing the apprehensions of religious bodies. **18.** Death of the Rev. F. Byng, Earl of Stafford. Chaplain of the House of Commons, 1855-1874. **22.** Resignation of Sir

Edward Carson from the War Cabinet, and of Lt.-Col. Sir James Craig, M.P., Treasurer of the Household and a Government Whip. Lord Selborne's amendment to the Reform Bill, providing for proportional representation, carried in the House of Lords by 132 votes to 41. **23.** Debate in the House of Commons respecting the British operations at Cambrai, and the non-publication of the result of the inquiry. **Feb. 6.** Parliament prorogued: The King's Speech. Royal Assent, Representation of the People Bill. **12.** New Session of Parliament opened by the King. **28.** Debate in both Houses on the food question: the policy of Lord Rhonda defended respectively by Lord Milner and Mr. Clynes. Sir G. Cave, in the House of Commons, explained that M. Litvinoff, the Bolshevik "Ambassador" to London, was not an Ambassador of any recognised Government. **Mar. 6.** Death of Mr. John Redmond, M.P., leader of the Irish Nationalist Party. Tribute paid to his memory by the Premier, Mr. Asquith, and Sir Edward Carson, in the House of Commons. **11.** Mr. Lloyd George made an important statement as to the connexion between the Government and the Press. **13.** Mr. John Dillon elected chairman of the Irish Nationalist Party. Resignation of the Duke of Marlborough of his office of Joint Parliamentary Secretary to the Board of Agriculture. **14.** Speech by Mr. Balfour, in the House of Commons, on the state of Russia and the possibility of Japanese intervention in Siberia. **19.** Blue Book "The War Cabinet: Report for the year 1917" issued. **19.** Appointment of Lord Pirrie as Controller-General of mercantile shipping announced. The new "Curfew" regulations announced by Sir A. Stanley, who made important statements on restrictions on railway travelling and coal consumption. **21.** Appointment, by the Chancellor of the Exchequer, announced of Committee to inquire into the actual cost of living to the working classes since June 1914. **April 20.** Death of Mr. Charles Fenwick, M.P. since 1885, the miners' leader in Northumberland. **21.** Irish bishops and clergy, at Mass, denounce conscription for Ireland. **22.** Budget statement by Mr. Bonar Law. **29.** Mr. Ian Macpherson, Under-Secretary for War, to be also Vice-President of the Army Council and Deputy-Secretary of State. **30.** Brastic powers given to the Board of Trade to deal with railway traffic by a Defence of the Realm regulation. **May 5.** Gen. Lord French, K.P., appointed Lord-Lieut. of Ireland, in succession to Lord Wimborne, resigned, and Mr. E. Shortt, K.C., Chief Secretary for Ireland, in place of Mr. Bage, resigned. **9.** Mr. Asquith's motion to refer the charge of inaccuracy, made by Gen. Maurice against Ministers, to a Select Committee of the House of Commons defeated by 293 votes to 126. **11.** Death of Lord Courtney, P.C. **16.** Mr. Balfour, in the House of Commons, on the Emperor Karl's letter, and German "peace offensives," and the plans of the Central Powers to divide the Allies. **17.** Text of Sir G. Cave's Bill to denaturalise dangerous aliens published. Treasonable communications between Germans and a small number of Irishmen discovered by the Government. **18.** Proclamation by the Lord Lieutenant of Ireland denouncing the pro-German plot, and calling upon all loyal Irishmen to aid in suppressing it. Arrest of 69 Sinn Féin plotters. Royal Assent, Military Service (No. 2) Act. **19.** Maj.-Gen. Sir F. Shaw, K.C.B., appointed G.O.

Com-in-Chief of Forces in Ireland. **21.** New regulations requiring permits to travel in Ireland in force. **30.** Treatment of British prisoners in Germany raised prominently in the House of Commons. **June 3.** King's birthday honours included 2 Viscounts, 3 Barons, 7 Privy Counsellors. The Dukes of Rutland and Atholl received respectively the K.G. and Lord Oranmore and Browne a K.P. New postage rates came into force. **6.** Highly encouraging survey of the food position given by Mr. Clynes in the House of Commons. **7.** Speech by Mr. Lloyd George, in which he eulogised the unsurpassed sacrifices of the British peoples and their Allies. **13.** In the House of Commons Mr. Bonar Law was closely questioned as to the present position of German banks in this country. **14.** Certain Irish counties and boroughs proclaimed. **15.** Decision of the War Cabinet announced to set up a Committee of Ministers of Home Affairs: Sir G. Cave to be Chairman. **19.** Debates in both Houses of Parliament on Cabinet control. **20.** Mr. Griffith, Sinn Féin, elected M.P. for East Cavan by majority of 1,214 votes over Mr. O'Hanlon, official Nationalist. **21.** Government announced the abandonment, for the present, of Home Rule and conscription for Ireland. **22.** Strong protest issued by Labour members of the Government against incessant "snipping" by anti-national factionists through the Labour Press and other means. Redistribution of Departments at the Ministry of Munitions: Brig.-Gen. J. Seely appointed Member of Council for new group—the "Warfare Group." **29.** Peerage conferred on Col. Sir A. H. Lee, K.C.B., M.P. (the donor of the Chequers Estate to the Nation), in recognition of his public services as Director-General of Food Production, 1917-18. **July 3.** Death of Lord Rhondda, Food Controller. **5.** Central Agricultural Advisory Council set up, amalgamating the Agricultural Advisory Committees of the Ministries of Food and Agriculture. Publication of the Report on Indian Constitutional Reforms, signed by the Viceroy and Secretary of State, as the result of their recent conferences. **8.** The six M.P.s asked by the Government to make recommendations for dealing with the alien question made their report to the Premier. House of Commons, without a division, accepted the Government Bill extending fifth time the life of Parliament until Jan. 30, 1919. Congratulations moved in both Houses of Parliament to the King and Queen on their Silver Wedding. Rt. Hon. J. Clynes, Parliamentary Secretary of Ministry of Food, appointed Food Controller in place of late Viscount Rhondda. **12.** British Nationality and Status of Aliens Bill passed its second reading, in the House of Commons, by unanimous assent. **13.** National memorial of all classes presented to the Premier, urging the immediate establishment of a Ministry of Health. **15.** In the House of Commons Sir G. Cave explained how the Government proposed to give effect to their new policy in dealing with aliens. **16.** Education Bill passed its third reading in the House of Commons without a division. Increased maximum prices for coal fixed by an Order of the Board of Trade. **19.** Lord Robert Cecil appointed Assistant-Secretary of State for Foreign Affairs; Sir L. Worthington Evans, Bt., Minister of Blockade; Rt. Hon. Maj.-Gen. J. Seely, Parliamentary Under-Secretary to Ministry of Munitions, and Maj. Hon. Waldorf Astor, Parliamentary Secretary to the Ministry of Food. **22.**

Retirement of Mr. A. W. Nicholson, C.B., Clerk Assistant of the House of Commons, announced. Resignation of Lord Lee, Director of Food Production. **23.** Return of the Irish M.P.s to the House of Commons after an absence of three months. **25.** Information about the Hague Agreement for the exchange of prisoners of war given by Sir G. Cave. **Aug. 1.** Vote of Credit for £700,000,000 moved by Mr. Bonar Law. Rt. Hon. T. F. Molony, K.C., appointed Lord Chief Justice in Ireland, and Rt. Hon. J. O'Connor, K.C., appointed Judge of Appeal in Ireland. **5.** Education Bill passed its third reading in the House of Lords. **6.** Meeting of all parties specially interested in the aliens question held at the House of Commons: Aliens Watch Committee formed, Sir Edward Carson chairman. Important debate in both Houses on the Montagu-Chelmsford Report on Indian Constitutional Reforms. **7.** Earl of Radnor gazetted Director of Agricultural Production, with temporary rank of maj.-gen. **8.** Labour delegates refused passports by the Government to visit M. Troelstra, the leader of the Dutch Socialist Party. **18.** Official statement that each Dominion is to have a resident or visiting Minister in London, to be a member of the Imperial War Cabinet, to attend periodical meetings. **28.** Retirement of Dr. Page, U.S. Ambassador in London, announced. **29.** Decision of the Government to appoint a Committee to investigate and report as to the relations that should be maintained between the wages of men and women. **Sept. 16.** Great strike of Lancashire cotton spinners. Letter from Mr. Lloyd George appealing to them to return to work in the interest of the men who are fighting. **30.** "Feed the Guns" Campaign, to raise the second £1,000,000,000, opened by the Chancellor of the Exchequer at the Guildhall. **Oct. 5.** Purchase of the *Daily Chronicle* by Sir Henry Dalziel, M.P., announced. **15.** Parliament reassembled. **23.** House of Commons, voting on non-party lines, by 274 votes to 25, decided that a Bill should be forthwith passed making women eligible as M.P.s. **31.** Government Bill making women eligible as M.P.s introduced in the House of Commons by Lord Robert Cecil.

ACCIDENTS (GENERAL).—(1917) **Nov. 10.** Fire at the Infirmary, Crumpsall, 15 women patients killed. **Dec. 11.** Serious explosion at Crouton Colliery, Lincs., caused by firedamp: five deaths, ten badly injured. (1918) **Jan. 1.** A mine being recovered from the sea at Deal exploded and killed six men. **2.** Motor-bus overturned near E. Finchley Station, and injured 11 people. **10.** Seven lives lost by the explosion of a live mine washed up during a heavy gale and striking against the pier at Rosehearty, on the Aberdeenshire coast. **12.** Colliery explosion at the Minnie Pit of the Podmore Hall Colliery, Halmead, Staffs., resulting in the death of 155 men. **19.** Accident to passenger train, St. Pancras to Scotland, near Lazonby, caused by a landslip: six killed, 17 injured. Training ship *Warspite* destroyed by fire: all the boys in warning brought safely ashore. **Feb. 24.** Steamer *Florizel* wrecked near Cape Race with loss of 102 lives. **Mar. 15.** L. & N.W. ss. *Rathmore* in collision with another vessel, 26 lives lost. **April 24.** Motor-bus overturned at Hendon: one killed, 18 injured. **29.** Upsall Castle, Thirsk, destroyed by fire. **May 31.** Explosion at a munitions factory in the North of England caused

the death of three persons and injury to two. **June 9.** Boating accident, with loss of 17 lives, in Ulverston Channel, off Peel Island, Barrow-in-Furness. **July 1.** Explosion at a national shell-filling factory in the Midlands: 100 killed, 150 injured. **9.** Explosion in Arbury Pit, near Airdrie, entombing 19 miners. **13.** Marina Pier, Ramsgate, partially destroyed by fire. **Aug 11.** Great fire at the electric sheds of the N.E. Ry. Co. at Heaton, Newcastle, 38 coaches and sheds, covering five acres, completely destroyed. **18.** Electric train accident at Victoria Station, Manchester, owing to the brakes not acting: 29 passengers injured. **Sept 24.** Headingham Castle, the remains of an old Norman fortress in North Essex, destroyed by fire. **Oct 10.** Big fire at Odessa Wharf, Rotherhithe. **24.** Canadian Pacific steamer *Princess Sophia* foundered in a storm off Alaska: 345 lives lost.

ART.—(1917) Nov. 17. Death of M. Rodin, the great French sculptor. **Dec. 10.** The *Orestes Vase*, from the Hope Heirloom Sale, acquired by the British Museum. **(1918) Jan. 1.** Knighthoods conferred on Messrs. David Murray, R.A., John Lavery, A.R.A., and Edwin J. Lutyens, A.R.A. **Feb. 13.** Chancery Division, Dublin, granted the application of the National Gallery of Ireland to retain 41 pictures bequeathed by Sir Hugh Lane. **April 23.** The "Ariadne in Naxos" by G. F. Watts, R.A., presented to the Guildhall Art Gallery by Sir Marcus Samuel. **May 3.** Mr. Wm. Stang elected President of the International Society, in succession to M. Rodin. Death of Mr. W. F. Yeames, ret. hon. R.A., aged 82. **8.** Sale at Paris of pictures by M. Degas, the famous painter, realised £224,000. **July 3.** Sir Edward Poynter, P.R.A., made a G.C.V.O., and Sir Luke Fildes, R.A., a K.C.V.O. **Aug. 9.** Death of Mr. Ascher Wertheimer, of the New Bond Street Gallery. **Oct 23.** Mr. Solomon J. Solomon, R.A., elected President of the R.S.B.A. **29.** "The Triumph of the Innocents," by Holman Hunt, presented to the nation by Mr. J. T. Middlemore, M.P.

CRIMES.—(1917) Dec. 31. Mrs. Wheeldon, sentenced to 10 years' penal servitude for conspiring to murder the Prime Minister, officially released from Holloway Prison on account of ill-health. **(1918) Jan. 10.** Arthur Harry Victor de Stamer, a corporal in the City of London Imperial Yeomanry, sentenced to death at the Central Criminal Court for the murder of Edward Kendrick Bunbury Tighe, a retired Army captain, at Wimbledon, on Nov. 2. **Feb. 16.** Mr. Arnold Lupton, formerly M.P. for Sleaford, sentenced at Bow Street to 6 months' imprisonment (second division) for aiding and abetting Samuel H. Street, a printer of Streatham, who was fined £62 10s. and 10s. costs, for printing a seditious leaflet without his (the printer's) name and address. (Notice of appeal given.) **Mar. 23.** George Sanders, St. Leo Alfred Garner, and the Twentieth Century Press were fined respectively, £200 and 30 guineas costs, £100 and 15 guineas costs, and £50 and 10 guineas costs, under the Defence of the Realm Act, for having in articles, published in the *Licensed Vehicle Trades Record*, on Jan. 9 and Feb. 6, made statements likely to prejudice recruiting and to cause sedition and dissatisfaction among the civil population. **May 9.** John Maclean, Bolshevik "Consul" at Glasgow, ex-deportee, sentenced to 5 years' penal servitude for speeches inciting Glasgow

munition workers of military age to begin a revolution by seizing the City Councils, the police stations, and other public buildings. (Released later in the year.) **18.** Appeal dismissed of David Greenwood, a young ex-soldier, sentenced to death for the wilful murder of Nellie Grace Trew on Eltham Common on Feb. 10. **June 4.** At the Central Criminal Court a verdict of not guilty was returned in favour of Mr. Pemberton Billing, M.P., on the charge of publishing a false and defamatory libel on Miss Maud Allan, the dancer. **8.** Eric Brotherton, manager, and James Percy Walker were found guilty at the Central Criminal Court, charged with conspiring to defraud the King and the Humber Graving Dock and Engineering Co., Ltd., of money by false representations. Brotherton sentenced to 20 months' imprisonment, Walker to 6 months' imprisonment, both in the second division. **14.** Bernard A. Kupferburg sentenced at the Old Bailey to 3 years' penal servitude for aiding and abetting James Samuel Reardon (sentenced to 18 months' hard labour) wrongfully to apply Government marks to war material with intent to deceive. **July 3.** Mir Anwarudin, Indian barrister, sentenced at the Old Bailey to 6 months' imprisonment (second division) for perjury in his last action against John Bull. **5.** The Recorder at the Central Criminal Court, in the case of a man charged with publishing a declamatory libel of and concerning his wife, held that a man could not libel himself, and, therefore, according to old common law, he could not libel his wife. **27.** Sir Joseph Jonas, J.P., a former Mayor of Sheffield, and Charles Alfred Vernon, for some time employed at the Ministry of Munitions, charged with conspiring in 1913 to contravene the provisions of the Official Secrets Act, 1911, at the Central Criminal Court. The jury found the defendants not guilty of felony, but guilty of misdemeanour in respect of information unlawfully obtained. Sir Joseph Jonas fined £2,000 and Vernon £1,000, defendants to pay costs. Subsequently Sir Joseph Jonas was deprived by the King of his knighthood, and was also removed from the Sheffield J.P.'s. **Aug. 31.** Resignation of Sir Edward Henry, Chief Commissioner of Metropolitan Police: succeeded by Maj.-Gen. Sir C. Macready. **Sept. 16.** Mrs. Villiers-Stuart sentenced at the Old Bailey to 9 months' imprisonment, without hard labour, for bigamously marrying Capt. Villiers-Stuart. **Oct. 31.** Brig.-Gen. W. Howard appointed Assistant-Commissioner of the Metropolitan Police, in succession to Maj. Sir F. Wodehouse.

Johnson, Speaker of the New Zealand Legislative Council. **15.** British Colony at Shanghai during "Tank Week" subscribed £429,655. **17.** 34,879 pensions and 3,013 gratuities awarded in Canada during the war. **19.** Maj.-Gen. Sir E. Northey, K.C.M.G., C.B., appointed Governor and Commander-in-Chief of the East African Protectorate, and H.M. High Commissioner for Zanzibar. **21.** Hon. Sir Eustace Fiennes, Bt., appointed Governor and Commander-in-Chief of Seychelles. **24.** First Canadian aerial mail started: special bag carried from Montreal to Toronto. **July 2.** Spread of influenza in Bombay: large increase of death rate. **3.** Hurricane in West Indies: the Grand Cayman swept by a cyclone. **15.** Threatened strike of 300,000 railwaymen in Canada. **23.** Postmen on strike at Victoria, Vancouver, New Westminster, Winnipeg, and Toronto: threatened strike of postmen throughout the Dominion. **25.** Severe cold in Australia: weather in Melbourne coldest since

1903. **28.** End of drought in New South Wales; 2,000,000 sheep and lambs lost by the drought. **Aug. 1.** Formation of a United Malayan Council, representing all nationalities in Malaya. **3.** Australia House, London, opened by the King. **7.** Mr. Lloyd George's "Hold fast!" message published in over 100 newspapers throughout Australia. **Sept. 5.** Death of Sir Ratan Tata. **8.** Death of Lord Forrest, first Australian peer and first Premier of Western Australia. **10.** Mohammedan riot in Calcutta; military called out; several casualties. **17.** Trades Congress, Canada, passed a motion promising the whole-hearted support of Labour on all war measures. **30.** Maj. Sir G. A. Lloyd, M.P., D.S.O., K.C.I.E., appointed Governor of Bombay in succession to Lord Willingdon, appointed Governor of Madras. **Oct. 3.** Death of Maharajah Sir Sumer Singh, K.B.E., ruler of Jodhpur. **10.** Resignation of Lord Shaughnessy, President of the Canadian Pacific Railway. **28.** New South Wales Assembly passed the Sedition Bill through all its stages.

UNITED STATES.*

(1917) Nov. 6. Mr. Hylaw, Tammany nominee, elected Mayor of New York. **Dec. 13.** Explosion at the Bethlehem Steel Co., Newcastle, Pa. **29.** Intense cold in New York: 14° Fahr. recorded. **(1918) Jan. 1.** New Year messages exchanged between Pres. Wilson and King George, reaffirming mutual solidarity of war aims and interests. Great fire at Norfolk, Va. **2.** Eight acres of munition plant destroyed by fire at Harrisburg, Pa. **8.** Pres. Wilson's message to Congress, in which he specified 14 conditions necessary for a world's peace. **12.** Chicago reported to have been isolated by one of the worst blizzards in its history, paralysing traffic and business. **22.** Inauguration of radio-telegraphic communication between Italy and U.S. **27.** Conflagration at Newark, New Jersey: portion of the quay destroyed and other damage done. **Feb. 11.** Arrival of Lord Reading on a Special Mission to the United States. Pres. Wilson restated U.S. war aims in an address to Congress, and laid down four principles for a just peace. **14.** Death of Sir Cecil Spring Rice, Ambassador to the United States. **28.** Direct telegraphic communication between the War Board at Ottawa and Washington inaugurated by exchange of congratulations. **March 5.** Women for the first time voted in special Congressional elections in New York State. Death of Dr. H. Howe Bancroft, the American historian. **11.** U.S. troops stated to be established on four separate points on the Western Front. **15.** Mr. McAdoo appointed sole Controller of American railways. **21.** Government Bill establishing a War Finance Corporation, to aid war industries, passed House of Representatives: measure previously passed by Senate. **April 3.** Third Liberty Loan launched. **5.** Greetings from King George to Pres. Wilson on the anniversary of America's entrance into the war. **May 1.** Air postal service between Washington, Philadelphia, and New York inaugurated. **2.** Commercial agreement signed between U.S. and Norway. **5.** U.S. Mission visiting France received in Paris by Gen. Joffre. **9.** Lord Derby, new British Ambassador to the U.S. **14.** Death of James Gordon Bennett, proprietor of the *New York Herald*.

First 1,000,000 tons of ships delivered to U.S. Government announced to have put on the high seas. **15.** Members of the American Delegation welcomed by the London Chamber of Commerce. Overman Bill passed by House of Representatives. **17.** Third Liberty Loan for minimum of £600,000,000 stated to have exceeded £800,000,000. **22.** Sedition Bill, giving the U.S. Government wide powers to punish disloyal acts or utterances, signed by Pres. Wilson. **23.** By regulations of U.S. Provost-Marshal all men of draft age must either fight or work after July 1. **29.** Mr. Hughes, Australian Premier, received by Pres. Wilson at Washington. **June 5.** Death of ex-Vice-President Charles Warren Fairbanks. **8.** American s.s. *Pinar del Rio* sunk by U-boat off Maryland. **15.** League formed of Americans of Italian descent to combat German propaganda among Italian-speaking people in the U.S. **20.** Mr. Gompers re-elected President of the American Federation of Labour. **22.** Disastrous railway collision near Hammond, Indiana: 59 killed, 115 injured. **23.** Proposal for a permanent Anglo-American Union for the preservation of the liberties of the world put forward by Lord Reading. **24.** Gift of £40,000 by American Red Cross to celebrate Italian victory at the Piave. **28.** For the first time since 1812 U.S. troops marched carrying arms through the streets of Toronto. **July 4.** Independence Day celebrated in London, Paris, and Rome, as well as in the U.S. Great New York parade and tableaux of the Allies, and demonstrations throughout the States. **5.** Excursion steamer *Columbia* overturned in the Illinois River: 175 drowned. **6.** First aerial super-Dreadnought, the U.S. giant aeroplane "launched" near New York. **9.** 100 persons killed in a railway collision near Nashville, and over 80 injured. **17.** Legacy of £3,000,000 bequeathed to Yale University by Mr. John W. Sterling, the eminent New York lawyer. **19.** G.C.M.G. conferred by King George upon Vice-Adm. Sims, and other honours on Maj.-Gen. Biddle, Generals Pershing, Peyton, and Bliss. U.S. armoured cruiser *San Diego* sunk off Fire Island. **23.** Mr. Hoover, Food Controller, attending Conference of Allies on food supplies, entertained at the Mansion House, London. **Aug. 1.** New York *Evening Post* purchased by Mr. T. W. Lamont, of J. P. Morgan & Co. **28.** Retirement of Mr. Page, U.S. Ambassador to Great Britain, 1913-18. Death of Senator Jones of Kentucky, one of the leaders of Congress. **Sept. 4.** U.S. expenditure for Aug. £11,058,064 per diem. **6.** "Lafayette and Name" Day celebrated throughout the U.S. **17.** Death of Cardinal Farley, Archbishop of New York. **19.** Mr. John Davis appointed U.S. Ambassador to Great Britain. **23.** Mr. Gompers and U.S. Labour Delegates visiting England received by King George at Buckingham Palace. **24.** House of Representatives approved the measure making national prohibition effective on July 1, 1919: measure already passed the Senate. **Oct. 8.** Full text of Pres. Wilson's reply to the German Peace Note published. **21.** 30,000,000 people throughout the States celebrated the British Navy's achievements in the war. **24.** Gift of £500,000 by American Red Cross to English "Our Day." **25.** Appeal of Pres. Wilson to the country to return a Democratic Congress at the elections. **28.** Reply of Mr. W. H. Hayes, Chairman of the Republican National Committee, to Pres. Wilson's appeal. **29.** Raleigh Tercentenary celebrated

* For principal events connected with the war, see "Diary of the War."

in North Carolina and elsewhere in the U.S. **30.** 200,000 cases of influenza reported in U.S. camps: Philadelphia the chief sufferer, with 180,000 cases since the outbreak five weeks previously. **31.** Joint appeal of ex-Presidents Roosevelt and Taft urging the election of a Republican majority.

OTHER COUNTRIES.*

(1917) **Dec. 8.** Revolution in Portugal resulted in the overthrow of the Government after three days' fighting. **13.** Dr. Felix Calander elected President of the Swiss Confederacy for 1918: Dr. E. Müller, Vice-Pres. **29.** Virtual destruction of Guatemala City by an earthquake: 1,000 reported killed, 225,000 people homeless. (1918) **Jan. 9.** Rapid spread of plague in China: passenger and goods traffic suspended between Peking and Fengcheu (Shansi). **14.** Rising at Santander, Malaga, Valencia, Barcelona. **26.** Ten persons killed, 50 injured by an accident to an express train between Munich and Berlin. **Feb. 16.** Crowded passenger train from Stanislaw to Lemberg, catching fire, caused many deaths by burning and drowning in the River Dniester. **Mar. 22.** Argentine general election resulted in sweeping majorities of Radicals supporting Pres. Irigoyen. **24.** Violent earthquake reported from Perugia, Italy. **April 25.** Mt. Stromboli in violent eruption. **May 4.** Amnesty Bill passed the Spanish Cortes. **11.** Roman Municipality granted a Government concession to build a port at Ostia, transforming Rome into a maritime city, at the cost of 47,000,000 lire. **20.** Violent earthquake at La Serena, the capital of Coquimbo, Chile, causing much damage. **21.** Resignation of Sun Yat Sen as Generalissimo of the Constitutional Military Government of S.W. China. **23.** Diplomatic relations between Mexico and Cuba severed. **27.** Illness of King Alfonso, caused by influenza widely spread throughout Spain. **28.** First Danish Rigsdag elected under the new Constitution opened by

* For principal events connected with the war, see "Diary of the War."

the King in person. **June 1.** Great fire at Constantinople, covering a distance of over 2½ miles: more than 2,000 houses destroyed, 20,000 people homeless. **3.** Death of Señor Ramón Valdez, Pres. of Panama, succeeded by Sr. Ciro Urilla. Explosion at Beaumont, France, munitions works: about 200 killed, 50 injured. **10.** 400 people killed by an explosion at a munition-depôt at Jassy. Return of Mr. Stefansson, the Arctic explorer, reported from Toronto. **12.** Statue of John de Witt unveiled in the Hague with State ceremonial. **13.** Bill for the damming of the Zuyder Zee finally passed by the Dutch States-General. **15.** Munitions factory at Mainz, Germany, partly destroyed by an explosion: many victims, and considerable damage done. **24.** Capt. Amundsen left Christiania on a N. Polar expedition in the *Maud*. **29.** 45 persons killed and many injured in a railway collision between Mircesti and Roman, Rumania. **July 1.** Bi-weekly through railway service between Penang (Straits Settlements) and Bangkok (Siam) started, shortening connexion with Europe by four days. **4.** Great fire at Kieff over an area of a sq. miles: whole streets and a bridge over the Dniester burnt down, many casualties reported. **11.** Violent typhoon swept S.W. Japan, including the Luchu Is. in Kiushiu and Shikoku and caused considerable damage. **16.** Railway accident in Paris: 15 killed, 70 injured. Trans-African railway, projected since 1875, purchased by Portuguese Government. **Aug. 5.** End of the Montevideo Port strike. **14.** Japanese rice riots at Tokyo. **Sept. 7.** Hsu Shi-chang elected President of the Chinese Republic by a large majority. New Netherlands Ministry formed, M. Ruys de Beercubrouck as Premier. **19.** Collision between two Marseilles express trains in the Pacy Tunnel between La Roche and Dijon: 30 killed, 100 injured. **Oct. 11.** Earthquake in San Juan de Puerto Rico: 150 killed. **30.** Article in the Danish Constitution giving the King the right to declare war to be changed by His Majesty's consent.

* Previous to 1912 these figures were exclusive of Rents, Tolls, Navigation, Steamboats, &c., but the 1912 and 1913 figures include receipts from all sources.

† Includes 314,912,000 Passengers holding Workmen's Tickets.

‡ Includes the estimated amount receivable by the Companies under agreement with the Government.

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have three days of grace allowed; thus, a bill dated 1 Jan. at two months' date is not due until March 4. There is, however, no such extension in the case of bill-drawn at sight, or on demand, and these must be paid on presentation. In the United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

TITHE RENT CHARGE.

Tithe Rent Charge for 1913 was £74 14s. 9½d.; for 1914, £75 16s. 4d.; for 1915, £77 1s. 4½d.; for 1916, £83 2s. 6½d.; for 1917, £92 1s. 0½d.; and for 1918, £109 3s. 11d.

THE ENTERTAINMENT TAX brought in £3,001,268 in 1916-17; Table Waters and Ciders, £1,229,008; Cinematograph Films, £169,334; and Clocks and Watches, £456,864.

COST OF THE WAR, FORTY THOUSAND MILLIONS.

The Federal Reserve Board of Washington, U.S.A., estimates that the cost of the war for all belligerents up to May 1, 1918, amounted to £35,000,000,000, and that the probable cost up to the end of the present year would be £40,000,000,000.

The Board has reason to believe that these figures are substantially correct. The Public Debt of the principal Entente countries is estimated at £21,000,000,000, and the aggregate debt of the Central Powers at £9,000,000,000.

MATCHES DUTY.—In 1916 a Customs Duty of 3s. 6d. per 10,000 matches imported, and an Excise Duty of 3s. 4d. per 10,000 made in the U.K., were imposed. A duty was also imposed on any tinder box, tinder lighter, or other mechanical and portable contrivance for producing a spark or flame, of 1s. each of those using spirit and 6d. on others. The receipts for the matches duty in 1916-17 amounted to £1,029,000, the quantities for which duty was paid being 6,089,000 standard gross of 10,000 matches, and from mechanical lighters £4,390, the numbers taxed amounting to 146,000.

The British Empire.

AREA AND POPULATION.

Continental Distribution.	English Square Miles.	Estimated Population, 1911.
In Europe	121,512	45,778,000
In Asia	2,187,550	323,100,000
In Africa	3,618,245	40,000,000
In North America	3,893,020	7,458,000
In Central America	8,600	20,000
In the West Indies	12,300	1,700,000
In South America	97,800	314,000
In Australasia	3,214,685	6,240,000
Total	13,153,712	434,286,650

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies about one-quarter of the known surface of the globe, and its population exceeds one-quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere. The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons, one half of the Empire enjoying summer while the other half is under winter conditions. In spite, however, of the uneven distribution east and west, daylight and darkness are almost equally divided, on account of the position of Australasia near the limit of east and west.

ETHNOLOGY.—By far the greater portion of the Empire lies within the temperate zones, and is suitable for white settlement, the tropical areas being Southern India, West and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Empire in 1911 was 60,000,000, mainly Anglo-Saxon, but partly French, Dutch, and Spanish. This white population includes a considerable sprinkling of Jewish blood. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 Red Indians in Canada.

RELIGIONS.—Of the total population over 220,000,000 are Hindus, 100,000,000 Muhammadans, 70,000,000 Christians (63,000,000 Protestants, 7,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.—There is no fundamental law upon which the Constitution of the Empire rests, but there are three main principles underlying its administration viz. self-government, self support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand,

and the Union of South Africa. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the Imperial Government. The third principle is of modern growth, and may be said to be the outcome of the Imperial Conference (post).

SELF-GOVERNMENT.—(1) *The United Kingdom.*—The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being modest, wielded by a Ministry supported by a majority of the House of Commons. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive Ministry, appointed by the Sovereign and responsible to Parliament; and the Judicature.

(2) *The Indian Empire.*—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. In certain matters the actions of the Secretary of State and Council are not valid unless sanctioned by Parliament. The Governor-General of India in Council (the Council, in this case, being the Council of the Governor-General) acts for executive purposes very much on the lines of the governing body of a Crown colony.

(3) *Imperial Dominions.*—All British dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a dominion unless that dominion is specially mentioned. If the legislature of a dominion enacts a law which is repugnant to an Imperial law affecting the dominion, it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent. Subject to what has been already stated, the parliament of a self-governing dominion exercises within its borders all the ordinary powers of a

sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—(a) *Those having responsible government.* The principal government departments are administered by political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa. (b) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, Mauritius, and Malta. (c) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, St. Vincent, Sierra Leone, Straits Settlements, Trinidad. (d) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Gibraltar, Labuan, and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown. (e) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the King-Emperor. The protectorates of the British Empire include British East Africa, Somaliland, Nyasaland, Uganda, Swaziland, and Nigeria. (f) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation.

SELF-SUPPORT.—With but few exceptions the Imperial Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Imperial Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. This practice has grown up in effect as a corollary of the principle, "No taxation without representation," which was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous experiment the principle has become an accepted maxim of British administration.

SELF-DEFENCE.—For many years the Imperial Dominions have contributed to the defence of the Empire, and a movement has recently been made by the various self-governing Dominions to provide land and sea forces to defend their territories against aggression. Canada has re-organised her old-standing militia, and has a naval defence scheme in contemplation. Australia and New Zealand are parties to a naval scheme which is to be replaced by an Australasian fleet; while their land forces have recently been re-organised. South Africa is developing a scheme of military service for home defence, and makes considerable contributions to the naval expenses of the Empire. These schemes are largely the outcome of the deliberations of the Imperial Conference, held periodically at London, and consisting of representatives of the Ministry of

the Imperial and Dominion Governments. Other Dominions provide for the defence of their immediate area, but the general strategic defence of the Empire is undertaken by the Imperial Government.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their countries at the centenary of the Jubilee of Queen Victoria. Similar gatherings took place in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of the United Kingdom. In 1917 and 1928 the Conference was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. The constitution of the Conference is as follows:—*President*, The Prime Minister of the United Kingdom; *Chairman* (in the absence of the President), The Secretary of State for the Colonies; *Members*, The Prime Ministers and other Ministers of Canada, Commonwealth of Australia, New Zealand, Union of South Africa, and Newfoundland, the Secretary of State for India and other representatives of India; *Secretary*, H. C. M. Lambert; *Assistant do.*, C. T. Davis, C.M.G.; E. J. Harding, C.M.G.

THE LEGISLATURE.—The Parliament of the United Kingdom is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs through the medium of the Colonial Office. The Secretary of State for the Colonies is a member of the Cabinet of the United Kingdom, his active participation in the government of the Imperial Dominions varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State. (See also "Imperial Conference," *ante*.)

THE JUDICATURE.—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for the United Kingdom is the House of Lords.

DEFENCE.—The general defence of the Empire is undertaken by the Imperial Government, aided in an increasing degree by the governments of India (*q.v.*) and the self-governing Dominions (see Canada, Australia, New Zealand, and South Africa). The "first line of defence" is the Royal Navy (see United Kingdom), the "second line" being the Regular and Auxiliary troops of the British Army (see United Kingdom). Questions affecting general strategy are considered and determined by the Defence Committee, which

secures co-ordination between the sea and land forces of the Empire.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. University Colleges and Universities have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at various colleges of Oxford University. These *Rhodes Scholarships* are tenable for three years, are of the annual value of £300, and are open to scholars of each Province of Canada, of each State of Australia, of New Zealand, Newfoundland, Natal, Cape of Good Hope (4), Jamaica, and Bermuda. Each State of the U.S.A. has a similar nomination, and 15 scholarships, each of £250, were formerly in the nomination of the German Emperor, but this provision has since been rescinded by an Act of Parliament.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. The tariff of the United Kingdom is imposed without distinction on foreign and Imperial merchandise. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need.

PRODUCTION.—In 1913 the wheat crop of the world was about 452,200,000 quarters, of which 83,750,000 quarters were produced in the British Empire. India, Canada, Australia, and the United Kingdom are the principal wheat-producing units. Barley, oats and maize, and tea, coffee, sugar, and rubber are largely cultivated. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in the United Kingdom exceeds that of every country except the U.S. Cotton is extensively grown in India and Egypt, and its cultivation is increasing elsewhere. Iron ore is found in many of the Dominions, and pig iron

is largely produced; tin is produced mainly within the Empire, while more than half the world's supply of gold is drawn from South Africa and Australasia. Precious stones are found in various parts of the Empire, South Africa producing the principal supply of diamonds, and India rubies and emeralds.

EXTERNAL TRADE.—The Imports of all Nations may be valued at £3,500,000,000 to £3,750,000,000, and their Exports at £3,000,000,000, to £3,400,000,000, the difference in the totals being made up by the value of services rendered in transport and insurance. The total trade of the British Empire in 1913 was valued at £2,108,686,000 (Imports £1,165,436,000; Exports £943,250,000), of which 73·8 per cent. was Foreign and 26·2 per cent. Inter-Imperial. The United Kingdom (total value £1,493,555,000), India (£327,225,000), Canada (£233,000,000), Australia (£158,275,000), New Zealand (£45,275,000), and South Africa (£103,000,000) are the principal trading units of the Empire.

SHIPPING.—On June 30, 1915, there were 11,353 vessels (over 100 tons) flying the British flag, of which total 9,285 were registered in the United Kingdom and 2,068 in other parts of the Empire. These figures include 10,218 steam vessels of 20,830,918 tons (U.K., 8,675 vessels of 19,235,705 tons; Dominions, 1,543 vessels of 1,595,213 tons) and 1,135 sailing vessels of 443,150 tons (U.K., 610 vessels of 305,663 tons; Dominions, 525 vessels of 137,487 tons).

TOWNS.—*Capital*, London (England). Population (1911), 4,522,961 (with suburbs, 7,352,963).

At the Census of 1911 there were 94 towns in the British Empire exceeding 100,000 inhabitants, of which 50 were in the United Kingdom (England 41, Wales 3, Scotland 4, Ireland 2), 29 India, 4 Canada, 4 Australia, 2 Egypt, and 1 each in New Zealand, South Africa, Ceylon, Hong Kong, and Straits Settlements.

WEALTH OF THE EMPIRE.—It has been computed by statisticians that the capital wealth of the British Empire amounted at the end of November, 1917, to twenty-six thousand million pounds (£26,000,000,000), and its yearly income to £4,000,000,000.

THE BRITISH ISLES.

THE British Isles, including the United Kingdom of Great Britain and Ireland, the Isle of Man and the Channel Islands, lie between the 48th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 77,033,084 acres, or 121,377 sq. miles, with a population in July 1914 of 46,431,544. In 1916 there were 686,892 births (21.1 per 1,000), 650,250 deaths (14.6 per 1,000), and 333,570 marriages (14.2 per 1,000 in the United Kingdom). In 1916 the Police numbered 72,497. The number of Immigrants was 48,762, and of Emigrants 76,479, in 1916. The number of Paupers and Dependents in Jan. 1917 was 794,021, and 5,941 Criminals were convicted in 1916. There were in 1917 66,014 registered Joint-Stock Companies trading in the United Kingdom, the paid-up capital amounting to £2,716,989,124. There were also 1,463 Building Societies, with a share capital of £45,208,375 and £58,460,131 outstanding on mortgage securities, and 2,525 Industrial and Provident (Co-operative) Societies, with 3,221,683 members and a share capital of £44,259,302. In 1916 there were 18,902 applications for Patents, of which 8,424 were sealed, and 14,766 Designs and 2,872 Trade Marks were registered. There were 1,009 cases of Insolvency in 1916. In 1916 shipping to the extent of 49,693,327 tons entered and 46,085,440 tons cleared at various ports of the United Kingdom, while in 1914 sailing (115) and steam (119) vessels numbering 225, exclusive of losses by enemy action, were totally lost, their tonnage being 106,441, and 1,778 lives, including 1,011 on the *Empress of Ireland*, were lost. Of the total area, 31,849,590 acres were under cultivation in 1916, 6,996,558 acres being under corn crops, 2,774,928 under green crops, 21,565,337 other crops, grass, permanent pasture, &c. The live stock included 1,292,626 horses, 7,442,155 cattle, 25,006,987 sheep, and 2,314,331 pigs; 1,975,291 acres of wheat, 1,501,815 acres of barley and bere, and 3,075,263 acres of oats were grown in the United Kingdom, while 100,070,320 cwt. of wheat and 9,960,325 cwt. of wheatmeal and flour were imported in 1916.

UNITED KINGDOM BIRTHS, MARRIAGES, AND DEATHS, 1909-1916.

Year.	Births.	Rate per 1,000.	Marriages.	Rate per 1,000.	Deaths.	Rate per 1,000.
1909	1,145,900	25.7	313,302	14.1	667,608	15.0
1910	1,122,925	25.0	320,699	14.3	630,386	14.0
1911	1,104,986	24.4	329,986	14.6	672,138	14.8
1912	1,096,518	24.0	338,988	14.8	631,491	13.8
1913	1,102,123	24.1	344,247	14.9	652,793	14.2
1914	1,101,551	23.9	352,833	15.3	661,671	14.4

1916	986,892	21.1	333,570	14.2	650,250	14.6

* Based on estimated population in 1914.

† Including only civil deaths.

UNITED KINGDOM IMMIGRATION AND EMIGRATION.

The following tables give the number of persons who left the British Isles between the years 1900-1910, and of those who arrived from 1907-1916. The Nationality of the Immigrants is given, and the chief Destinations of the Emigrants (*British and Irish only*).

NATIONALITY OF IMMIGRANTS.					DESTINATION OF EMIGRANTS.				
Year.	British and Irish.	Foreigners.	Not distinguished.	Total.	Year.	To British North America.	To the United States.	To Australia and New Zealand.	Total.
1903	49,916	62,998	4,381	112,914	1900	18,443	102,797	14,922	168,825

1916	48,762	35,892	—	84,654	1916	18,953	38,884	7,191	76,479

CENSUS POPULATION OF THE BRITISH ISLES.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1823 that statisticians had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, culled from the numbers of baptisms, burials, and marriages, was in the years—

1570.....	4,160,222	1670.....	5,773,645
1600.....	4,811,718	1700.....	6,045,008
1630.....	5,600,517	1750.....	6,517,035

The first general census of the United Kingdom was taken in 1801, and since that time there has been a fresh return every ten years, with the following results:

1801.....	16,345,646	1861.....	29,221,288
1811.....	18,509,116	1871.....	31,845,379
1821.....	21,272,187	1881.....	35,221,482
1831.....	24,392,485	1891.....	38,104,975
1841.....	27,036,450	1901.....	41,076,827
1851.....	27,724,056	1911.....	45,370,530†

* The population of the United Kingdom, a month before the outbreak of the war, was estimated at 46,089,249. The number of persons to the square mile was in 1901: 1,000 618.0; Scotland, 156.5; Ireland, 135.6.

POPULATION ENUMERATED AT EACH DECENNIAL CENSUS IN ENGLAND AND WALES AND SCOTLAND, 1801-1911; IRELAND, 1821-1911; AND ISLANDS IN THE BRITISH SEAS, 1851-1911.

COAL EXPORT DUTY.—A duty was charged upon exported coal during the financial years 1901-2 to 1906-7, the amounts derived therefrom being as follows:—

1901-2	£1,311,706	1904-5	£2,052,774
1902-3	1,991,767	1905-6	2,183,973
1903-4	2,051,653	1906-7	1,494,777

CORN AND GRAIN IMPORT DUTY.—A duty was charged upon imported corn and grain in the financial year 1902-3, and was repealed in 1903-4. The following amounts were raised:—

1902-3	£2,346,796	1903-4	£101,234
MOTOR SPIRIT DUTY, imposed in 1909 10, pro-			
duced £312,881 in 1909 10, £721,951 in 1912-13,			
£823,623 in 1913-14, and £1,923,084 in 1916-17.			

GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), the *Habeas Corpus Act* (1679), the *Act of Settlement* (1701), the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), and the *Parliament Act* (1911). The first secured annual parliaments and the equal administration of justice; the second established the liberty of the person; the third provided for the Protestant succession to the throne; the fourth and fifth created the United Kingdom; and the last enabled the Commons to pass certain Acts without the adherence of the other Chamber. The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign*.—The throne is hereditary in the English house, of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress. While, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General (*Dyson v. Attorney-General* [1911], 27 T.L.R. 143).

2. *The Legislature*.—Parliament consists of two Houses, the House of Lords and the House of Commons. (a) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops, Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

While the House of Lords was formerly entitled to alter or reject any Bill passed by the House of Commons, these powers are much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified, without the consent of the Upper House. The Speaker of the Commons decides what is a Money Bill within the meaning of sect. 1(2) of the Act. As for a Public Bill other than a Money Bill, such a measure will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act.

(b) *The House of Commons*.—This body consists of 707 members, elected by the registered male and female electors in county, borough, and university constituencies. Roughly speaking, about one-third of the population are electors. The maximum duration of Parliament is five

years. Members of the House of Commons, since 1906, receive annually salaries of £400.

(3) *The Executive*.—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The Cabinet, or inner Council, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister. The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

The Judiciary.—(a) *England and Wales*.—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. The High Court comprises the King's Bench, Chancery and Probate, Divorce and Admiralty Divisions. Two Courts of Appeal hear appeals from these divisions, the ultimate Court of Appeal from all the courts in the United Kingdom being the House of Lords. Civil cases arising in London and Middlesex are tried at the Royal Courts of Justice, but civil cases arising in the country are tried on circuit by judges of the King's Bench. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g., the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court, while in the provinces the County Courts have jurisdiction in bankruptcy.

With regard to criminal law in England, it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction are: (1) The judges of the High Court sitting at Assizes for the trial of cases in the provinces, and in London at the Central Criminal Court for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions in respect of cases arising within their districts. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(b) *Scotland*.—Scotts civil law, which is entirely different from that of England, is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of each county is the proper criminal judge in all crimes occurring within the county, which merit only an arbitrary punishment. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(c) *Ireland*.—The civil courts in Ireland are very similar to the English courts.

THE EDUCATION ACT, 1902—SUMMARY.

The passing of the Education Bill into law marks the opening of a new era in English history as well as in English education.

At present, full time school attendance is obligatory up to 12 years of age, with a restricted power of compulsion up to 14 years. The Act now raises the lower limit to 14 years and the higher limit to 18 years, and extends the compulsion between 14 and 18 years by attendance at a Continuation School or some equivalent instruction. In the first place, there may be compulsory full time or part time attendance at the ordinary day school up to the end of the term in which the pupil reaches 15 years. Then "suitable and efficient full time instruction" up to 16 voluntarily, will exempt from compulsory education after that age. The hours of compulsory attendance are now fixed at "320 in each year," and for the first five years may be decreased in any area by the Local Authority; the Continuation Schools are to be free and under the control of the Local Education Authority, though not necessarily maintained by them. "Works" schools are recognised and, although not under control, are to be inspected. There is a new statutory prohibition of all employment under the age of 12, and the prohibition of street trading is raised from 11 to 14; after the age of 12 employment of a day school scholar is restricted, before school hours and forbidden during school hours, or after eight o'clock at night; and on school holidays it is forbidden in factories, workshops, mines or quarries absolutely, and in other occupations "before six o'clock in the morning or after eight o'clock in the evening."

Special provision is made that the employment of each young person who is "under an obligation to attend a Continuation School," may be suspended not only to allow for school attendance, but also to secure "fit mental and bodily condition" for school work.

In order to develop "Public Elementary Schools," the Authorities will provide special classes for cookery, laundry work, housewifery, dairy work, handicrafts, gardening and other subjects of practical instruction; courses of advanced instruction in elementary schools for older scholars; co-operation in the preparation of the children for further education, and their transfer at suitable ages to other schools; and in the supply and training of Teachers.

No fees shall be charged in any public elementary school, and children who are "not in a position to receive the full benefit of education" near their homes, may be boarded and lodged elsewhere by the Local Authority.

"Means of recreation during holidays, and arrangements for attending to health and physical condition," is now to be extended to "other children and young persons, or persons over the age of 18 attending educational institutions." Specific mention is made of centres for physical training, of playing fields, baths, holiday camps for continuation scholars, and of other facilities for social and physical training in the day or evening. Power is extended to provide medical inspection and treatment to Continuation Schools as well as to Secondary Schools if provided by the Local Education Authority, and an optional power to any other educational institution: Nursery Schools or Classes may be provided by the Local Education Authority.

Large portions of the Act are devoted to charges in the details of local administration and the future relations of the Board, and the local authorities are placed upon a reasonable basis. The old method of acquiring is replaced by adopting the new method of the Housing Act (1909). The old Education Acts in regard to Public Enquiries are repealed and a simple code introduced. The imposition of charges on rural parishes by the County is made optional. The veto of the Local Government Board in the Act of 1902, relative to the expenditure for higher education, is abolished, and all mention of a limit on County Councils is struck out of that Act. The power to prosecute parents for cruelty is now extended to Education Authorities. The Act provides that the Board of Education may pay "not less than one half the net local expenditure." The old system of submitting the Annual Code for parliamentary approval before it becomes operative is abolished. A new power is taken to compel Local Authorities to survey the possibilities of their trust, with a view to the establishment of a national system of public education available for all persons capable of profiting thereby, and to consult and "submit schemes" to the Board of Education which, after considering the schemes and making alterations by agreement, may "approve" any scheme, and "thereupon it shall be the duty of the Local Education Authority to give effect to the scheme."

The Board of Education takes power to establish "Federations" for "areas larger than those of individual education authorities" to undertake "any educational or administrative functions." Such bodies may consist of nominated and co-opted persons, the Council appointing two-thirds, but none necessarily being elected members of either Council or Education Committee.

As to Sectional interests as apart from the public interest, private schools may, on their own request only, be inspected free of cost by the Board of Education, and may share all the benefits of the Local Authority's School Medical Service. The Denominational public elementary schools get the benefit of cooking, laundry and other practical instruction provided by the Local Authority; they lose the power of charging fees, but for five years they receive an equivalent sum from the taxes; they get the benefit of the section allowing the Local Authority to provide conveyance, board and lodging, &c., in exceptional circumstances; they get the advantage of, though compelled to receive, visiting teachers for cookery and other "practical instruction"; they are forbidden to close their schools without 18 months' notice, and if unable to carry on the school whilst the notice is running they must allow the Local Authority to do so; they must, when "efficiency and economy" demand it, allow neighbouring schools to be grouped and re-organised.

Expenditure is authorised to aid teachers and students to carry on research, and to give them compensation for loss of office. Pupil teachers, student teachers, and teachers in "practical" subjects are definitely set free from denominational appointment, trust-deed tests, &c. The Board of Education is empowered to constitute and incorporate "official trustees" to take over official trust property from the official trustee of charity lands, and from the official trustee of charitable funds.

SECONDARY EDUCATION IN 1918: SUMMARY.

Statistics.—A recent Report of the Board of Education (Cd. 9045) states, that in the Secondary Schools a deficiency in the number of teachers and the growth in the number of pupils have necessitated the relaxation of the rule that classes should not exceed 30 and may not exceed 35. The effect of increased entry and the stoppage of building has caused "overcrowding, more or less serious, in a very large number of schools, and frequently in all the schools of a particular area." The increase in the number of pupils in the schools on the grant list for the year 1917-18 is 17,745, and of these 11,020 are due to the "longer average school life." On October 1, 1917, there were 14,497 pupils between the ages of 16 and 18, or 9 more than on October 1, 1914. Free places were held on October 1, 1916, by 61,776 scholars in 931 schools on the grant list (including those on the lower grant scale), out of 198,759 scholars in such schools. Thus nearly one-third of the pupils in grant-aided Secondary Schools are receiving free secondary education. In Wales the number of pupils in Secondary Schools in 1917 was 21,538, showing an increase of 1,439 on 1916. Twenty-five per cent. of free places is required in all the Welsh Secondary Schools on the grant list, with the exception of one school of a not local character.

Government Reports.—Among the documents of importance calling for attention during the year are the Reports of two Government Committees, appointed in August, 1916, on the Teaching of Science and the Teaching of Modern Languages, issued in the spring of this year. As to Science, the Committee urged concerted efforts by employers, teachers, local authorities, and the State to increase the flow of capable students to the universities and higher technical institutions in order to secure a larger supply of trained scientific workers. This is not the main object of education, but is a policy in accordance with the necessities of our times, and one which should be brought into harmony with the truly national system now in course of construction. In advocating the more extensive study of modern languages, the Report frankly points out that our position has been "insidiously weakened by our own complacency and by foreign energy."

Superannuation.—It has been plain that many of the secondary teachers were much underpaid, and one of the most interesting movements during the war was the steady pressure of all branches of the teaching profession for more adequate remuneration. The Pensions Bill practically places the teachers in this respect on a Civil Service basis. On consideration of the School Teachers (Superannuation) Bill, as amended in the House of Commons in November, Mr. Fisher moved an amendment to Clause 16, which, he said, was designed to meet the desire of members that there should be a definite indication as to schools in which service should be pensionable. The amendment excluded (a) schools conducted for private profit; (b) schools not open to inspection by the Board of Education, and not shown to the satisfaction of the Board to be efficient; (c) schools able out of their own resources to maintain a satisfactory

pension scheme; and (d) schools which do not satisfy such other conditions as may be prescribed as necessary or desirable for securing the public interest. The amendment was agreed to, as was also a proviso, moved by Mr. Fisher, enabling the Board to fix the maximum salary in regard to schools which are not grant-aided, which may be taken into account in calculating the average salary.

Registration.—Meetings have been less frequent during the year, and the Council has been engaged mainly with the Education Bill. It has sent a number of suggestions and criticisms to the President of the Board of Education, which have been sympathetically considered, and the Council was warmly in favour of the Bill. The number of teachers seeking registration has risen considerably during the year.

Salaries of Teachers.—A Departmental Committee for enquiring into the principles which should determine the fixing of salaries in Secondary and Technical Schools, &c., have presented their report to the Minister for Education, and it is published as a Parliamentary Paper (Cd. 9140).

Public Schools O.T.C.—In March last the half-yearly return, dated October 1, 1917, gave the strength of junior contingents of the Officers Training Corps as officers, 545; cadets, 26,844. This figure has obviously been considerably increased since that date.

Schools Examination.—On what may be called the inner side of education, questions of curricula and examinations, there have been many striking movements during the war. Standard secondary examinations have been secured which will in the future guarantee the results of a full secondary school life, and bring the schools in touch with the universities. The Oxford and Cambridge Schools Examination Board issued recently the list of certificates obtained by candidates from nearly all the great public schools in England. The higher certificate examination was conducted this year for the first time under new regulations, in accordance with the scheme agreed upon between the Board of Education and nearly all the examining bodies. The examination is intended for candidates who have been for two years in the higher form of their school, and is of a rather more specialized character than the examination under the old regulations. As this was the first year of the new examination, and a serious epidemic of illness affected nearly all schools, it is not surprising that the proportion of candidates who were successful fell below what is expected to be the normal level in future. The number of candidates for higher certificates who offered the several groups was as follows:—Group I. (classical studies) 293, of whom 142 obtained certificates; Group II. (modern studies) 114 candidates, 60 successful; Group III. (mathematics) 57 candidates, 39 were successful; Group IV. (natural science) 104 candidates, 38 successful. There were 1,974 candidates examined for school certificates, and 1,193 of them were successful. For lower certificates there were 966 candidates (61 being girls for letters only). The number of lower certificates awarded was 415 (130 letters were given).

FINANCE.

The Revenue and Expenditure of the United Kingdom for the five years ended March 31, 1918, are stated as follows :—

Year.	Revenue.	Expenditure.
1913-14.....	£198,243,000	£197,492,700
1914-15.....	270,332,000	1,132,654,000
1915-16.....	336,767,000	1,559,706,000
1916-17.....	573,428,000	2,198,113,000
1917-18.....	707,235,000	2,696,221,000

The Accounts for 1917-18 and Budget Estimates for 1918-19, on basis of existing taxation, are shown below :—

Revenue.

Revenue.	Receipts, 1917-18.	Estimate, 1918-19.

Expenditure against Capital.....	710,000

* The average daily war expenditure from 24 July to 24 Oct. was £6,977,000.

PRODUCTION AND INDUSTRY.

Occupations.—In 1901 the total number of occupied persons in the United Kingdom was 15,388,501 (12,134,259 males and 3,254,242 females). Of this total the largest percentage, or 12.66, were employed in agriculture, 11.39 in commerce, 8.2 in conveyance, 5.0 in mines and quarries, 7.89 in metals and machinery, 6.77 in building and construction, 6.92 in textile fabrics, and 7.23 in dress.

Trade Unions.—On Jan. 1, 1915, there were 1,123 Trade Unions, with a total membership of 3,959,863. The 100 largest Trade Unions (1,816,506 members) had an income of £2,936,754 and invested funds at Dec. 31, 1911, of £5,570,690.

Crops in 1918.

The following is summarised from an Abstract issued by the Director-General of Food Production. The total home acreage under wheat, barley, and oats is the highest ever achieved in the history of British agriculture. An official and compulsory census, obtained on April 27, 1918, from occupiers of land in England and Wales, shows the following total acreages up to that date.

Corn and Potatoes. (England and Wales only.)

Crop.	Acrea.	Increase over 1906.
		Acrea. Percentage.
Wheat	2,665,000	752,000 +39 p.c.
Barley	1,490,000	58,000 +11 p.c.
Oats	2,820,000	735,000 +35 p.c.
Rye, Dredge Corn, and Pulse.....	682,000	280,000 +69 p.c.
Potatoes	645,000	217,000 +50 p.c.

Total acreage 8,302,000 +2,042,000

The above figures relate only to holdings of one acre and upwards and do not include gardens and allotments. The increase in the number of allotments alone, since 1916, was not less than 800,000 in England and Wales, or 140 per cent. The crop of wheat is the highest recorded since 1882; that of oats, the highest on record by 20 per cent.; and the crop of potatoes is the highest on record by 27 per cent. The total acreage in the U.K. under crops is the highest ever recorded in the history of British agriculture. The acreage under potatoes is the greatest since 1872. Complete returns of the acreage of grass land ploughed are not yet available, but a compulsory census, taken on March 11, 1918, showed that over 1,800,000 acres of "permanent" grass in England and Wales had been broken up by that date, and it is estimated that a total addition of not less than 2,500,000 acres to the tillage area of England and Wales (as compared with 1916) has since been made. If, as may be anticipated from the recent forecasts of the Board of Agriculture for Scotland (300,000) and Ireland (1,500,000), the corresponding addition to the tillage area in those two countries will approximate to 1,800,000 acres, the total for the United Kingdom will be well over 4,000,000 acres.

Live Stock.

Description.	1914.	1915.	1916.
Horses	1,851,042	1,711,858	1,834,215
Cattle	12,184,505	12,171,452	12,451,540
Sheep	27,963,977	28,275,970	28,849,655
Pigs	3,952,615	3,795,131	3,361,891

Fisheries.

The Fisheries of the United Kingdom employed 102,000 men and boys in 1911, 3,155 steam vessels and 21,827 sailing vessels being used. The total value of fish landed in 1915 was £10,165,903 (exclusive of salmon), the weight being 8,637,665 cwt.

Minerals.

The chief metallic minerals produced in the United Kingdom are iron ore, tin, and lead, of which the output and value of the first far exceed the remainder. The following table shows the weight and value of the principal metals won in 1916, the total value being £73,868,627—

Metal.	Tons.	Value.
Iron (from U.K. ores)	4,319,096	35,045,211
" (from Foreign Ores)	4,600,373	37,322,999
Tin	4,697	855,656
Lead	12,573	389,449
Zinc	3,000	205,350
Copper	278	37,794
Silver	86,485	11,284
Gold	273	884

The non-metallic minerals include coal (of which the produce of the United Kingdom is second only to that of the United States) and various stones and slate, salt, and oil shale. The output and value of coal produced in the five years 1912-1916 is as follows—

Year.	Tons.	Value at Pit.
1912	260,416,000	117,921,000
1913	287,430,473	145,535,669
1914	265,664,393	132,596,853
1915	253,206,081	157,830,670
1916	256,375,366	200,014,626

1,049,897 persons were employed in the 3,300 coal mines in 1911.

The coal production is mainly in England and Wales, the counties producing over 20,000,000 tons annually being Durham, Yorkshire, Glamorganshire, and Lancashire; and those over 10,000,000 tons annually are Derbyshire, Northumberland, Staffordshire, Monmouthshire, and Nottinghamshire. The most productive county for iron ore is Yorkshire, the next counties being Northamptonshire, Lincolnshire, Cumberland, and Staffordshire.

Manufactures.

The United Kingdom imports annually (for home consumption) about 2,000,000,000 lb. of cotton and 800,000,000 lb. of wool (in addition to 150,000,000 lb. produced at home), the former principally from the U.S., the latter principally from Australasia and South Africa. Of the Textile Industries cotton is the most important, employing 576,820 hands (217,742 males and 359,078 females) in 1907, the output permitting exports valued at £103,266,538 in 1914 (the imports being £9,373,399). Woollen industries employed 261,192 persons in 1907, the exports being valued at £31,499,885, in 1914 (imports £7,648,409). Flax (linen) industries employed 151,143 persons, the exports being £12,000,000. Hemp and jute, silk, hosiery, and lace are also important. The Metal Industries are next in importance, the manufacture of iron and steel permitting exports in 1914 valued at £41,668,000, exclusive of machinery (£31,000,000). Chemicals and Drugs (exports, 1914, £19,508,000), Shipbuilding (exports, 1914, £7,000,000), Cutlery and Hardware (exports, 1914, £6,512,000), Electrical Goods and Apparatus (£3,000,000), Leather (£4,685,000), Earthenware and Glass (£4,127,000), and Paper (£3,186,000) are also important industries, in addition to Printing and Brewing and Distilling, which are mainly for the home market.

* According to a Return issued by the Board of Trade, the total output of coal in the United Kingdom during the first half of 1915 is estimated to have been 127,826,000 tons, as against 140,274,000 in the first half of 1914, the reduction is thus 12,448,000 tons, or 8·9 per cent. As compared with the first half of 1913 the reduction is 18,997,000 tons, or 12·4 per cent.

For the first six months of 1918, the imports amounted to £652,183,526 and the exports to £246,832,646.

COMMUNICATIONS.

Railways.—On Dec. 31, 1916, there were 23,709 miles of railway open for traffic, the capital of the various companies being £1,349,219,000. The total receipts were £154,468,000 and working expenses £102,251,000, leaving net receipts at £51,947,000. The total number of passengers carried in 1914 (exclusive of season ticket holders) was 1,454,761,000, and the total weight of goods conveyed 568,201,000 tons, as against 520,279,126 in 1913.

Tramways.—The total tramway mileage was 2,703 on Dec. 31, 1914. The total receipts were £15,787,877, the working expenses £10,159,556, and the net receipts £5,588,121, the total paid-up capital being £78,858,930. During 1914 3,426,473,192 passengers were carried. (The information for 1915 and 1916 is not available.)

Roads.—The maintenance and repair of bridges and main roads is within the jurisdiction of the County Authorities in each Division of the United Kingdom, other roads being maintained by Borough, Urban, Rural, and Parish Councils. The increase of motor traction and the consequent use of highways by other than county or district residents has led to a movement in favour of the nationalisation of the highways, and a Development and Road Improvement Fund (the latter derived from duty on motor spirit and from carriage licences) has been formed for the creation and improvement of highways. On March 31, 1916, this fund amounted to £694,395.

Posts and Telegraphs.—In the year ending March 31, 1915, 3,409,000,000 letters (74 per head of the population) were delivered in the United Kingdom, in addition to 880,000,000 post-cards, and 1,321,87,002 halfpenny packets. There were in 1914-15, 87,002 miles of telegraph and telephone lines (3,071,867 miles of wire), transmitting 31,758,000 inland and 14,580,000 foreign messages, and 796,347 telephones, giving 40,699,877 trunk calls in 1914-15.

Navigations.—In 1905 there were 4,673 miles of canals, carrying 43,161,927 tons of merchandise, the revenue being £2,680,710 and expenditure £1,891,213. Of the total mileage 1,363 miles were owned or controlled by railway companies. The total paid-up capital was £47,550,768. The Manchester Ship Canal, opened in 1894, has a total length of 36 miles and connects Manchester with the Mersey port of Liverpool.

Shipping.—In 1914 the mercantile marine of the United Kingdom consisted of 12,862 steamers (19,145,140 gross tons) and 8,203 sailing vessels (864,679 gross tons), a total of 21,065 vessels (20,009,819 tons). In 1914 281 sailing vessels (29,107 net tons) and 858 steam vessels (1,066,065 net tons) were built in the United Kingdom. In 1914 there were 286,806 seamen employed in British vessels (exclusive of vessels employed on rivers and inland navigation, but inclusive of

fishing vessels); of this total, 208,635 were British, 30,960 foreigners, and 47,211 were Lascars and Asiatics. Germans (5,000), Swedes (3,600), Norwegians (2,150), and Russians (2,000) were the most numerous of the foreign nationalities. The total tonnage of British and Foreign shipping entered and cleared at the various ports of the United Kingdom in 1916 (exclusive of vessels engaged in coasting trade or in connexion with the war) is shown below:—

U.K. COTTON IMPORTS, 1909-1916.

Year.	Total Imports. (1,000 lb.).	From U.S. (1,000 lb.).	From Egypt. (1,000 lb.).	From India (1,000 lb.).
1909	2,188,761	1,640,485	411,344	75,770
1910	1,972,741	1,470,129	339,412	168,041
1911	2,207,088	1,682,389	364,342	79,373
1912	2,805,817	2,164,872	491,284	56,624
1913	2,174,300	1,584,769	402,669	51,304
1914	1,864,133	1,284,434	336,102	104,290
1915	2,647,616	2,022,385	448,490	95,962
1916	2,171,002	1,646,863	356,736	80,061

The total imports in 1916 amounted to 21,771,002 cents of 100 lb., of which 17,153,115 cents were from Foreign Countries, and 4,556,907 cents from British Dominions. Of the total imports 19,335,294 cents were retained for home consumption and 2,374,728 cents were re-exported. The sources of the British cotton supply in 1916 were the U.S., 16,468,638 cents; Egypt, 3,567,360 cents; Indian Empire, 800,614 cents; Peru, 448,804; Brazil, 86,724; British East Africa, 120,423; British West Africa, 64,005; British West Indies, 15,863; and Chile, 3,223 cents. The total value of the raw cotton imported in 1916 was £84,729,677.

STREET ACCIDENTS IN U.K., 1917.

In addition to the accidents on the various railways of the U.K., there were no fewer than 45,520 accidents caused by vehicles on streets and roads in 1917. Of this number 2,404 were fatal and 43,116 non-fatal, compared with 2,837 fatal and 54,278 non-fatal accidents in 1916.

1918	Good	

NOTE.—When the yield of wheat per acre differed from the average for the 31 years 1888-1918 by less than one-tenth of a bushel, the year has been noted as Average. When the difference was between 0.1 and 0.5 bushel, the year has been noted as "Slightly above (or below) Average"; when between 0.5 and 1.5 bushels, as "Decidedly above Average" or "Deficient"; when between 1.5 and 2.5 bushels, as "Good" or "Bad"; when between 2.5 and 3.5 bushels, as "Very good" or "Very bad"; and when above 3.5 bushels, as "Extremely good" or "Extremely bad."

OLD AGE PENSIONS.

By the Old Age Pensions Act, 1908, every man or woman who has attained the age of 70 years, who has been a British subject and has had his residence in the United Kingdom for 20 years, and whose means do not exceed £31 10s., is entitled to receive a pension of an amount which varies according to his or her means of from 1s. to 5s. a week. The scale is as follows: Where the yearly means of the Pensioner as calculated under the Act do not exceed £21, the rate of pension per week is 5s.; exceed £21, but do not exceed £23 12s. 6d., the rate is 4s.; exceed £23 12s. 6d., but do not exceed £26 5s., the rate is 3s.; exceed £26 5s., but do not exceed £28 17s. 6d., the rate is 2s.; exceed £28 17s. 6d., but do not exceed £31 10s., the rate is 1s.; exceed £31 10s., no pension is payable. To meet economic conditions arising from the war, such as high food prices, an additional grant not exceeding 2s. 6d. was made to pensioners who proved the necessity, in Sept., 1916. The following table shows the number of Claims received, Pensions payable, revoked, lapsed, &c., during the year ended 31st March, 1917:—

	ENGLAND.	WALES (including Monmouth).	SCOTLAND.	IRELAND.	TOTAL.

N.B.—The figures include casual paupers, and no deductions are made for persons counted twice, such as persons who received indoor and outdoor relief on the days mentioned.

THE INCOME TAX.

THE old Land Tax was levied on personalty, including Salaries, Pensions, and Profits from the occupation of land; but the beginning of the modern Income Tax dates back to 1798, when, to meet the expenses of the French War, Pitt imposed a tax of 2s. in the £ on Property and Employments. He allowed an abatement for children, a lower rate of tax on incomes below £200, and exempted incomes below £60. At the conclusion of peace in 1802 the tax was abolished, but was revived in 1803, divided into Schedules A, B, C, D, and E, as at present, the rate being 1s. in the £; incomes under £60 were exempt, and an abatement was allowed to incomes below £150. In 1806 the exemption limit was lowered to £50 and restricted to Earned Income. On the restoration of peace the Income Tax ceased for 26 years, and was re-imposed by Sir Robert Peel in 1842, when the rate was fixed at 7d. in the £; incomes below £150 were exempted, but no abatement was allowed.

In 1853 Mr. Gladstone extended the tax to Ireland, and the limit of exemption was lowered to £100, with a lower rate of tax for incomes between £100 and £150. In 1863 the differential rate was abolished, and in lieu thereof an abatement of £60 granted to incomes between £100 and £200. In 1872 the abatement was increased to £80 and extended to incomes of £300. During the Crimean War (1854-1856) the Income Tax stood at 1s. 4d. (its highest point prior to 1914), but in 1857 it was 7d., and in subsequent years was gradually lessened till in 1874 it fell to 2d. in the £, and at the preceding General Election Mr. Gladstone proposed to abolish it. In 1876 the exemption limit was again raised to £150, with an abatement of £120 for incomes up to £400. In 1894 exemption was allowed to incomes not exceeding £160, and abatements of £160 and £100 to incomes of £400 and £500 respectively, and an allowance made under Schedule A to landlords for repairs. In 1898 the scale of abatements was revised and extended to incomes not exceeding £700. In 1907 a distinction was made between Earned and Unearned Income, the rate for the former being fixed at 9d. and for other income 1s., but the relief was restricted to incomes not exceeding £2,000.

Mr. Lloyd George further developed the principle of graduation by his famous Finance Act for the year 1909-10, which did not become law till April 29, 1910. The relief for Earned Income was extended to incomes not exceeding £3,000, the allowance to landlords for repairs was increased to one-fourth of the Schedule A value on proof of the expenditure, and an allowance for children was made to incomes not exceeding £500. The right to exemption and abatement was withdrawn from persons residing abroad

(see p. 349), except in regard to Foreign and Colonial Income.

An additional tax (named Super-Tax) was imposed on incomes exceeding £5,000. This was fixed at 6d. in the £ on excess income over £3,000.

From 1909 to 1913 the rate of tax had been 1s. 2d. in the £, but in 1914, after the outbreak of war, the tax was increased to 1s. 8d., but important modifications were introduced. The limit of relief for Earned Income was lowered to £2,500, the rates were graduated according to the total income, and in addition a rebate was granted to Unearned incomes not exceeding £500. This year the Super-Tax was extended to incomes exceeding £3,000, the tax being graduated and an abatement of £2,500 allowed. The restriction as to the amount to be allowed under Schedule A for landlords' repairs was removed. In 1915-16 the Income Tax was raised to 3s., the Super-Tax rates increased (see p. 349), and the assessment under Schedule B for farm profits raised from one-third of the rental to the full annual value. At the same time the exemption was lowered to £130, and the scale of abatements revised (see p. 349), provision being made for the assessment of weekly wage-earners on their actual receipts for each quarter.

The Finance Act, 1916, raised the Income Tax to 5s., extended the rebate on Unearned Income to incomes not exceeding £2,000 (see p. 349), and in addition granted relief for Colonial Income Tax. This relief, however, is restricted to 1s. 6d. in the £, and only benefits incomes exceeding £1,000. The allowance for children is granted to incomes not exceeding £700. The 5s. rate was continued for 1917-18, and in order to work the principle of graduation fairly, incomes exceeding the limit by a small margin are allowed the benefit of the lower scale.

The Finance Act, 1818, raises the tax to 6s., extends the children's allowance to incomes not exceeding £1,000, and grants an abatement of £25 for a wife or dependent relative where the total income does not exceed £800. The limit for Super Tax is lowered to £2,500, with an abatement of £2,000 and the rates are revised (see p. 349).

In addition, an Act to come into force on April 6, 1910, has been passed consolidating the statutes relating to income tax from the 1842 Act to date.

In 1842 the Income Tax yielded £5,000,000, or £700,000 for each 1d. In 1916 it yielded £186,000,000, or over £3,000,000 for each 1d. (see p. 457). In its first year (1910) the Super Tax receipts were less than £3,000,000 from 11,329 persons, and in 1916 they were £20,000,000 from 30,400 persons. In 1916-17, 95 persons returned an income exceeding £100,000. The Excess Profits Duty (see p. 346) up to October 5, 1918, yielded £500,000,000.

THE DEBT OF THE UNITED KINGDOM. (No later figures available.)

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II. about £87,000,000 were added, but the first twelve years of George III. saw £10,000,000 of this paid off. The American War added £121,000,000, making the total nearly £250,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised:

Year.	£	Year.	£	Year.	£
1793...	4,877,956	1801...	27,395,271	1809...	12,298,375
1794...	6,998,389	1802...	14,638,254	1810...	7,792,444
1795...	30,464,831	1803...	8,752,761	1811...	19,143,953
1796...	22,244,982	1804...	14,570,763	1812...	24,790,697
1797...	30,356,873	1805...	16,649,801	1813...	39,649,282
1798...	16,858,503	1806...	13,935,344	1814...	34,563,603
1799...	21,714,863	1807...	10,432,934	1815...	20,241,807
1800...	23,030,520	1808...	12,095,044	1816...	514,059

The amount of the Debt in January, 1816, was £900,436,000 (Funded, £816,312,000; Unfunded, £44,727,000; Annuities, £39,397,000), the annual charge being nearly £33,000,000, but the following amounts were paid off from 1817-1837:—

Year.	£	Year.	£	Year.	£
1817...	1,826,814	1822...	2,962,564	1827...	2,023,028
1818...	1,624,606	1823...	5,261,725	1828...	4,667,965
1819...	3,163,130	1824...	7,456,559	1829...	2,760,003
1820...	1,918,019	1825...	9,900,725	1830...	1,935,465
1821...	4,104,457	1826...	1,195,531	1831...	2,673,858

* The rate of interest on Consols was reduced from £3 per centum per annum to £2 15s. 0d. per centum in March, 1888; and from £2 15s. 0d. per centum to £2 10s. 0d. per centum in April, 1903.

† The average price in 1914, to the end of July, was £75 3s. 2d., and the yield £3 6s. 8d.

‡ Includes £170,142,313 issued under Section 1 (5) of the War Loan Act, 1915.

§ Includes £177,113,529 cancelled under Section 1 (5) of the War Loan Act, 1915, and £401,904,509 cancelled on conversion into 4½ per cent. War Loan under Section 1 (3) of that Act, of which £35,795,490 was exchanged on account of Savings Banks Funds.

|| Includes £313,625,273 4½ per cent. War Loan created in respect of conversions under the War Loan Act, 1915, of which £28,863,600 was in exchange for Stock cancelled on account of Savings Banks Funds.

The Debt is of three descriptions:—I. Funded (a) *Permanent*, (b) *Terminable*; II. Unfunded; III. Certain other Liabilities. The Funded and Unfunded (or Floating) Debts are included in the fixed annual charge, and details of the various descriptions are given below:—

I. FUNDED DEBT.—(a) *Permanent*.

That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on

	1916.	1917.
2½ per cent. <i>Consols</i> ...	£280,466,338	£279,904,678
2½ per cent. <i>Consols</i> ...	2,708,677	2,689,679
2½ per cent. (16 Vict.)	21,639,392	21,546,873
Bank of England Debt	11,015,100	11,015,100
Bank of Ireland do. ...	2,630,769	2,630,769
	£318,460,276	£317,787,099

(b) *Terminable Annuities*.

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off year by year, and after a certain time the capitalized sum entirely extinguished, the Treasury giving an Annuity for a certain number of years in exchange for permanent stock.

The following is a list of these terminable annuities with their amount, the dates when they expire, and their capitalized value as on March 31, 1917:—

(1) Annuities for Life and Terms of Years (£1,485,965, created 1830-1838)	£13,198,872
---------------------------------------------------------------------------------	-------------

(2) Annuities created by Finance Act, 1899:—

(a) Savings Banks Annuities (£745,215 expiring in 1924-1925)	5,559,516
(b) Book Debt Annuities (£745,215 expiring in 1924)	5,286,790

(3) Sinking Fund Annuity (£15,547 created in 1884 and expiring in 1934)	—
-------------------------------------------------------------------------------	---

Total Capital value... £24,045,178

II. UNFUNDED DEBT.

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government is bound to pay off at certain dates; it is represented by certain loans having currency for periods varying from a few months to five or more years.

Pre-War Treasury Bills	£12,995,000
Temporary Advances	217,526,500
Total Unfunded Debt, included in Fixed Annual Charge	£230,521,500

Unfunded Debt on which interest is excluded from the Permanent or Fixed Annual Charge:

3½ % War Stock and Bonds (repayable 1925-28)	£62,746,703
4½ % War Stock and Bonds (repayable 1925-45)	19,989,842
5 % War Stock and Bonds (repayable 1929-47)	2,066,988,385
4 % War Stock and Bonds (repayable 1929-42)	52,418,250
Exchequer Bonds:	
3 % repayable March 1920	21,659,700
" " " Dec. 1920	55,239,255
5 % " " " Oct. 1919	18,477,230
" " " " 1921	83,196,930
6 % " " " Feb. 1920	141,744,780
Treasury Bills	450,710,000
War Saving Certificates	74,487,016
War Expenditure Certificates	23,561,000

Other Debt under War Loan Act.

American Loan	£316,503,177
51,369,863	
Total	£3,439,092,130

III. OTHER CAPITAL LIABILITIES.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They stood as follows on 31 March, 1917:—

Under Telegraph Acts, 1892 to 1913	£3,453,702
" Uganda Railway, 1896 to 1902	2,497,070
" Public Offices Act, 1895	353,774
" (Whitehall Site) Act, 1897	391,550
" Royal Niger Compy. Act, 1899	442,698
" Naval Works Acts, 1895-1905	13,686,207
" Military Works, 1897 to 1903	7,255,902
" Land Registry Buildings, 1900	186,373
" Pacific Cable Act, 1901	1,675,051
" Public Offices Site (Dublin) Act, 1903	173,019
" Public Buildings Expenses Act, 1903	1,239,216
" Cunard Agreement Act, 1904	1,430,000
" Telephone Transfer Act, 1911	7,853,454
" Post Office (London) Railway Act, 1913	611,616
" Housing Act, 1914	949,441
Total	£52,199,073

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On 31 March, 1917, these consisted of the following sums:—

Liability to Suitors (Chancery)	£1,632,135
" " Bankrupts' Estates	1,114,575
" " Suitors, &c. (Ireland) ...	618,435
Court of Bankruptcy	42,542
Unclaimed Dividends (B. of England)	43,019
" South Sea Annuities, &c. "	39,788
" Dividends (Bank of Ireland) ...	1,712
" Prize Money	2,015
Life Annuities, &c. (Nat. Debt Office)	20,000
Unclaimed Dividends	524,365
Deferred Annuity Fund	92,858

COST OF THE DEBT.

The Cost of the National Debt for 1915-16 and 1916-17 is detailed below:—

	1915-1916	1916-1917
I. Annual Interest—		
Perpetual Annuities	£12,934,406	£7,624,439
Government Debts	341,146	341,147
Terminable Annuities	2,897,758	2,860,176
Unfunded Debt	4,330,772	8,630,482
II. Cost of Management	175,321	327,130
Interest on War Debt	38,445,857	100,183,760
American Loan and other debt under War Loan Acts	—	3,672,921
Expenses under War Loan Acts, 1914 and 1916	1,465,197	3,620,618

Cost of Interest, 1918, £280,000,000.

Sinking Fund.

Large sums are paid off annually by means of (a) the New Sinking Fund, which is the balance of the Annual Charge after providing for interest and cost of management; (b) the Old Sinking Fund, which is the application of the surplus revenue of any year for the redemption of debt; and (c) Terminable Annuities, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable.

THE KINGDOM OF SCOTLAND.

His Majesty's Household in Scotland.

Great Steward of Scotland, H. R. H. the Prince of Wales, K.G. (Duke of Rothesay).

In Scotland the principal local court is the Sheriff Court. The Sheriff is the chief judge, but the judge who usually sits is the Sheriff-Substitute. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is practically unlimited, whatever be the money value of the cause. On the criminal side the Court has cognizance of all serious crime, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

The Procurator-Fiscal is peculiarly a Scottish official. Criminal prosecutions are in Scotland conducted by Crown officials at the public expense; the Lord Advocate and his deputies prosecute in the High Court; the Procurators-Fiscal in the Sheriff Court.

BURGH DIRECTORY OF SCOTLAND.

ROLL OF THE CONVENTION OF ROYAL BURGHS (203).

POPULATION—Burghal, 3,201,504; Rural, 1,559,400; Scotland, 4,760,904.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. $54^{\circ} 3' - 54^{\circ} 25' N.$ and long. $4^{\circ} 18' - 4^{\circ} 47' W.$, nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 (227 sq. miles) acres, with a population (1911) of 52,016. The cultivated area (1913) was 93,225 acres, and the live stock included 5,858 horses, 21,368 cattle, 76,618 sheep, and 3,315 pigs. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Fifty miles of railway have been constructed, and about 23 miles of electric tram road.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL, Douglas. Pop. (1911), 21,192 (Castle-town is the ancient capital); the other towns are Peel and Ramsey.

THE CHANNEL ISLANDS

situated off the north-west coast of France (at distances of from ten to thirty miles) are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest.

The land under cultivation in 1916 was 49,678 vergées ($\frac{2}{3}$ vergées = 1 acre), the principal product of the soil of Jersey being potatoes (of which, in 1917, 57,406 tons were exported), tomatoes, and wheat, and of Guernsey green crops and oats, fruits and tomatoes. There were 2,134 horses, 9,808 cattle, 78 sheep, and 3,536 pigs in Jersey; and in Guernsey, &c., 2,114 horses, 7,486 cattle, 289 sheep, and 2,987 pigs in 1915. The

famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and the old Norman dialect is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The climate of these islands is mild, and the soil exceptionally productive. The islands being all but exempt from imperial taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea bathing; the principal town of Guernsey is St. Pierre Port, on the east coast.

* The above is abstracted from the 285th "City's Cash Account" of the series extant A.D. 1633 to 1918. The Accounts earlier than A.D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, *temp.* Queen Elizabeth, have been recently discovered among the Corporation Archives as exceptions to that belief. The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The extract is from the 131st Annual Printed Account of the Corporation, A.D. 1784 to 1918. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1902, and the 14th December, 1905, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts are issued in the form prescribed by those Orders, and show the Income and Expenditure applicable to the year on the various Funds. The Accounts being now made up to the end of March instead of December the figures represent one year and a quarter instead of twelve months, and not having been audited must be taken as approximate.

LONDON WITHIN VARIOUS BOUNDARIES.

	AREA IN STATUTE ACRES.	POPULATION.	
		1901.	1911.
Within the Registrar-General's Tables of Mortality			
Within the Limits of the County of London	74,816	4,536,267	4,521,685
City of London within Municipal and Parliamentary Limits	675	26,923	19,657
Central Criminal Court District	268,356	6,079,115	6,610,021
Metropolitan Police District (not including City)	442,749	6,554,449	7,231,701
Metropolitan and City Police Districts	443,424	6,581,372	7,251,358

Parliamentary Boundaries.—In consequence of changes of boundaries under the London Government Act, 1899 the County of London does not now include the whole of certain Metropolitan Parliamentary Divisions; on the other hand, it includes portions of certain Extra Metropolitan Parliamentary Divisions.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1917-1918 of £57,537,441, and embraces an area of upwards of 699 square miles. The number of new houses built since 1879 up to and including the year 1917 is 602,362, with 34 in course of erection; the new mileage since 1879 being 1,656.

DEPOPULATION OF PRISONS.

	1913	1918
Convict Prisons	2,704	1,393
Local Prisons	14,352	7,335
Reformatory Institutions	928	722
State Inebriate Reformatories	81	3

BRIDGE HOUSE ESTATES.—The rental in 1917 of the Bridge House Estates of the City of London was £164,500. From these estates London, Blackfriars, and the Tower Bridges have been erected, and large sums spent on the purchase of Southwark Bridge and the widening of Blackfriars and London Bridges and their approaches. The estates are also charged with the maintenance and support of all these bridges.

Offices, County Hall, Spring Gardens, S.W. - Education Offices, Victoria Embankment, W.C.

Hours 9.30 to 5 (Saturday 9.30 to 1). - Meets on Tuesday (fortnightly during the War) at 2.30 p.m.

The triennial election was due in March, 1916, but was postponed by the Elections and Registration Acts, 1915 and subsequent Acts.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman, 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, but the present term of office was extended by one year by the Elections and Registration Act, 1915, and was again extended by Acts of 1916 and 1917. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken.

The Finance Committee have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £47,565,300 (of which £11,582,100 represents debt incurred for revenue-producing undertakings), and an annual expenditure (in normal times) of about fourteen millions, of which about seven millions are expended on education. The Asylums and Mental Deficiency Committee administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has lunatic asylums with accommodation for over 20,000 patients. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital outlay on the erection of working-class dwellings up to 31st March, 1918, was £3,097,000. It has always been the aim of the Council to make its working-class dwellings self-supporting, and in this, taking all the dwellings as a whole, it has succeeded, the latest returns showing a total net surplus of about £7,000 on a total rent-roll of about £235,000. The provision of dwellings for the working-classes after the war is engaging the serious attention of the Council, in common with local authorities throughout the country.

The Improvements Committee are responsible for the carrying out of street improvements and the construction and maintenance of bridges (outside the City of London) and tunnels across the river Thames. The largest improvements

carried out in recent years are the new streets between Holborn and the Strand, now known as Kingsway and Aldwych; tunnels under the Thames at Rotherhithe and Woolwich; and an extensive improvement at Westminster, including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge.

The metropolitan main drainage system covers about 149 square miles, including certain districts outside the county, and comprises 370 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and six sludge vessels. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea. The total capital outlay on main drainage is upwards of £12,700,000.

The Council is the tramway authority for London. The system extends over 150 street miles, of which 144 miles are electric lines (mostly underground conduit). Practically the whole of this great system is worked by the Council, and through running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on 31st March last, to £13,674,000, and the net debt outstanding to £8,784,000. The actual results of the year 1917-18 have not yet been reported to the Council, but the approximate figures have been stated to be gross receipts £2,912,295, surplus on working £770,730, net surplus, after payment of interest on capital outlay and providing for repayment of debt, £62,009, to be transferred to the Renewals Fund.

The Education Committee comprises thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. The Council is responsible for the education of about 740,000 children in elementary schools, and has done much to improve the provision of higher education and technical education. Much anxious thought is being given to the problem of widening educational facilities of all kinds and the perfecting of a programme to meet the after-war demands and needs.

Amongst the other powers and duties of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; the sanctioning of local sewers; controlling the building line, and the naming and numbering of streets; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter, and electric-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licences; public health; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shops Act, the Children Act, the Midwives Act, and the Mental Deficiency Act; licensing and inspection of employment agencies; licensing of premises under

the Cinematograph Act; registration of motor cars; collection of duties on dog and establishment and certain other local taxation licences; and registration of War charities. A motor ambulance service has recently been installed, with six stations spread over the county and special facilities for calls by telephone.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock or bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. Owing to the war, expenditure on capital account has been reduced to very small proportions for the time being, and large sums available from the sinking fund and other sources have been invested in War Loan and War Bonds, the total holding being recently reported to be £9,461,490.

No issue of London County Consolidated Stock has been made by the Council since May, 1909. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury

approval, sufficient to repay all expenditure within a period of 60 years. The total Stock now outstanding amounts to £71,862,472, out of total issues of £77,856,011.

The rating for the year 1918-19 was estimated at the beginning of the year at the amounts shown in the statement given below, namely, 3s. 0½d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 1½d. in the pound, together 3s. 2½d., the same rate as for the previous two years and 3d. in the pound less than for the year 1915-16, effected chiefly by war-time economies. Of the total rate, 1s. 9d. was for education. One-half of these amounts was raised for the first half year. For the second half year, however, the rate had to be increased by 6d. in the pound, wholly for education purposes, chiefly teachers' salaries and war bonus, and this increase, representing about £1,138,000, must be borne in mind in connection with the figures in statement. The assessable value of the County of London on 6th April, 1918, was £45,527,802—a 1½d. rate over the whole county producing £189,700.

ESTIMATED RECEIPTS.

1. ESTIMATED BALANCES ON 1 April, 1918	£	1,297,405
2. GOVERNMENT GRANTS—	£	
Exchequer Contributions	503,472

LONDON FIRE BRIGADE. Headquarters: 94 Southwark Bridge Road, S.E. 1.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On 1st January, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On 1st January, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade."

On 31st March, 1918, the complement of the Brigade consisted of:—1 chief officer; 2 divisional officers; 1 assistant divisional officer; and 1,297 officers, firemen, coachmen, and

pilots; a technical and clerical staff of 130, and an ambulance service staff of 58. There were 79 land fire-stations, 6 ambulance stations, 3 river stations; and the appliances included 8 horsed fire-engines, 18 horsed fire-escapes, 75 motor fire-engines, 81 motor fire-escapes, 5 motor hose-tenders, 4 electrically driven turntable long ladders, 19 long ladders, 36 smoke helmets, 86 hose carts, 4 fire-floats and 4 steam fire-engines on rafts, 1 oil tank wagon, 16 motor-cars, and 9 motor ambulances. There were 36 horses and 60 miles of hose in use by the Brigade. The fire-alarms distributed over London numbered 1,582. The number of calls to which the Brigade responded during the year ended 31st December, 1917, totalled 6,938, and the fires numbered 5,251, of which 107 were classed as "serious," including calls and fires due to air raids.

PRINCIPAL OFFICERS.

Chief Officer, Lieut.-Comdr. Sampson Sladen, R.N. (with certain allowances) £1,000
 Divisional Officers, Arthur R. Dyer; Major Cyril C. B. Morris, M.C.
 Assist. Divisional Offr., Comdr. H. Spencer, R.N.

LONDON POLICE.

THE CITY POLICE district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p. 237). Although the area is comparatively small, the rateable value is enormous, and there are 19,657 night residents.

The Force comprises 1 Assistant Commissioner, 3 Superintendents, 6 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 94 Sergeants, and 1,015 Constables; also 1 Sergeant and 40 Constables on private service duty.

The METROPOLITAN POLICE district embraces an area of 447,626 statute acres, with a popula-

tion of between seven and eight millions. There are within this area fourteen Police Courts, viz., Bow Street, Clerkenwell, North London, Lambeth, Marlborough Street, Marylebone, Old Street, Thames, Tower Bridge, Westminster, West London, Greenwich and Woolwich, South Western, and West Ham (see p. 238).

The Force on Oct. 14, 1917, consisted of 36 Superintendents, 652 Inspectors, 3,024 Sergeants, and 18,571 Constables, making a total of 22,283, with 337 horses. The strength of the Metropolitan Special Constabulary on Nov. 30, 1918, was 25,047.

Note.—"Open Daily" means every Week-day, and not on Sundays, except where otherwise stated.

* * Many of the more important Pictures and other National Treasures have been removed for safety during the war.

GUIDE LECTURERS are now in attendance at several of the Museums and Galleries, who give free demonstrations, at stated hours and days. (*Mostly suspended during the war.*)

PICTURES.

NATIONAL GALLERY, Trafalgar Square (founded in 1824).—National collection of pictures. Students' days, Thursday and Friday. Admission after 11 a.m. on Students' days, 6d. Open free on Monday, Tuesday, Wednesday, and Saturday, from 10 to 4, 5, or 6; Sunday, from 2 to 4, 5 or 6. Closed on Good Friday, Christmas Eve, and Christmas Day.

In 1917, 212,574 persons were admitted on free days; 40,584 on Sundays, and 18,060 on Students' days. The average admitted on free days was 1,047.

TATE GALLERY (National Gallery, British Art), Millbank, S.W. (opened in 1897).—National collection of modern British pictures. Students' days, Tuesday and Wednesday, 6d.; other days free. For hours and Sundays see National Gallery. A Gallery for modern foreign art is to be built adjoining this Tate Gallery as soon as circumstances permit. It is the gift of Mr. Joseph Duveen, the famous art collector.

NATIONAL PORTRAIT GALLERY, St. Martin's Place, Charing Cross (founded in 1856, and removed to present buildings in 1895). Series of 1,800 historical portraits. The exhibition galleries are closed for the duration of the war, but inquiries on the subject of portraiture can be made personally at the offices or by letter addressed to the Director.

WALLACE COLLECTION, Hertford House, Manchester Square, W. (opened in 1900).—Pictures, drawings and miniatures, French furniture, bronzes, porcelain, armour, and miscellaneous objects d'art. Closed for the duration of the war.

GUILDHALL ART GALLERY.—Founded in 1886, and maintained by the Corporation of London. Admission free from 10 to 5 March to Sept., and from 10 to 4 April to Feb.—*Director and Secretary, Alfred G. Temple, F.S.A.*

ROYAL ACADEMY OF ARTS, Burlington House, Piccadilly (founded in 1768).—Exhibition of works by living artists, open from 1st Monday in May, to middle of August, from 9 to 7; admission 1s.; catalogue, 1s. Evening Exhibition, last week, from 7.30 to 10.30; admission, 6d.; catalogue, 6d. Exhibition of works by old masters and deceased British artists, 10 weeks from 1st Monday in January, from 9 till 5; admission, 1s.; catalogue, 1s. Gibson and Diploma Galleries, free, daily, from 11 to 4.

ROYAL INSTITUTE OF PAINTERS IN WATER COLOURS, 195 Piccadilly, W.—Exhibitions open to all artists, March 17 to May 30, admission 1s.

ROYAL INSTITUTE OF OIL PAINTERS, 195 Piccadilly, W.—Open from Oct. 13 to Dec. 15, admission 1s.

ROYAL SOCIETY OF PAINTERS IN WATER COLOURS, 5A Pall Mall East, S.W. (founded in 1804).—Exhibitions confined to the works of Members and Associates are held in April and November, admission 1s.

GROSVENOR GALLERY, 51A New Bond Street, W.—Exhibitions of *International Society of Sculptors, Painters, and Gravers, of National Portrait Society*, and of various Exhibitions.

PASTEL SOCIETY, Royal Institute Galleries, Piccadilly, W. Sec. Mrs. Anne Blackmore.

MUSEUMS.

BRITISH MUSEUM, Bloomsbury (opened in 1759).

—Fine collections of ancient sculpture, &c. Exhibition of specimens of early printed books, bindings, manuscripts, autograph letters, and prints and drawings; of Egyptian, Assyrian, Etruscan, Greek and Roman, Cyprian, British and mediæval and other antiquities; coins, gold ornaments, gems, nielli, &c. MSS., illustrating British naval and military history, and documents bearing on early history of the Oversea Dominions. *Reading-room* open daily to readers, from 9 a.m. to 5 p.m. throughout the year. Closed for cleaning first four week-days in March and Sept. Tickets of admission to the reading-room, for purposes of research and reference, are granted on written application to the Director. The applicant must state abode, business or profession and purpose, and must send a recommendation from a householder, who must be a person of recognised position.

NATURAL HISTORY MUSEUM, Cromwell Road, S. Kensington, branch of THE BRITISH MUSEUM (removed to present buildings in 1880-5).—Open free daily, except Good Friday and Christmas Day, at 10; Sundays, from May to Aug. inclusive, from 2.30 to 7; Jan., 2 to 4; Feb. 1 to 2.4, 2 to 4.30; 15 to end, 2 to 5; Mar., 2 to 5.30; April, 2 to 6; Sept., 2 to 5.30; Oct., 2 to 5; Nov. and Dec., 2 to 4. The hours of closing are: Jan. and Feb., 5; Mar., 5.30; April to Aug. (inclusive), 6; Sept., 5.30; Oct. to Dec. (inclusive), 5. The collections comprise all branches of natural history. A morphological series in the centre hall; a collection of domesticated animals; a series of insects illustrating economic zoology; galleries of mammals, including whales; birds and their nests; fishes; reptiles; insects; shells; corals, sponges, &c.; galleries of fossils of all kinds; a botanical gallery; and an extensive gallery of minerals, rocks and meteorites, with series of specimens forming introductions to their study. Students are admitted daily for the special study of the collections, and to make drawings and take photographs of specimens, under special regulations to be obtained from the Director. Admission to the study collections during the war is restricted to research work.

VICTORIA AND ALBERT, South Kensington (founded in 1852).—Museum of decorative and industrial Art, under the control of the Board of Education. Entrance in Cromwell Road. The Museum contains nine departments, viz.:—Architecture and Sculpture; Ceramics; Engraving, Illustration and Design; Metal-work; Paintings; Wood-work; Textiles; Library (books on art); and the Department of Circulation. Open on week-days from 10 a.m. except Good Friday and Christmas Day. Closed at 6 during summer months, Oct. to Mar. at dusk. Admission free. Persons desiring to use the Library must apply for a ticket. The Indian Section, containing collections illustrating the arts and industries of the Indian Empire, is situated in the Imperial Institute Road; open free every day, same hours as above. On Sundays the Indian Section and all other Departments of the Museum, with the exception of the Library and the Circulation De-

partment, are open from 2 p.m. till 6 p.m. during summer months; 10 Oct. to March, closes at dusk.

BETHNAL GREEN.—Branch of Victoria and Albert Museum. Collections of pictures, art objects, animal products, food, entomology, boots and shoes. Closed for the duration of the war.

BRADMORE HOUSE, 14 Queen Street, Hammer-smith.—Early 18th century panelled room. Open, first Monday of each month from 10 to noon.

CARLYLE'S HOUSE, 24 Cheyne Row, Chelsea.—Opened as a museum by the Carlyle's House Memorial Trust. Open daily 10 a.m. to sunset, 12. (6d. Saturdays). Sec., G. A. Lumsden.

GREFFRYE MUSEUM, Kingsland Road, N. (formerly Ironmongers' Almshouses).—Exhibition of old carvings, furniture, and relics of vanishing London, of antiquarian and artistic interest. Open free from 11 to dusk, according to season, Sundays included. Not open on Mondays (except Bank Holidays).

GUILDHALL MUSEUM.—Maintained by the Corporation of London. Closed for the duration of the war.

HOGARTH'S HOUSE, Chiswick.—Open Mon., Wed., Sat. Summer, 11 to 5. Winter, 11 to 3.

LORD LEIGHTON'S HOUSE, 12 Holland Park Road, Kensington.—Pictures, famous Arab Hall. Open on week-days, admission 12., Saturday free.

HORNIMAN MUSEUM AND LIBRARY, London Rd., Forest Hill (L.C.C.).—Natural History of Man and Animals. Admission free. Week-days: 11 a.m. till dusk. Sundays throughout the year from 2 p.m. Closed on Tuesdays.

DR. JOHNSON'S HOUSE, Gough Square, Fleet Street, E.C.—Open daily from 10.30 to 4.30 or 5, according to season, free. Not open on Sundays, except by writing to the custodian previously. Entrance through Johnson's Court, Fleet Street, is the easiest mode of access.

LONDON MUSEUM, Lancaster (late Stafford) House, St. James's, S.W. Instituted, on the lines of the *Carnavalet* at Paris, for the conservation of antiquities and other objects associated with the history of London. Opened April 1912 at Kensington Palace and removed in 1913 to Lancaster House (the lease of which was presented to the nation by Lord Leverhulme), where the collection was re-arranged and opened in 1914. Open on Sundays. (Closed to the public for duration of the war.)

IMPERIAL INSTITUTE, South Kensington. The National Memorial of the Jubilee of Queen Victoria.—(I.) *Exhibition Galleries*, open to public, free, from 10 to 5; from Nov. 1 to Jan. 31, 10 to 4. Entered from Imperial Institute Road. The collections illustrate the raw materials obtainable from the various countries of the British Empire. Royal Presents and Addresses from India and the Colonies, lent by His Majesty the King, are displayed in each Court. There is a Central Stand for distribution of literature and for dealing with inquiries. Special arrangements made for conducted visits of schools and institutions. (II.) *Scientific and Technical Department*, equipped with extensive laboratories and sample rooms, for conducting investigations. (III.) *Technical Information Bureau* for the supply of information regarding new or little known natural products and the commercial utilisation of standard products of the Dominions, India, and the Colonies. (IV.) *Reference Library and Reading Rooms*, and *Map Room*, containing collection of works on tropical

agriculture, official publications and maps, and the principal newspapers of the British Empire. (V.) *Ophioca* (Mezzanine Floor) of the Universities Bureau of the British Empire, Tropical Diseases Bureau, British Women's Emigration Association, and Overseas Nursing Association. (The University of London is housed, at present, in a part of the Imperial Institute Building.)

PARKES MUSEUM of the Royal Sanitary Institute, 90 Buckingham Palace Road, S.W. 1, contains various sanitary appliances and exhibits relating to health and hygiene; there is a large library of sanitary literature. The Museum is open free daily from 9.30 to 5.30, and on Mondays to 7.

PRACTICAL GEOLOGY, Jermyn Street, Piccadilly.—Open every week-day, free, from 10 to 4. Nov., Dec., Jan., and Feb., and 10 to 5 during other months. (Closed during the war, except for students and commercial or scientific enquiries.) *Curator*, J. Allen Howe.

PRINCE HENRY'S ROOM, 17 Fleet Street, E.C.—A 17th century timber constructed house. Jacobean ceiling. Closed to the public for the present. Available for private letting day and evening.

SCIENCE MUSEUM, South Kensington, Exhibition Road and Imperial Institute Road.—Under the control of the Board of Education. The collections illustrate the principles of Science and also their application to industrial purposes. There are four divisions: (a) Scientific instruments and apparatus used in Instruction and Research; (b) Machinery, including models and examples illustrating the development of various branches of Engineering and certain other industries; (c) Naval Models and Marine Engines, together with objects illustrating methods of ship propulsion; (d) Science Library, containing books on pure and applied Science, and a set of British patent specifications. Open daily, except Good Friday and Christmas Day, on Mon., Tu., Wed., Th., and Fri. 10 to 5; Sat. (Oct. to Mar.), 10 to 5; (Apr. to Sept.) 10 to 8; Sunday, 2.30 to 5. Admission free.

ROYAL COLLEGE OF SURGEONS, Lincoln's Inn Fds.—Admission to the Museum by order of members, or on application to the Secretary or Conservator, first four days of the week, from 10 to 5 in summer, and 10 to 4 from Nov. 1 to Feb. 28. (Closed during the war.)

Opposite are *Tilbury Docks and Fort*.

GREENWICH.—Royal Naval College. The Painted Hall, Nelson's Relics, &c., free on week-days (except Friday) from 10 (and on Sundays from 2) till 4 or 6, according to time of year. *Naval Museum*, interesting Collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6. *Chapel* open daily except Sundays and Fridays and after 4 p.m. on Saturdays. *Observatory* only by permission of the Astronomer Royal. (At present closed to the public.)

The estimated income of Greenwich Hospital for 1916-17 was £204,666, the expenditure during 1915-16 being £203,500.

HAMPSTEAD HEATH (250 acres), with *Golden's Hill* (36 acres) and *Parliament Hill* (265 acres), open to the public.

HAMPTON COURT.—Sixteenth century Palace built by Cardinal Wolsey, and enlarged by Sir Christopher Wren for William and Mary. 15 miles from London. Fine view of river. Trams from Shepherd's Bush. Beautifully kept gardens with maze and prolific grape vine (planted in 1768). Old Royal Apartments and collection of pictures. Open every week-day (except Friday) and on Sundays. Hours: Jan., Feb., Nov., Dec., 10 to 4; Sun. 2 to 4; Mar., Apr., Oct., 10 to 5; Sun. 2 to 5; May, June, July, Aug. and Sept., 10 to 6; Sun. 2 to 6. Admission, Mon., Wed. and Thur., 6d.; Tues., 1s. (children half price); Sat. and Sun. free. *Bushey Park* adjoins the Lion Gates of Hampton Court Palace.

HARROW-ON-THE-HILL.—10 miles by Metropolitan and other railways. Large public school (600 to 700 scholars), founded by John Lyon in 1571. The "Fourth Form Room" dates from 1608.

HIGHGATE HILL and **HIGHGATE WOODS**, the scene of the Dick Whittington legends, with *Waterlow Park* (30 acres) and *Lauderdale House*, formerly occupied by Nell Gwynne.

RICHMOND.—The *Park*, and adjacent villages, &c., as Twickenham. *Pope's Villa*, Sheen,

Mortlake, Teddington, Thames Ditton; boating, fishing, &c.

RYE HOUSE, at Hoddesdon, on the River Lee. Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels; Queen Elizabeth's bed; the Great Bed of Ware (mentioned in "Twelfth Night").

ST. ALBANS.—Abbey recently restored. Ruins of ancient City of Verulam, and St. Michael's Church, with tomb of Lord Bacon.

WALTHAM ABBEY.—By Great Eastern Railway. The Abbey ruins, Harold's Bridge (11th century), and Abbey Church; powder-mills, fishing, &c.

WINDSOR CASTLE.—(Closed to the public for the duration of the war.)

WOOLWICH.—*Extensive Barracks for Royal Artillery, Army Service Corps, &c.* Common for military evolutions. *Rotunda* daily, free, from 1 April to 30 Sept., 10 a.m. to 12.45 p.m. and

from 2 p.m. to 5; 1 Oct. to 31 March, from 10 to 12.45 and from 2 to 4; Sundays, April to Sept., 2 to 5; Oct. to March, 2 to 4 p.m. S.E.R. Dockyard Station for Barracks, Rotunda, &c.

OFFICIAL COUNTRY RESIDENCE FOR PRIME MINISTER.—The beautiful and historic Chequers estate in the Chilterns, with the house and its contents, has been presented to the Nation by Lord and Lady Lee of Fareham, to be used after their deaths as an official country residence for future Prime Ministers. This munificent and patriotic gift includes an endowment sufficient to maintain the estate and a staff of servants, with a residential allowance for the occupant.

STONEHENGE.—Situated on Salisbury Plain, this is the greatest of our archaeological relics. It was presented by the owner, Mr. C. H. E. Chubb, in 1918, to the nation.

Laws Relating to Cabs in London.

THE Secretary of State has, by Order dated Oct. 23, 1917, authorised that in addition to the fares specified below there shall be payable the sum of sixpence for every hiring of a motor cab fitted with a taximeter recording the fare by a combination of time and distance, provided that a notice to this effect, in a form approved by the Commissioner of Police, is kept conspicuously displayed inside the cab in such a position as the Commissioner may direct. The Order came into force on Nov. 1, 1917, and will remain in force until the termination of the present war. The Secretary of State has also authorised that a similar charge shall be made in respect of horse-drawn cabs.

HORSE VEHICLES.

FARES BY DISTANCE (Cabs either with or without a Distance Recorder, but without a Taximeter): If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles 1 0

The driver may notify, by means approved by the Commissioner of Police, that he is willing to accept a fare of 6d. for any journey not exceeding a mile. 8 d.

For every additional mile or part of a mile If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0

If hired *within*, but discharged *outside* the Four-Mile Circle, whole distance not exceeding one mile, 1s.; exceeding one mile, then for each mile *ended* within the circle, 6d.; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four-Mile Circle: Four-wheeled Cabs, for one hour or less, 2s.; two-wheeled Cabs. 2 6

If above one hour, for every quarter hour or part of a quarter of the whole time, four-wheeled Cab, 6d.; if a two-wheeled Cab ... 0 8

If hired *outside* the Circle, wherever discharged, for one hour or less 2 6

If above one hour, then for every quarter hour or part of quarter of the whole time. 0 8

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE OR BY TIME.

LUGGAGE.—For each bicycle, child's mail cart, or perambulator, 6d.; for each package carried outside the carriage 0 2

EXTRA PERSONS.—For each above two (two children under 10 years of age count as one person) 0 6

WAITING.—By distance: for every 15 minutes completed—if hired within the Four-Mile Circle, 4 wheels, 6d.; 2 wheels ... 0 8

If hired without Circle, 2 or 4 wheels ... 0 8

MOTOR CABS.

The fare payable for the hiring of a *Motor Cab fitted with a Taximeter* shall be according to the following scale:—

(a) Not exceeding one mile, or for a period of time, or a journey not exceeding ten minutes 1 0

(b) Exceeding one mile or ten minutes:—
(1) For each quarter of a mile, or for a period of time, or a journey, not exceeding two and a half minutes ... 0 2
(2) For any less period or distance. 0 2

In addition to the above the driver may be entitled to charge the following extra payments:—

(1) **Luggage**:—Whether hired by distance or by time—for each bicycle, child's mail cart, or perambulator, 6d.; for each package carried outside 0 2

NOTE.—Luggage carried on the footboard of a hansom-pattern cab so that the doors do not close over it is deemed to be outside within the meaning of this clause.

(2) **Extra persons**:—When licensed to carry more than two persons—for each additional person beyond two, for the whole journey. 0 6

Provided that two children under the age of ten years shall count as one person.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares are according to distance or time, at the option of the hirer, expressed at the commencement of the hiring; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate

not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1866, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40s.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the

person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

HACKNEY CARRIAGE STATISTICS.

During 1917 there were licensed public carriages:—Hansom's, 56; clarences—animal power 574, mechanical power 4,717; omnibuses—animal power 11, mechanical power 2,414; tramway cars—mechanical power 2,624; total, 10,396. Drivers and conductors: Cab drivers—animal power 837, mechanical power 5,917; stage drivers—animal power 7, mechanical power 6,658; composite licences (stage driver and conductor)—animal power 10; mechanical power 1,488; conductors, 9,923; total, 24,840.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1917, of 145 men examined, 103 were successful. The proportion of drivers to hackney carriages is 12½ drivers to 10 carriages.

LOST PROPERTY.

Of lost property, 54,210 articles were deposited, of which 26,799 were claimed by the owners. The number of awards paid to drivers, &c., was 24,115.

Newspapers.—It has been stated that over 60,000 newspapers are now appearing at daily or weekly intervals in the various quarters of the globe. Of these considerably over one-half are in the English language, there being 23,000 in the United States, and over 13,000 in the British Empire. The most justly celebrated newspaper in the world is *The Times*, founded in London in 1788. The greatest circulation ever yet reached by any daily morning newspaper in any country is that of the *Daily Mail*, founded in London on May 4, 1896.

Deaths from Starvation.—In 1917 there was a total of 66 deaths from starvation, or cases in which death was accelerated by privation, in England and Wales. Twenty-one occurred in the administrative County of London and 45 in the country. In 1916 the cases numbered 41, 10 being in London. For the most part the deaths appear to have been due to disease, due to or accelerated by want or exposure. In 48 of the 66 cases no application had been made for relief, or else application was only made when the person was in a dying condition.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any officer subordinate to him; while "India" means British India, together with any territories of any native prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or any officer subordinate to him (Act 52-3 Viet., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government; and within the Indian sphere of influence lie the self-governed States of Afghanistan, Nepal, and Bhutan.

Boundaries.—The political boundary of India marches with Persia from the Gulf of Oman to near Zulfikar on the Harirud; then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab; thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of that lake by the line demarcated in 1805 up to Povalo Schweikovski on the Taghdumbash Panir, where three empires—the British, Russian, and Chinese—meet. From this point the frontier, in many parts not yet clearly defined—touches the Chinese Empire, mainly along the crests of the Muztagh (Karakoram) range and the Himalayas, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrain, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,803,000 square miles, with a population of over 315 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the States under native administration, comprise 61 per cent. of the area, and nearly 78 per cent. of the population. The details are as follows:—

PROVINCE, STATE, OR AGENCY.	Area in square miles (1921).	PERSONS.			Differ-ence per cent 1911 & 1901.	
		1911.				1901.
		Males.	Females.	Total.

* Districts and Administered Territories. † Includes an estimated population of 1,604,265. ‡ Included in Punjab.

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsau-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India Native States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghats all but complete this enviroing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the

Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The fourth general census of India was taken on the 10th March, 1911. The enumeration embraced the whole of the Indian Empire, but only estimates could be made for a few outlying tracts and tribal areas on the frontier. The census returns gave a population of 315,156,396, as compared with 294,361,056 in 1901 (for details see p. 499); an increase in the ten years of about 7 per cent. The returns were in some parts much affected by severe malarial fever and plague, which caused a large temporary decrease in certain towns, particularly Cawnpore and Nagpur. The census total of 1911 is divisible into 244,267,542 (or 78 per cent.) for British India, and 70,888,854 (or 22 per cent.) for Native States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1911 29 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet.

Religions.—The population by religions, so far as ascertained, includes 217,586,892 Hindus (69 per cent. of the total), 66,647,299 Muhammadans (21 per cent.), 10,721,453 Buddhists (3 per cent.), nearly all in Burma, leaving 7 per cent. for all other religions, including 3,876,203 Christians (three-fifths of whom are in Madras, Travancore, and Cochin), 3,014,466 Sikhs (a large increase), 1,248,182 Jains (a decline, ascribed to plague), 100,006 Parsis, and 10,295,168 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1911 dependent on pasture and agriculture. Industrial occupations support 35,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 5,000,000 persons.

Sec.—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1911

over 26,400,000 widows in India. The males outnumbered the females in 1911 in the proportion of 1,000 to 954.

Languages.—India has 220 vernacular languages, of extraordinary variety. The languages spoken by 312,912,624 persons in 1911 are grouped in four families; and 23 languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 82,003,235 persons), Bengali (48,367,915), Telugu (23,542,861), Marathi (19,806,636), Tamil (18,128,365), Punjabi (15,870,758), Rajasthani (14,067,590), Western Hindi (14,037,882), after which come Gujarati, Kanarese, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

* In 1906.

India under the Crown.

For a brief sketch of Indian History from 326 B.C., the date of Alexander's invasion of India, to 1858, see WHITAKER'S ALMANACK for 1917, page 566 et seq.

IN 1857, during Earl Canning's administration, a mutiny of sepoys broke out on the 10th May at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Com-

pany." Legislative Councils were established. Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of Lord Northbrook (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was marked by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The principal publications relating to India presented to Parliament in the past year were:—Statistical Abstract, 1906-7 to 1915-16; Moral and Material Progress Report, 1916-17; Review of the Trade of India in 1916-17; Indian Financial Statement for 1918-19; Home Accounts, 1916-17; Explanatory Memorandum regarding the Accounts and Estimates of 1917-18; Return of Net Income and Expenditure, 1914-15 to 1916-17; Report on Constitutional Reforms; Report of the Indian Wheat Committee; Addresses presented to the Viceroy and the Secretary of State for India in connection with Constitutional Reforms; Report of the Sedition (Rowlatt) Committee; Report of the Bengal Detenus Committee. They can be purchased through any Bookseller, or direct from H.M. Stationery Office, Imperial House, Kingsway, W.C. 2.

One-inch Ordnance Survey Maps are published by the Survey of India, and can be obtained from the India Office Sale Agents, Messrs. E. Stanford, Ltd., 12 to 14 Long Acre, London, W.C. 2 (1s. to 1s. 6d. each).

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chital made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chital to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Amphill* occupied the post of Viceroy. *Lord Curzon* was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed

Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure have been granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, which enables them to dispose of growing sources of revenue, the control of the Government of India being relaxed. A Royal Commission was appointed in 1912 to inquire into the public services in India. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. A Royal Commission was appointed in April, 1913, to examine and report on Indian Finance and Currency, but decisions on the more important recommendations were deferred owing to

the war. The outbreak of war in Europe in August, 1914, was the signal for a great outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government, and large forces of Indian troops were despatched for service in Europe, Asia, and Africa.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North-West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India.

Lord Chelmsford succeeded in April, 1916. A strong Commission was appointed to examine and report on the possibilities of further industrial development in India. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India," formulated by Mrs. Besant and her party. Restrictions, afterwards removed, were placed on Mrs. Besant in consequence of her methods.

The Mesopotamia Commission strongly criticised the administration from India of the early stages of the campaign, and its conclusions are expected to have an important bearing on the organisation of the Indian Army. The Public Services Commission, appointed during Lord Hardinge's administration, reported, and its recommendations are under consideration. Three Indian leaders attended the Imperial War Cabinet. As regards indentured Indian labour in the Colonies, the Dominions' representatives accepted the principle of reciprocity of treatment, and commended to the favourable consideration of their Governments three general principles: that the facilities for settlement accorded to Indians should not be less advantageous than those allowed to other Oriental nations; that facilities should be accorded to educated Indians visiting the Colonies for travel and study; and that Indians who have been permitted to settle should receive sympathetic treatment. Action was taken against the Mahsuds and Mohmands on the North-West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced. During the year the Viceroy made the following important announcements:—The grant of King's Commissions to Indians, a contribution of £100,000,000 towards the cost of the war, and further grants towards the improvement of education. The special conditions arising from the war induced the Government of India to anticipate the findings of the Commission by organising at once, as far as was possible, the resources of the country, with a view to making India more self-contained. It also devoted itself to the supply of essential stores for the armies in the field. A Munitions Board was created for the purpose of mobilising the resources of India for the war.

Towards the end of 1917 the Secretary of State visited India in connexion with a development

of constitutional progress, for some time under consideration by the Home and Indian Governments. The Secretary of State and the Viceroy submitted their report to H.M.'s Government in April, 1918. Their proposals are the application to practical conditions of four propositions:—(i) As far as possible complete popular control in local bodies and the largest possible independence for them of outside control; (ii) to give the Provinces the largest measure of independence of the Government of India compatible with the discharge by the latter of its own responsibilities; (iii) the authority of the Government of India to remain indisputable in essential matters, saving its responsibility to Parliament, pending experience of the effect of the changes; (iv) the control of Parliament and the Secretary of State to be relaxed.

The proposals aim at affording Indians a fair share in the Government of the entire country, while providing in the provinces the means for them to attain the stage of responsible Government.

To give effect to these principles the following measures are proposed:—*Parliament and the India Office*.—The Secretary of State's salary to be placed on the Home Estimates; a *Parliamentary Select Committee for Indian Affairs* to be appointed every Session; the organisation of the *India Office*, including the constitution of the *Council of India*, to be examined by a Committee.

The Government of India to preserve indisputable authority in essential matters; establishment of a *Privy Council for India* as an advisory body. The Indian element in the Governor-General's *Executive Council* to be increased; abolition of the statutory maximum and qualification for seats; a limited number of members of the Legislature to be appointed to positions analogous to Parliamentary Under-Secretaries.

The Legislature to consist of a *Council of State*, or Upper House, of 50 members (21 elected, 29 nominated, of which latter not more than 25 to be officials), and a *Legislative Assembly* of 200 members, two-thirds elected and one-third nominated, of which latter not less than one-third to be non-officials. Differences of opinion on legislation to be settled by joint Sessions, but the will of the Council of State to prevail in cases where the Governor-General in Council certifies legislation as essential. Resolutions to have effect only as recommendations. The Governor-General to have power to dissolve either or both Houses, and to retain his existing power of making Ordinances, and the Governor-General in Council his power of making Regulations; the Governor-General and the Crown to retain their respective powers of assent, reservation, or disallowance of legislation. Nominated official members of both Houses to have freedom of speech and vote except when Government otherwise directs. Joint Standing Committees of both Houses to be associated with Departments.

The Provinces.—The *Executive Government* to consist of the Governor and Executive Council, a Minister or Ministers nominated by the Governor from the elected members of the Legislative Council, and an additional member or members without Portfolios. The *Provincial Executive Council* to consist of two members, one an Indian. Devolution of responsibility in certain subjects: "transferred" subjects to be under the charge of the Minister or Ministers appointed for the term of the Legislative Council; "reserved" subjects to remain with the Governor and

Members of the Executive Council. Additional (official) members to be appointed by the Governor for consultation and advice. Decisions on "reserved" subjects to rest with the Governor and Executive Council, on "transferred" subjects with the Governor and Ministers. A limited number of members of the Legislative Council to be appointed to positions analogous to that of Parliamentary Under-Secretaries. Ministers to hold office at the will of their constituents, but Governor not bound to accept advice of his Ministers at first.

Provincial Legislative Councils with a substantial elected majority, elected by direct election on a broad franchise, with such communal and special representation as may be necessary. *Standing Committees* elected by the Legislative Council from among their own members to be attached to each Department in an advisory capacity. Legislation on all subjects normally to be passed in the Legislative Council. Grand Committees, partly elected, partly nominated, to legislate on "reserved" subjects certified as essential by the Governor.

Finance.—Complete separation between Indian and provincial heads of revenue; provincial contributions to the Government of India to be the first charge on provincial revenues, and Provincial Governments to have certain powers of taxation and borrowing. In the event of the Legislative Council refusing to accept the budget proposals for reserved subjects, the Governor in Council to have power to restore the whole or part of the original allotment. Except in so far as the Governor exercise this power, the budget to be altered so as to give effect to the resolutions of the Legislative Council.

Local Self-Government.—Complete popular control in local bodies to be established as far as possible.

The question of the *modification of the Provincial Constitutions* to be reconsidered after five years from the first meeting of the new Councils.

Committees to be appointed to advise on the question of the separation of Indian from provincial functions, and to examine constituencies, franchises, &c. A Commission of Inquiry to be appointed after ten years to review the constitutional position.

The Native States.—A Council of Princes to be called into existence as a permanent consultative body. Members of the Council of Princes to be invited to serve on the Committee of the Privy Council.

The authors of the Report conclude with certain recommendations regarding the abolition of racial bars, fixed percentages of recruitment in India for, and as to pay, pensions, leave, and allowances in, the Public Services.

The year 1918 was marked by some symptoms of unrest; the Rowlatt Committee, appointed in 1917, reported, and revealed evidence of the association of the Bengal seditionists with German plots; anti-Moslem riots broke out in Berar, and Muhammadans organised agitation leading to disturbances in Madras and Calcutta. Recruiting for the Army broke all records; the operations against the Marris were closed; a War Conference was held at Delhi with the object of stimulating India's efforts in the war. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. Reckless speculations in Broach cotton prevailed, and

a certain amount of discontent due to high prices was manifested. The Home Rule League continued its activities. The Industrial Commission, appointed in 1916, issued a report. Two representatives of the Indian people, appointed by the Government of India, attended the Imperial War Cabinet in London.

IMPERIAL LEGISLATION.—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act (1773)*, which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. *Pitt's India Act (1784)* left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), which still regulates Indian affairs, all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act, as amended by Acts of 1889 and 1907, at least 9 members of Council must have resided in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 14. Their term of office is now 7 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915.

INDIAN LAW.—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H.I.M. GEORGE V.

Secretary of State—The Rt. Hon. EDWIN SAMUEL MONTAGU, P.C., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. In all matters the Secretary of State can impose his orders on the Government of India. No expenditure from Indian revenues is legal unless sanctioned by him and a majority of his Council. In matters requiring secrecy (e.g., foreign policy and the affairs of native States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office (see pp. 204-205).

The King-Emperor appoints the Governor-General, the Governors of Madras, Bombay, and Bengal, the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of the Governors of Madras, Bombay, and Bengal, and the Judges of the High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the Secretary of State's approval. The term of these appointments, except judgeships, is usually five years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains six ordinary members (of whom three must have served in India ten years), as well as himself and the Commander-in-Chief, who is an extraordinary member. All Acts of the SUPREME GOVERNMENT IN INDIA run in the name of "The Governor-General in Council." Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. The Governors of Madras, Bombay, and Bengal and the Lieutenant-Governor of Bihar and Orissa have each an Executive Council of three members, including one Indian. The Governor-General's Legislative Council, in accordance with the Indian Councils Act, 1909, consists of 28 official and 32 non-official members (including 27 elected), in addition to the *ex-officio* members. There are similar Legislative Councils in Madras, Bombay, Bengal, Bihar and Orissa, the United Provinces, the Punjab, Burma, Assam and the Central Provinces and Berar. For the first five of these the maximum number of members is 50, and for the last four 30, in addition to *ex-officio* members. The Governor-General's Legislative Council has an official majority, while all the provincial councils have non-official majorities. Every Indian Act requires the Governor-General's assent, but the Crown may disallow it. The seat of the Supreme Government is now at Delhi, the summer headquarters being still at Simla.

Business is conducted by ten Departments—Finance, Foreign and Political, Home, Legislative, Revenue and Agriculture, Public Works, Commerce and Industry, Education, Army, and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Supreme Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his

Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with Afghanistan, Nepal, and other conterminous countries, and, through its Political Residents and Agents in the various native States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The *Home Department* deals with the civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department*. The most important subjects that come before the *Revenue and Agriculture Department* are land revenue and surveys, forests, agricultural development, famine, and meteorology. The *Public Works Department* deals with irrigation, roads, buildings, &c. The department of *Commerce and Industry* deals with trade and shipping, customs, excise, salt, ports, post-office, telegraphs, mines, factories, statistics, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education Department* has the control of education, local government, sanitation, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce and Industry Member of Council, and controlled by a Railway Board.

British India is divided into 15 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies; under Lieutenant-Governors, the provinces of Bihar and Orissa, the United Provinces of Agra and Oudh, the Punjab, and Burma; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the Central Provinces and Berar, Assam, Ajmer-Merwara, Coorg, British Baluchistan, the North-West Frontier Province, Delhi, and the Andaman Islands. The chief Local Governments enjoy a large measure of financial and administrative independence, which was further extended in 1912. The Governors of Madras, Bombay, and Bengal have greater independence than the others, being alone permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are about 270 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal, Bihar and Orissa, and in the North-Western Provinces (the United Provinces of Agra and Oudh). Appeals may be carried to the English Privy Council. The Punjab and Lower Burma have *Chief Courts*. The Central Provinces, Berar, Oudh, Sind, North-West Frontier Province, and Upper Burma have each a *Judicial Commissioner's Court*.

THE SUPREME GOVERNMENT, DELHI.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees per mensem.]

<i>Viceroy and Governor-General</i> , His Excellency the Right Hon. Frederick John Napier, Baron Chelmsford, P.C., G.M.S.I., G.C.M.G., G.M.I.E., G.B.E. b. 1868 (assumed charge 4th April, 1916)	Rs. 20,900
<i>Private Secretary</i> , J. L. Maffey, C.I.E.	Rs. 2,250

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

(1) **MADRAS** (area, 142,330 sq. miles; pop. 41,405,404) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 90 per cent. of the people are Hindus. There are about 1,200,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil and Telugu. The Governor of Madras is assisted by an Executive Council of three members. The Legislative Council consists of 48 members, 21 nominated (including not more than 16 officials) and 21 elected according to regulations made under the Indian Councils Act, 1909, in addition to 4 *ex-officio* and 2 extra members. Madras (134,130) and Trichinopoly (123,512), famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Madras. Population, 518,660.

Governor, H.E. the Rt. Hon. Baron Willingdon, G.C.I.E. (Oct., 1918)Rs. 10,000

(2) **BOMBAY**.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the

East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including Sind, but not Aden and Perim, which are also attached to it) contains 122,979 square miles (about equal in size to the British Isles), with a population of 19,626,477. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. Marathi, Gujanti, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. The Governor has an Executive Council of three members, while the Legislative Council comprises 48 members, 21 nominated (including not more than 14 officials) and 21 elected, in addition to 4 *ex-officio* and 2 extra members. Ahmedabad (216,777), Poona (158,856), Surat (124,868), and Karachi (151,903), the capital and chief port of Sind, are the most important cities. For Aden and Perim, see p. 512.

* The areas and populations of the separate provinces are for British territory only. The populations are according to the Census of 1911.

(3) **BENGAL** (area of newly-constituted province, 78,699 sq. miles, with population of 45,483,977) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 53 per cent. of the population are Muhammadans and 45 per cent. Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. The Governor is assisted by an Executive Council of three members, created in 1910. There is a Legislative Council of 53 members, 20 nominated (including not more than 16 officials) and 28 elected, besides 3 *ex-officio* and 4 extra members. Important cities are Dacca (1,08,551), now the second capital, and Howrah (179,006), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta. Pop., including suburbs and Howrah, 1,222,313.

(4) **THE UNITED PROVINCES OF AGRA AND OUDH**, called "North-Western Provinces and

Oudh" until 1905 (area, 107,267 sq. miles; pop. 47,182,044), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Western Hindi are the chief tongues. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1887 a Legislative Council was established. Under the Indian Councils Act it consists of 49 members, 26 nominated (including not more than 20 officials) and 21 elected, besides 2 extra members. Among the important cities may be named the ancient city of Agra (185,449), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (203,804), the great manufacturing centre, Cawnpore (178,557), Bareilly (129,462), and Meerut (116,227).

(5) **THE PUNJAB** (area, 99,222 sq. miles; pop. 19,583,128) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce.

More than half the population are Muhammadans, and more than a third are Hindus. The Sikhs number about 2,883,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. In 1897 a Legislative Council was constituted, which now consists of 30 members, 17 nominated (including not more than 11 officials) and 11 elected, besides 2 extra members. After the close of the war the Punjab Chief Court is to be converted into a High Court. Amritsar, the sacred city of the Sikhs, has 152,756 people.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 230,839 sq. miles, about equal to Spain and Portugal, with a population of 12,115,217. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Aracan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States are administered by local sawbwas, or chiefs, under the superintendence of a political officer. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased over 15 per cent. in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Karen are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 86 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are

considerable exports by land to Western China. The Burma Railways have reached Myitkina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. The Lieutenant-Governor of Burma has a Legislative Council consisting of 19 members, 15 nominated (including not more than 7 officials) and 2 elected, besides 2 extra members.

(7) BIHAR AND ORISSA (area of new province, 83,181 sq. miles, with pop. of 34,490,084). This province, which came into existence on 1 April, 1912, comprises Bihar, Orissa, and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Lieutenant-Governor has an Executive Council of 3 members, created in 1912. There is a Legislative Council of 44 members, 21 elected and 19 nominated (including not more than 15 officials), besides 3 *ex-officio* and 1 extra member. A new High Court for the province has been established at Patna. The Court finally came into existence on 1 March, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar, and tobacco are cultivated. The bulk of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

(8) THE CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,057 sq. miles; pop. 10,859,146). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Hindi and Marathi. The province, which is served by the Indian Midland Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,766 sq. miles; pop. 3,057,162), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

In 1913 a Legislative Council was established. It consists of 25 members, 17 nominated (including (a) not more than 10 officials and (b) 3 non-official persons resident in Berar) and 7 elected, besides 1 extra member.

CHIEF CITY, Nagpur. Population, 101,415.

CENTRAL PROVINCES.

Chief Commissioner, The Hon. Sir B. Robertson, K.C.M.G., K.C.S.I., C.I.E. (Aug., 1912)...Rs. 5,167

BERAR.

Commr., B. P. Standen, C.I.E.....Rs. 2,750

(9) ASSAM (area, 53,015 sq. miles; pop. 6,713,635), was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. In 1912 a Legislative Council was established. It consists of 25 members, 13 nominated (including

not more than 9 officials) and 11 elected, besides 1 extra member. Seat of Government, Shillong. Population 13,639.

Chief Commissioner, N. D. Beatson Bell, C.S.I., C.I.E.....Rs. 4,667
Chief Secretary, J. E. Webster, C.I.E.Rs. 2,250
Second Sec., A. W. Botham, C.I.E.....Rs. 1,800
Public Works Sec., F. E. Bull.....Rs. 2,500

(10) THE NORTH-WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan (area, 13,418 sq. miles; pop. 2,196,933, partly estimated). Attached to the Province are the five trans-border political agencies of Malakand, Khyber, Kurram, Tochi, and Wano, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned (estimated area 25,500 sq. miles, estimated population 1,623,094). The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

CHIEF CITY, Peshawar. Population, 97,935.
Agent to Gov.-Gen. and Chief Commr., The Hon. Lt.-Col. Sir G. O. Roos-Keppel, G.C.I.E., K.C.S.I.Rs. 4,000

Judicial Commr., W. P. Barton, C.I.E. Rs. 2,750
Res. Commr., Lt.-Col. D. B. Blakeway, C.I.E. Rs. 2,750

(11) AJMER-MERWARA (area, 2,711 sq. miles; pop. 501,395), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmer-Merwara and the chief executive and judicial authority.

CHIEF CITY, Ajmer. Population, 86,222.
Chief Commissioner, The Hon. Lt.-Col. J. Manners Smith, V.C., C.I.E., C.V.O.Rs. 4,000

(12) COORG (area, 1,582 sq. miles; pop. 174,976), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.

Chief Comm., The Hon. H. V. Cobb, C.S.I., C.I.E. Rs. 4,000

(13) BRITISH BALUCHISTAN (area, 54,228 sq. ms.; pop. 414,412) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chotiani, Nushki, Zhab, Chagai, Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs *via* Quetta. A railway now runs from Quetta to Dalbandin, where there is a caravan route (358 miles), opened in 1896, with wells, rest-houses, telegraphs, &c., to Persian Seistan. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

Chief Commissioner of British Baluchistan, Hon. H. R. C. Dobbs, C.S.I., C.I.E.....Rs. 4,000
Rev. and Jull. Commr., Lt.-Col. A. B. Dew, C.S.I., C.I.E.....Rs. 2,750

(14) **DELHI**.—This province (area, 557 sq. miles; pop. 391,828) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi.

Chief Commissioner, Lt.-Col. H. C. Beadon Rs. 3,000

(15) **THE ANDAMANS AND NICOBARS** (area, 3,143 sq. miles; pop. 26,459) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coco-nuts.

Chief Commissioner and Superintendent (Port Blair), Lt.-Col. M. W. Douglas, G.I.E. Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,600.)

Aden and Perim.—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-

route between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857—form part of the Bombay Presidency, and have an area of 80 square miles and a population of 46,165 (1911). Aden is a free port. The traffic in arms and ammunition is subject to special regulations. The total trade in 1916-17 was £10,052,000. In 1916-17, 1,203 vessels called at Aden, and 327 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Saïr.

Aden: Political Resident, Maj.-Gen. James Marshall Stewart, C.B. ...per mensem Rs. 3,000

INDIAN APPOINTMENTS.

The higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London Aug. 1. Candidates must be over 22 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W.1. Examination fee, £8. Selected candidates are on probation in England for one year, and generally receive an allowance of £150 if they pass their probation at one of the Universities or Colleges approved by the Secretary, conduct themselves well, and comply with all the rules laid down for their guidance. A final examination is held in Indian law, language, &c. The salary of a covenanted civil servant commences usually at Rs. 4,800 (£320) a year. No person will be eligible for admission to the Indian Civil Service who has made before any tribunal established under the Military Service Acts, 1916, an application for the issue to him of a certificate of exemption from the provisions of those Acts on the ground of a conscientious objection to the undertaking of combatant service.

The annual Competitive Examination will continue to be held under normal conditions, but a greatly reduced number of places will be offered for competition while the war continues. Any person not engaged in military or naval services, otherwise eligible, may enter for the Open Competition. Concessions as to the age limits, in the case of candidates who have served in the Army or Navy, are made, and full particulars can be obtained from the Civil Service Commissioners. Under the special powers conferred by the Indian Civil Service (Temporary Provisions) Act, 1915, a proportion of the vacancies are now filled by nomination.

The Indian Army.—Candidates for com-

missions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 17½ and 18½ years of age (21 in the case of candidates already serving in the Army, for which the upper limit of age will be 21). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India and by the War Office, the remainder being offered to candidates in the order of their passing the entrance examination. At the end of the period of training at Sandhurst (at present 18 months), cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. Cadets are also selected at the Army Entrance Examination or nominated by the Army Council for training at Quetta or Wellington in India. Officers holding commissions in the British Service, who were under 28 years of age at the time they were called to Army Service as officers (or, in the case of regular officers, at the date of their application), may apply through their commanding officers for transfer to the Indian Army. On appointment to an Indian regiment, an officer's minimum initial pay is Rs. 4,560 (£304 a year). Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Further information regarding these appointments—e.g., Civil Service of India, the Indian Army, the Public Works Dept., the Imperial Forest Service of India, the Indian Police, the Indian Medical Service, the Indian Ecclesiastical Service, the Educational Service, &c., &c.—is contained in "The India Office List" (published by Harrison & Sons, 45, Pall Mall, S.W.), or can be obtained on application from the Under-Secretary of State, India Office, Whitehall, London, S.W. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a summary also appears in the "India Office List."

THE FINANCES OF INDIA FOR THE YEARS ENDED 31st MARCH,
1916, 1917, AND 1918.

GROSS AND NET REVENUE AND EXPENDITURE.—The statement of Gross Revenue and Expenditure exhibits all revenue receipts and payments therefrom, except that railway working expenses and the surplus profits paid to certain railway companies are deducted from revenue. A clearer view of the financial position is obtained from the following statement of Net Revenue and Expenditure, in which departmental receipts, which are a set-off against expenditure, have been deducted, as also interest charges and working expenses of railways and irrigation works, refunds and assignments, cost of cultivating and manufacturing opium, &c.

In 1915-16 there was a deficit of Revenue as compared with expenditure of £1,188,661, in 1916-17 a surplus of £7,478,710, and an estimated surplus of £5,711,000 in 1917-18.

CAPITAL EXPENDITURE.—In addition to the expenditure from revenue there was a capital

outlay in 1916-17 of £1,872,000 on State Railways, £512,000 on Irrigation Works, and £245,000 in connexion with the new capital at Delhi.

BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Native States, the burden in 1917-18 was 3s. 6d. per head, or, if land revenue (which is akin to rent) be added, 4s. 8d. per head. The Budget for 1917-18 introduced a super-tax on large incomes, enhanced the export duties on raw jute, increased the import duties on cotton manufactures, and imposed, as a war measure, a surcharge on railway goods and traffic.

DEBT AND ASSETS.—On 31 March, 1918, the debt of India amounted to £403,419,000, viz., Sterling Debt, £237,760,000, and Rupee Debt (converted into sterling at 1s. 4d. the rupee), £165,659,000. Miscellaneous obligations (Savings Bank balances, &c.) amounted to about £41,635,000, besides a charge of £994,000 for various railway annuities. Up to the same date the Indian Government had devoted £181,935,000 to the construction of railways and £43,995,000 to the construction of irrigation works. It had purchased from companies, by cash payments, annuities, or the issue of India stock, nine railways, on which, at the time of purchase, £108,092,000 had been spent; its advances to Native States, corporations, agriculturists, &c., stood at £11,462,000, and to railway companies £1,608,000. Other assets were the Gold Standard Reserve of £34,453,000, and the cash balances in England and India, £10,625,000 and £15,320,000 respectively. The Rupee War Loan realised £36,100,000 in 1917-18, the proceeds have been made over to H.M.'s Govt. in part liquidation of India's War Contribution of £100,000,000.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *raiyatwari* tenure prevails, and each *rayat*, or peasant proprietor, holds direct from the State. In temporarily settled *zamindari* districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled *raiyatwari* districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State in 1916-17 amounted to £23,868,000, of which £7,827,000 was due to irrigation and credited under that head.

THE OPIUM REVENUE. Poppy may now be grown only in parts of the United Provinces (Bengal opium) and in the Central Indian (Malwa) native States. Except in these States

the manufacture is a Government monopoly. In 1916-17, 9,229 chests of Bengal opium were sold for export, in addition to 4,715 chests sold direct to Governments of Hong Kong, Straits Settlements and Netherlands (Indies). The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £3,160,000. The expenses of production, &c., were £912,000. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from 31 March, 1917, export of Indian opium to China is prohibited.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded in recent years, and amounted to £9,106,000 net in 1916-17. Reforms in excise administration are in progress.

CUSTOMS.—The net revenue was £8,393,000 in 1916-17. (For tariff see page 518.) The export duty on rice yielded £578,000, and the countervailing duty on Indian cotton goods £297,000 in 1916-17. New and enhanced duties were brought into effect on 1 March, 1916, and 1 March, 1917.

INCOME TAX on incomes of Rs. 5,000 (£333) a year and over is levied on non-agricultural incomes at the following rates:—

Annual Income.	Rate of Tax.
Rs. 1,000 and over	Per Rupee = per £
" 2,000 "	4 pips 5d.
" 3,000 "	5 " 6½d.
" 4,000 "	6 " 7½d.
" 5,000 "	9 " 11¾d.
" 10,000 "	18 " 28. 3d.

Super-tax is leviable in addition to ordinary income tax on incomes above Rs. 50,000 at rates equal to 1s. 3d. to 3s. 9d. in the £. It is proposed to introduce an excess profits tax.

STAMPS.—Stamps yielded £5,720,000 (net) in 1916-17. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (81 lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1½ with effect from 1 March, 1916.

FORESTS.—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 150,000 square miles besides are under State control. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1916-17 conveyed 1,087 millions of letters, postcards, newspapers, &c., and issued over 32 millions of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on 31 March, 1917, was 343,000 miles, and the number of messages sent in 1916-17 was 19,298,000. Their capital cost to the end of 1916-17 was £8,688,000. The Indian Postal and Telegraph services were amalgamated on 1 April, 1914. The combined services yielded for the year 1916-17 a net income of £733,000. The Indo-European Telegraph Department yielded a profit of 5.82 per cent. on its capital expenditure of £1,173,584.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and

worked by companies. The mileage open for traffic on 31 March, 1917, was 36,286, while the mileage under construction was 2,082. Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 41 per cent on the metre gauge. On the 31st March, 1917, the total capital at charge was £394,922,000. The net earnings of the railways in 1916-17 amounted to £24,854,000. The number of passengers increased to 500 millions, and the goods traffic to 93 million tons. Rates are very low, third-class passengers travelling on the average over five miles for a penny. The net working profit from State railways was £7,482,000 in 1916-17. The total capital expenditure on State and other railways in 1916-17 was about £4,696,000.

IRRIGATION.—The total capital outlay on State irrigation works up to 31st March, 1917, was £49,503,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,162,000. The area irrigated by Government irrigation works was over 26 million acres, while the annual value of the crops raised is estimated at over 125 per cent. on the capital outlay. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1916-17 to £30,268,000: Interest on Railway Debt and Annuities, £9,287,000; Interest on Irrigation Debt, £121,000; Interest on Ordinary Debt and Management of Debt, £1,891,000; Stores, £2,882,000, of which £2,108,000 was for Marine and Military Stores; payments for British forces, troop service, &c., £1,052,000; Army non-effective charges, £2,679,000; Civil annuities, pensions, &c., £1,453,000; Furlough payments, civil and military, £509,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 1s. 4d. This rate has now a legal sanction, since an Act of 1899 makes the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount. In 1907-8 and 1908-9 half the profit on silver coinage was applied to capital expenditure on railways. With this exception the whole of the net profit on silver coinage since 1 April, 1900, has been held as a special reserve, now called the Gold Standard Reserve, which is partly invested in England in sterling securities, for the purpose of maintaining the rate of exchange between England and India. On 31 March, 1918, the investments of this fund in sterling securities amounted to £28,453,000 (estimated value), while £6,000,000 was held in cash in England. In June, 1912, it was decided that no

portion of the profit on coinage will be used for railways till the total sterling assets of the Reserve amount to at least **£25,000,000**. The Royal Commission on Indian Currency and Finance made certain recommendations, but decisions on the more important of these recommendations have been deferred. India has a paper currency. The **1, 2½, 5, 10, 50, and 100** rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. Some difficulty was experienced in **1917** and **1918** in maintaining the stability of the exchange rate, and in **1918** a branch of the Royal Mint was established at Bombay for the minting of gold coins.

ARMY.—In peace time, the Army in India consists, first, of British troops, about **76,000**; and, secondly, of Indian troops (largely Muhammadans), about **160,000**. In addition, the native Army Reserves number nearly **40,000** men, and the Imperial Service Troops furnished by native States contribute **21,000**, including cavalry, transport corps, and sappers. Further, there are **38,000** European and Eurasian volunteers (efficient). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (**1902-9**) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On **1 June, 1907**, there was a redistribution of the Army of India, which now consists of the Northern and Southern Armies, each under a general officer and staff. The artillery has been increased. Factories for making rifles, cordite, and gun carriages have been erected. The transport service has been improved. A flying school has been established at Sitapur. A General Staff has been formed. A Staff College has been established at Quetta; and colleges have been established at Quetta and Wellington, on the lines of the Royal Military College, Sandhurst, for the training, with a view to the appointment to the Indian Army, of cadets selected in the United Kingdom. The net military expenditure (including marine) in **1916-17** was **£24,991,000**. During the war the Army of India has been engaged in operations of war in France and Belgium, East and West Africa, Egypt, Somaliland, Aden, Mesopotamia, Palestine, Persia, China, and on the North-West frontier of India. At the outbreak of war the strength of the Army in India was:—British, **77,000**; Indian, **240,000**. The number of Indian ranks recruited during the war was **1,162,000**; **1,215,000** officers and men were sent on service overseas from India; the total Indian casualties were **101,000**. In **1917** the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved; compulsory military training for Europeans was introduced. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The **ROYAL INDIAN MARINE** consists of ten sea-going vessels, and numerous smaller steamers and launches. The principal officers are as follows:—

Offg. Director R.I.M., Bombay, Capt. N. J. F. Wilson, C.M.G., C.B.E.Rs.2,500
Offg. Deputy ditto, Capt. B. H. Jones.
Asst. ditto, A. A. Whelan.

EDUCATION has benefited by larger grants for primary education. A Department of Education has been created, and increased attention is being given to primary, commercial, and

technical education. There are five Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, and the Punjab. A denominational Hindu University is being established at Benares, and there are movements for a Muhammadan University at Aligarh, and for Universities at Dacca, Patna, Rangoon, Nagpur, and Mysore. In State institutions education is secular. The institutions in **1916-17** numbered **193,000** and the scholars **7,852,000**, including **1,230,000** females. Of the institutions, about **70** per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in **1916-17**, **£7,526,000**, **£2,124,000** came from fees, and **£4,099,000** from provincial revenues or local and municipal funds. The census of **1911** showed that only **106** males and **10** females per mille can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of **1916-17** numbered **721**, controlling a total population of **17½** millions, and receiving an income of **£4,056,000** from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and **£1,870,000** from other sources (excluding loans). Out of **9,802** members of municipal bodies **8,870** were Indians, and **8,025** were non-official. In almost all districts in British India there are local district boards, partly representative. About one-half of their total expenditure of about **£5,209,500** in **1916-17** was devoted to civil works, one-fourth to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are over **10,000** officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In **1916** **2,329,000** civil suits were instituted; while in **1916** **2,098,000** persons were tried, and **1,011,000** convicted, in criminal cases, of whom **584** were sentenced to death, **2,029** to transportation, and **172,828** to imprisonment. The strength of the police in **1916** was **14,000** officers and **189,000** men. There were **766** prisons, with a daily average of **120,000** prisoners, in **1916**. At the convict settlement of Port Blair (Andamans) there were **12,800** prisoners on **31 March, 1917**.

VITAL STATISTICS.—The reporting of vital occurrences is still defective, and proposals have been formulated with a view to securing more complete and accurate vital statistics. The recorded death rate for British India in the decennium ended **1913** ranged between **38.21** per **1,000** in **1908** and **28.72** in **1913**; it was **29.30** per **1,000** in **1916**. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, smallpox, and (since **1896**) plague being other chief causes. The reported deaths from plague up to the end of **1916** were about **9,258,000** in India as a whole. Nearly **24,000** people were killed by snakes in **1916**. In **3,063** hospitals and dispensaries, maintained mostly from public funds, **34,623,000** patients were treated in **1916**. The number of persons vaccinated was **9,438,000**. According to the census of **1911** there were **110,000** lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical, and archaeological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. During the

(£5,706,000), raw hides and skins (£4,381,000), leather and cowhides (£2,049,000), dyes (£581,000), cotton yarn and manufactures (£522,000), hemp (£426,000), and oilcake (£189,000).

* Information not available.

five years ending 1913-14 both imports and exports were, on the average, twice as great as they were 25 years ago. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The above table exhibits the leading figures for the last five years in thousands of pounds sterling. As the publication of the treasure figures has been temporarily discontinued, it is not possible to give the total imports and exports for 1917-18.

In 1913-14 both imports and exports of merchandise were of unprecedented magnitude, but the outbreak of war during the course of the year 1914-15 brought the figures for the year down to the level at which they stood five or six years earlier. There was, however, a recovery in 1916-17. The rise in prices was, and continues to be, a very potent factor in the increase in values. During the year 1917-18 as compared with 1916-17 the value of the imports of merchandise and Government stores increased by £2,667,000 and the exports decreased by £6,545,000. In imports the principal articles showing increases were: Cotton goods (£2,262,000), matches (£795,000), chemicals (£564,000), seeds (£448,000), salt (£190,000), dyes (£176,000), cotton yarn (£164,000), liquors (£113,000), and rubber manufactures, wood and timber, building and engineering materials, woollen goods, glass, raw silk and silk goods. Government stores increased by £2,220,000.

Japan appears to be rapidly finding an increasing market in India for twist and yarn, hosiery, and grey unbleached goods.

In the export trade, grain, pulse and flour increased by £11,609,000, raw cotton by £1,417,000, jute manufactures by £799,000, lac by £651,000, oils by £329,000, opium by £207,000, paraffin wax by £62,000, and rubber by £20,000. The chief falling off was in raw jute (£6,690,000), seeds

The following statement shows the chief articles of the foreign trade of India in 1917-18:—

IMPORTS.	
(000 omitted.)	(000 omitted.)
Cotton Goods	£34,939
Sugar	9,931
Iron and Steel	5,172
Machinery, &c.	2,948
Cotton Yarn	2,863
Mineral Oils	2,348
Silk Goods	1,902
Chemicals	1,815
Hardware, &c.	1,810
Liquors	1,666
Matches	1,566
Paper, &c.	1,541
Salt	1,467
Woollen Goods	1,398
Spices	1,268
Provisions	1,183
Instruments, &c.	1,150
Glass	1,083
Dyes	941
Drugs & Medicines	£83
Wood & Timber	885
Apparel	864
Silk (raw)	774
Rubber Manufactures	772
Soap	756
Building, &c.	755
Materials	755
Fruits and Vegetables	688
Paints	645
Seeds	616
Government Stores:	
Arms, Ammunition, &c.	£1,826
Metals	1,021
Woollen Goods	955
Cotton Goods	733
EXPORTS.	
(000 omitted.)	(000 omitted.)
Grain, Pulse & Flour	£24,378
Jute Manufactures	28,569
Cotton (raw)	24,207
Other articles of Food & Drink	13,883
Cotton Yarn and Manufactures	7,984
Seeds	5,256
Hides and Skins, Raw	5,225
Leather & Cowhides	4,245
Jute (raw)	4,229
Lac	2,518
Wool (raw)	£2,354
Opium	1,605
Dyes, &c.	1,406
Oils	1,326
Rubber	1,082
Paraffin Wax	740
Chemicals	710
Hemp	589
Metals & Ores	575
Re-Exports:	
Cotton Yarn and Cloth	1,916
Sugar	995
Wool (raw)	698

As will be seen, the bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following table shows the distribution of the Indian private sea-borne trade in 1917-18:-

COUNTRIES.	PRIVATE MERCHANDISE ONLY.	
	Imports.	Exports.
Total Value (000 omitted) ...	£100,205	£148,610
	Per cent.	Per cent.
United Kingdom	54.4	26.3
France	1.1	3.7
Italy	1.2	3.1
Russia	0.1	0.3
Java and Borneo	8.0	1.2
Ceylon	1.6	4.3
China (excluding Hong Kong)	1.4	2.0
Hong Kong	0.9	1.8
Japan	12.1	13.0
Straits Settlements	3.5	2.9
Egypt	0.7	11.2
Mauritius	0.7	0.5
United States	7.9	13.6
All other countries	6.4	16.1

In imports, the United Kingdom comes easily first with 54 per cent. of the total, but is much less prominent in exports from India, on account of the wide demand for India's raw produce for food and manufactures. England re-exports a large quantity of her imports from India.

CUSTOMS DUTIES.—The Indian Tariff (Amendment) Acts, 1916 and 1917, introduced new and enhanced Customs duties with effect from 1 March, 1916, and 1 March, 1917, respectively. The general import tariff, which has stood at 5 per cent. *ad valorem* since 1894, was raised to 7½ per cent. The principal exceptions to the general rate are as follows:—Cotton yarn and thread are exempt, but the duty on other cotton goods is 7½ per cent., an Excise duty of 3½ per cent. being levied on those woven in Indian mills. Arms and ammunition pay 20 per cent., sugar 10 per cent., cigars and cigarettes 50 per cent., spirits generally Rs. 11¼ a gallon, salt Rs. 1¼ a maund (82 lb.), silver coin or bullion As. 4 an ounce, silver plate, silver thread and wire, and silver manufactures 10 per cent., refined petroleum As. 1½ a gallon (with an additional 6 as. per gallon on motor spirit; an excise duty of 6 as. per gallon is levied on motor spirit produced in India), coal As. 8 a ton. Iron and steel goods, grain, tea-chests, printing materials, machinery other than cotton machinery, railway materials, and a few other articles pay 2½ per cent. Gold, living animals, raw hides, skins, cotton and wool, certain agricultural requisites, cotton machinery, quinine, and a few other articles are free. There are export duties of As. 3 a maund on rice, Rs. 1½ per 100 lb. on tea, Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, in the case of which the rate is Rs. 1¼ per bale; Rs. 20 per ton on jute sacking, and Rs. 32 per ton on hessians.

SHIPPING.—In 1916-17 the number of vessels engaged in the foreign trade which entered and cleared at ports in British India was 10,386,

with a tonnage of 11,955,000. Of this tonnage, 79 per cent. was under the British flag.

PORTS.—The chief ports are Calcutta, Bombay, Karachi, Rangoon, and Madras. These ports are administered by port trusts having wide powers, but subject to Government supervision.

FOREIGN LAND TRADE OF INDIA.—The most important countries in the land trade are Afghanistan and the Shan States. The total imports of merchandise and treasure in 1916-17 were £8,579,000, and the total exports £7,090,000.

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1915-16, 255 million acres were cropped, of which about 9 per cent. was under wheat, 31 per cent. under rice, and 40 per cent. under other food-grains and pulses, 6 per cent. under oilseeds, and 6 per cent. under cotton, jute, and other fibres. Jute cultivation has been extraordinarily profitable. Sugar, tea, and tobacco are other important crops. The agricultural departments (central and provincial), which have been much developed since 1906, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. There is also a civil veterinary department.

BANKS AND CO-OPERATIVE CREDIT SOCIETIES.—Besides the three Presidency Banks, closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. Much success has been achieved in rural districts by co-operative credit societies. In 1916-17 there were 735 central, 19,968 agricultural and 1,034 non-agricultural societies, with a total membership of 960,000 and a capital of £7,693,000.

MINERALS. The output of coal in India in 1916 was 17,254,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 297 millions in 1916. The production of salt is about 1,489,000 tons. The production of manganese ore in 1916 was about 645,000 tons, and of saltpetre 25,000 tons. The yield of gold (nearly all from Mysore) was about 598,000 oz. in 1916. There is a considerable output of mica and a fluctuating output of rubies and jade. Monazite and wolfram have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1916 was 1,292 tons, and of the latter 3,761 tons.

MANUFACTURES.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 267 cotton mills at work in British India and Native States in 1916-17, mostly in Bombay and Ahmedabad, contained 6,670,000 spindles and 111,000 looms. Up-country cotton mills have increased. The production in 1916-17 was 681 million lb. of yarn (mostly of low counts) and 377 million lb. of woven goods. There is a tendency to produce finer yarns, and to pay more attention to weaving. The 74 jute mills, mostly situated in or near Calcutta, contained 824,000 spindles and nearly 40,000 looms. There were, in 1917, 6 woollen and 10 paper mills, 16 breweries, and various other factories.

TABLE OF THE PRINCIPAL INDIAN RULING CHIEFS, SHOWING THE SALUTES TO WHICH THEY ARE ENTITLED, AND THE AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES.

STATE, SALUTE, AND TITLE OF CHIEF.	Date of Suc- cession.	Area in sq. miles.	Population in 1911.	Prevailing Religion.	Revenue for last year recorded or approximate
Salutes of 21 Guns.					
Baroda, The Maharaja (Gaekwar) of.....	1875	8,182	2,032,798	Hindus	£ 1,100,000

N.B.—There are also 11 other chiefs entitled to salutes of 11 guns.

+ The present chief has a personal salute of two additional guns.

NATIVE STATES OF INDIA.

THE Native or Feudatory States, whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £612,000 (£233,000 from Mysore) were paid to the Government of India in 1916-17. Generally speaking, the States are governed by their native Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a

group of States. A common characteristic of all native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction. The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Native States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the native States have a combined area of 709,583 square miles, and a population of 70,888,854. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Imperial Service troops. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of native States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and

elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over a native State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the native States, large and small, number 693, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new native State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the native princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 519-520 are the names of 73 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H.H. the Agha Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Burdwan, K.C.S.I., K.C.I.E., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, Gwalior, Indore, and Travancore and Cochin.

The native States may be thus classified:—
1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 500,623—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted

heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. *The Himalayan Hill States*, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 126,344) was granted to Gholab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. *The Sikh States*, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 7. *Rajputana*, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 10,530,432) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. *The States of Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Reva*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. 9. *The Malayalam States of Travancore and Cochin*, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of *Khairpur* (Sind), *Bahawalpur*, and *Rampur*. 11. *Kalat* (including *Makran* and *Kharan*) and *Las Bela*, with tribal areas in the possession of the Marri and Bugti tribes. 12. *Gujarat*, including *Kutch* and the numerous petty chiefships of *Kathiawar*. 13. *The Southern Mahratta States*. 14. *The numerous Afghan and Baluch tribes* of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of some of these tribes, *Waziris*, *Orakzais*, *Afridis*, &c., have become familiar owing to the many expeditions against them. 15. *The aboriginal Gond and Kol tribes*, under petty princes of aboriginal or Rajput blood, in *Chota-Nagpur*, *Orissa*, the *Central Provinces*, and the *Jaipur* (*Vizagapatam*) Agency. 16. *The Indo-Chinese group* of States, and the numerous hill tribes of the N.E. frontier.

Countries within the Indian Sphere of Influence.

THE native States of Nepal and Bhutan enjoy a large measure of independence, and may be most conveniently treated as within the Indian sphere of influence. Outside India, but within its sphere of influence, is Afghanistan. Great Britain declared in 1910 that no administrative changes in Tibet would be allowed to affect the integrity of Nepal or Bhutan, whose interests and rights England is prepared to protect.

NEPAL.

Sovereign. H.H. Maharaja Dhiraja Tribhuhana Bir Bikram Shah Bahadur Shamsheer Jang; *suc.* 1911. Salute in British territory, 21 guns. **Prime Min.** H. E. Maharaja Sir Chandra Shamsheer Jang, Bahadur Rana, G.C.B., G.C.S.I., G.C.V.O., D.C.L.

Nepal (area, about 54,000 sq. miles; pop. 5,639,092) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1916-17 its exports to British India were £2,646,000, while its imports amounted to £1,362,000. The chief trade route is that between Katmandu and the Bengal frontier (76 miles). Nepal exports rice and other grains, hides, oilseeds, *ghat*, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister, who paid a most successful visit to England in 1908. The British Political Resident does not interfere in internal affairs, but the Indian Government control foreign relations. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

CAPITAL, Katmandu (pop. 50,000)—British Res., Lt.-Col. S. E. Hayley Rs. 2,750

BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 350,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, Sir Ugyen Wangchuk, K.C.S.I., K.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India in 1916-17 was £158,000. There is no British Resident. **CAPITAL,** Punakha.

AFGHANISTAN.

Amir of Afghanistan and its Dependencies. His Majesty Siraj-ul-millat-wad-din Amir Habibullah Khan, G.C.B., G.C.M.G.; *b.* 1872. *suc.* October 7, 1901. Salute in British territory, 21 guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India. Estimated area, 250,000 sq. miles, and pop. 4,600,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfiqar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1903. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Afghans (or Duranis) have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashs, who belong to the Shiite sect. The national tongue is Pushtu.

Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakshan (with Kadrizan and Wakhan), which are under governors, with subordinate nobles and judges, police, and revenue officers. The late Amir (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack

animals. The chief trade routes to India are the Khabar Pass, from Kabul to Peshawar (191 miles), along which a motor service has been established by the Amir, and the road from Kandahar to Quetta (125 miles). The Sind-Pishin railway terminates at Chaman, on the frontier, 65 miles from Kandahar, from which a fine road of 318 miles runs to Kabul. The trade of Afghanistan with India in 1916-17 was over £2,294,000. The exports to India are mainly fruits and nuts, raw wool, and *ghis*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £900,000, including the subsidy of £120,000 a year from the Government of India. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

By agreement with the Amir, the "buffer State" of Afghanistan has no foreign relations with any Power except the Government of India. In all other respects it is independent, and the rule of the Amir despotic. The modern history of Afghanistan dates from 1881, when Abdurrahman, the late Amir, was recognised as ruler. As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the late Amir since 1880 were re-

newed by the treaty of 21 March, 1905. Under this treaty the British Government engaged to refrain from interference in internal affairs, but promised to preserve the safety and integrity of Afghanistan against any unprovoked attack, provided that the Amir acted as a friend and ally, and followed unreservedly the British Government's advice in all his external relations. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence, and engaged to conduct all her political relations with Afghanistan through Great Britain. Great Britain declared her intention not to change the political status of Afghanistan, to exercise only a pacific influence, and not to take or encourage measures that might threaten Russia. After reciting the treaty with the Amir in 1905 Great Britain engaged not to annex or occupy any part of Afghanistan in contravention of that treaty. It was agreed that specially designated Russian and Afghan frontier officials might establish direct relations for settling local non-political questions, and that Great Britain and Russia should enjoy equality of commercial facilities.

There is a native British Agent (a Muhammadan) at Kabul. The Amir has an agent with the Government of India, an agent at Peshawar, and commercial agents in England and India.

CAPITAL, *Kabul* (about 180,000). The chief commercial centre is Kandahar (80,000). Other provincial capitals are Herat (20,000) and Tashkurgan (17,000). *British Agent*, Khan Bahadur Hafiz Saifulla Khan, Rs: 1,000.

Countries Contiguous to India.

THE PERSIAN GULF.—For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. On the Arabian side, the Katif coast only is Turkish. In the negotiations connected with the Anglo-Russian Convention of 1907 the policy of Great Britain was declared to be the preservation of the *status quo* and the maintenance of British trade, and Russia did not deny the special interests of Great Britain in the Gulf. British forces are now in occupation of Mesopotamia, extending from Basra at the head of the Gulf to Baghdad and beyond.

The *Kuria Muria* Islands, to the S. of Oman, have been in British possession since 1854. In 1834 the East India Company occupied *Sokotra* (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

Bahrain (capital, Manama), governed by Sheikh Isa bin Ali and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Katr). It is the headquarters of extensive pearl fisheries, and a distributing centre for the adja-

cent mainland. Pearls are the only notable export; rice, cotton goods, dates, sugar, and spices the chief imports. In 1914-15 the value of the exports was £462,000, and of the imports £758,000. The people (about 100,000) are Muhammadans. The Sheikh has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrain. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court.

The independent tribes on the *Pirate* (Arab) Coast from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *via* Lingah and Bahrain.

Important caravan routes converge at *Koweik*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

PERSIA (*q.v.*) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905. A Trans-Persian railway, linking Russia with India, is under discussion. By the Anglo-Russian Convention of August, 1907, N.W. Persia is recognised as a region in which Russia has special interests; while S.E. Persia, east of a line drawn from the Afghan frontier, *via* Gazik, Birjand, Kerman, and Bunder Abbas, is assigned as a region in which Russia will not seek political or commercial concessions, or oppose similar concessions supported by the British Government. In view of the unsettled state of Southern Persia, British forces occupied Bushire in August, 1915, with the consent of the Persian Government. The occupation terminated in October, 1915, the Persian Government having taken steps to ensure the security of British interests and the maintenance of order.

ASIATIC RUSSIA.—A portion of the Russian Empire is continuous with Persia and Afghanistan. The Russian Trans-Caspian Railway runs, *via* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers. Russian territory stretches into the Pamir Region—the “Roof of the World”—a wind-swept, icy mountain-land, snow-bound for half the year. Its southern boundary was fixed in 1895 by the Anglo-Russian Pamir agreement.

CHINA.—India is in contact with two dependencies of China, Chinese Turkistan and Tibet, and one province, Yunnan.

Chinese Turkistan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkistan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkistan has not been officially defined. Russia has special treaty rights in the dependency. There is a British consul-general at Kashgar (Sir G. Macartney, K.C.I.E.). Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *via* Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1916-17 was about £476,000. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1800, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on 3 August, 1904. A new Convention was signed (7 Sept.), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for

payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initiated by the three representatives, but the Chinese Government have refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £1,051,000 in 1916-17. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Teng-yueh and Ssumao, near the Burma frontier, are treaty “ports.” There are British consuls at Teng-yueh and Yunnan-fu.

SIAM (*q.v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiangmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. In 1916-17 the value of the total trade was £418,000. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

The Indian Population was 127,932 in 1901, 105,492 in 1911, and 105,561 in 1916. The Eskimos numbered 3,447 in 1915.

PHYSIOGRAPHY.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the Arctic seas, and from the Pacific to the Atlantic Ocean. The boundaries between the Ungava district of the Labrador peninsula (transferred to Quebec in 1912) and the Labrador coast region of Newfoundland are expected to be settled shortly by a Judicial Commission.

Relief.—From a physical point of view Canada may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Hooker, 15,700 feet) and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

GOVERNORS-GENERAL OF CANADA SINCE 1867.

Name.	Date of Appointment.	Date of Assumption of Office.
Viscount Monck	June 1, 1867	July 1, 1867
Sir John Young (Lord Lisgar)	Dec. 29, 1868	Feb. 2, 1869
Earl of Dufferin (Marquess of Dufferin and Ava)	May 22, 1872	June 25, 1872
Marquess of Lorne	Oct. 5, 1878	Nov. 25, 1878
Marquess of Lansdowne	Aug. 18, 1883	Oct. 23, 1883
Lord Stanley of Preston (Earl of Derby)	May 1, 1888	June 11, 1888
Earl of Aberdeen	May 22, 1893	Sept. 18, 1893
Earl of Minto	July 30, 1898	Nov. 12, 1898
Earl Grey	Sept. 26, 1904	Dec. 10, 1904
Field-Marshal H.R.H. the Duke of Connaught and Strathearn ...	Mar. 21, 1911	Oct. 13, 1911
Duke of Devonshire, P.C., K.G., G.C.M.G., G.C.V.O.	Aug. 8, 1916	Nov. 11, 1916

GOVERNMENT

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

Governor-General.

<i>Governor-General and Commander-in-Chief</i> , The Duke of Devonshire, P.C., K.C., G.C.M.G., G.C.V.O.	£10,000
<i>Military Secretary and Secretary</i> , Lt.-Col. Hon. H. G. Henderson.	
<i>Equerry and Comptroller of the Household</i> , Lord Richard Nevill, C.V.O., C.M.G.	
<i>Aides-de-Camp</i> , Capt. R. O. R. Kenyon-Slaney, Grenadier Guards; Capt. F. Bulkeley-Johnson, Rifle Brigade; Capt. Angus A. Mackintosh, Royal Horse Guards.	
<i>Honorary Aides-de-Camp</i> , Lt.-Col. H. R. Smith, C.M.G., I.S.O.; Lt.-Col. Sir A. P. Sherwood, K.C.M.G., M.V.O.; Maj.-Gen. S. B. Steele, C.B., M.V.O.; Col. J. P. Landry; Maj.-Gen. R. E. W. Turner, V.C., C.B., D.S.O.; Brig.-Gen. V. A. S. Williams; Col. Sir Henry M. Pellatt, C.V.O.; Maj.-Gen. H. E. Burstall, C.B.; Col. S. J. Denison, C.M.G.	
<i>Private Secretary</i> , A. F. Sladen, C.V.O., C.M.G.	

THE EXECUTIVE.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council.

WAR CABINET.

Rt. Hon. Sir Robert Laird Borden, G.C.M.G., M.P.	
Hon. Sir William Thomas White, K.C.M.G., M.P.	
Hon. Arthur Meighen, K.C., M.P.	
Hon. Sir James Alexander Lougheed, K.C.	
Major-General Hon. S. C. Mewburn, C.M.G.	
Hon. J. A. Calder, M.P.	
Hon. Newton Wesley Rowell, K.C., M.P.	

UNION GOVERNMENT.

<i>Prime Minister and Secretary of State for External Affairs</i> , Rt. Hon. Sir Robert Laird Borden, G.C.M.G., M.P.	\$12,000
<i>President of Privy Council</i> , Hon. Newton Wesley Rowell, K.C., M.P.	7,000
<i>Minister of Militia and Defence in Canada</i> , Major-General Hon. S. C. Mewburn, C.M.G., M.P.	7,000
<i>Minister of Overseas Military Forces in London</i> , Hon. Sir Albert Edward Kemp, K.C.M.G., M.P.	7,000
<i>Minister of Railways and Canals</i> , Hon. John Dowsley Reid, M.D., M.P.	7,000
<i>Minister of the Interior and Solicitor-Gen.</i> , Hon. Arthur Meighen, K.C., M.P.	7,000
<i>Minister of Customs</i> , Hon. Arthur L. Sifton, K.C., M.P.	7,000
<i>Minister of Agriculture</i> , Hon. T. A. Crerar, M.P.	7,000
<i>Minister of Immigration and Colonisation</i> , Hon. J. A. Calder, M.P.	7,000
<i>Secretary of State</i> , Hon. Martin Burrell, M.P.	7,000
<i>Minister of Trade and Commerce</i> , Rt. Hon. Sir George Eulas Foster, G.C.M.G., M.P.	7,000
<i>Minister of Finance</i> , Hon. Sir William Thomas White, K.C.M.G., M.P.	7,000
<i>Minister of Justice</i> , Hon. Charles Joseph Doherty, K.C., LL.D., M.P.	7,000
<i>Postmaster-General</i> , Hon. Pierre Edouard Blondin, M.P.	7,000
<i>Minister of Inland Revenue</i> , (vacant).....	7,000

* NOTE.—In every case including the Prime Minister's—two thousand one hundred dollars is paid in addition to a Minister of the Crown as his sessional indemnity as a member of either the Senate or the House of Commons of Canada.

<i>Minister of Public Works</i> , Hon. F. B. Carvell, M.P.	\$7,000
<i>Minister of Marine and Fisheries</i> , Hon. C. C. Ballantyne	7,000
<i>Minister of Labour</i> , Hon. Gideon Decker Robertson	7,000
<i>Ministers without Portfolio</i> , Hon. Frank Cochrane, M.P.; Hon. Sir James A. Lougheed, K.C.; Hon. Alexander K. Maclean, M.P.	

GOVERNMENT DEPARTMENTS.

PRIVY COUNCIL OFFICE.

<i>Clerk of the Privy Council</i> , Rodolphe Boudreau, C.M.G.	\$5,000
<i>Assistant do.</i> , F. K. Bennett, I.S.O.	3,500
<i>Secy., Imperial and Foreign Correspondence</i> , William Mackenzie	3,650

TRADE AND COMMERCE.

<i>Minister of Trade and Commerce</i> , Rt. Hon. Sir George Eulas Foster, P.C., K.C.M.G., D.C.L.	7,000
<i>Deputy Minister</i> , F. C. T. O'Hara, F.S.S.	5,000
<i>Dominion Statistician and Controller of Census</i> , R. H. Coats	3,700

Sec., Whitehead Kluttz, Washington, D.C.	4,000

CANADA.

Chairman, Charles A. Magrath	7,500
Commissioners, Henry A. Powell, K.C.; Pierre B. Mignault, K.C.each	7,500
Secretary, Lawrence J. Burpee, Hope Chambers, Ottawa	4,000

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The Senate consists of 87 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 4 for Manitoba, 4 for Alberta, and 4 for Saskatchewan; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amounting to \$4,000. The House of Commons is chosen every five years at longest, and the 1911-16 Parliament consists of 221 members; future Houses will contain 234 members, elected as follows: 82 for Ontario, 65 for Quebec, 16 for Nova Scotia, 11 for New Brunswick, 15 for Manitoba, 13 for British Columbia, 3 for Prince Edward Island, 12 for Alberta, 16 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum.

The Houses of Parliament were destroyed by fire in 1926, the new buildings being started the same year.

THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

Chief Justice of Canada,

\$10,000

<i>Puisne Judges, Hon. Sir Louis Davies,</i> K.C.M.G.; Hon. J. Idington; Hon. Lyman Poore Duff; Hon. F. A. Anglin; Hon. Louis Philippe Brodeur.....each	9,000
<i>Judge of the Court of Exchequer for the</i> <i>Dominion, Hon. Sir Walter Cassels</i>	8,000
<i>Assistant Judge of the Exchequer Court,</i> Hon. Louis A. Audette, LL.D.....	6,000
<i>Registrar of the Supreme Court, E. R.</i> <i>Cameron, K.C.</i>	5,000
<i>Registrar of the Exchequer Court, C.</i> <i>Morse, K.C., D.C.L.</i>	3,500

DEFENCE.

Service in the Militia is universal and compulsory on all male citizens from 18 to 60. Service in the *Active Militia* is for 3 years with 8-16 days' annual training. The *Peace Effective* consists of a Permanent Staff of 3,447 officers and men, and 78,350 undergoing service. The *War Effective* consists of four classes: the unmarried men 18 to 30; the unmarried men 30 to 40; the married men 18 to 45; and, finally, the remaining male citizens of 18 to 60, a total of 2,153,000.

Expeditionary Force.—The number enlisted up to June, 1918, exceeded 500,000. In addition 14,000 had joined the Air Service.

Militia Council.

<i>President, The Hon. Albert Edward Kemp, M.P.</i> <i>Vice-President, Surg.-Gen. E. Fiset, C.M.G., D.S.O.</i> <i>Chief of the Gen. Staff, Maj.-Gen. W. G. Gwatkin,</i> <i>p.s.c.</i>	
<i>Adjutant-Gen., Br.-Gen. V. A. S. Williams, A.D.C.</i> <i>Quartermaster-General, Maj.-Gen. Sir D. A.</i> <i>Macdonald, C.M.G., I.S.O.</i>	
<i>Master-Gen. of the Ordnance, B.-Gen. H. M. Elliot.</i> <i>Finance Member, J. W. Borden.</i>	
<i>Secretary, E. F. Jarvis.</i>	
<i>Inspector-General Eastern Canada, Maj.-Gen. F.</i> <i>L. Lessard, C.B.</i>	
<i>Inspector-General Western Canada, Maj.-Gen. S.</i> <i>B. Steele, C.B., M.V.O.</i>	

Royal Canadian Navy.

There are Naval stations on the Atlantic and Pacific, and two vessels, H.M.C.S. *Niobe* and H.M.C.S. *Rainbow*, are used as training ships for the Royal Canadian Navy.

EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are 26,000 elementary and secondary schools (attendance at the former being compulsory), with over 1,327,121 pupils; and 61 universities and university colleges with about 24,000 students. The 22 universities had about 16,000 students in 1916.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—For the whole of Canada the area estimated to be sown to field

* Since the year 1906 the financial year ends on March 31, previous to 1906-7 on June 30.

* Canada's net debt, 30 June, 1918, was £168,194,623. The total war expenditure to 31 Oct., 1918, amounted to £209,200,000.

crops was 38,930,333 acres, as compared with 39,140,466 in 1915—wheat 15,369,709 acres, oats 10,996,487, barley 1,802,906, other grain crops 1,917,645, potatoes and other roots 472,992, hay and clover 7,821,257, fodder corn 293,058, and alfalfa 99,350 acres. The live stock (1916) included 3,258,342 horses, 6,594,151 cattle, 2,022,941 sheep, and 3,474,840 pigs. The total production of creamy butter in Canada in 1916 was 82,564,130 lb., valued at \$26,966,355, as compared with 83,091,453 lb., valued at \$24,385,052, in 1915; and the total production of factory cheese in 1916 was 192,968,597 lb., valued at \$35,512,622, as compared with 183,887,837 lb., valued at \$27,097,176, in 1915.

The total value of farm property in Canada was \$4,231,840,636 in 1911; the total value of the principal field crops was \$886,494,900 in 1916.

Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, herrings, mackerel, and lobsters, the total value of the catch in 1916-17 being \$39,202,011.

Forestry.—The lumber, lath and shingles produced in Canada in 1916 had a total value of \$66,075,000. The value of cross ties and telegraph and telephone poles purchased by Railway and Electric Companies in 1916 was \$3,734,473. Wood used in the pulp industry in 1916 was valued at \$13,104,458; the forests have a total estimated area of nearly 568,500,000 acres.

Postal Census of Manufactures.—The industrial establishments of all kinds numbered 21,306 in 1915, with a total capital of \$1,994,103,272, the value of the products being \$1,407,137,140; 514,883 persons were employed, the salaries and wages amounting to \$289,764,503. The above statistics cover all establishments, irrespective of the number of employees.

Minerals.—The metals produced in 1917 were valued as follows:—Gold, 17,000,000 oz.; silver, 23,500,000 lb.; copper, 113,000,000 oz.; nickel, \$29,935,497; lead, 56,000,000 lb.; 1,186,000 tons of pig iron, 1,735,000 tons of steel ingots and castings. The non-metallic minerals included coal, 14,100,000 tons; Portland cement, \$6,529,861; asbestos and asbestic, \$5,160,479; petroleum, 6,924,305 gallons; natural gas, \$3,924,632; clay products, \$4,196,933; and stone, \$3,868,059.

* Short tons of 2,000 lb.

† Census figures for 1912.

EXTERNAL TRADE.

The total trade of Canada for certain years since 1908 is stated as follows, in dollars (\$4.867 = £1 sterling). (Includes imports of merchandise for home consumption and exports of merchandise, domestic and foreign.)

Year.	Imports.	Exports.	Total Trade.
	\$	\$	\$
1907-8	351,879,955	263,368,952	615,248,907
1908-9	288,217,515	259,922,366	548,139,881
1909-10	369,815,437	298,763,993	668,579,420
1910-11	451,745,108	290,000,210	741,745,318
1911-12	521,448,309	307,716,151	829,164,460
1912-13	670,089,066	377,016,355	1,047,105,421
1913-14	618,457,144	455,437,224	1,073,894,368
1914-15	455,446,312	461,442,590	916,888,821
1915-16	507,817,159	779,300,070	1,287,117,229
1916-17	845,330,903	1,179,211,100	2,024,542,003

The special trade of Canada is classified as follows (*Home produce* exported and imports for *home consumption*):—

Classification.	Exports, 1915-16.*	Imports, 1915-16.*
	\$	\$
Agricultural Produce...	249,661,194	54,018,369

Total, 1916 37,434 *1,893,125,774

Navigation.—During the navigation season of 1916 Canadian vessels of 9,839,029 tons, and United States vessels of 263,648 tons passed over the canal systems, and 263,648 passengers and 23,583,491 tons of merchandise, chiefly grain, lumber and minerals, were carried in 1916.

Posts and Telegraphs.—There were 13,057 post-offices in 1915-16. The total value of money orders issued from 4,690 offices was \$94,469,871, and the net postal revenue \$18,858,410, expenditure \$16,009,139. At the end of the calendar year 1916 there were 3,894 rural mail delivery routes on which were erected 178,083 boxes; the corresponding figures for the calendar year 1915 were 3,432 routes and 154,183 boxes. The length of Government telegraph lines in 1916 was 11,843 miles (including 382 miles of cables), and the number of offices was 1,001, from which 371,883 messages were sent and received. The chartered telegraph companies have a line mileage of 43,473, carrying 206,575 miles of wire (including 962 miles of cables), and 3,620 offices, from which 11,526,091 messages were sent and received. In 1916 there were 47 radio-telegraph land and coast stations operated in the public service of Canada, having a range of 100 to 750 nautical miles, or an average of about 270 nautical miles. There is also a long-distance station at Glace Bay, Cape Breton, with a range of 3,000 nautical miles, and also one at New Castle, N.B., with a range of 2,500 nautical miles. Messages sent and received numbered 161,477. Twenty-four Government steamers are equipped with wireless, having a range of 100 to 400 miles, or an average of 162 miles.

On June 30, 1916, there were 548,421 telephones and 1,600,564 miles of telephone wire in use; of the latter, 1,125,365 miles were urban and 475,199 rural. The earnings amounted to \$18,594,268, and the expenses to \$11,147,401.

Shipping.—The sea-going and lake mercantile marine of Canada on Dec. 31, 1915, consisted of 4,625 sailing vessels and 4,132 steamers (total net tonnage, 929,312). The sea-going vessels entered and cleared at Canadian ports in 1916

numbered 37,762 (Canadian 12,386, British 6,817, Foreign 18,559), tonnage 24,827,650. The principal ports are Montreal, Toronto, Vancouver, Quebec, Halifax, St. John, N.B., and Ottawa.

WEIGHTS, MEASURES AND CURRENCY.

The *System of Weights and Measures* is that of the United Kingdom, except that the cwt. = 100 lb. and the ton 2,000 lb., as in the U.S. The *Unit of Currency* is the dollar of 100 cents. \$1 = 49³³/₁₀₀ pence, English, i.e., \$4 86⁷/₁₀₀ = £1 sterling. All British coins are legal tender, and there is a branch of the Royal Mint at Ottawa.

Banking.—There were 21 incorporate banks of issue in 1916, with liabilities \$1,596,905,337 and average assets \$1,839,286,709. The balance of undrawn deposits in Post Office and Government savings banks on March 31, 1916, amounted to \$53,528,426, the depositors numbering 164,993.

* Not including capital expenditure on Intercolonial, P.E.I., and National Transcontinental Railways.

* Including Stratheona.

Provinces of the Dominion.

ONTARIO.

Area and Population.—The Province of Ontario contains a total area of 407,263 sq. miles, with a population (1916) of 2,580,252, an increase since the last census (1911) of 62,350. Of the total population 1,560,625 live in towns, townships, and villages, and 1,019,627 in cities.

Government.—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 111 members elected for four years which meets every year at Toronto. Executive Council of nine members (one without portfolio) act as the Ministry of the Province.

Lieutenant-Governor, Hon. Col. Sir J. S. Hendrie, K.C.M.G., C.V.O. (1914)\$20,000
Official Sec., A. Fraser 1,400

SUPREME COURT OF ONTARIO.

Chief Justice of Ontario, Hon. Sir William Meredith, born 1840 (1912)\$8,000
Chief Justice of the King's Bench and President of the High Court, Hon. Sir Glenholme Falconbridge 8,000
Chief Justice, Exchequer Division, Hon. Sir William Mulock 8,000
Chief Justice, Common Pleas, Hon. R. M. Meredith 8,000

Justices of Appeal, Hon. J. J. MacLaren;
 Hon. J. Magee; Hon. F. E. Hodgins;
 Hon. W. N. Ferguson each \$7,000
Puisne Judges, Hon. B. M. Britton; Hon. R. C. Chute; Hon. W. R. Riddell;
 Hon. F. R. Latchford; Hon. R. F. Sutherland; Hon. W. E. Middleton;
 Hon. H. T. Kelly; Hon. H. I. S. Lennox; Hon. C. A. Marten; Hon. H. E. Rose each 7,000

Agent-General for Ontario in the British Isles, Richard Reid, 163, Strand, London, W.C. 2.

Agriculture and Live Stock.—The total area is 234,163,030 acres, and in 1917 the area of cleared land was 14,728,014 acres, of which 9,178,250 acres were under crops. The total value of the agricultural production in 1917 was \$382,267,743. In 1917, 980 cheese factories produced 128,698,948 lb. of cheese valued at \$23,653,343, and 290 creameries made 27,070,857 lb. of butter valued at \$8,635,026. In 1916 there were 775,732 horses, 2,734,767 cattle, 908,066 sheep, 1,735,254 pigs, and 14,377,844 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

Log Products.—The total production of log and timber products and wood pulp amounted in 1916 to \$42,260,053, or 24 per cent. of the lumber and pulp trade of the whole Dominion.

Manufactures.—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1915 was \$715,531,839, an increase since 1910 of \$136,000,000. There were, in 1915, 6,538 factories with nearly 250,000 employees, an invested capital of \$946,619,114, and an annual wage bill of \$140,609,691.

Minerals.—The mineral wealth of the Province is enormous, although its development is only in its infancy, and represents 46 per cent. of the output of Canada. In 1917 its mines yielded \$88,821,815, an increase of \$8,360,492 over 1916. The principal minerals are: gold (58 per cent. of Canada's output), silver, 19,479,692 oz. (\$16,183,208, 87 per cent.), nickel, 41,887 tons (\$20,943,500), and copper, 21,197 tons (\$7,842,890). The oil wells produced 202,991 barrels of petroleum in 1917.

Hydro-Electric Power.—One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro-Electric Commission, supplying light and power from Niagara and elsewhere. These works are now developing 237,733 horse-power, and a further development of 300,000 horse-power is now under construction.

Principal Cities.—CAPITAL, TORONTO, population (1917) 473,829, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (107,832); Ottawa, the Federal capital (101,785), with a large lumber trade and woodenware manufactories; London

(56,358); Brantford (27,664); Kingston (23,261); Peterborough (20,653); Windsor (28,064); Port William (27,176); Kitchener (19,695); Guelph (16,799); St. Thomas (16,794); Stratford (17,096); Owen Sound (12,385); St. Catharines (17,296); Port Arthur (14,440); Sault Ste. Marie (19,283); Chatham (13,943); and Galt (12,060).

QUEBEC.

Area and Population.—The Province of Quebec contains an area estimated at 703,653 square miles, with a population (1915-16) of 2,316,417, an increase since the last Census of 353,814. In 1912 the Province was enlarged by 351,780 square miles by the addition of the greater part of the Labrador Peninsula, known as *Ungava* (or New Quebec).

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 81 members elected for five years to represent the same number of electoral districts in the Province.

Lieutenant-Governor, Rt. Hon. Sir Charles Fitzpatrick, G.C.M.G., born 1851 (1916).....\$10,000
Aide-de-Camp, Maj. Victor Pelletier..... hon.

Letellier; S. C. E. Dorion; L. A. Panneton; G. Globensky; C. Laneeach \$5,000 to \$7,000

Agent-General for Quebec in England, Lt.-Col. J. P. Pelletier, 38 Kingsway, W.C. 2.

Production and Industry.—The total value of manufactured products in 1915 was \$387,900,585 (1900, \$158,287,994), the principal manufacturing centres being (1915): Montreal (\$243,237,575), Quebec (\$18,933,277), Hull (\$6,737,274), Maisonneuve (\$5,033,541), and Lachine (\$3,257,812). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 150,000,000 acres, of which 45,000,000 are under licence to cut timber. The wood-pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only \$2,516,683 at the Census of 1911, was, in 1916, \$6,840,489. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1917, was 7,297,471 acres. In 1916 there were 885 cheese factories, 660 butter factories, and 445 butter and cheese factories combined. The total value of dairy industry products was \$22,875,337.

Education.—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1915-16, 7,288 schools with 490,718 scholars, including the high and superior schools and 14 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and three Universities—two Protestant, McGill College, Montreal, and Bishop's College, Lennoxville; and Laval University, Roman Catholic.

Principal Cities.—CAPITAL, QUEBEC (population, 110,000), with a large export timber trade, and the great seaport town of Canada; and Montreal (population, 750,000), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (25,422), Sherbrooke (23,212), Westmount (18,500), Trois Rivières (21,000), Verdun (24,100), St. Hyacinthe (12,491), Sorel (9,229), and Lévis (9,672).

NOVA SCOTIA.

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25'–47° N. lat. and 59° 40'–66° 25' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 20,907 square miles (one-fifth of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1911, of 492,338 (251,019 males and 241,319 females), an increase since the last census of 32,764 persons.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 43 members.

Lieut.-Governor, Hon. MacCallum Grant \$9,000

Executive.

<i>Provincial Secretary</i> , Hon. G. H. Murray, LL.D., K.C. (<i>Premier</i>)	\$6,000

<i>Judge, Vice-Admiralty Court</i> , Hon. Arthur Drysdale	1,000

Agent-General for Nova Scotia in England,
John Howard, 57A Pall Mall, S.W.

Agriculture and Live Stock.—About 10,000,000 acres are fit for tillage, and the soil is unsurpassed for fertility. The climate is delightful, and the winter is not nearly so cold as in other parts of the Dominion. In 1912 there were 5,064,968 acres of land occupied (2,219,573 improved), of which 758,074 acres were under crop, 1,282,050 acres in pasture, and about 100,000 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding 875,027 tons in 1917. Fruit is extensively cultivated, and Nova Scotia apples are claimed to be the best in the world. The yield has ranged in recent years from 600,000 to 1,500,000 barrels, the principal district being the Annapolis Valley. Thirty-five model orchards have been set out during the past fifteen years. In 1917 there was an increase in the output of the creameries of 10 per cent. over that of 1916. Wheat-growing is receiving encouragement as a war-time measure. Four additional roller process mills were constructed. The total returns from the agricultural industry in 1916 were \$36,000,000. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the

Government offer uncleared Crown lands at \$80 per 100 acres, and 80 cents per acre for any additional quantity. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax.

Manufactures.—In 1912 there were 1,480 industrial establishments with a capital of \$79,596,341, paying wages amounting to \$10,628,955. The value of the total output in 1917 was \$72,750,000 (1900, \$23,592,513).

Fisheries.—In 1917 the sum of \$8,661,643 represented the amount invested in the fisheries, the total value of the fish marketed being \$10,092,900, and the number of persons employed being 29,000.

Minerals.—The coal deposits are extensive and of quality ranging up to 14,000 B.T.U.; 5,803,660 gross tons were produced in 1917; 411,575 tons limestone, 298,108 tons of gypsum, and 10,000 tons of calcined gypsum. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton; gold mines are being profitably worked.

Principal Cities.—CAPITAL, HALIFAX (population 46,619), one of the terminals of the Intercolonial Railway, with a magnificent harbour; is the principal winter port of Canada, and the entrepôt of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers is now in process of construction. Other towns are Sydney (17,617); Glace Bay (16,569); Amherst (9,000); Sydney Mines (7,470); Truro (6,107); Yarmouth (6,600); New Glasgow (6,383); Spring Hill (5,713); North Sydney (5,418); and Dartmouth (5,058).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of 122,084 inhabitants. The chief city, Sydney (pop. 17,617), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. A plate mill is now being erected which will supply the steel plates required by the various steel shipbuilding plants of Canada. The Canadian Government Railway connects the island with the mainland.

NEW BRUNSWICK.

Area and Population.—NEW BRUNSWICK is situated between 45°–48° N. lat. and 63° 47'–69° W. long., and comprises an area of 27,985 square miles, with a population in 1911 of 351,889 (179,867 males and 172,022 females), an increase since the last census of 20,769 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Lieutenant-Governor, Hon. Wm. Pugsley,
D.C.L., LL.D., K.C.

Executive.

<i>Premier</i> , Hon. Walter E. Foster	2,400
<i>Minister of Lands and Mines</i> , Hon. Ernest A. Smith.....	
<i>Provincial Secretary and Treasurer</i> , Hon. Robert Murray.....	2,100
<i>Public Works</i> , Hon. Peter J. Veniot.....	2,100

Attorney-Gen., Hon. James P. Byrne \$2,100
Agriculture, Hon. J. Fletcher Tweeddale 2,100
Deputy Provincial Secretary and King's Printer,

Judge, Hon. O. S. Crocket 500

Agriculture and Live Stock.—In 1916 14,637 acres were under wheat, 194,311 under oats, and 45,210 under buckwheat, with 1,900 acres under barley. The produce in 1916 was 284,985 bushels of wheat, 5,883,963 bushels of oats, and 1,082,183 bushels of buckwheat. 44,583 acres of potatoes produced 8,148,807 bushels, and 9,135 acres of turnips 4,189,203 bushels. The value of the field crops amounted to \$30,000,000 in 1917. The live stock (1915) included 247,212 cattle, 136,193 sheep, 88,538 pigs, and 64,488 horses. The value of agricultural produce in 1911 was \$18,959,000. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad. The capital invested in this industry is upwards of \$5,000,000, giving employment to 22,000 persons. In 1916 there were 25 cheese factories in operation, producing 1,185,664 lb., value \$210,692, and from 21 creameries 709,932 lb. of butter realised \$236,194.

Manufactures.—The value of the total output of manufactured goods in 1910 was \$35,422,302 (1900, \$20,972,470), the principal manufacturing centre being St. John (\$10,081,667). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERICTON; population (1911), 7,208. St. John (pop. 52,000) is one of the principal winter ports of Canada, and is connected by C.P.R. and Intercolonial Railways with Montreal; Moncton (12,260); Chatham (4,666).

MANITOBA.

Area and Population.—Manitoba, formerly the Red River Settlement, is situated in about the centre of the continent, between 49°–60° N. lat.

and 95°–105° W. long., with a total area of 251,832 square miles and a population (1916) of 553,860 (294,609 males and 259,251 females), an increase since the last census of 200,493.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members and a Legislative Assembly of 49 members.

Lieut. Governor, Hon. Sir J. A. Aikins
(1 Aug., 1916) \$9,000

each 6,000

Agriculture.—The soil is fertile and productive; emigration is invited and encouraged, and liberal grants of land are made to settlers. In 1915 6,731,521 acres were cultivated, of which 3,364,281 acres were under wheat, and the crops were 96,662,912 bushels of wheat, 101,077,991 oats from 2,121,845 acres; 1,039,849 acres under barley produced 35,423,495 bushels, 85,365 acres under flax, rye, and peas yielded 1,169,336 bushels, and potatoes (67,343 acres) produced 7,736,368 bushels. *Dairy Products:* 10,716,836 lb. butter, value \$2,760,698; cheese, 1,553,192 lb., value \$107,170; total value, including milk and cream, \$3,845,184. In 1915 there were 329,994 horses, 631,005 cattle, 76,577 sheep, 286,433 pigs, and 1,320,249 turkeys, geese and chickens. The production of honey was 104,655 lb.

Manufactures.—The value of the total output in 1910 was \$53,673,609 (1900, \$12,927,439). The principal manufacturing centres being Winnipeg and St. Boniface (\$39,400,608).

Principal Cities.—CAPITAL, WINNIPEG; population (1911), 135,430; the third largest city in Canada. Brandon (13,839), St. Boniface (7,483), Portage La Prairie (5,892).

BRITISH COLUMBIA.

Area and Population.—British Columbia has a total area estimated at 390,344 square miles, with an estimated population in 1917 of 356,800, about 46,000 having gone to the Front; the Census of 1911 gave 392,480 (251,619 males and 140,861 females), an increase since the former census of 213,823.

Government.—The Government consists of a Lieutenant-Governor and an Executive Council,

together with a Legislative Assembly of 47 members.

Lieut.-Governor, His Honour Sir Frank S.

Barnard, K.C.M.G. \$10,000

Agent-General in London, Hon. F. C. Wade, K.C. (1918).

Production and Industry.—The total value of the output of manufactures in 1916 (estimated) was \$55,000,000 (1900, \$19,447,778), the principal manufacturing centres being Vancouver and Victoria. The yield of the other industries in 1917 was: minerals, \$37,010,392; lumber, \$35,528,000; fisheries, \$14,637,346; fruit and farm products, \$37,661,850. There are extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over \$595,571,107, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are acres of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals, and timber.

Revenue, 1917 (Budget), \$6,906,783. Expenditure, 1917 (Budget), \$9,079,317.

Principal Cities.—CAPITAL, VICTORIA. Population 1917 (estimated), 45,000. Other centres are Vancouver (160,000), New Westminster (17,000), Nanaimo (8,000), North Vancouver (8,000), Nelson (7,000), Prince Rupert (6,000), Kamloops (6,000), and Fernie (5,500).

PRINCE EDWARD ISLAND.

Area and Population.—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 2,133 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1911) 93,728 (47,069 males and 46,659 females), a decrease since the last census of 9,981 persons. The island was first settled by the

French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

Lieut.-Governor, Hon. Augustine Colin

Macdonald (1915) \$7,000

Executive.

Premier and Attorney-Gen., Hon. Aubin

E. Arsenault \$2,700

S. Stewart 5,200

Assistant Judge of Superior Court and

Master of the Rolls, Hon. Francis L. Hazard 5,200

Asst. Judge and V.-C., Hon. R. R. Fitzgerald 5,200

Prothonotary and Clerk of the Crown,

W. A. O. Morson 1,250

Agriculture and Live Stock.—There were (1914)

768,256 acres of improved land, of which 477,698

acres are under crops, 284,923 acres of pasture

land, and 5,635 acres of gardens and orchards.

Production and Industry.—The value of the

field crops in 1916 was estimated at \$14,287,325,

including oats (6,567,000 bushels), \$3,990,200;

wheat (603,750 bushels), \$1,026,375; potatoes

(6,200,000 bushels), \$4,030,000; roots (3,551,000

bushels), \$923,000. The value of the fisheries

was estimated at \$1,261,666.

The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from \$20 to \$60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity, after passing through an experimental stage for over twenty years, has now become an established and profitable industry. There are about 375 fox ranches, conducted by about 300 incorporated companies and also a number of private partnerships or individuals. The assessed value of the young foxes born in the spring of 1916 totals about \$1,500,000. Shareholders in fox ranches for the three years 1911-13 received from 50 per cent. to 200 per cent. on their investments. The valuation is at present greatly reduced owing to the war and the closing of the great fur markets.

Manufactures.—The total value of the manufactures in 1920 was \$3,136,470, against \$2,326,708 in 1900.

Principal Cities.—CAPITAL, CHARLOTTETOWN, on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Georgetown, Summerside, Souris, Kensington, and Alberton.

ALBERTA.

Area and Population.—The Province of Alberta has an estimated area of about 257,000 square miles, including about 2,500 square miles of water, with a population (1916) of 496,117, compared with 374,663 in 1911.

Government.—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 55 members, elected for five years, representing 52 electoral districts into which the Province is divided. The Executive Council consists of eight members.

Lieutenant-Governor, Hon. R. G. Brett,
LL.D. (1913)..... \$9,000

Executive.

Premier and President of the Council, and Minister of Railways and Telegraphs,
Hon. Charles Stewart..... \$8,500
Attorney-General, Hon. John R. Boyle 6,000
Provincial Secretary, Hon. George P. Smith 6,000
Provincial Treasurer, Hon. C. R. Mitchell 6,000
Public Works, Hon. A. J. McLean 6,000
Municipal Affairs, Hon. A. G. Mackay 6,000
Education (Vacant) 6,000
Agriculture, Hon. D. M. Marshall 6,000
Clerk of the Executive Council, J. D. Hunt 4,800

Speaker of the Legislative Assembly, C. W. Fisher \$2,500

The Judiciary.

Chief Justice, Hon. Horace Harvey \$7,000

Agent-General in London, John A. Reid, 1 Charing Cross, S. W. 1.

Agriculture and Live Stock.—There is a succession of wheatfields, homesteads, villages, and towns; while settlers from the U.S., Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops, 1917, was 6,127,150 acres. Wheat, 2,879,340 acres, yielding 53,859,254 bushels; oats, 2,537,883 acres, yielding 84,384,610 bushels; barley, 472,112 acres, yielding 10,504,492 bushels; flax, 139,827 acres, yielding 1,153,572 bushels. The Department of Agriculture in the Provincial Government has established seven Demonstration Farms at different points, and on three of these are free schools of agriculture. Free homesteads are available for thousands of settlers in desirable localities. Animals slaughtered and sold, \$45,000,000; dairy products, \$25,000,000; wool clip (2,086,633 lb.), \$1,781,682; game and furs, \$2,000,000; poultry, \$3,500,000. There were, in 1917, 718,317 horses, 730,237 swine, 276,966 sheep, 592,982 cows, 616,671 beef cattle, and 592,982 other cattle.

Manufactures.—The total value of the output in 1920 was \$18,788,826, against \$1,313,375 in 1900, the principal manufacturing centres being Calgary (\$7,751,011) and Edmonton (\$4,493,304).

CAPITAL, EDMONTON. Population (Census of 1916, 53,846).

SASKATCHEWAN.

Area and Population.—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west, and has an estimated area of 251,700 square miles, the population at the Census of 1916 being 627,835, an increase of 636,556 persons since the Census of 1901. The estimated rural population for 1916 is 471,673.

Government.—The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of eight members. The Province is divided into 59 electoral districts.

Lt.-Governor, Hon. Sir R. S. Lake, K.C.M.G. \$9,000

Premier, Minister of Education, and

President of Council, Hon. W. M. Martin 7,500

Attorney-General, Hon. Alphonse Turgeon 7,500

Provincial Secretary, Hon. W. E. Knowles 5,000

Clerk Executive Council, J. W. McLeod ... 3,500

Speaker of the Legislative Assembly, Hon. Dr. R. M. Mitchell.

Clerk of the Legislative Assembly, G. A. Mantle.

Chief Justice, Court of Appeal, Hon. Sir Frederick W. G. Haultain, born 1857 \$7,000

Puisne Judges, Hon. H. W. Newlands, C. Johnstone, J. H. Lamont, and E. L. Elwood each 6,000

Ch. Justice, King's Bench, Hon. J. T. Brown

Puisne Judges, Hon. J. McKay, H. Y. MacDonald, H. V. Bigelow, J. F. L. Embury, C.M.G., and G. E. Taylor.....

Agriculture and Live Stock.—Of the total area, 152,340,320 acres are land; and of the total area surveyed, 78,561,297 acres are land, 1,835,456 are water, and 1,455,537 roads. Forest reserves and parks extend to 6,195,700 acres, and the Indian reserves amount to 1,131,747 acres, while 307,750 acres of Indian reserves have been surrendered. The area under homesteads, &c., was 26,910,000 acres in 1916, while 15,177,063 acres had been granted to railway companies, 3,205,800 to Hudson's Bay Company, 3,941,800 acres were school land endowment, and 76,921 had been sold under irrigation system. The area under grain crops in 1917 was 14,678,042 acres, including 8,273,270 acres under wheat.

The principal products are grain and cattle.

In 1898 there were but 276,253 acres under wheat, whilst in 1917 there were 5,384,092. In 1898 4,780,440 bushels were produced; in 1916, 121,864,454 bushels.) The estimated crop area for 1918 was: wheat, 9,901,000 acres; oats, 4,622,000; barley, 663,000; and flax, 724,000 acres.

THE YUKON TERRITORY, which occupies the north-western extremity of the Dominion, was constituted in 1898, and contains a total area of 207,076 square miles, with a population in 1911 of 8,512 (6,518 males and 2,004 females). The Government is administered by a Commissioner, with a Legislative Council of 10 members.

Commissioner, George N. Williams (actg.) \$6,000

Gold Commissioner and Crown Timber and

Land Agent, George P. Mackenzie 5,000

Assistant Do. (White Horse), R. C. Miller 2,500

THE NORTH-WEST TERRITORIES comprise the present unorganised part of British North America north of the Provinces of Quebec, Ontario, Manitoba, Saskatchewan, and Alberta, a total area estimated at 1,242,324 square miles.

Population in 1911, 17,196.

PHYSIOGRAPHY.

The Island of Newfoundland is situated between $46^{\circ} 37' - 51^{\circ} 37' N.$ latitude and $52^{\circ} 44' - 59^{\circ} 30' W.$ longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 370 miles long and 290 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tofts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of pine and birch. The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80° .

GOVERNMENT.

Newfoundland is the oldest English colony, for it was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses. The *Legislative Council* is appointed by the Crown and consists of 24 members; the *House of Assembly* consists of 36 members, elected by the people, every male British subject aged 21 being entitled to the franchise.

GOVERNOR.

Governor, His Excellency Sir Chas. Alexander Harris, K.C.M.G., C.B., C.V.O. (1917)\$12,500
Private Sec., Hon. R. Watson 900

THE MINISTRY.

(January, 1918).

Premier & Minister of Justice, William Frederick Lloyd, K.C.\$2,000
Colonial Secretary, *Hon. W. W. Halfyard 2,000
Minister of Finance and Customs, *Hon. Sir M. P. Cashin, K.B.E. 2,000
Minister of Agriculture and Mines, *Hon. J. A. Clift 2,000
Minister of Shipping, Hon. J. Crosbie 2,000
Minister of Public Works, Wm. Woodford 2,000
Postmaster-General (vacant) 2,000

Not in Cabinet.

Minister of Marine & Fisheries, Hon. J. G. Stone.
Minister of Militia, Hon. J. R. Bennett.

(The Ministry in July, 1917, was enlarged from 9 to 12 members.)

LEGISLATURE.

The *Legislative Council* consists of not more than 24 members, appointed for life; the *House of Assembly* of 36 members, elected by the people for 4 years.

Pres. of the *Legislative Council*, Hon. John Harris.
Speaker of the *House of Assembly*, Hon. John R. Goodison\$750

* The Ministers with an asterisk before their names, together with the Hons. C. H. Emerson, K.C., R. K. Bishop, M. P. Gibbs, K.C., and J. C. Crosbie, form the Executive Council.

JUDICATURE.

Chief Justice, Hon. Sir W. H. Horwood ... \$5,000
 Assist. Judges, Hon. G. M. Johnson, Hon.
 J. M. Kent each 4,000

DEFENCE.

Expeditionary Force, 3,000; Naval Reserve,
 1,500.

EDUCATION.

Education is denominational, and is assisted by Government. Primary schools were attended in 1915 by 56,307 pupils, and Secondary schools by 1,535 students. The Government grants in 1915 amounted to \$366,923.

RELIGION.

At the Census of 1901 and 1911 the following statistics were obtained:—

Religion.	1901.	1911.
Roman Catholics.....	75,989	81,177
Church of England.....	73,008	78,616
Methodists	61,388	68,045
Presbyterians	1,497	1,876
Salvation Army	6,554	10,141
Various	2,505	2,767

FINANCE.

The revenue, expenditure and debt of Newfoundland for the six years ended June 30, 1910-1916, are stated as under (\$2 = 4s. 2d. or \$4 8 = £1 sterling):—

Year.	Revenue.	Expenditure.	Public Debt.
	\$	\$	\$
1910-11	3,527,126	3,354,747	27,176,280
1911-12	3,736,456	3,524,653	27,489,957
1912-13	3,919,040	3,803,561	29,470,060
1913-14	3,920,178	3,920,178	30,450,765
1914-15	3,950,790	4,008,623	31,454,678
1915-16	4,728,000	4,250,000	35,450,000

EXTERNAL TRADE.

The external trade of the island for the five years ending June 30, 1916, is stated as follows:—

Year.	Imports.	Exports.	Total.
	\$	\$	\$
1911-12 ...	14,733,490	13,730,024	28,472,514
1912-13 ...	16,012,365	14,672,887	30,685,254
1913-14 ...	15,193,726	15,134,543	30,328,269
1914-15 ...	12,350,786	13,136,880	25,487,666
1915-16 ...	16,833,500	19,406,406	36,379,906

The trade was chiefly distributed in 1915-16 as under:—

Country.	Imports from.	Exports to.
United Kingdom	\$2,579,614	\$4,582,379
United States	7,097,779	2,540,606
Canada	6,466,359	2,727,337

The principal imports in 1914-15 were flour, textiles, coal, hardware, and provisions; the principal exports were codfish, value \$10,394,041; cod and seal oil, value \$1,085,974; pulp and paper, \$2,999,377; herrings, \$1,076,000; seal-skins, \$206,449; tinned lobsters, \$148,303; copper, copper ore, iron pyrites, and other minerals, \$927,741; total value of the fishery products in 1914-15, \$9,639,789.

PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer, a large proportion of which is exported to South America; and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. During 1915-16 there was exported from Grand Falls and Bishop Falls paper and pulp valued at nearly \$3,000,000, most of which was consigned to the United Kingdom. The larger portion of the interior is practically in a state of nature; but the railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's, assays running as high as 29½ per cent.

COMMUNICATIONS.

Railways.—There were 827 miles of railway open in 1915. The trans-insular line runs to Port-aux-Basques, via Exploits River and Bay of Islands, with branch connexions to Placentia, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Branch lines are under construction.

Posts and Telegraphs.—There were 738 post-offices in 1915, dealing with 3,750,000 letters and post-cards, 3,400,000 newspapers and books, and 150,970 parcels. There are 4,225 miles of telegraph line and 899 of telephone wire.

Shipping.—On Dec. 31, 1915, the Mercantile Marine of Newfoundland consisted of 3,330 sailing vessels of 133,728 tons, and 98 steam vessels of 20,252 tons. In 1914-15 the tonnage of vessels entered and cleared at Newfoundland ports was 1,962,342 tons, of which 1,448,197 tons were British.

TOWNS.

The CAPITAL, ST. JOHN'S (population 32,292), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (4,279), Carbonear (3,540), Twillingate (3,348), and Bonaville (3,911).

HIGH COMMISSIONER IN LONDON.—Sir Edgar R. Bowring.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north; the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for settlement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Maggovic, Hopedale, Nain, Okak, Hebron, and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet to deal with the almost inexhaustible supply of timber.

Australia.

(The Commonwealth of Australia.)

* Included in New South Wales.

† The Aboriginal inhabitants of Australia are not enumerated in the Census, with the exception of half-caste, and those employed at stations, &c. Their numbers are estimated not to exceed 100,000, many of whom live in the unexplored interior.

‡ Exclusive of Papua, or British New Guinea, a dependency of the Commonwealth. Its capital is Port Moresby, and its area 88,460 square miles. White inhabitants numbered 1,032 in 1911, 1,279 in 1913, 1,186 in 1914, and 1,037 in 1915. The Native population is estimated at 450,000.

PHYSIOGRAPHY.

The territory of the Commonwealth includes the Continent of Australia, the Island of Tasmania, Norfolk Island, and part of the island of New Guinea (Papua).

Australia (mainland) is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest of the Continents, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between $10^{\circ} 39' - 39^{\circ} 11\frac{1}{2}'$ South latitude and $113^{\circ} 5' - 153^{\circ} 16'$ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, sometimes below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Marv, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Executive Council of seven Ministers of State and such honorary Ministers who may be appointed thereto. The Constitution rests on the fundamental law of March 16, 1898, ratified by the Imperial Parliament on July 9, 1900; and the Commonwealth was inaugurated on Jan. 1, 1901. Under the Constitution the Federal Government possesses limited and enumerated powers as surrendered by the federating States, the residuum of legislative power being in the Governments of the various States. Briefly stated, the enumerated powers include authority over commerce and navigation, finance, defence, posts and telegraphs, census and statistics, and conciliation and arbitration in extra-State industrial disputes; with authority to assume the control of railways and lighthouses, marriage and divorce, emigration and immigration, currency and banking, and weights and measures.

Gov.-Gen., His Excellency the Rt. Hon. Sir Ronald Crauford Munro-Ferguson,

P.C., G.C.M.G.

Military Secretary, Capt. Hon. C. D. Finch-Knightley.

Aides-de-Camp, Captain E. A. Haskett-Smith; Captain C. P. L. Firth.

Official Secretary, Maj. George Steward, C.M.G.

£10,000

Executive Council (March, 1918).

Prime Minister and Attorney-General, Rt. Hon. W. M. Hughes, P.C. (now in England).
Minister for the Navy, Rt. Hon. Sir Joseph Cook, G.C.M.G.

Treasurer, Hon. W. A. Watt.
Minister of Defence, Hon. G. F. Pearce.
Vice-President, Executive Council, Hon. E. J. Russell.

Minister for Repatriation, Hon. E. D. Millen.
Minister for Works and Railways, Hon. L. E. Groom.

Minister of State for Home and Territories, P. McM. Glynn, K.C.

Minister of State for Trade and Customs, J. A. Jensen.

Honorary Ministers, Honrs. A. Poynton; Wise; Massey; Greene; Orchard.

The sum of £15,330 is provided in the Constitution for annual salaries of Ministers. The distribution of the same is a matter of Cabinet arrangement.

PUBLIC DEPARTMENTS.**Prime Minister's Department:—**

Sec., M. L. Shepherd.
Public Service Comm., W. B. Edwards (acting).
Sec. Public Service Comm., H. McTaggart (acting).
Auditor-General, John William Israel, I.S.O.
Sec. to Auditor-General, G. H. Gatehouse.

Treasury:—

Secretary and Commissioner of Pensions and Maternity Allowances, James Richard Collins.
Asst. Sec., C. J. Cerutti.
Accountant, J. T. Heathershaw.
Commissioner of Land Tax, R. Ewing (acting).
Governor, Commonwealth Bank, D. K. Miller.

Attorney-General's Department:—

Secretary and Solicitor-General, Sir Robert R. Garran, Kt.
Chief Clerk, G. S. Knowles.
Crown Solicitor, Gordon Harwood Castle.
Commr. of Patents, G. Townsend.

Home and Territories:—

Sec. to Dept., Atlee A. Hunt, C.M.G.
Chief Clerk, F. J. Quinlan.
Commonwealth Statistician, G. H. Knibbs, C.M.G.
Chief Electoral Officer, R. C. Oldham.
Chief Surveyor and Estates Officer, T. J. H. Goodwin.
Administrator, Northern Territory, Dr. J. A. Gilruth.

Lieut.-Gov., Papua, Hon. J. H. Murray, C.M.G.

Postmaster-General:—

Sec. to Dept., Justinian Oxenham.
Chief Clerk, J. C. T. Vardon.
Chief Electrical Engineer (vacant).
Chief Accountant, G. G. Haldane.
Commonwealth Meteorologist, H. A. Hunt.

Defence:—

Secretary, T. Trumble.
Acting Asst. Secretary, M. Maguire.
Chief Accountant, Col. T. J. Thomas.
Chemical Adviser, Marcus Bell.

Trade and Customs:—

Comptroller-General, S. Mills.
Director of Quarantine, J. H. L. Cumpston.
Analyst, W. P. Wilkinson.
Director of Fisheries (vacant).
Director of Lighthouses, J. F. Ramsbotham.

Works and Railways:—

Acting Secretary, W. D. Bingle.

Director-Gen. of Works, Col. P. T. Owen.
Engineer-in-Chief for Commonwealth Railways, N. G. Bell.

THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The Senate contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1917, is made up of 27 for New South Wales, 21 for Victoria, 10 from Queensland, 7 from South Australia, and 5 each from Tasmania and Western Australia, and consists of members of the Labour Party and Liberals.

President of the Senate, Hon. T. Glivena.

Speaker, House of Representatives, Hon. W. E. Johnson.

THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 6 Judges, having original and appellate jurisdiction, subordinate to the final Appeal Court of the Empire, the Judicial Committee of the Privy Council.

Chief Justice, Rt. Hon. Sir Samuel Griffith, P.C., G.C.M.G.

Judges, Rt. Hon. Sir Edmund Barton, P.C., G.C.M.G.; Hon. I. A. Isaacs; Hon. H. B. Higgins; Hon. F. G. Duffy; Hon. C. Powers; Hon. G. E. Rich.

INTER-STATE COMMISSION.

The Inter-State Commission was constituted in 1913, its members being A. B. Piddington, K.C., Hon. G. Swinbourne, and N. C. Lockyer, I.S.O. **Secretary**, A. G. Brown, LL.B.

DEFENCE.

In 1916 there was a total membership of the Defence Force of 275,867, of whom 554 officers and 8,869 men were serving in the Navy and 266,444 others in the Army. The latter figure includes 104,184 riflemen and 86,959 cadets. The expenditure on Defence (excluding War expenditure) in 1916-17 was £5,072,000, and the special war expenditure £59,239,363.

Navy.

An agreement was entered into (1902) by the Commonwealth and Imperial Governments under which a naval force was to be maintained (for ten years, 1903-13) in Australasian waters by the British Board of Admiralty, in return for annual contributions from Australia (£200,000) and New Zealand (£40,000), a third party to the agreement. This agreement provided also for the maintenance of Sydney as a first-class naval station, and for the nomination of naval cadets in the Royal Navy by the Australian and New Zealand Governments. This agreement has merged into the Australian Defence Scheme, under which the Commonwealth provides and maintains certain ships of war, which will form an Australian squadron of the Royal Navy, under the command of a Commonwealth officer in time of peace, and an integral part of the Eastern Fleet of the Royal Navy in time of war. Ships of the Royal Australian Navy are known as H.M.A.S. (His Majesty's Australian Ship), and did good service in the Pacific in the earlier months of the war. H.M.A.S. *Sydney* destroyed the German cruiser *Emden* at Cocos Island on Nov. 9, 1914.

Board of Naval Administration:—

President, The Minister of State for the Navy.
First Naval Member, Rear-Admiral Sir William R. Creswell, C.M.C.G.

Second do., Capt. H. L. Cochrane, R.N.

Third do., Eng.-Capt. W. Clarkson, C.M.C.G.

Finance and Civil Do. (vacant).

Secretary, Hon. Fleet-Paymaster G. L. Macantlie.

Army.

By a Federal Law of 1910 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12-18, and *Citizen Soldiers* 20-26, with short periods of training in the field. The *Peace Effective* is about 80,000 of all ranks; the *War Establishment* about 127,000 upwards. The Commonwealth had, up to the end of September, 1917, enlisted no fewer than 306,227 men, fully equipped for service in the war: New South Wales, 111,970; Victoria, 83,648; Queensland, 42,955; South Australia, 28,039; West Australia, 26,342; Tasmania, 10,273. These numbers have been since considerably added to. The Australian forces, who are unrivalled as mounted infantry, have behaved with the greatest gallantry whenever engaged with the enemy. To Aug. 5, 1918, their War record was 36 V.C., 370 D.S.O. (14 bars), 1,258 M.C. (48 bars), 920 D.C.M. (10 bars), 5,206 M.M. (167 bars and a double bars), 248 foreign decorations.

Board of Military Administration:—

President, The Minister of State for Defence.

1st Mil. Member, Brig.-Gen. H. Foster (acting).

2nd do., V. C. M. Sellheim, C.B., C.M.C.G.

3rd do., Col. J. Stanley, C.M.C.G. (acting).

4th do., Col. H. W. Dangar (acting).

Finance Member, Col. T. J. Thomas.

Secretary, A. J. Murphy (acting).

Chief of General Staff, Brig.-Gen. H. Foster, R.E., p.s.c. (acting).

Inspector-General, Maj.-Gen. J. G. Legge, C.B., C.M.C.G.

FEDERAL FINANCE.

The Revenue and Expenditure of the Commonwealth for the years 1912-13 to 1916-17 are stated as follows:—

Years.	Revenue.	Expenditure.	Balance repayable to States.
	£	£	£
1912-13	21,899,413	15,779,483	6,119,930
1913-14	21,741,775	15,458,776	6,282,999
1914-15	22,419,798	16,056,023	6,363,775
1915-16	30,762,211	24,415,221	6,346,995
1916-17	34,035,173	21,286,300	6,270,419

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of 25s. per head of the population.

DEBT.

The Commonwealth has now undertaken responsibility for the Northern Territory Debt and the Port Augusta-Coodnadatta Railway Debt, whose combined amounts were £4,531,520 at June 30, 1917. The other State Debts remain at the charge of the State Governments. The total of the Commonwealth Public Debt on June 30, 1917, was £169,177,767 (including £47,774,269 War loan from British Government). The Public Debt of the several States being: N.S.W., £138,138,347; Victoria, £75,504,562;

South Australia, including Northern Territory, £42,723,671; Queensland, £61,303,136; Tasmania, £14,671,640; and Western Australia, £35,878,863. The people of Australia had lent, up to April 30, 1918, £147,000,000 for War purposes.

PRODUCTION AND INDUSTRY.

The estimated value of the products of the Commonwealth in 1914 and 1915 was:—

	1914.	1915.
Agricultural	£36,052,000	£73,769,000
Pastoral	60,265,000	65,607,000
Dairying, &c.	21,562,000	21,156,000
Forests and Fisheries	6,419,000	5,777,000
Mining	22,265,000	22,397,000
Manufacturing	62,922,000	62,883,000
	£209,485,000	£251,589,000

Agriculture and Live Stock.—The total land area of the Commonwealth is estimated at 1,903,731,840 acres, of which 18,528,234 were under cultivation in 1915-16. The following table shows the areas and crops of 1915-16:—

Crop.	Acreage.	Produce.
		Bushels.
Wheat	12,484,512	179,065,703
Oats	721,644	16,538,979
Maize	323,637	6,793,509
Hay	3,597,771	5,633,988
Sugar Cane	164,285	1,310,264

Live Stock.

	1915.	1916.
Sheep	69,257,189	72,865,926
Cattle	9,931,416	9,979,126
Horses	2,377,920	2,440,234
Pigs	753,693	879,510

In 1916 the Commonwealth produced 550,604,675 lb. of wool (as in the grease), against 622,734,725 lb. in 1915; 137,672,313 lb. of butter in 1915, against 193,970,412 lb. in 1914; 15,829,226 lb. of cheese in 1915, against 21,240,411 lb. in 1914; and 43,130,883 lb. of bacon and hams in 1915, against 52,574,902 lb. in 1914.

Mines and Minerals.—In 1916 the value of gold produced was £7,074,673; silver and lead, £3,530,078; copper, £4,625,363; tin, £900,806; coal, £4,118,201; the value of all minerals produced in 1916 being £23,567,974.

Manufactures.—In 1915 there were in the Commonwealth 15,092 industrial establishments, employing 321,071 hands; wages paid amounted to £33,210,654; the value of plant and machinery £22,277,002; of materials used £102,776,082; value added by manufacture £66,310,618; and total value of final output £169,086,700.

EXTERNAL TRADE.

The Imports and Exports of the Commonwealth for the seven and a half years 1909-1915-16 are as follows, the value of gold and silver coin and bullion being included in the totals:—

Year.	Imports.	Exports.	Total.
1909	£51,171,896	£65,318,836	£116,490,732
1910	60,014,351	74,491,150	134,505,501
1911	66,967,488	79,422,258	146,449,746
1912	78,158,600	79,066,090	157,254,690
1913	79,749,653	78,523,769	158,273,422
*1914	39,777,497	37,930,087	77,707,584
1914-15 ..	64,431,837	60,592,576	125,024,413
1915-16 ..	77,521,142	74,778,321	152,299,463

The total trade of 1912 amounted to £33,178,2d. per head, of 1913 to £32,19s. 2d. per head, of 1914-15 to £256s. 1d., and of 1915-16 to £30,17s. 8d. per head.

* First six months only.

The share of the various States in the external trade of the Commonwealth in 1915-16 was as under:—

State.	Imports.	Exports.*
New South Wales.....	£33,379,697	£40,958,316
Victoria	26,761,922	14,748,730
Queensland*	7,000,931	8,105,930
South Australia	5,152,210	6,136,085
Western Australia	4,169,109	4,196,188
Tasmania*	982,849	612,119
Northern Territory	74,424	20,953

The exchange of trade was with the principal countries as under in 1914-15 and 1915-16 (in £ sterling, 000 omitted):—

Country.	Imports from		Exports to	
	1914-5.	1915-6.	1914-5.	1915-6.
United Kingdom	37,897	35,145	38,546	33,528
Germany	1,297	117	478	—
United States	9,586	15,865	4,947	17,647
Belgium	524	81	805	—
France	238	1,793	1,280	2,469
New Zealand	2,096	2,701	2,809	3,654
India	2,748	3,680	1,425	1,746
Ceylon	977	1,245	435	337
Japan	1,392	2,910	1,967	3,433
South Africa	117	821	2,023	1,679
Canada	—	1,527	—	721
Argentina	—	1,136	—	5
Java	—	1,325	—	505
Switzerland	—	1,459	—	1
Italy	—	920	—	3,381

The principal articles of merchandise exchanged in 1914-15 and 1915-16 were as follows (in £ sterling, 000 omitted):—

Imports.	1914-5.	1915-6.
Apparel and Textiles.....	15,751	18,999
Metals and Machinery.....	15,200	14,984
Drugs, Chemicals, and Fertilizers	2,426	3,001
Timber	2,565	2,108
Paper and Stationery.....	2,746	2,961
Bags and Sacks	1,542	1,983
Oils (in bulk).....	2,100	2,215
Sugar	208	1,894
Tea	1,528	1,940
Spirits	1,291	1,149
Arms, Ammunition, and Explosives	658	797
Tobacco	902	969

Exports.	1914-5.	1915-6.
Wool	22,102	26,854
Wheat	859	7,998
Skins and Hides	3,522	2,429
Butter	2,659	1,118
Copper Matte, Ingots and Ore	2,302	3,591
Zinc Concentrates	613	1,311
Tallow	1,571	444
Mutton and Lamb	3,414	770
Flour	509	1,739
Timber	795	396
Coal	721	508
Lead (Pig and Matte)	2,009	3,194
Beef	4,990	2,176
Tin (Ingots)	226	377

* Goods transferred from one State to another for transshipment to an overseas country are counted as an export from the State whence they were finally despatched from the Commonwealth; thus, much of the produce of Queensland and Tasmania are credited in the export returns to New South Wales and Victoria.

COMMUNICATIONS.

Railways.—The total length of Government (and private) railways open at June 30, 1916, is stated as follows, the private lines being included in the totals and shown in parentheses—

State.	Miles open.
New South Wales	4,497 (304)
Victoria	4,153 (52)
Queensland.....	6,453 (1,485)
South Australia	3,000 (34)
Western Australia	4,707 (965)
Tasmania	758 (196)
Northern Territory	146 —

Total..... 23,774 (3,036)

The gross earnings of all Government lines in 1915-16 were £22,229,174, working expenses £16,249,387, and net earnings £5,979,787, being at the rate of 2s. per train mile, and representing a return on the total cost (£205,167,000) of 2'91 per cent., as against 2'88 per cent. in 1914-15.

The great trans-continental railway from West to East, linking up Kalgoorlie in Western Australia with Port Augusta in Spencer's Gulf, was completed in 1917, and the first mail train made a successful run through on 22 October of that year.

Shipping.—The entrances and clearances of vessels engaged in overseas trade at the various Australian ports in the six years 1909-1915-16 were as follows (tonnage in brackets):—

Year.	Entered	Cleared.
1909.....	2,000 (4,361,194)	1,910 (4,155,557)
1910.....	1,958 (4,607,820)	2,060 (4,725,326)
1911.....	2,081 (4,993,220)	2,093 (4,991,581)
1912.....	2,035 (5,163,357)	2,017 (5,111,957)
1913.....	2,014 (5,371,531)	1,971 (5,230,417)
1914-15	1,568 (4,174,955)	1,643 (4,424,303)
1915-16	1,654 (4,269,484)	1,670 (4,268,838)

Of the vessels entered (1915-16), 1,210 were under the British flag (Australia, 337, of 552,782 tons; U.K., 691, of 2,661,946 tons; N.Z., 167, of 261,783 tons); and 444 under foreign flags (Dutch, 46, of 140,165 tons; French, 57, of 89,160 tons; Norwegian, 51, of 81,945 tons; United States, 177, of 198,902 tons; other foreign, 113, of 259,966 tons).

Posts and Telegraphs.—In year ended June 30, 1916, there were 8,565 post and receiving offices, dealing with 736,000,000 letters, &c.; there were 6,119 telegraph stations, with 133,500 miles of wire, transmitting and receiving 18,000,000 cable and telegrams in 1915-16. *Telephones* are highly organised and generally used.

TOWNS.

CAPITAL.—CANBERRA, in the Federal District, transferred to the Commonwealth by the State of New South Wales on Jan. 1, 1911, is to be laid out as the capital of the Commonwealth. Meanwhile the seat of Government is MELBOURNE.

There were 16 cities and towns with a population exceeding 20,000 at the Census of 1911, viz.:—

SYDNEY (N.S.W.)	764,600*
MELBOURNE (Vic.)	695,640*
ADELAIDE (S.A.)	201,899*
BRISBANE (Q.)	168,393*
PERTH (W.A.)	118,466*
Newcastle (N.S.W.).....	65,500
Ballarat (Vic.)	44,000
Bandigo (Vic.)	42,000
HOBART (Tas.)	39,632*

* Estimated Dec., 1916.

Broken Hill (N.S.W.)	31,000
Geelong (Vic.)	28,880
Charters Towers (Q.)	25,000
Launceston (Tas.)	24,536
Ipawich (Q.)	23,000
Rockhampton (Q.)	21,033
Fremantle (W.A.)	20,000

WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in general use are the same as those of the United Kingdom. The *Coinage* is of the same denomination as that of the U.K., and the gold coins are identical in appearance; silver 2s., 1s., 6d., and 3d. pieces and bronze 1d. and ½d., of the same weights and composition as those of the U.K., but of special design. The coinage of the U.K. of all denominations is legal tender.

States of the Commonwealth.

I. NEW SOUTH WALES.

The State of New South Wales is situated between the 29th and 37th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 310,378 square miles—i.e., more than six times the area of England, and nearly three times the size of Great Britain and Ireland.

POPULATION.

Census.	Males.	Females.	Total.
1881	410,811	339,614	749,825
1891	608,003	515,951	1,123,954
1901	710,005	644,841	1,354,846
1911	857,698	789,036	1,646,734

The estimated population on June 30, 1918, was 1,903,628, viz., 941,694 males and 961,934 females.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1910	45,533	16,191	14,294
1911	47,677	17,179	15,267
1912	51,993	18,886	16,664
1913	52,134	19,738	16,311
1914	53,615	18,777	17,353
1915	52,885	19,610	18,129
1916	52,075	19,854	18,320
1917	52,467	17,969	18,261

Vital Statistics—Rates per 1,000 of population in 1917:—Births, 28·02; Deaths, 9·60; Marriages, 7·08. Deaths under 1 year per 1,000 births, 57·6.

Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1911, numbering 734,000; Roman Catholics numbering 412,013. Presbyterians 182,911, and Methodists 151,274.

Payments to ministers ceased in 1862, and since that year they have been restricted to those then in receipt of the subvention. In 1917-18 the amount paid was only £108 to 1 recipient.

PHYSIOGRAPHY.

Relief.—The Eastern or coastal district is traversed by a mountain range known as the

Banking.—On June 30, 1916, the liabilities of the Banks of Issue throughout the Commonwealth amounted to £198,851,101, and the assets to £219,553,559. At the close of the financial year 1915-16 there were 2,420,477 depositors in the Savings Banks, the amount of the deposits being £96,998,645.

COMMONWEALTH OFFICES IN LONDON,
Australia House, Strand, W.C. 2.

High Commissioner, Rt. Hon. Andrew Fisher	£3,000
Official Secretary in Gt. Britain of the Commonwealth of Australia, E. A. Cox	1,000
Chief Clerk, Maj. A. W. Arkill	650
Military Adviser, Col. P. N. Buckley, R.A.E.	950
Naval Representative, Rear-Adm. Haworth-Booth, R.N., C.M.G.	950
Director, Publicity Dept., Lt. H. C. Smart	

Great Dividing Range, which is called locally the *Australian Alps* (or *Munlong Range*) in the south—the highest point being Mount Townsend or Kosciuszko (7,328 feet)—in the centre the *Blue Mountains*, and in the North the *Liverpool Range* and *New England Range*, the last-named continuing across the Queensland border.

Rivers.—The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, Shoalhaven, Clyde, Moruya, Tuross, Bega, Tumumba, and Snowy Rivers. The western portion of the country is not well watered, but immense reservoirs are being constructed for irrigation purposes, and many artesian bores have been laid down. The Darling and the Murrumbidgee, both tributaries of the Murray, which divides the State from Victoria, are navigable for part of the year only.

Climate.—The climate is dry and very healthy. At the capital the average mean shade temperature is 64°; the mean temperature in the shade for the north coast is 69°, Hunter and Manning district 64·8°, south coast 59·8°, northern tableland 59·6°, central tableland 58·6°, southern tableland 54·2°, north-western slope 66·5°, central western slope 63·9°, south-western slope 61·2°, north-western plain 68·9°, central western plain 66·4°, Riverina district 62·2°, and western division 66·2°.

GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

GOVERNOR.

Governor of New South Wales, His Excellency Sir Walter Edward Davidson, K.C.M.G., born 1859 (1917) £5,000
 Private Secretary, Capt. Stanham.
 Aide-D.C., Capt. Saltmarsh.
 Official Secretary, H. S. C. Budge.
 Lieutenant-Governor, Hon. Sir William Portus Cullen, K.C.M.G., LL.D., born 1855.

EXECUTIVE COUNCIL.

Salaries of Ministers of the Crown, £11,040.
President, H.E. the Governor.

Premier and Treasurer, Hon. W. A. Holman.
Chief Secretary, Hon. G. W. Fuller.
Attorney-General, Hon. D. R. Hall.

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. Sir C. G. Wade, K.C., 26 and 27 Cockspur Street, S.W. (and allowance, £500) £1,850
Secretary, Thomas George White 600
Consulting and Inspecting Engineer, W. Shellshear, M.I.C.E. 1,100
Immigration and Publicity Officer, John S. Cormack 650

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. The *Legislative Council* consists of not less than 21 members (70 in October, 1918), appointed by the Crown for life. The *Legislative Assembly* consists of 90 members, representing 90 electoral districts. Each member of the Legislative Assembly receives £500 per annum, and members of both Houses travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. With few exceptions all natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904. Naturalised British subjects of enemy origin have been disfranchised for the period of the war and for six months thereafter. At the last General Election in March, 1917, of 525,682 males on the roll in contested electorates, 328,598, or 62.5 per cent., voted, and, similarly, of 487,585 females on the roll, 293,418, or 60.2 per cent., voted.

President of the Legislative Council, Hon. F. Flowers £750
Chairman of Committees, Hon. B. B. O'Connor, LL.B. 470
Clerk of the Parliaments, W. L. S. Cooper 740

Speaker, Legislative Assembly, Hon. John

Jacob Cohen £2,000

Chairman of Committees, D. Levy 740

Clerk of Senate, A. R. Blount, C.M.G.

Clerk of Assembly, W. S. Mowle 900

Librarian, Francis Walsh 600

THE JUDICATURE.

The judicial system includes Magistrates' Courts and Quarter Sessions, Industrial Court, and a Supreme Court with a Chief Justice and 6 Puisne Judges. Trial by jury has been in force since 1824.

Chief Justice, Hon. Sir W. P. Cullen, K.C.M.G., LL.D. £3,500

Puisne Judges, Mr. Justice P. W. Street (Ch. Judge in Equity), Mr. Justice Robert D. Pring, Mr. Justice R. M. Sly, Mr. Justice Alexander Gordon (Disorce), Mr. Justice D. G. Ferguson, Mr. Justice J. M. Harvey (Bankruptcy and Probate). Judges of Industrial Arbitration Court, Mr. Justice C. G. Heydon, Mr. Justice W. Edmunds, each £2,500; Judge F. Rolin, Judge H. R. Curlewis each 1,500

Crown Solicitor, J. V. Tillett 1,640

EDUCATION.

Education.—Education is non-sectarian, compulsory, and free, school fees in State, primary, and superior schools having been abolished in October, 1906. The total enrolment in 1917 in 3,412 State schools was 303,548, and the average daily attendance 220,037. The State expenditure on Education, Science, and Art was £2,108,196. The University of Sydney, with which 4 colleges are affiliated, including the Women's College, was incorporated in 1851. In addition to the State schools there were, in 1916, 701 private colleges and schools, with 67,704 scholars, exclusive of many business colleges and shorthand schools.

FINANCE.

The Revenue and Expenditure and Public Debt of New South Wales for the six years ended June 30, 1918, are stated as under:—

Year.	Revenue, including Advances repaid.	Expenditure, including Transfers and Advances.	Public Debt.
	£	£	£
1913	16,260,456	17,488,836	106,170,747
1914	18,438,229	18,065,190	116,695,031
1915	18,946,227	18,516,179	127,735,405
1916	19,703,518	19,553,927	130,514,018
1917	20,537,835	20,806,633	138,138,347
1918	21,577,230	21,553,405	152,584,693

To the total revenue during 1917-18, Railways and Tramways contributed £10,821,648; and other Business Undertakings, £1,634,587. A sum of £2,317,763—equal to 2s. per head of the population—was returned to the State by the Commonwealth Government, in lieu of Customs and Excise revenue collected by the latter. Revenue from Taxation amounted to £3,860,500. Included in the total Expenditure were the following:—Interest upon Public Debt, £1,089,654 (exclusive of £4,412,701 charged to Business Undertakings); Public Instruction, £1,955,267; Hospitals and Charities, £941,349; Business Undertakings, £12,534,567 (including interest, £4,412,701).

Banking, &c.—There were (June 30, 1918) 18 banks within N.S.W., with total assets, £100,674,174, including advances, £73,013,430;

coin, bullion, and Australian Government Notes, £22,498,864; and liabilities, £84,743,042, including deposits, £82,252,003. The savings bank deposits on June 30, 1918, amounted to £43,039,000, representing 920,337 depositors.

Shipping.—Excluding coastal trade, 2,602 vessels entered ports of N.S.W. during 1916-17, the net tonnage being 5,803,451; the clearances were 2,613 vessels of 5,802,683 net tonnage. Sydney is the chief port. In 1917 the shipping entries, including coastal, were 8,453 vessels of 6,725,828 net tonnage. The dock accommodation includes four large graving docks, five floating docks, and six patent slips.

Railways.—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 145 miles, are controlled by the State. At June 30, 1918, the mileage of the State railways open for traffic was 4,679, the capital cost amounted to £75,050,452, and the net earnings for the year 1917-18 to £3,014,443, or 3½d. per train mile. There were also 225 miles of State tramways, the capital cost being £8,470,091, and the net earnings £389,381, or 4½d. per tram mile.

The population to each mile of railway line open was 392, and the area 64 square miles.

Posts and Telegraphs.—The postal, telegraphic, and telephonic services are administered by the Federal Government. In 1916-17 there were 2,040 post offices in New South Wales. The postal matter carried included 259,186,000 letters, postcards, and registered articles, 68,547,000 newspapers, 31,137,000 packets and parcels, and 7,152,913 telegrams, including 446,427 cablegrams, were received and despatched.

TRADE.

The overseas imports into New South Wales during 1916-17 were valued at £32,742,297, or £17 11s. 5d. per capita, and the overseas exports at £42,068,333, or £22 11s. 6d. per capita.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of the State; 6,523,722 acres are under cultivation, producing during the year ended June 30, 1917, 36,598,000 bushels of wheat, 4,333,480 bushels of maize, 1,084,980 bushels of oats, besides other kinds of grain, with 45,331 tons of potatoes and 921 cwt. of tobacco. Sugar-cane to the extent of 143,558 tons was produced; and 628,950 gallons of wine, and 1,559,835 bushels of oranges, lemons, &c. (all citrus fruit); almost every kind of fruit and vegetable may be grown. The area sown for wheat for the year 1916-17 was 3,806,604 acres, which yielded 36,598,000 bushels. The total extent of land alienated and in process of alienation on June 30, 1917, was 60,242,766 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 116,171,750 acres.

Live Stock.—The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, were introduced in 1813. On June 30, 1917, there were 733,791 horses, 854,632 dairy cows, 1,911,311 all other cattle, 36,196,383 sheep, and 259,763 pigs. In 1916-17, 270,525,000 lb. (stated as in the grease) of wool were produced, in addition to 379,660 cwt. of tallow, 79,364,471 lb. butter, 7,820,239 lb. cheese, and 15,788,156 lb. bacon and hams. During 1916-17 there were 142,169 persons permanently employed in rural occupations, 116,092 being males, and 26,077 females.

Minerals.—The goldfields were discovered in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, alunite, wolfram, scheelite, molybdenite, cobalt, and kerosene shale, diamonds, rubies, opals, and other precious stones are also found. The total value of minerals raised during 1917 was £12,564,473, coal accounting for £4,422,740, silver, silver lead and ore £4,493,565 and gold £349,938. The mining industry gave employment to 32,817 miners during the year.

Manufactures and Works.—In 1916-17 there were 5,356 manufactories and works; 117,997 hands were employed, 88,910 being males and 29,087 females, the amount of £14,381,309 being paid in salaries and wages. Male workers received on an average £149 6s. 11d., and females £57 9s. 10d. The capital value of land and buildings amounted to £18,920,000, and of machinery and plant £20,364,000. The machinery in use represented 236,830 h.p., including steam, 159,712 h.p., and electric, 61,702 h.p. The value of goods manufactured and of work done was £85,944,000, including materials used, £57,045,000, and fuel and power, £1,766,000; the production, i.e., value added to raw materials, was £27,133,000.

The principal products of the factories during 1916-17 were:—

	Quantity.	Value.
Saw-milling, native timber	125,243,000 sup. ft.	£949,306
Racon	13,590,366 lb.	641,051
Butter	75,064,384 lb.	4,859,482
Biscuits	28,604,495 lb.	779,407
Jams and preserves	38,250,740 lb.	731,168
Flour	331,233 tons	3,588,212
Refined sugar (cane)	2,319,900 cwt.	2,784,518
Beer and stout (quantity on which excise was paid)	21,851,727 gal.	2,042,309
Tobacco, cigars, and cigarettes	7,904,430 lb.	1,977,250
Boots and shoes, &c.	6,703,691 pairs	2,186,743
Graz	6,399,688,000 cub. ft.	1,088,421
Electric light and power	246,704,000 units	1,282,775
Scoured wool	35,402,589 lb.	3,516,136
Wool tops and noils	5,759,162 lb.	1,293,181
Leather	16,269,969 lb.	1,348,255

INDUSTRIAL ARBITRATION.

Matters relating to the conditions of industrial employment in New South Wales are determined by a Court of Industrial Arbitration, which is empowered to make awards fixing the lowest rates of wages, the hours and times of work, rates of payment for overtime, &c., and the proportionate number of apprentices and improvers in any industry, and granting preference of employment to members of any trade or industrial union of employees. Industrial agreements between employers and employees may be enforced as an award. Awards were until recently made by subsidiary tribunals known as Wages or Industrial Boards, constituted for each industry, but their functions are now being absorbed by Judges of the Industrial Arbitration Court. At June 30, 1918, there were 276 awards and 86 industrial agreements in force. The industrial laws provide for the registration of industrial unions of employers and employees, and for mediation in industrial disputes. Under certain conditions strikes may be recognised as lawful, except strikes by Government employees, or by persons engaged in military or naval contracts, or by employees in an industry of which the conditions are regulated by award or industrial agreement; but when an award has been in operation for twelve months, the em-

ployees may decide by secret ballot to withdraw from its conditions.

When a strike occurs or is contemplated, the Minister for Labour may order a secret ballot to ascertain if the majority of the employees favour a strike.

A "Board of Trade of New South Wales" has been constituted in 1918 with extensive powers regarding industrial matters, one of its functions being to declare annually the rate of living wage for adult employees of each sex, to be used as a standard by the Court in determining rates of wages.

Industrial matters which extend beyond the limits of one State are determined by the Commonwealth Court of Arbitration and Conciliation.

LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,216 square miles in the sparsely-populated western division, the State is divided into 185 municipalities and 136 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is almost wholly on the unimproved capital value of land, which in 1916 was £89,266,947 for municipalities and £105,697,791 for shires.

Revenue.

	Municipalities.	Shires.
1912	£1,727,205	£999,498
1913	1,979,559	836,511
1914	2,199,833	1,044,562
1915	2,316,018	1,064,888
1916	2,413,686	1,085,410

Expenditure.

	Municipalities.	Shires.
1912	£1,704,501	£933,325
1913	1,910,213	886,090
1914	2,055,742	996,017
1915	2,252,785	1,017,773
1916	2,288,375	1,071,688

TOWNS.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of over 200 miles, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The city extends four miles north and south by three miles east and west; and contains 134½ miles of streets, and a population of 106,000 (Dec., 1917); or, including suburbs, 2,172 miles of streets, and a population (Dec., 1917) of 777,300. In addition to the Government buildings, there are the branch Royal Mint, the University, National Art Gallery, museums, free public libraries, observatory, two cathedrals, and numerous churches. The parks within the metropolitan area are 4,714 acres in extent, in addition to which the National Park measures 33,747 acres and Ku-ring-gai Chase 35,322 acres. Other towns are Newcastle (with incorporated suburbs), 59,600; Broken Hill, 27,000; Bathurst, 8,450; Goulburn, 10,000; Granville, 11,350; Parramatta, 12,250; Lismore, 8,350; Maitland, E. and W., 11,700; Grafton and South Grafton, 6,350; Albury, 6,400; Tamworth, 7,750; Lithgow, 10,400; Wagga

Wagga, 7,000; Orange, 7,000; Auburn, 11,050; and Lidcombe, 8,100.

Approximate time in transmission of mails, 31 days.

DEPENDENCY.

LORD HOWE ISLAND (450 miles north-east of Sydney). Pop. (Census 1911), males 58, females 49, total 107. The affairs of the Island and the control of the Kentia Palm Seed Industry are vested in a Board of Control.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles, the entire area being 87,884 square miles.

POPULATION.

Year.	Males.	Females.	Total.
1910	603,720	597,350	1,201,070
1911	655,591	659,960	1,315,551
1912	685,895	689,186	1,375,081
1913	706,948	705,171	1,412,119
1914	712,594	718,073	1,430,667
1915	692,275	725,536	1,417,801
1916	666,931	732,848	1,399,779

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1911	33,044	15,217	11,088
1912	35,817	16,595	11,738
1913	35,970	15,474	11,324
1914	36,224	16,503	11,830
1915	35,009	15,823	12,832
1916	34,235	16,489	11,341

Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1911 numbered 451,087, "Protestants" 24,116, Presbyterians 234,553, Methodists 176,662, Baptists 31,244, Church of Christ 16,511, Independents 16,484, and Roman Catholics 286,433.

PHYSIOGRAPHY.

Relief.—The Australian Alps and the Great Dividing Range pass through the centre of the state, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys.

Rivers.—The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature over a period of 60 years was 57.4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for three nights in the year) below 32° F. The average number of days on which rain fell was 136, and the average yearly rainfall was 25.48 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of 12 members.

GOVERNOR.

Governor of the State of Victoria, Hon. Sir Arthur Lyulph Stanley, K.C.M.G. £5,000
 Private Sec., Hon. Albert N. Hood, C.M.G.
 Aide-de-Camp, Capt. N. C. P. Conant
 Lt.-Gov., Hon. Sir William Hill Irvine, K.C.M.G.

THE MINISTRY (31 March, 1918).

Premier, Minister of Labour and Attorney-General, Hon. H. S. W. Lawson.....
 Minister of Railways and Mines, Hon. S. Barnes.....
 Treasurer, Hon. W. M. McPherson.....
 Public Health, Hon. John Bowser.....
 Agriculture, D. S. Oman.....
 Crown Lands and Water Supply, Hon. F. G. Clarke.....
 Education & Forests, Hon. W. Hutchinson
 Honorary Ministers, Hons. W. Kendall,
 A. R. Robertson, John McWhae, H. J. M. Campbell.....
 Secretary to the Cabinet, A. A. Farthing...

HEADS OF DEPARTMENTS.

Public Serv. Commissioner, G. C. Morrison £1,000
 Auditor-General, F. H. Bruford..... 1,000
 Secretary to the Premier, F. T. Short..... 696
 Clerk Executive Council, F. W. Mabbott... 456
 Chief Secretary's Department, Under-Secretary, W. A. Callaway..... 1,000
 Under-Treasurer, M. A. Minogue..... 1,000
 Director of Education, F. Tate, I.S.O. 1,000
 Law Department, W. R. Anderson..... 900
 Registrar of the Supreme Court and Registrar of Titles and Master in Equity and Lunacy, H. A. Templeton..... 1,000
 Secretary Lands, J. M. Reed..... 900
 Secretary Mines, W. Dickson..... 900
 Chairman State Rivers and Water Supply Commission, W. Cattanach..... 1,500
 Director Agriculture, S. S. Cameron..... 900
 Secretary Public Works, E. T. Drake..... 900
 Pub. Health, Chairman, Dr. E. Robertson
 Secretary Labour, H. M. Murphy..... 800
 Hospitals for Insane—Inspector-General, Dr. W. E. Jones..... 1,500
 Victorian Railway Commissioners, E. C. Norman (chairman), £2,500; and C. B. Jones..... 1,750
 Chief Engineer for Railway Construction, M. E. Kernot..... 1,000
 Secretary, G. H. Sutton..... 800
 Govt. Statist, A. M. Laughton..... 650
 Penal and Gaols Inspector-General, J. W. K. Freeman..... 700
 Industrial Schools Secretary & Inspector, J. Molloy..... 576
 Chief Commr. of Police, A. G. Sainsbury... 900

 Astronomer, J. M. Baldwin (acting)..... 420
 Botanist, Professor A. J. Ewart, D.Sc. 425
 Curator of Estates of Deceased Persons, W. B. House..... 750
 Parliamentary Draftsman, J. T. Collins, M.A. 1,200

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. Sir Peter

McBride, Melbourne Place, Strand, W.C.

Secretary, H. G. W. Neale £456

Melbourne, distant 11,267 miles; transit, 32 to

37 days.

THE LEGISLATURE.

Parliament consists of two Houses—the *Legislative Council* of 34 members, elected for the 17 Provinces for 6 years, one-half retiring every 3 years, and the *Legislative Assembly* of 65 members, elected for a maximum duration of 3 years, for the 65 electoral districts, by universal adult suffrage. The electors for the Council number 308,339, and those for the Assembly 818,881.

President of the Legislative Council, Hon.

Sir John Mark Davies, K.C.M.G. £750

Speaker of the Legislative Assembly, Hon.

Sir Frank Madden 1,000

THE JUDICATURE.

There are magistrates' courts, and general sessions and county courts; and a Supreme Court with a Chief Justice and four Puisne Judges.

Chief Justice, Hon. Sir William Hill Irvine, K.C.M.G. £3,500

Puisne Judges, Their Honours Sir H. E. A.

Hodges, Joseph H. Hood each 3,000

L. F. E. Cussen 2,500

County Court Judges: J. G. Eagleson,

W. H. Moule, J. S. Wasley, and H. C.

Winneke each 1,500

Income Tax Commissioner, R. M. Weldon 696

Deputy Commissioner of Land Tax, M.

Murphy 624

Crown Prosecutors, C. J. Z. Woinarski,

£1,000; J. A. Gurner, £700; S. Leon ... 700

Crown Solicitor, E. J. D. Guinness 1,100

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 257,726 children on the registers in 1916, the average attendance being about 63 per cent. *Secondary Education* is principally under private control, 57,400 pupils being in attendance at the 495 schools in 1916. There is a State-aided *University* at Melbourne, with three affiliated colleges (Trinity, Ormond, and Queen's) and a *School of Mines* at Ballarat.

FINANCE.

The revenue and expenditure and State Debt for the five years ended June 30, 1913-1918, are given as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1913	10,508,945	10,479,741	62,776,724
1914	10,958,037	10,944,718	66,130,726
1915	10,529,017	11,706,968	72,183,927
1916	11,470,875	11,683,363	75,504,562
1918	12,361,235	12,141,080	

Banking, &c.—There were (Dec. 31, 1916) 17 banks, with total assets £63,435,125, within the State, and liabilities £60,195,632. The savings bank deposits at June 30, 1917, amounted to £28,339,417.

PRODUCTION AND INDUSTRY.

Agriculture.—Agriculture has of late years much improved, wheat and oats chiefly being

cultivated; the dairy industry has also made marked progress. Of the 6,750,894 acres under cultivation in 1916-17, 3,125,692 were wheat crops and 441,598 oats, and 897,186 acres were cut for hay. In 1916-17, 1,302,660 gallons of wine were produced.

Live Stock.—There were in 1916, 488,086 milch cows, producing 59,125,051 lb. of butter and 5,796,092 lb. of cheese; and 687,012 other cattle, 12,576,587 sheep, 254,436 pigs, and 514,403 horses.

Minerals.—Victoria is one of the leading gold-producing States in Australia. From the discovery of gold in 1851 to the end of the year 1916, the quantity raised—74,587,975 oz.—amounted in value to £297,794,151, the amount produced in 1916 being 276,188 oz. The value of other minerals raised to the end of 1916, consisting principally of tin, copper, coal, and antimony, is estimated at about £10,271,068 (including building stone, &c., £4,976,588).

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (5,413 factories, &c., employing 113,834 hands in 1915) are mainly for home consumption. In 1916-17 the chief exports overseas were: Wool, £8,149,212; lead, £501,775; butter, £3,189,025; wheat, flour and biscuit, £5,470,592; leather, £439,706; skins and hides, £548,736; tallow, £246,091; live stock, £84,781; jams and jellies, £371,753; and milk and cream, £311,213. A trade is also springing up in preserved and frozen meats, the value of the exports (excluding bacon and hams) being £696,209 in 1916-17. The principal overseas imports of the State in 1916-17 were:—Iron and steel, £801,045; machines and machinery, £1,152,048; metals and metal manufactures, £956,771; silks, velvets, &c., £1,175,986; apparel and attire, £1,222,945; bags and sacks, £756,624; tea, £617,485; cottons and linens, £2,272,070; woollens, £1,233,799; and timber, £369,487.

TOWNS.

MELBOURNE, the chief city and seat of federal government, is an episcopal see, and is distinguished for its University, museum, Mint, public gardens, observatory, public library, hospital, its churches and other institutions. With its suburbs it contained on December 31, 1916, a population of 695,640 inhabitants. Other towns are Ballarat, 40,691; Bendigo (Sandhurst), 35,790; Geelong, 34,524; Castlemaine, 7,412; Warrnambool, 7,400; Maryborough, 5,000; Hamilton, 4,700; Mildura, 5,200; and Stawell, 4,410.

Transmission of mails, approximate, 30 days.

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 120° and 142° E. long., the total area being 380,070 sq. miles.

POPULATION.

Year.	Males.	Females.	Total.
1911	207,358	201,200	408,558
1913	221,605	218,442	440,047
1914	220,550	221,140	441,690
1915	212,080	226,205	438,285
1916	201,998	230,711	432,709
1917	201,433	234,781	436,214

NOTE.—Excluding about 30,000 on Active Service.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1913	12,627	4,693	4,094
1914	12,905	4,713	4,009
1915	11,798	4,694	3,965
1916	11,857	5,077	3,602
1917	11,326	4,365	3,252

Birth rate 26·21, death rate 10·10, marriage rate 7·52 per 1,000 of population. Infantile mortality, 53·68 per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1911, the persons belonging to the principal religious denominations were as follows:—Church of England, 113,781; Methodists, 100,402; Congregationalists, 13,357; Baptists, 21,863; Lutherans, 26,681; Roman Catholics, 50,964; Presbyterians, 22,567; and Church of Christ, 9,324.

PHYSIOGRAPHY.

Relief.—The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude (the northern boundary since the transfer to the Commonwealth of the Northern Territory), is also unpromising in comparison with the fertile land that surrounds the hill country of the east.

Rivers.—Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 62°, the winter temperature (July–August) averaging 53°, and the summer (November–March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight.

The average annual rainfall at Adelaide, derived from 78 years' record, is 30·95 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland.

In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

GOVERNOR.

Governor of South Australia, His Excellency

Lieut.-Col. Sir Henry Lionel Galway,

K.C.M.G., D.S.O., born 1859 (1914) £4,000

Private Sec., Legh Winter.

Sec. and Registrar of Stock, J. B. Whiting	525
Trade Commissioner, C. F. G. McCann	650
Adelaide, 11,100 miles; transit, 29 days.	

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 94,971 (23,461 women) in 1918, those for the Assembly numbering 258,712 (132,043 women).

President of the Legislative Council, Hon. Sir J. L. Stirling, K.C.M.G.	£600
Speaker of the House of Assembly, Hon. F. W. Coneybeer	600

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and two Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 60 annually, which is at the rate of 1 in every 7,000 of the population.

Chief Justice and Judge of Vice-Admiralty, Hon. Sir G. J. R. Murray, K.C.M.G., B.A., LL.B., K.C.	£2,000
Second Judge, Hon. Sir J. Hannah Gordon	1,700
Third Judge, Hon. A. Buchanan	1,700

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free; there are 885 State schools, with 2,214 teachers and 70,959 scholars; the expenditure in 1917-18 was £373,656. The Government grants Exhibitions and scholarships, carrying the holders to higher schools and the University. Private schools number 169, with 703 teachers and 12,011 scholars. There is an endowed *University* at Adelaide, founded in 1874, with 400 undergraduates, and 500 other students; all classes are open to women. A State School of Mines and Industries has also been established with branches at 5 country centres, and technical education is also provided. The public library, museum, art gallery and local institutes are supported or assisted by the State.

FINANCE.

The Revenue and Expenditure and Public Debt for the five years ended June 30, 1914-1918, are stated as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1914	4,822,766	4,604,129	33,564,332
1915	3,973,310	4,662,421	35,108,123
1916	4,359,967	4,741,376	37,743,289
1917	4,874,603	5,190,453	39,364,280
1918	5,526,226	5,500,419	40,621,480

Most of the revenue is derived from inland revenue, railways, and territorial receipts, while most of the expenditure is on account of public works and railways, and interest on public debt.

Banking.—There are 8 banking institutions in Adelaide, in addition to the Commonwealth Government Bank, with 257 branches and agencies, and £23,427,706 authorised capital, having a total liability of £19,297,914 and assets £17,217,418 in June, 1918. The Savings Banks on June 30, 1918, had 337,708 depositors with £12,897,480 to their credit. About 77 per cent. of the population have Savings Bank accounts. The total banking deposits, £31,491,871, averages £72 per head of population.

PRODUCTION AND INDUSTRY.

Agriculture.—Of the total area about two-thirds are farmed or grazed, and 5,148,440 acres cultivated—under wheat 2,778,357 acres, hay 483,040; oats 151,609, barley 103,627, and potatoes 4,737 acres, with 1,304,936 acres lying fallow. During the last ten seasons the quantity of wheat produced has averaged 24,000,000 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable. There were 29,177 acres of vines, with an average annual production of about 3,250,000 gallons of wine; 42,000 cwt. of currants, and 35,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock.—There were 6,228,519 sheep in 1917, cattle number 313,045, horses 262,840, pigs 110,365, and goats 9,315.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total mineral output being valued at £1,460,674 in 1917. Over £31,000,000 of copper have been produced since the foundation of the State.

Manufactures.—In 1917 there were 1,286 factories, employing 26,010 hands, the gross value of the output being £17,392,352, and the wages paid £3,094,094. Plant, machinery, land, and buildings were valued at £6,775,499. A Department of Chemistry has been established for the purpose of fostering new industries by the utilisation of products at hand, and there is also an Advisory Board of Science and Industry.

Value of Production, 1916-17.—Crops, total value, £13,838,432, average per head, £32 2s. 2d.; (cereals, hay, &c., £12,791,983; orchards, vineyards and gardens, £1,046,449); manufactures, £6,060,538; wool, £2,110,354; minerals, £1,460,674; dairying and poultry, £1,754,632; fisheries, £240,500.

Exports of Produce.—A considerable quantity of the produce of South Australia is exported to Great Britain and other overseas countries, the average annual value being about £16,000,000.

The main items are wheat, flour, wool, meats, skins and hides, butter, tallow, leather, minerals, wines, fruits (fresh and dried), manures.

Communication.—There are 3,300 miles of railway in South Australia, 112 miles of electric tramways, 44,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. There are 830 post offices in the State, which transmit annually 40,000,000 letters, 10,000,000 newspapers, 5,000,000 packets and parcels, and also 1,700,000 telegrams.

Ships entered and cleared 1916-17, 1,600. The larger part of the trade is with the U.K., and other British possessions, besides the U.S., France, Italy, Japan and Russia. The export trade is equal to about £35 per inhabitant.

TOWNS.

ADELAIDE, the chief city and capital, population (1917) 225,317, inclusive of suburbs. Other towns are Moonta (4,000), Kadina (3,000), Wallaroo (5,500), Port Pirie (11,500), on the east and Port Augusta (3,000) on the west of Spencer Gulf, and Kapunda (2,500), Gawler (4,500), and Peterborough (2,500) on the line from Adelaide to the north, Strathalbyn (1,200) in the south, and Mt. Gambier (4,500) in the south-east.

Transmission of mails, approximate, 29 days.

IV.—QUEENSLAND.

This State, situated in lat. 10° $40'$ — 29° S. and long. 138° — 153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (i.e., equal to more than $5\frac{1}{2}$ times the area of the United Kingdom).

POPULATION.

Census.	Males.	Females.	Total.
1881	125,325	88,200	213,525
1891	223,779	169,939	393,718
1901	277,003	221,126	498,129
1911	329,506	276,307	605,813

The estimated population on Dec. 31, 1916, was 669,467.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1911	16,991	6,544	5,169
1912	18,758	6,921	5,628
1913	19,747	6,783	5,662
1914	19,883	6,731	5,895
1915	20,165	7,360	6,141
1916	18,916	7,514	5,208

Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1911 there were 212,702 Church of England, 137,086 Roman Catholics, 75,560 Presbyterians, 59,200 Methodists, 24,235 Lutherans, 13,715 Baptists, and 47,394 other Christians, with 5,518 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY.

Relief.—The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Kirby's Range divides the land into a northern and southern watershed.

Rivers.—The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the average temperature for 1916 was 68° , the maximum and minimum shade temperatures being 96° 8' and 39° 5'; mean barometer, 29.958. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1916 was 52.781 inches, and there were 131 wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 9 members.

GOVERNOR.

Governor of Queensland, His Excellency Sir Hamilton John Gould-Adams, G.C.M.G., C.B., born 1858 (1915)	£3,000
Private Sec., T. B. A. Thatcher	300
Aide-de-Camp, Capt. W. F. U. Cozens	300
Lieutenant-Governor; Hon. Sir Pope A. Cooper, K.C.M.G., M.A., C.J., bn. 1846 (1917).	
President of Legislative Council, Hon. W. Hamilton	1,000

EXECUTIVE COUNCIL.

(H.E. the Governor presides.)

Premier, Chief Sec., and Vice-President, Hon. T. J. Ryan	£1,300
Attorney-General, Hon. T. J. Ryan	
Treasurer and Secretary for Public Works, Hon. E. G. Theodore	1,000
Home Secretary, Hon. John Huxham	1,000
Secretary for Railways, Hon. J. L. Pihelly	1,000
Secretary for Public Instruction, Hon. H. F. Hardacre	1,000
Secretary for Public Lands, Hon. J. H. Coyne	1,000
Secretary for Agriculture and Stock, Hon. William Lennion	1,000
Secretary for Mines, Hon. A. J. Jones, M.L.C.	1,000
Asst. Minister for Justice, Hon. — Gillies	
Clerk of the Council and Chief Clerk, Chief Secretary's Dept., E. H. Abell	500

UNDER-SECRETARIES, &c.

Chief Inspector of Machinery and Scaffolding, J. Henderson, M.I.M.E.	400
Chief Inspector of Factories and Shops, and Director of Labour, F. E. Walsh	350
Engineer for Harbours and Rivers, E. A. E. Cullen, M.Inst.C.E.	1,000
Hydraulic Engineer, John Hargreaves, M.S.E.	500
Surveyor-General, A. A. Spowers	750
Government Geologist, B. Dunstan	550
Registrar of Friendly Societies, R. Rendle	600
Medical Supt., Benevolent Asylum, J. H. Macarthur, M.B., M.S.	650
Director, State Children, G. A. Ferguson	430
Chief Protector of Aborigines, J. W. Bleakley	350
Comptroller-General of Prisons, C. E. de F. Pennefather	650
Govt. Analyst, J. B. Henderson, F.I.C.	630
Government Storekeeper, G. C. McLennan	500
Secretary, Public Service Board, V. H. B. Madsen, A.C.I.S., A.S.A.A., &c.	330

AGENT-GENERAL IN LONDON.

Agent-General in London, Lt.-Col. Sir T. B. Robinson, K.C.M.G., K.B.E., Marble Hall, 409-410 Strand, London, W.C.	£1,250
Secretary, P. J. Dillon	500

THE LEGISLATURE.

Parliament consists of two Houses: a *Legislative Council* of 37 members, nominated for life by the Crown, and a *Legislative Assembly* of 72 members, elected by universal adult suffrage. President of the *Legislative Council*, Hon.

W. Hamilton	£1,000
Speaker of the <i>Legislative Assembly</i> , Hon. William McCormack	1,000

THE JUDICATURE.

There is a Supreme Court, with a Chief Justice, and four Puisne Judges; District Courts, presided over by District Court Judges; and Inferior Courts at all the principal towns, presided over by Police Magistrates.

Chief Justice Supreme Court, The Hon. Sir Pope A. Cooper, M.A., K.C.M.G.	£2,500
Pres., Industrial Court, T. W. McCawley	2,000
Senior Puisne Judge, Hon. Patrick Real	2,000

Puisne Judges, C. E. Chubb, K.C. (Southern), L. O. Lukin (Central), W. A. B. Shand, M.A. (Northern) ... each	£2,000
District Court Judges, Allan W. Macnaughton (also £500 as Industrial Court Judge); Charles Jameson; Thomas O'Sullivan, K.C. each	1,000

EDUCATION.

Primary Education is compulsory, secular, and free. In 1916 there were 1,512 State schools and six High Schools in operation, with 4,017 teachers and an average daily attendance of 84,968 children; and 154 private and grammar schools, with an average attendance of 16,609. A State-aided University was established during 1910.

FINANCE.

The revenue, expenditure, and debt of Queensland for the six years ended June 30, 1912-17, are stated as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1912	*5,989,347	5,965,692	44,613,197
1913	*6,378,213	6,372,097	50,390,736
1914	*6,973,859	6,962,516	52,164,036
1915	*7,202,658	7,199,399	52,164,336
1916	*7,706,365	7,671,573	56,945,836
1917	*7,880,893	8,134,387	Not available.

Banking.—The banking deposits on Dec. 31, 1916, were £27,597,331, apart from the £11,740,750 (equal to an average of £54 18s. 8d. to each depositor) in the hands of the State Government Savings Bank, and Commonwealth Savings Bank £1,850,725.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 16,570,590 acres; under a system of deferred payment, 10,566,829 acres more are in process of alienation, and an additional area of 215,950,840 acres leased out for sheep and cattle runs, 64,773,601 acres for grazing farms and homesteads, 44,619,240 acres are held under occupation licence, 238,311 acres under gold-mining and mineral lease, 173,200 for special purposes, and 231,355 acres perpetual lease, and scrub selections 206,155 acres, leaving 75,709,879 practically unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pine-apples, grapes, bananas, coco-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1916, 176,973 tons of sugar were produced. The live stock in 1916 included 4,765,657 cattle, 15,524,293 sheep, 697,517 horses, and 129,733 pigs. Wool, meat, and butter are the principal products.

Forestry.—There are many varieties of fancy timber which are much utilised by cabinet-makers, &c.; among them may be mentioned "silky oak," largely used in furniture and office fittings; maple, a timber with a handsome grain and capable of taking a very high polish; "bean" is also much in demand for furniture; black walnut, penda, beech, crows' ash, quandong, bally gum, as well as many varieties of

* Including net amount received from Commonwealth on a per capita basis.

the eucalypt, pine, cedar, and sandalwood, the latter being mainly exported to China.

Minerals.—The total mineral output in 1916 was £4,021,007. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1916 was valued at £913,951, in 1913 at £1,128,768, and in 1912 at £1,477,979.

Commerce.—The chief articles of export overseas, the produce of the State, in 1915-6 were: Wool, £3,921,930; gold, £31,742; silver, £6,364; tin, £103,319; copper, £366,146; pearl and tortoise-shell, £26,815; meat, including extract, and bacon, hams, and pork, £2,766,324; green and preserved fruit, £6,033; sugar, £112; hides and skins, £243,581; marsupial skins, £30,153; tallow, £160,861; live stock, £101,551; and borderwise £995,593; butter, cheese, and milk, £141,118; timber, £11,315.

TOWNS.

CAPITAL, Brisbane. Population (1916), 168,393. The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (20,915), Maryborough (12,500), Townsville (17,300), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg (10,132). Other places of importance are Ipswich (18,574), Toowoomba (24,200), Charters Towers (17,298), Gympie (12,419), and Cairns, Mt. Morgan (12,023).

Transmission of mails, approximate, 32 days.

V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33'—43° 39' S. lat. and 144° 39'—148° 23' E. long., and contains an area of 26,215 square miles.

POPULATION.

Year.	Males.	Females.	Total.
1891	77,560	69,107	146,667
1901	89,624	82,851	172,475
1911	97,591	93,620	191,211
1914	103,390	97,826	201,216
1915	101,761	99,264	201,025

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1911	5,444	1,924	1,477
1912	5,853	2,057	1,506
1913	5,886	2,131	1,620
1914	6,017	1,918	1,543
1915	5,845	2,015	1,600
1916	5,642	2,056	1,443

Religion.

All religions are free. In 1911 there were 88,000 members of the Church of England, 29,000 Roman Catholics, 25,000 Methodists, 16,000 Presbyterians, and 11,000 Independents and Baptists.

PHYSIOGRAPHY.

The surface of the country is generally undulating forest land, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to

European constitutions, and the hot winds of Australia do not reach the Island. At Hobart in 1915 the mean annual temperature was 54° 2', the mean summer temperature being 61° 7', and that of winter 46° 7'. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall is about 25 inches.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. The executive authority is vested in a Governor (appointed by the Crown), aided by a Council of responsible Ministers.

GOVERNOR.

Governor of Tasmania, His Excellency Rt. Hon. Sir Francis Alexander Newdegate-Newdegate, K.C.M.G., born 1862 (1917) £2,750
Private Sec., Major B. Kerr-Pearse
Lieut.-Governor (vacant).

EXECUTIVE COUNCIL.

Premier, Chief Sec., and Education, Hon. W. H. Lee £950
Treasurer and Minister of Mines, Hon. Sir Neil Elliott Lewis, K.C.M.G. 750
Att. Gen. and Railways, Hon. W. B. Propsting, C.M.G. 750
Land, Works, &c., Hon. J. B. Hayes 750

UNDER-SECRETARIES, &c.

Under-Secretary, D'Arcy Addison 450
Under-Treasurer, E. Prettyman 500
Auditor-General, J. E. Bennison 550
Registrar-General, R. M. Johnston, I.S.O. 600
Commissioner of Taxes, H. E. Downie 550
Do., Railways, G. W. Smith 1,200
Director of Education, W. T. McCoy 600
Surveyor-General and Secretary for Lands, E. A. Counsel 550
Commissioner of Police, J. E. C. Lord 475
Chief Health Officer, A. H. Clarke (actg.) 600
Government Printer, J. Vail 500
Director of Agriculture, A. H. Benson 500
Engineer-in-Chief, T. W. Fowler, M.I.C.E. 800
Govt. Statistician, R. M. Johnston, I.S.O.
Secretary for Mines, W. H. Wallace 475

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. Sir John McCall, M.D., LL.D., 56 Victoria St., S.W. Secretary, Herbert W. Ely £360

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years; and a *House of Assembly* of 30 members, elected for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 12 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon. Tetley Gant, C.M.G. £350
Speaker of House of Assembly, Hon. J. W. Evans 550

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.
Chief Justice, Hon. Sir H. Nicholls, C.M.G. £1,500
Puisne Judges, Hons. N. K. Ewing; H. Crisp each 1,800

Solicitor-General, L. E. Chambers.....	£600
Registrar Supreme Court, P. S. Seager ...	550
Recorder of Titles, J. W. Whyte.....	600

EDUCATION.

Primary education is compulsory, secular, and free, there being 485 State schools in 1916, with 35,827 children on the registers. Secondary education is also provided by the State and by private efforts. There is a University at Hobart, and special schools at Hobart and Launceston.

FINANCE.

The revenue and expenditure and debt of Tasmania for the five years ended June 30, 1913-1917, are stated as follows:—

Year.	Revenue.	Expenditure.	Debt.
1913	£1,238,085	£1,162,514	£11,302,411
1914	1,154,095	1,219,149	12,265,012
1915	1,224,095	1,384,149	13,133,046
1916	1,376,493	1,340,711	14,671,640
1917	1,369,368	1,402,893	—

Banking.—In 1915 the banks of issue had total assets £4,943,583, and total liabilities £4,390,783. The savings bank deposits on 30 June, 1917, were £2,695,270.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres, on March 1, 1916, 270,526 acres were under crops and 654,072 under artificially sown grass; wheat, 27,789 acres; while 1,641,743 acres (exclusive of mineral land) were leased from the Crown principally for pastoral purposes, the terms of purchase being £1 an acre for cash, or £1 6s. 8d. in 14 yearly instalments. The live stock on March 31, 1917, included 179,360 cattle, 1,702,579 sheep, 53,033 pigs, and 41,422 horses. The wool clip in 1916 was estimated at 10,442,978 lb. Fruit of all kinds and of the finest quality is grown in abundance.

Forestry.—The forests of Tasmania abound in the most beautiful cabinet woods and the largest size timbers, adapted for every variety of purpose. In 1915 about 47,889,991 super ft., estimated at about £297,588, were cut by the saw mills.

Minerals.—There are gold, silver, tin, lead, and copper fields on the west coast; over 53,462 acres have been taken on mineral leases, and mines of both lode and stream tin are being worked in the north. The value of tin produced in 1916 was £12,319,363; of silver, £153,796; and of copper, £886,454; iron ore exists, and the value of gold produced in 1916 was £67,072. Coal of a good quality, and in easily accessible positions, is very generally distributed over the island.

TOWNS.

CAPITAL, Hobart. Population (1915), 39,948. Other towns are Launceston (pop. 24,703), Devonport, Zeehan, Ulverstone, Latrobe, Waratah, Westbury, Longford, Burnie, and Queens-town.

Transmission of mails, approximate, 31 days.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 110° E. long., the most westerly point being in 110° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

Physical Features.—Large portions of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or the Stirling Range (3,640 ft.) in the south-west. The greater part of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists of large areas of sand-dunes, varied by wide stretches of clayey soils. Long, straggling rivers, broken during the summer into a series of pools, cross the country as far inland as the hill-country extends, widening in many cases nearer the coast into large sea-estuaries. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about three-fourths is suitable for pastoral purposes, immense tracts having already been proved eminently so. Some 60,000 square miles at least are equally fitted for agricultural purposes, more especially for the production of wheat, wine, and fruit, considerable areas being already under cultivation. Gold, coal, and other minerals in abundance are found in many parts, and immense tracts of land are covered with forests of great commercial value.

POPULATION.

Year.	Males.	Females.	Total.
1913	180,747	139,937	320,684
1914	179,188	143,830	323,018
1915	171,304	146,712	318,016
1916	159,998	148,808	308,806
1917	158,701	150,722	309,423

The apparent decrease in the male population since 1914 exists, of course, only in a technical sense, since it is mainly due to enlistment of volunteers for the war. From the inception of the recruiting movement to September, 1918, a total number of 32,424 men enlisted in the State, those returned numbering 6,031. The eventual repatriation of the soldiers still at the front is a matter receiving constant consideration. Although this may for some little time even after the war stem the tide of immigration by crowding the avenues of occupation, this cannot be for long in view of the unlimited scope a country like Western Australia offers for further settlement. It is therefore confidently expected that shortly after the conclusion of the present world struggle a better knowledge of the great resources of this as yet very meagrely peopled part of the Empire will attract large numbers of suitable settlers from Great Britain and other populous countries, particularly as it is the undoubted intention of the Western Australian Government to offer every inducement to the *bona fide* immigrant.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1912	8,689	3,335	2,524
1913	9,218	2,934	2,572
1914	9,204	3,043	2,660
1915	9,017	2,992	2,581
1916	8,563	3,085	2,365
1917	7,882	2,769	1,621

Religions.

There is no State aid to religions. At the Census of 1911 there were 109,435 Church of England, 56,616 Roman Catholics, 34,348 Methodists, and 26,687 Presbyterians.

PHYSIOGRAPHY.

The coastal regions of the west and of the north are undulating, with an interior slope to the central desert of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea.

Climate.—The average temperature of Perth (lat. 32° S.) for the past 21 years was 64°, while the mean for the barometer for 33 years was 30.02 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1910 was 37.02, during 1911 23.38, during 1912 27.85, during 1913 38.28, during 1914 20.21, during 1915 43.61, during 1916 35.16, and during 1917 45.64; the average for the past 42 years being 33.53.

The climate is one of the most temperate in the world, especially in the south-western portion, where excessive cold is never and excessive heat very rarely known. The summer heat, which is mostly dry, with hardly any rainfall, is during the greater part of the hot season relieved by cool sea-breezes in the afternoon. The winters are rainy, but with occasional dry spells of perfect weather.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1911, under which the Executive is vested in a Governor appointed by the Crown and aided by a Council of Ministers.

GOVERNOR.

Governor of Western Australia, His Excellency Rt. Hon. Sir William Grey Ellison-Macartney, P.C., K.C.M.G., born 1852 (1917) £4,000
Private Sec., Capt. Charles Lionel Grey Matthews-Matthews-Donaldson, Royal Irish Rifles (retired)
Aide-de-Camp, Capt. George Egbert Holland, Suffolk Regiment.
Hon. Assistant Secretary, Ernest Chase.
Lieut. Governor, Hon. Sir Edward A. Stone, K.C.M.G., born 1844 (1906).

EXECUTIVE COUNCIL (June, 1917).

Premier, Lands and Agriculture, Hon. H. B. Lefroy, C.M.O. £1,500
Col. Secretary and Minister for Education, Hon. H. P. Colebatch
Works & Trading Concerns, Hon. W. J. George
Justice, Industries and Forests, Hon. R. T. Robinson, K.C. 2,300
Treasurer, Hon. J. Gardiner

Railways and Mines, Hon. C. A. Hudson, £1,300
Without Portfolio, Hon. F. E. S. Wilmott, C. F. Baxter, and R. H. Underwood.

PERMANENT STAFF.

Public Service Commr., G. W. Simpson ... £850
Commr. of Railways, John T. Short
Engineer-in-Chief, J. Thompson, M.I.C.E. 1,300
Under-Secretary, F. D. North, C.M.G. 600
Under-Treas. and Cont.-Gen. of Accounts, E. A. Black, A.I.A.W.A. 708
Under-Sec. for Lands & Surveyor-General, H. S. King
" Works, C. A. Munt
" Mines, M. J. Calanchini ... 552
" Law Dept., H. G. Hampton 600
" Agriculture & Industries, H. C. Trethowan, A.I.A.W.A. 650
Solicitor-General, W. F. Sayer
Registrar, Supreme Court, F. A. Moseley 804
Chief Harbour-Master, Capt. F. Winzar ... 504
Commr. of Police, R. Connell
Chief Protector of Aborigines, A. O. Neville 432
Auditor-General, C. S. Toppin
Commissioner of Public Health, E. Atkinson, M.A., M.B., Ch.B., D.P.H. 852
Govt. Printer, F. W. Simpson
Registrar-General and Govt. Statistician, S. Bennett, F.I.A. Lond. 636
Director of Education, C. R. P. Andrews 750
Chief Mech. Engr., E. S. Hume, M.I.M.E. 1,000
Deputy Master Royal Mint, Capt. J. Campbell
Commissioner of Taxation, E. T. Owen ... 650
State Mining Engineer, A. Montgomery ... 804
Agricultural Commissioner (Wheat Belts), G. L. Sutton
Govt. Geologist, A. Gibb Maitland
Govt. Astronomer, H. B. Curlew, B.A., F.R.A.S. 504

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. J. D. Connolly, Offices, Savoy House, Strand, W.C. £1,500
Acting Secretary, Morrie Melville Moss ...
Inspecting Engineer, Ernest E. Salter

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

President of the Legislative Council, Hon. Sir H. Briggs
Speaker of the Legislative Assembly, Hon. George Taylor

THE JUDICATURE.

There are magistrates' courts and general and quarter sessions, and a Supreme Court with a Chief Justice and three Puisne Judges.
Chief Justice, Hon. Sir R. F. Macmillan £2,000
Puisne Judges, Hons. R. B. Burnside, J. Rooth, and J. A. Northmore

EDUCATION.

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie, a modern school, and a University. The total amount expended on education during

the year ended June 30, 1918, was £367,293 (including the University, £13,500).

It has been consistently the object of successive Governments to place within the reach of each child in the State every advantage of education, from the kindergarten to the university.

FINANCE.

The revenue and expenditure and debt of the State for the 5 years ended June 30, 1914-1918, are stated as under:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1914	5,205,343	5,340,754	34,420,181
1915	5,140,725	5,706,542	37,022,622
1916	5,356,978	5,705,201	39,139,676
1917	4,577,007	5,276,764	40,934,826
1918	4,662,536	5,328,279	42,304,001

Banking.—There were, including the Commonwealth Bank of Australia, 8 cheque-paying banks, formerly banks of issue, in the State on June 30, 1918, with total assets £13,521,559 and liabilities £20,141,250. The amount due to depositors in the State Savings Bank at June 30, 1918, was £4,997,766; in the School Savings Bank, £37,568; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1918, was £1,183,885. The combined amounts due to State Savings Bank depositors and State School Savings Bank depositors, on June 30, 1918, averaged £15.184 per head of the population, whilst the amount due to Commonwealth Savings Bank depositors on March 31, 1918, averaged £3.824 per head of the population.

War Funds.—The public contributions in Western Australia to a variety of War Funds up to June 30, 1918, totalled approximately £880,000, or nearly £3 per head of the population.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area (624,588,800 acres) 1,679,676 acres were under crops in 1917-1918, wheat for grain accounting for 1,249,762 acres; large areas of good wheat-growing soil exist in the southern districts. The live stock included 957,086 cattle, 6,384,191 sheep, 111,844 pigs, 33,786 goats, and 178,151 horses. There were about 3,000 acres of vineyards.

Land Settlement and Agriculture.—It is only a few years since the immense capabilities of the State as one of the world's potential great wheat-producers were more generally realised. In those few years the area under wheat for grain has increased annually by leaps and bounds, the acreage in 1908 being only 279,609, whilst in 1916 it was 1,734,127. From 1916, owing to the war, a temporary retrogression has set in, the acreage in 1918 being 1,249,762. Fruit-growing, prior to the war, was rapidly creating a considerable export trade to foreign markets. Large numbers of English and other immigrants were then annually settled on the still unoccupied agricultural areas of the State. At the conclusion of the war it is anticipated that land settlement will progress even more rapidly than in former years, and that Western Australia will then absorb a constantly increasing stream of immigrants. A very large portion of the south-western division of the State, containing many

millions of acres, is especially suitable for wheat-growing, whilst the hills of the Darling Range, and many other portions of the State, produce grapes and other excellent fruit in the greatest variety.

Live Stock.—The live stock on December 31, 1917, included 957,086 cattle, 6,384,191 sheep, 111,844 pigs, 33,786 goats, and 178,151 horses. Many millions of square miles are available for pastoral purposes.

Manufacturing Industries.—There were on December 31, 1916, a total of 953 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed by them was 13,844, as against 18,799 in 1914, the highest number previously reached. The combined output of these establishments was computed at £7,346,462.

Forestry.—The forests are among the most extensive within the Commonwealth, and contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), have been largely exported, and, just prior to the war, their annual export value was over one million pounds. These two timbers are eminently suitable for every kind of constructional purpose and for use in all kinds of railway rolling-stock. They are already employed in these respects in Great Britain, India, South Africa, Egypt, and elsewhere. Their hardness and durability is remarkable, and the great size of the trees permits of beams and pieces of unusually large dimensions being obtained. For furniture and decorative purposes they are also extensively employed, the beauty of the grain when polished being equal to that of the best Honduras mahogany. Besides these trees the forests contain a wealth of hardwoods, one or other of them suitable for every purpose to which wood can be applied. The beauty of grain and delicacy of marking in nearly all of them recommend them to the furniture manufacturer. Sandalwood (*Santalum cynnorum*) is peculiar to the forests, and is exported very largely to the East, its essential oil being extracted locally. There are in the forests many barks containing tannin. Some of these are exported, the trade in mallet bark prior to the war having been extensive. The forests are rich in gums and resins. A Bill for their protection and management was introduced into Parliament in September last.

Minerals.—The sensational goldfinds at Coolgardie and Kalgoorlie in 1892 and 1893 gave an impetus to Western Australian goldmining which in a few years' time placed this State at the head of all the Australasian colonies as regards gold output—a place which it has retained to the present day. The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 970,327 oz. in 1917, and 593,842 oz. in the first eight months of 1918. To the Coolgardie group belong the following goldfields: North Coolgardie, Broad Arrow, North-East Coolgardie, East Coolgardie, and Coolgardie. The total amount produced in the State from 1886 to August 31, 1918, is 32,113,814 fine oz.: of this amount the greater portion was received at the Royal Mint, Perth.

Magnetic iron, lead, copper, and tin ores exist in large quantities, as also coal.

Total Production.—The total estimated value of Western Australian production during 1916 was £18,548,443, distributed as follows: Agricultural, £5,889,663; Pastoral, £3,679,966; Dairy, Poultry, and Bee-Farming, £691,366; Forestry and Fisheries, £860,959; Mining, £4,893,417; Manufacturing, £2,542,072 (value added to the raw material by the production of the industrial establishments).

Industrial Legislation.—Industrial legislation has for many years included industrial arbitration, with the result that wages are not subject to the frequent depreciation prevailing in the older countries.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, mallet bark for tanning, pearls and pearl-shells, kangaroo skins, wheat, flour, fruit, &c. The estimated value of the exports for the year ended June 30, 1917, was:—Wool, £1,420,201; timber, £310,983; sandalwood, £72,669; pearls and shell, £208,486; hides and skins, £222,506; wheat, £1,619,630; flour, £424,361.

During 1916-17, the total imports into Western Australia were valued at £9,382,210, including £2,598,834 from the United Kingdom, and £4,995,823 from other States of Australia. The exports totalled £5,562,966, including £2,807,639 to the United Kingdom and £1,125,865 to other States of Australia. Among the imports it is estimated that products of the soil and of live stock to the value of £1,977,695 were such as might be eventually produced within the State.

TOWNS.

CAPITAL, Perth. Population (1918) of Metropolitan area, including Fremantle, 130,000.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, is one of unique natural beauty. Other towns are Fremantle (including suburbs, 20,847), Albany (3,586), Coolgardie (2,000), Kalgoorlie (8,781), Boulder (10,824), Bunbury (3,763), Claremont (4,222), Geraldton (3,478), Midland Junction (3,484), and Northam (3,361).

Transmission of mails, approximate, 25 days.

Water Supply.—Water supply, both in the settled districts and along the stock routes, has been a subject of the Government's most careful consideration ever since settlement extended. The Goldfields water scheme, supplied from the stored waters of the Helena River in the Darling Range, is of world-wide renown, and its history is closely linked with the names of the late Lord Forrest, once Premier of the State, and the late C. Y. O'Connor, its engineer.

Fauna and Flora.—As in other parts of Australia, the fauna is chiefly remarkable for its marsupials. It may, however, be added that Western Australia has a large variety of beautifully coloured birds and many striking song-birds. The flora of the south-west is one of the richest known, the wild flowers of the State being of unusual variety and beauty.

The Aborigines.—As in all countries where the

white man has settled among races that cannot in a large measure adapt themselves to his forms of civilisation, the natives, in so far as they existed in the present centres of settlement, are fast dying out, a natural consequence of the loss of their original hunting-grounds. They are of quick intelligence, but disinclined for the application made imperative by civilised modes of life. The Government has taken the best measures available for their protection.

Beauty Spots.—The State, although in many parts possessed of a very fair share of natural beauty, presents but few really striking features beyond the ruggedness of its hills and the grandeur of its forests. On the Warren River, in the south-west, it is not unusual to find karri trees which attain 300 feet in height. The most remarkable special feature is found in the many beautiful limestone caves, those of the Margaret River being of exceptional grandeur and picturesqueness.

Territories.

NORTHERN TERRITORY.

The Northern Territory occupies the centre of the Australian continent between 129°-138° East longitude as far as 26° South latitude, and its administration was taken over by the Commonwealth on Jan. 1, 1911. From 1863 to Dec. 31, 1910, it was part of the State of "South" Australia.

POPULATION.

Census.	Males.	Females.	Total.
1891	4,560	338	4,898
1901	4,216	595	4,811
1911	2,734	576	3,310
1916	3,839	928	4,767

The population of the Northern Territory on January 1, 1914, was as follows:—Europeans, 2,123; Coloured (practically all Asiatics), 1,445; Aborigines (estimated), 20,000.

The only railway is from Darwin to Katherine (200 miles). A further extension to the head of the Roper River (80 miles) will be proceeded with in the near future, the permanent survey having been completed. The policy of the present Government is to link up the Territory with the other States by means of a trans-continental railway. The Government have recently initiated a policy whereby every consideration and encouragement will be given to those desiring to settle on the land, suitable areas for tropical agriculture being granted rent free during the original settler's lifetime or for a period of 21 years, whichever is longer. The Darwin Botanical Gardens, where experiments in tropical agriculture are carried out, are situate 1½ miles west of the town. Portions of the country are well adapted for tropical and semi-tropical agriculture, and successful results have been obtained from experiments with Indian wheat. Pearl fishing is carried on round the coast, and the shell is of good quality. The country's mineral resources are great, but are as yet undeveloped. Gold, silver, copper, lead, and tin have been found in considerable quantities, pointing to a great future for the mining industry. Horse-breeding stations under Government supervision are to be established at an early date for remount purposes, and the Government have recently started experimental farms with favourable prospects. Extensive meat freezing works have been erected near Darwin

which will greatly enhance the value of locally bred cattle, which hitherto have been driven to other states for disposal.

The average rainfall for Darwin and neighbourhood is 63 inches per annum, but further inland it diminishes gradually till, at the southern end of the Territory, it is not more than 8 to 10 inches. Speaking broadly, the country is generally suitable for cattle raising, and recent investigation has shown that much country previously considered desert wastes is capable of use. The chief grasses are Mitchell and Flinders. The staple industry of the Territory is undoubtedly pastoral. There are thousands of square miles of first-class pasturage which will one day carry millions of sheep. Immense freezing works have been erected at Darwin. The Territory is blessed in many parts with abundant surface waters, and, where this does not occur, water can be obtained at shallow depths by sinking. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable from 40 to 100 miles from their entrance for boats drawing 4 feet. Wildfowl are plentiful; crocodile are numerous in the rivers. Buffalo and wild cattle abound in parts and kangaroo and other marsupials are very plentiful. The best months to arrive for sport would be May to August. The Territory has hitherto been little known in connexion with sport, but offers greater inducements in this direction than any other part of the continent. For the months of April to September the climate is delightful. From October to December it is hot and humid; from January to March is the wet season, when travelling becomes extremely difficult.

Darwin, the seat of Government, occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin, one of the finest harbours in Australia, and contains the offices of the Administrator and officials of the Territory. The cable owned by the Eastern Extension Company lands at Darwin from Singapore. The town is healthy and free from malaria.

Administrator, J. A. Gilruth.

Private Sec. (vacant).

Judge, Supreme Court, His Honour Mr. Justice J. D. J. Bevan.

Director of Mines, T. G. Oliver.

Director of Lands, T. J. Worgan (acting).

Government Secretary, H. E. Carey.

Supt. of Railways, R. J. Evans.

Supt. of Public Works, W. C. Kellaway.

Supervisor, State Hotels, J. Callan.

PAPUA.

(British New Guinea.)

The total area of Papua is about 90,600 sq. miles, with an estimated native population of 200,000. The territory, formerly known as British New Guinea, comprises the southern and south-eastern shores of the island of New Guinea, the second largest island in the world. It lies some 80 miles to the north of Queensland, between 0° and 12° 0' S. lat. and between 130° 50' and 154° 30' E. long. Its greatest length is 1,490 miles, with a maximum breadth of 430 miles. The islands lying near Papua, some 200 in number, form part of the Territory. Papua was discovered in 1511, and was first claimed by the Dutch. The British portion was annexed by Queensland to the Empire in 1883, but it was not then ratified by the Imperial Government. A Protectorate

was, however, proclaimed in 1884, on the Australasian Governments guaranteeing £15,000 annually, to cover the cost of administration. The Territory was annexed by the Crown in 1888. The Imperial Government has contributed some £52,000 towards the founding of the Possession. In 1901 the Commonwealth Government took it over as a Territory of the Commonwealth. The two largest rivers are the Fly and the Purari. It is mountainous generally, the highest point reaching 13,150 feet, and a large portion of the country consists of forest. The climate is favourable to the cultivation of all tropical products. The soil is exceedingly fertile, but the cultivated area is small. The chief exports are copra, rubber, sisal hemp and copper ore. Tobacco is being cultivated and a factory is established at Moresby. Oil has been discovered, and the petroleum industry is likely to become important. Gold to the value of £37,987 was exported in 1917, and copper ore to the value of £10,000. The imports were valued at £571,640 in 1916-17, and the exports at £156,535. The ports of entry are PORT MORESBY, Samarai, Daru, and Bonagai.

An expedition of Imperial Australian troops took possession of the German territory (Kaiser Wilhelm's Land) in the north on September 24, 1914.

EXECUTIVE COUNCIL.

There is an Executive Council of 6 members, who, with 3 non-official members, form also the Legislative Council.

Lieutenant-Governor of Papua, His Ex-

cency John Hubert Plunkett Murray,

C.M.G., born 1861 (with allowance £450) £1,250

Govt. Sec., Hon. H. W. Champion 700

Commr. for Lands, Hon. M. S. C. Smith... 800

Treasurer, Hon. R. W. T. Kendrick... 600

Chief Med. Officer (actg.), W. M. Strong,

M.D. 625

Commr. for Native Affairs, Hon. B. W. Bramell 600

THE JUDICATURE.

Chief Judicial Officer, H.E. the Lt.-Governor.

Deputy do., Hon. C. E. Herbert £1,000

FINANCE.

The revenue, imports and exports, and shipping of Papua for the six years ended June 30, 1917, are as follows:—

Year.	Revenue.	Imports.	Exports.
	£	£	£
1911-12	51,034	235,369	99,990

NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length, by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in December, 1915, was 829.

Administrator, M. V. Murphy.

President, Executive Council, C. C. R. Nobbs.

New Zealand.

(The Dominion of New Zealand.)

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between $34^{\circ} 22'$ and $47^{\circ} 18'$ South latitude and 162° East longitude — 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers, the Tasman (18 miles by $1\frac{1}{4}$) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 56° F., rainfall 48 in. (days with rain 159); South Island, mean temperature 52° F., rainfall 44 in. (days with rain 155).

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on 13 December, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on 3 May, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

GOVERNOR-GENERAL.

Governor-Gen. and Commander-in-Chief of New Zealand, His Excellency The Earl of Liverpool, P.C., G.C.M.G., G.B.E., M.V.O. £7,000
Private Sec., Gavin M. Hamilton.

A.D.C.'s, Capt. J. Gage Williams (19th Hussars), Hon. Lieut. H. G. Helmore, Lieut. H. G. de F. Garland, M.C., Lieut. E. W. J. Millton, and Lieut.-Col. J. H. Boscawen (extra).

Hon. A.D.C.'s, Col. Sir A. H. Russell, K.C.M.G., C.B. (temp. Maj.-Gen.); Col. R. J. Collins, C.M.G., I.S.O., V.D.; Col. G. F. C. Campbell, V.D.; Col. R. Logan, C.B.; Col. R. A. Chaffey, V.D.; Col. J. C. Nichols, V.D.

* EXECUTIVE COUNCIL, 1917.

(Formed 15th August, 1915.)

The Executive Council now consists of:—

His Excellency the GOVERNOR-GENERAL.

Prime Minister, Minister of Labour, Industries and Commerce, Commissioner of State Forests, Minister in Charge of Valuation and Electoral Departments, Rt. Hon. W. F. Massey £a,600

* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £1 00s. per diem when so engaged, but not during attendance at a session of the General Assembly.

Minister of Finance, Postmaster-General and Minister of Telegraphs, Minister in Charge of Land and Income Tax, State Advances, Public Trust, and Government Life Insurance Departments, Rt. Hon. Sir J. G. Ward, Bt., K.C.M.G. £1,000
Minister of Defence and Minister in Charge of War Pensions, Hon. Sir J. Allen, K.C.B. 1,000
Minister of Railways and Native Minister, Hon. W. H. Herries 1,300
Minister of Public Works, and Minister in Charge of Roads Dept., Hon. Sir William Fisher 1,000
Minister of Internal Affairs, Public Health, Minister in Charge of Hospitals and Charitable Aid, Mental Hospitals, Printing and Stationery, High Commissioners, Audit, Museum, Registrar-General's, Census and Statistics and Laboratory Departments, Hon. G. W. Russell 1,000
Minister of Customs, Minister in Charge of Munitions and Supplies, Pensions, Advertising, and National Provident Fund Departments, Hon. A. M. Myers 1,000
Attorney-General, Minister of Immigration and Leader of the Legislative Council, Hon. Sir F. H. D. Bell, K.C.M.G., K.C. 1,000

<i>Minister of Agriculture, Mines, Minister in Charge of Legislative, Public Buildings, Inspection of Machinery, State Fire and Accident Insurance, and Tourist and Health Resorts Departments, Hon. W. D. S. Macdonald</i>	£1,000
<i>Minister of Education, and Minister in Charge of Friendly Societies, Hon. J. A. Hanan</i>	
<i>Minister of Justice, Marine and Stamp Duties, Hon. T. M. Wilford</i>	1,000
<i>Minister of Lands, Minister in Charge of Land for Settlements and Scenery Preservation, Hon. D. H. Guthrie</i>	1,000
<i>Representing the Native Race, Minister of the Cook Islands, and in Charge of Maori Councils, Hon. Dr. M. Pomare</i>	400
<i>Clerk of the Executive Council, James Frank Andrews, I.S.O., J.P.</i>	625

PUBLIC OFFICERS.

<i>Public Service Commr., D. Robertson, I.S.O.</i>	£1,300
<i>Asst. Public Service Commissioner, A. D. Thomson</i>	1,000
<i>Solicitor-General, J. W. Salmond, LL.D., K.C.</i>	1,250
<i>Controller & Auditor-Gen., Col. R. J. Collins, C.M.G., I.S.O.</i>	1,000
<i>Commissioner Govt. Life Insurance Dept., J. H. Richardson, F.I.A., F.F.A., F.A.S.</i>	1,000
<i>Public Trustee, R. Triggs</i>	1,000
<i>Inspector-General Mental Hospitals, F. Hay, M.B., C.M.</i>	1,000
<i>Inspector-General of Hospitals and Chief Health Officer, T. H. A. Valentine, M.R.C.S., L.R.C.P., D.P.H., R.C.P., R.C.S.</i>	950

UNDER-SECRETARIES, &c.

<i>Internal Affairs, James Hislop</i>	£750
<i>Treasury, Col. G. F. C. Campbell, V.B.</i>	1,000
<i>Customs, W. B. Montgomery</i>	900
<i>Education, W. J. Anderson, M.A., LL.D.</i>	900
<i>Justice (also Native, and Cook Islands), G. C. B. Jordan</i>	850
<i>Crown Solicitor, P. S. K. Macassey</i>	900
<i>Commissioner of Police, J. O'Donovan</i>	600
<i>Public Works, W. S. Short</i>	900
<i>Lands, T. N. Brodriek</i>	850
<i>Surveyor-General, E. H. Wilmot</i>	700
<i>Registrar-General, W. W. Cook</i>	525
<i>Govt. Statistician, M. Fraser</i>	550
<i>Govt. Printer, Marcus F. Marks</i>	650
<i>Taxes, D. G. Clark</i>	850
<i>Valuer-General, F. W. Flanagan</i>	700
<i>Railways, E. H. Hilley</i>	3,000
<i>Gen. Post Office, W. R. Morris, I.S.O.</i>	1,000
<i>Telegraph Engineer, J. Orchiston, M.I.E.E.</i>	900
<i>Stamps, P. C. Corliss</i>	800
<i>Land and Deeds, C. G. Bridges</i>	725
<i>Dir. Museum, J. A. Thomson, M.A., D.Sc., F.R.A.S., A.I.A.</i>	600
<i>Govt. Astronomer, C. E. Adams, D.Sc., F.R.A.S., A.I.A.</i>	500
<i>Domination Analyst, J. S. MacLaurin, D.Sc., F.R.S.</i>	750
<i>Agriculture, C. J. Reakes, M.R.C.V.S., D.V.Sc.</i>	800
<i>Tourist Dept., B. M. Wilson</i>	675
<i>Govt. Balmologist, John, F. W. T. Rowley</i>	1,000
<i>Marine, G. Alport</i>	650
<i>Pensions, G. C. Fache</i>	750
	650

HIGH COMMISSIONER IN LONDON.

<i>High Commissioner in London, Hon. Sir Thomas Mackenzie, K.C.M.G., F.R.G.S., New Zealand Government Offices, 413 Strand, W.C. 2</i>	£2,000
<i>Secretary, Capt. T. E. Donne</i>	750

THE LEGISLATURE.

Parliament consists of a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 38 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election or for appointment to the Legislative Council. An Act providing for an elective Legislative Council has been passed.

Speaker of the Legislative Council (vacant).

Speaker of the House of Representatives, Hon. Sir F. W. Lang, Kt. Bach.

THE JUDICATURE.

The judicial system is similar to that of England, with magistrates' courts and quarter sessions, and a supreme court with a Chief Justice and 6 puisne judges.

Chief Justice, Hon. Sir Robt. Stout, K.C.M.G. £2,000

Puisne Judges, Hon. F. E. Chapman, J. H. Hoskings, W. B. Edwards, T. Cooper, W. A. Sim, A. L. Herdman

each 1,800

In 1917, 29,412 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 34,189. Convictions (or sentences) in Supreme Courts were (Europeans) 362. Civil cases, to number of 242; were tried, judgment being entered for a total amount of £100,447.

POLICE.

On 31 March, 1917, the strength of the Police Force was 896 of all ranks, equivalent to 1 for every 1,280 of the population. Average cost of police protection per inhabitant was, in 1917, 4s. 3d.

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road and harbour boards. Electors are adult ratepayers of both sexes.

Revenue of local bodies £2,720,150
Indebtedness, 31 Mar., 1917 25,333,992

PASSPORTS.

After 1 Oct., 1916, no person over 15 years will be permitted to land, unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the N.Z. Staff Corps (Officers), the Permanent Staff (Warrant and N.C. Officers), and the Royal New Zealand Artillery (Field and Garrison); the Territorial Forces consist of 12 regiments of Mounted Rifles; 6 batteries N.Z. Field Artillery; 9 companies N.Z. Garrison Artillery; 4 companies N.Z. Engineers; 2 battalions N.Z. Railway Corps; 17 battalions Infantry; 8 companies N.Z. Signal Corps; the N.Z. Army Service Corps; 2 battalions N.Z. Post and Telegraph Corps; 8 field ambulances N.Z. Medical Corps; the N.Z. Veterinary Corps; the Rifle Clubs; and the Senior Cadets.

Military training is compulsory on all male citizens between the ages of 12 and 25—in *Cadet Corps* 12-18, *Territorial* 18-25, with short periods of training in the field. The *Peace Effective* is about 30,000 of all ranks. The material from which the Australian and New Zealand Armies are being constructed is the finest in the world. The Dominion has contributed an Expeditionary Force of more than 100,000 men, completely equipped, and its services in the war have been most valuable.

Commandant, Maj.-Gen. Sir A. W. Robin,
K.C.M.G., C.B.

Navy.

The Naval Defence Act, 1913, provided for the establishment of a N.Z. Naval Force by voluntary enlistment for two years. The 3rd-class cruiser *Philonel* has been handed over to the Dominion by the Imperial Government as the nucleus of a New Zealand-owned navy, to be, however, placed at the disposal of the Home Government in time of war. A number of small vessels, formerly belonging to the Australian Squadron, are located in N.Z. waters. In 1909 the Dominion presented the battle-cruiser *New Zealand* (18,000 tons) to the Imperial Government. The Calliope Dock, capable of docking two warships, was subsidised by the Imperial Government in 1898.

Naval Adviser, Capt. Hall-Thompson, R.N.

FINANCE.

The revenue and expenditure (Consolidated Fund) and debt of New Zealand for the 5 years ended 31 March, 1914-1918, are stated as follows:—

Year.	Revenue.	Expenditure.	Debt.
1914	£12,229,661	£11,825,864	£99,730,427
1915	12,451,945	12,379,803	100,059,970
1916	14,507,539	12,493,107	109,637,397
1917	18,355,194	14,058,770	129,836,105
1918	20,206,222	15,120,288	150,840,055

Taxation by General Government.—The total taxation for the year ended 31 March, 1918, was £12,340,853, representing £11 3s. 6d. per head of population.

Customs and Excise Duties	£3,601,383
Land-tax	1,385,708
Income-tax	5,619,561
Death Duties	805,511
Other taxes	928,690

Land Valuation.

Unimproved value of North Island.	South Island.
land £156,700,141	£94,387,567
Value of improvements 98,717,793	55,660,570
Capital value 255,417,934	150,048,137

Banking.—At the end of 1917 there were six banks of issue doing business, two of which were New Zealand banks. Total assets, £44,979,616; liabilities, £48,541,961; value of notes in circulation, £5,410,957.

Post-office and private savings banks had, at the close of 1917, 651,532 depositors, having £31,917,099 to their credit.

EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1916) 2,355 public primary schools, with 5,366 teachers and 185,884 scholars; there are also 305 private schools, with 23,412 scholars, and, in addition, 131 schools for the Maoris. The higher education of boys and girls in the cities and large

towns is carried on in 33 endowed colleges and grammar schools. The University of New Zealand (to which are affiliated Auckland University College, Victoria University College, Canterbury College, and the University of Otago, the four colleges having 1,985 students in 1916) has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the two main islands is 65,440,815 acres, and 41,262,193 acres of this were in occupation in 1916, this acreage representing 77,229 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. Preliminary figures show that the area under wheat in 1917-18 was 276,877 acres, giving a yield of 6,761,249 bushels. An area of 153,399 acres of oats was threshed, the yield totalling 4,785,391 bushels; while 307,625 acres were converted to chaff, hay, or ensilage. Other acreages were: barley, 19,229; rye-grass, 68,721; and potatoes, 22,635. An area of 441,295 acres was sown in turnips. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1918 (preliminary figures) numbered 2,888,214; sheep, 26,538,302; pigs, 258,269; and horses, 378,991. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Minerals.—Coal-mining is one of the largest industries, the output in 1917 being 2,068,419 tons, the approximate total output to the end of 1917 being 46,158,590 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, has been found in Tararua, and in the form of brown hematite at Parapara, near Nelson.

EXTERNAL TRADE.

The total imports and exports of the Dominion are valued as follows, for the 5 years 1913-17:—

Year.	Imports.	Exports.	Total.
1913.....	£22,288,302	£22,986,722	£45,275,024
1914.....	21,856,096	26,261,447	48,117,543
1915.....	21,728,824	31,748,912	53,477,736
1916.....	26,339,283	33,286,937	59,626,220
1917 ^a	20,743,124	30,613,184	51,356,308

The principal articles of Import and export in 1916 and 1917 were:—

	1916.	1917.
Spirits and Alcoholic Liquors	£873,468	£621,304
Beverages (non-alcoholic) ...	547,401	570,241
Tobacco and preparations thereof	717,822	446,301
Foodstuffs (excluding Sugar) 1,478,768		1,665,261
Sugar	986,766	1,136,721
Apparel, Textiles, and Manufactured Fibres	7,316,713	5,759,901
Oils, Fats, and Waxes	1,088,659	1,046,811
Metal Manufactures (other than Machinery & Machines) 2,580,784		1,654,521
Machinery and Machines ...	1,186,903	956,713
Paper and Stationery	1,112,004	929,351
Drugs, Chemicals, and Drug-gists' Wares	890,980	741,771

^a Excluding gold and specie.

	Exports.	
	1916.	1917.
Wool	£12,386,074	£12,175,366
Frozen Meat	7,271,318	5,982,404
Butter and Cheese	6,146,603	5,980,802
Skins, Hides and Pelts	1,667,679	1,861,817
Gold	1,199,212	1,199,212
Phormium Fibre	1,007,725	1,197,396

* Not available for publication.

The external trade of 1917 was shared by the principal countries as under:—

Country.	Imports from.	Exports to.
United Kingdom	£8,594,010	£26,023,396
Australia	2,636,149	1,460,980
United States	4,294,379	1,894,317
Fiji	1,198,589	167,024
India and Ceylon	1,043,615	16,557
Canada	771,952	961,653
Japan	693,808	4,388
France	258,574	481,792

COMMUNICATIONS.

Railways.—In March, 1918, there were 2,983 miles of Government railway lines in working order, and more under construction; and 29 miles of private lines, together with an excellent coaching system. The number of passengers carried in 1917-18 was 11,408,156, while goods

carried amounted to 5,742,969 tons. Revenue and expenditure were £4,687,700 and £3,042,906 respectively.

Shipping.—During 1917 the vessels entered inwards numbered 543 (tonnage, 1,405,776), and those entered outwards 547 (tonnage, 1,381,882), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1917) 253,346,812 letters and postcards, 40,366,792 newspapers, 44,934,218 books and packets, and 6,314,875 parcels, and the work is effected by 2,346 post-offices. There are 13,687 miles of telegraph line, with 50,291 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 11,624,670.

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The population of the chief cities and towns at the Census of 15 October, 1916, was as follows:—Wellington,* 95,235; Auckland,* 133,712; Dunedin,* 68,716; Christchurch,* 92,733; Invercargill,* 17,862; Napier,* 15,131; Gisborne,* 12,660; Palmerston North,* 14,006; Nelson,* 9,962; Timaru, 13,716; Wanganui,* 19,517; Greymouth,* 8,373; and New Plymouth,* 9,795.

* Metropolitan area.

† Suburban area.

DEPENDENCIES OF NEW ZEALAND.

Antipodes Group (49° 41' 15" S. lat., and 178° 43' E. long.) are uninhabited.

Auckland Islands lie about 290 miles south of Bluff Harbour, in 50° 32' S. lat., and 166° 13' E. long. The islands contain several good harbours, but are uninhabited.

Bounty Islands (47° 43' S. lat., 179° 0' 30" E. long.) are uninhabited.

Campbell Island is uninhabited.

Chatham Islands, between 43° 30' S. lat. and 175° 40'-177° 15' W. long., have a population of 219 Europeans and 258 Maoris and half-castes. They support large flocks of sheep and some cattle.

Cook Islands Administration.—The Cook and other islands, annexed to the British Empire in October, 1900, and included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, The Hervey (Manuae and Aoutu), and Takutea. Outside the Cook group are Savage (or Niue), Palmerston, Penrhyn (or Tongareva), Humphrey (or Manahiki), Reirson (or Rakaanga), Danger (or Pukapuka), and Suwarrow Island, which are situated in the South Pacific, between 8° to 23° S. lat. and 156° to 170° W. long. The population at the Census of 1916 numbered 12,797, all except 265 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee,

pearl-shell, and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1917) were valued at £69,590, and the imports at £93,140. Rarotonga is the chief island, with a native population of 2,853, and a European population of 211. The government is administered locally under the direction of New Zealand. The Federal Council of the Cook Islands, under the direction of the Resident Commissioner at Rarotonga, legislates for all the islands except Niue, which has a Resident Commissioner and an Island Council of its own. The six Arikis of Rarotonga are of equal rank and are all members of the Federal Council. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

Resident Commissioner, Rarotonga, F. W.

Platts £700

Resident Comm., Niue, G. N. Morris 500

The Kermadec Group, between 29° 10' to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. The group is uninhabited.

The Three Kings (discovered by Tasman on the Feast of the Epiphany), in 34° 9' S. lat. and 170° 8' 6" E. long., are uninhabited.

Union of South Africa.

AREA AND POPULATION.

Provinces and Capitals.	Area (English Sq. Miles).	Population.	
		1904.	Census of 1911.
Cape of Good Hope (Cape Town)	276,966	2,409,804	2,564,965
Natal (Pietermaritzburg)	35,290	1,108,754	1,194,943
Transvaal (Pretoria)	110,430	1,260,951	1,686,212
Orange Free State (Bloemfontein)	50,389	387,315	528,174
Total	473,075	5,175,824	5,973,394

Of the total 5,973,394 persons (1911), 3,069,392 were males, and 2,904,002 females. The increase for the Union (1904-11) was 15·41 per cent. For the Provinces it was as follows:—Cape, 6·44 per cent.; Natal, 7·69 per cent.; Transvaal, 32·78 per cent.; Orange Free State, 36·37 per cent.

The population comprised (1911) 1,276,242 Europeans or Whites (591,078 females), 4,019,006 natives (1,996,057 females), and 678,146 other coloured races (316,867 females). In 1904 the figures were:—Europeans, 1,116,806 (increase, 1904-11, of 14·28 per cent.); natives, 3,491,056 (increase, 1904-11, of 15·12 per cent.); and other coloured races 567,962 (increase, 1904-11, of 19·40 per cent.). The total non-European increase (1904-11) was 15·72 per cent. The proportion of Europeans in the total population in 1904 was 21·58 per cent.; in 1911, 21·37 per cent.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50' - 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarté Bergen* and *Lange Bergen* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuwveld* to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeubergen*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet), between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magabies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooë Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensbergen* and flowing into the Atlantic between the Protectorate of South-West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal,

but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The Transvaal was formed as the South African Republic by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The Orange Free State was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1900. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seized of all State property, and the Railways, Ports, Harbours, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (Pretoria), His Excellency the Rt. Hon. Viscount Buxton,

HIGH COMMISSIONER IN LONDON.

Rt. Hon. William Philip Schreiner, C.M.G., K.C. *High Commissioner's Office, 32 Victoria Street, S.W.*

Secretary, R. A. Blankenberg, O.B.E.
Asst. do., (vacant).

Trades Commissioner, A. H. Canham (acting), 90 Cannon Street, E.C.

THE LEGISLATURE.

The *Senate* consists of 40 members. For ten years after the establishment of Union eight are nominated by the Governor-General in Council and 32 are elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy will be filled by the choice of the Provincial Council in respect of whose Province a vacancy occurs.

The *House of Assembly* consists of 130 elected members, 51 of whom represent the Cape of Good Hope, 17 Natal, 45 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

President of the Senate, Hon F. W. Reitz £1,200
Speaker of the House of Assembly, Hon. Sir J. T. Molteno, K.C. 2,000 |

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply.

THE JUDICATURE.

SUPREME COURT OF SOUTH AFRICA.

APPELLATE DIVISION
(Bloemfontein).

Chief Justice of South Africa, The Rt. Hon. Sir J. Rose-Innes, P.C., K.C.M.G. £3,000

<i>Judges of Appeal, Hon. Sir W. H. Solomon, K.C.S.I., K.C.M.G., £3,000; Hon. C. G. Maasdorp</i>	£2,750

<i>panies, Transvaal Provinces), C. W. T. B.</i>	
<i>Juta</i>	£800
<i>Chief Clerk and Examiner, H. D. Wedlake</i>	550

DEFENCE.

At the commencement of the war, the S.A. Government undertook the defence of the Union, thus freeing the Imperial troops for service elsewhere.

UNION OF SOUTH AFRICA TROOPS.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act provides for the establishment of Defence Forces comprising (1) a Permanent Force; (2) a Coast Garrison Force; (3) a Citizen Force; (4) a Royal Naval Volunteer Reserve; and (5) Special Reserves.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 21 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number. Citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a rifle association. Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The Permanent Force—South African Mounted Riflemen—was established on the 1st April, 1913. The Union has been divided into 15 Military Districts. To each Military District has been allotted various Units of different Arms, to which the citizens entered for Peace Training in their 20th and 21st years are posted. The first Training Camps began in September, 1913.

A Cadet organisation is also in existence, and Rifle Associations have been formed.

In October, 1914, a rebellion broke out, and the rebels attempted to join forces with the Germans of the neighbouring Colony. The Union forces, under the command of General Botha, met the outbreak successfully. An expedition to German South-West Africa, which followed, resulted in the surrender of the German forces on the 9th July, 1915, and the taking over of the administration of that territory by the Government of the Union.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils." For practical purposes it has been provisionally determined that all post-matriculation instruction shall be deemed to constitute higher education. The Department of Education, under the Minister, is therefore concerned with:—

(a) The University of the Cape of Good Hope, Cape Town, established 1873. It is empowered to grant degrees, but has no teaching institution. (b) The South African College, Cape Town (1829). (c) Victoria College, Stellenbosch (1883). (d) Rhodes University College, Grahamstown (1904). (e) Huguenot College, Wellington (1907). (f) Grey University College, Bloemfontein (1910). (g) Transvaal University College, Pretoria (1910). (h) South African School of Mines and Technology, Johannesburg (1910). (i) Natal University College, Pietermaritzburg (1909). The Department is further charged with the Teachers' First Class Certificate examinations.

In the Session of 1916 three Acts were passed providing for the conversion of the South African College into the University of Cape Town, of the Victoria College into the University of Stellenbosch, and of the University of the Cape of Good Hope into a federal University, with the remainder of the University Colleges as constituent colleges. The last-named University to be styled the University of South Africa.

Provision is made on the Vote of the Department of a grant-in-aid to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in February, 1916, and has at present 23 students.

The total number of students at these Colleges in 1916 was 1,353. The State expenditure on higher education during 1916-17 was £114,500.

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of Railways and Harbour Administration) for the four years ended March 31, 1918, are stated as under:—

Year.	Revenue.	Expenditure.
	£	£
1914-1915.....	14,265,097	16,253,140
1915-1916.....	16,556,396	16,158,478
1916-1917.....	17,690,536	17,487,456
1917-1918.....	18,408,615	17,845,376

DEBT.

The Public Debt of the Union at March 31, 1916, was £150,832,734, composed as follows:—

Rate.	Funded Debt.	Floating Debt.
	£	£
3%	54,105,113	...
3½%	26,650,761	2,335,790
3¾%	3,000,000	...
4%	36,888,475	8,144,987
4½%	4,024,465	15,263,636
5%	419,507	...
	£125,088,321	£25,744,413

PROVINCIAL FINANCE.

Prior to the passing of the Provincial Relations Act the four Provincial Administrations (Cape of Good Hope, Natal, Transvaal, and Orange Free State) received no revenues beyond the amount voted by Parliament by way of subsidies for the performance of the services and duties assigned to them. On the passing of the Act (April 1, 1913) certain revenues were transferred and assigned to the various provinces, and, in addition, subsidies were voted by Parliament equal to half the normal or recurrent expenditure. The Cape Province receives an additional amount equal to one-half the expenditure by local bodies; whilst the Natal and Orange Free State Provinces receive additional grants of £100,000 each.

The ordinary Revenue and Expenditure for the two years ended March 31, 1916, were as follows:—

Financial Year.	Revenue transferred or assigned	Subsidies.	Total Ordinary Revenue.	Total Ordinary Expenditure.
	£	£	£	£
1914-15	1,058,088	2,264,790	3,332,875	3,346,125
1915-16	1,134,566	2,049,627	3,184,193	3,365,533

PRODUCTION AND INDUSTRY.

Agriculture.—The exports in 1916 of the principal articles of agricultural production were:—

Article.	Quantity.	Value.
Wool	136,395,191 lb.	£6,601,376
Mohair	17,374,068 lb.	1,115,281
Hides	19,450,001 lb.	811,338
Skins	38,927,132 lb.	1,513,391
Ostrich Feathers.	452,080 lb.	486,362
Meatles	1,746,030 muids	877,368
Fruit, fresh	340,897 pkgs.	65,832
Wattle Bark	114,923,934 lb.	269,794

Production of Crops, 1911.

Provincial Statistics in 1,000 muids (muid of wheat, maize, peas or beans = 200 lb.; of oats and potatoes, 150 lb.; of barley, 160 lb.; of onions, 120 lb.).

Crop.

Manufactures.—The development of local industries has been most marked during the last twelve months, the scarcity of overseas supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1915-16 was £40,434,882 sterling, and this amount is expected to be considerably exceeded when the returns are available for 1916-17 census, which was taken in January to March, 1918. Amongst the new industries which have been established during the period of the war may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making; starch from maize; iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c. As indicating the production during 1915-16 of certain specified industries, the following figures may be of interest:—

PARTICULARS OF CERTAIN MATERIALS USED OR
TREATED AND OF ARTICLES PRODUCED IN
SPECIFIED INDUSTRIES DURING 1915-16.

Industry.	Quantity.	Value.
Woolwasheries—		£
Wool scoured	25,800,000 lb.	—
Amount received for scouring	—	65,813
Fellmongeries—		
Value of hides and skins treated	—	142,500
Tanneries—		
Value of leather pro- duced	—	455,154
Hides & skins tanned		270,413
Wattle bark used	4,000 tons	22,683
Brush and Broom Fac- tories—		
Value of brushes and brooms made	—	53,261
Bacon and Ham Fac- tories—		
Bacon and ham pro- duced	2,021,475 lb.	107,524
Lard produced	190,849 lb.	8,461
Value of pigs used	—	76,332
Butter and Cheese Factories—		
Butter Produced	7,877,271 lb.	558,156
Butter-fat used	7,500,699 lb.	—
Cheese produced	978,301 lb.	44,787
Milk used	999,132 gall.	—
Fish Preserving Works—		
Crayfish canned	59,391 cases	90,684
Flour and Grain Mills—		
South African wheat treated	149,439 tons	—
Imported wheat treated	85,821 "	—
Maize treated	287,474 "	—
Sugar Mills—		
Sugar produced	117,768 tons	1,875,364
Sugar-cane crushed...	1,362,738 "	—
Tobacco, Cigar, and Ci- garette Factories—		
Tobacco made	6,452,000 lb.	265,032
Cigars and cheroots made	10,480,000	25,923
Cigarettes made	959,343,000	734,600
South African leaf used	7,992,244 lb.	248,109
Imported leaf used...	466,020 lb.	134,114
Boot and Shoe Fac- tories—		
Value of boots, shoes, veldschoens, &c., made	—	493,044
Furniture Factories—		
Value of furniture (in- cluding chairs and mattresses) made...	—	562,237
Soap Factories—		
Output of soap	24,795 tons	882,320
Glycerine produced...	850 "	49,128
Candle Factories—		
Output of Candles ..	14,604 tons	625,836
Paraffin wax used ..	8,252 "	305,579
Stearine used	1,154 "	69,400

Agricultural Production.—The output of sugar from Natal last season (1916-17) was estimated at 115,000 tons, and would have been greater but for adverse climate conditions, while the crop of tea in the same province was estimated at 1,747,000 lb. (season 1916-17). Among other commodities it is estimated that 9,800,000 muids of maize (1916-17), 1,500,000 muids of wheat (1916—a bad season), 15,013,557 lb. of butter (1916), 1,975,487 lb. of cheese (1916) were produced in the Union for the periods stated. A serious slump prevails in the ostrich feather industry, the average yearly export being £1,747,000 less during the years 1914-16 as compared with the years 1911-13; but on the other hand, considerable progress has been made in the production of tobacco, jams, dried fruit, potatoes, &c., while instead of importing such articles as fresh meat, eggs, and butter, as was formerly necessary, these commodities are now being exported.

Mines and Minerals.—Gold mining still continues the chief source of the country's wealth. At the outbreak of war the diamond mines closed down. The total value of the mineral output of the Union in 1916 was £50,593,359, the main items being:—

	£		£
Gold	39,490,990	Lime	115,750
Diamonds ..	5,728,391	Silver	106,311
Coal	2,739,665	Salt	106,303
Copper	1,127,380	Asbestos	83,078
Tin	339,571	Soda	25,121

The mineral production for the Union of South Africa was as follows:—

	Gold.
1916	9,296,964 fine oz. £39,490,990

The labour employed in the gold industry in January, 1917, was 23,175 whites and 203,046 coloured. Of these, 23,168 whites and 203,003 coloured were working in the Transvaal in January, 1917.

	Diamonds.
1911	£2,746,724
1912	10,061,489
1913	11,389,807
1914	5,487,194
1915	399,810
1916	2,346,330 carats 5,728,391
1917	2,902,416 " 7,713,810

The sales amounted to £6,170,906. The labour employed in diamond mining, including individual diamond digging, was in January, 1917: Transvaal, 1,883 whites, 7,368 coloured; Cape, 3,079 whites, 20,413 coloured; O.F.S., 409 whites, 2,916 coloured; & total of 5,371 whites and 30,697 coloured (4,619 whites and 10,709 coloured in January, 1916).

	Coal.
(Tons of 2,000 lb.)	
1916	

Transvaal	6,136,912 tons	£1,382,680
Cape	41,752 "	24,092
O.F.S.	762,576 "	198,699
Natal	3,066,261 "	1,124,194

Totals..... 10,007,503 " £2,739,665

The labour employed in coal mining in January, 1917, was: Transvaal, 709 whites, 14,355 coloured; Cape, 29 whites, 354 coloured; O.F.S., 137 whites, 2,183 coloured; Natal, 567 whites, 12,925 coloured;

a total of 1,442 whites and 29,817 coloured (1,263 whites and 24,859 coloured, January, 1916).

Silver.

There are no silver mines in the Union. The output of 968,935 fine ozs., valued at £106,311, represents silver contained in gold bullion and base metal ores.

Copper.

(Tons of 2,000 lb.)

72,243 tons of matte and concentrates, valued at £663,304, were shipped from the Transvaal, and 10,599 tons of matte and ore, valued at £474,076, from the Cape. The figures for 1915 are 14,997 tons (£525,106) and 13,973 tons (£517,208) respectively.

Tin.

(Tons of 2,000 lb.)

3,235 tons of tin concentrates, valued at £336,135, were shipped from the Transvaal, and 29 tons, valued at £3,436, from the Cape. The Union figures for 1915 are 3,471 tons, valued at £331,420, including 40 tons for the Cape Province, valued at £4,332.

Salt.

(Tons of 2,000 lb.)

1916.

Transvaal	6,592 tons	£10,763
Cape	25,505 "	54,528
O.F.S.	24,170 "	41,012

Totals..... 56,267 " £106,303

Other Minerals.

The value of the Union's production for 1916 of other base minerals, such as asbestos, lime, graphite, magnesite, lead, flint, &c., was £279,400, and of miscellaneous products, such as bricks, cement, coke, tar, &c., £665,348, compared with £271,015 and £598,631 respectively for 1915.

EXTERNAL TRADE.

The total value of the Imports and Exports in the five years 1912-1916 (exclusive of specie) was as follows:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1912	38,838,960	62,974,219	101,813,179
1913	41,828,841	66,569,364	108,398,205
1914	35,354,971	39,933,612	75,288,583
1915	31,810,717	16,664,991	48,475,708
1916	40,399,945	23,759,191	64,159,136

The principal articles imported and exported in 1915 and 1916 were:—

IMPORTS.	1915.	1916.
	£	£
Apparel	1,938,727	2,882,096

CITIES AND TOWNS.

SEAT OF GOVERNMENT, PRETORIA.

SEAT OF THE LEGISLATURE, CAPE TOWN.

The following cities had a white population exceeding 10,000 at the Census of 1911:—

City.	Pop. 1904.	Pop. 1911.
Johannesburg (T.)	83,363	119,953
Durban (N.)	31,302	31,783
Cape Town (C.)	44,203	29,863
Pretoria (T.)	21,114	29,618
Port Elizabeth (C.)	21,987	18,190
Woodstock (C.)	21,530	17,957
Germiston (T.)	9,123	15,579
Maritzburg (N.)	15,806	14,737
Bloemfontein (O.F.S.)	15,501	14,720
Kimberley (C.)	13,556	13,598
Krugersdorp (T.)	6,946	13,132
East London (C.)	14,686	12,279
Boksburg (C.)	4,175	11,529

COMMUNICATIONS.

Railways.—The total open mileage of Government-owned lines at the end of 1916 was 9,419 miles (comprising Cape 4,185, Orange Free State 1,342, Transvaal 2,650, and Natal 1,242), of which 8,899 miles are 3 ft. 6 in. gauge and 520 miles a ft. gauge. The capital expenditure on Government railways up to 31 December, 1916, amounted to £76,097,197, plus £15,278,959 in respect of rolling stock, or a total of £91,376,156, while £264,726 was spent in new construction. The gross earnings for 1916 were £13,257,067, and the net profit, after payment of interest, £988,750. Working expenditure (excluding renewals) amounted to £8,386,273, or 63·3 per cent. of the gross revenue, as compared with £7,499,306, or 61·5 per cent., of the gross revenue for the previous year.

Posts and Telegraphs.—At the end of 1916 there were in the Union 2,522 post and telegraph offices open. 113,251,801 inland letters and cards, 66,952,997 newspapers, books, and circulars, and 5,692,873 telegrams were received and despatched in 1916. The number of money orders issued during the year was 383,010, and the value £2,298,229, while 337,638 orders of the value of £2,005,131 were paid. 3,681,262 postal orders amounting to £2,249,173 were issued, and 3,102,906, valued at £1,824,122, paid. The revenue of the post and telegraph department was £1,028,939, and the expenditure £1,010,032; the revenue of the telegraph and telephone service being £746,750, and the expenditure £673,355.

16,036 miles of telegraph line, carrying 54,031 miles of wire, were open. 2,436 wireless messages were dealt with. The number of depositors in the Government Savings Bank at the end of 1916 was 271,222, the amount to their credit being £6,724,358.

Shipping.—In 1916 the shipping entered and cleared at the ports of the Union of South Africa was:—

Entered—4,357 vessels of 11,314,809 tons net.
 Cleared—4,288 " " 11,014,500 "

RAILWAYS AND HARBOURS BOARD.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board. The constitution of the Board at date is as follows:—

Chairman, Hon. Henry Burton, K.C., Minister of Railways and Harbours.

Members, Sir Thomas Hyslop, The Hon. J. F. B. Riisik.

Secretary, G. W. Pilkington.

Chief Officers:

Gen. Manager, Johannesburg, Sir W. W. Hoy, Kt.

Asst. do., Johannesburg, G. C. S. Clark, C.M.G., V.D.

Assistant do., Bloemfontein, W. H. Barrett.

Assistant do., Cape Town, H. Salmon.

Engineer-in-Chief, Johannesburg, A. M. Tiplett, M.I.C.E.

Chief Mech. Engineer, Pretoria, D. A. Hendrie.

Chief Accountant, Johannesburg, G. A. Reid.

Chief Railway Storekeeper, Johannesburg, R. B. Gettcliffe.

Catering Manager, Johannesburg, A. H. Simmons.

South-West Africa.

SOUTH-WEST AFRICA lies approximately between 17° 18'–29° 10' S. lat. and 11° 40'–21° E. long., having an estimated area of 322,200 square miles, and a population of about 220,000.

In accordance with a census taken on January 1, 1913, the white population was 14,830, and the native population (excluding Ovamboland and the Caprivi Zipfel) was 78,810. The number of natives in the areas excluded has been estimated to be between 150,000 and 200,000. The principal native races in the Protectorate are Hottentots, Bushmen, Bergdamaras, Hereros, Ovambos, and Bastards.

The inhabitants are principally Animists. The northern district is known as *Ovamboland*, the central part as *Damaraland* (or *Hereroland*), and the southern portion as *Great Namaqualand*. The white population in 1913 was 14,830. Agriculture and stock-raising are the principal industries. The exports (valued at £3,515,141 in 1913) include live stock, guano, horns, hides, wool, meat, ostrich feathers, copper, ore, lead, marble, and diamonds; the imports (£2,171,230 in 1913) include foodstuffs, textiles, metal, and hardware. The railways, prior to occupation by the Union Forces, were divided as follows:—(1) The Otavi line, extending from Swakopmund to Tsumeb, with branches from Ongwati to Karibib and Otavi to Grootfontein (421 miles). (2) The

State (Northern) railways, extending from Swakopmund *via* Jakalswater to Karibib and Windhuk (240 miles). (3) The North and South Railway, extending from Windhuk to Keetmanshoop (314 miles). (4) The Southern Railway, extending from Luderitzbuch to Keetmanshoop, with a branch from Seeheim to Kalkfontein (365 miles). These railways, together with the line from Prieska to Kalkfontein (326 miles), connecting the S.W. African railways with the Union system, are now controlled and worked by the South African Railways Administration. The line from Prieska to Kalkfontein was constructed in connexion with the recent military operations.

The railway system in the Protectorate, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 344 miles), comprises:—

3 feet 6 inches Standard Gauge.		Miles.
Main Line, Nakop (Union border) to Karibib	657	
" Karibib to Swakopmund.....	114	
Branch Line, Seeheim to Luderitzbuch.....	197	
Total	968	

From Swakopmund the line extends to Walvis Bay (20 miles), a Union port now serving the Northern portion of the Protectorate.

2 feet Narrow Gauge.		Miles.

1917	55,529	41,023	11,814

Religion. — In 1911 there were 1,437,688 Christians—479,825 Dutch Churches, 282,619

Anglican Communion (including Church of England, Church of Province of South Africa, Church of Ireland, Episcopal Church of Scotland and Episcopalian), 74,005 Presbyterians, 147,378 Independents or Congregationalists, 285,283 Wesleyans, 19,161 other Methodists, 21,506 Lutherans, 21,167 Moravians, 22,953 Rhemish Mission, 12,234 other Lutherans, 13,704 Baptists, 35,934 Roman Catholics, 21,919 other Christians; Muhammmans 24,189, Jews 16,744; " of no religion " 1,077,998, of whom 1,047,233 were natives.

Education.—The Province is divided into 121 school districts, each under the control of a School Board, two-thirds of the members being locally elected, and one-third nominated partly by Government and partly by Municipal or Divisional Councils. Education is compulsory for children of European extraction. The necessary grants are provided from the general revenue to supplement local contributions, which, in the case of Public Schools controlled by School Boards, amount to about one-fourth of the total expenditure, and are derived principally from school fees payable by the parents.

Aided Schools, June 30, 1918. 4,288: enrolment 260,422, attendance 233,522. There are 121,105 European pupils and 148,317 non-European pupils. There are 10,474 teachers. Government expenditure on education, exclusive of Higher Education (for which see Union of S.A.) for 1912-13, £784,716; 1913-14, £853,448; 1914-15, £919,485; 1915-16, £917,856; 1916-17, £976,294; 1917-18, £1,166,059.

Charitable Institutions, Hospitals, Pauperism.—In the hospitals 18,466 in-patients were treated during 1917, and there were 95,682 out-patient attendances at Government-Aided Hospitals and 70,275 out-patient attendances at Government Chronic Sick Hospitals, making the total out-patient attendances for 1917, 165,957. There is no recognised system of poor law relief, but 1,303 persons received indoor relief during the year 1917.

Harbours and Works.—There are magnificent

* These population figures are those of the census for 1918, and may be subject to revision.

harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

CAPITAL, CAPE TOWN. Total population (1911), white and coloured, 67,170 (with suburbs, 149,461).

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 51 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 126 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 79 Village Management Boards.

Administrator, Hon. Sir N. Frederic de Waal, K.C.M.G. £2,500

Executive Committee, C. R. Arnold; Daniel Retief; Hon. W. Ross; C. J. Langenhoven.

Prov. Sec., C. L. W. Mansergh, I.S.O. £1,200

Capetown is 5,979 miles from Southampton; transit, 16 days.

NATAL.

The Province of Natal comprises an area of 35,290 square miles, (including Zululand, 10,424 square miles), with a seaboard of 360 miles.

Population.	Census, 1904.	Census, 1911.
Europeans	97,109	98,114
Indians and Asiatics ...	100,918	133,439
Natives	910,727	962,490

Total 1,108,754 1,194,043

The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour. The measures taken to control the movements and settlement of the Asiatic population led to serious disturbances in November, 1913.

In 1916 the European births registered numbered 2,775, the deaths 1,125, and the marriages 920. In 1911 there were 564,648 males and 629,395 females.

Education.—A University College has been founded at Pietermaritzburg, and there are 3 Government high schools, 2 preparatory schools, 73 primary schools, 2 art schools, 1 agricultural and trades school, 5 Indian schools, and 4 Government schools for coloured children, 100 Government-aided schools, and 167 Government-aided farmhouse schools for European children. There are also 2 Technical Institutes, 39 Indian schools, 315 native schools, and 18 coloured schools, which receive Government aid, and a large number of private schools.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (white and coloured), 19,347.

In Durban (population, May 7, 1911, 69,187), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, the bar being no longer existent, for 1908 being 33 ft. 7 in.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. C. J. Smythe.

Executive Committee, F. C. Hollander, J. Dyson, J. McAustin, J. P. Whyte.

Provincial Secretary, G. T. Plowman, C.M.O.

Natal, 6,800 miles; transit, 20 days.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amaputaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpiet-rsburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

The Province of the Transvaal has a total area of 110,426 square miles, about 20,000 square miles lying within the tropics. The Census of 1911 showed a population of 1,686,212, of whom 971,555 were males and 714,657 females; the population comprised 420,562 Europeans or whites, 1,219,845 natives, and 45,805 other coloured races. In 1916 there were 19,821 births (16,010 European), 14,099 deaths (5,313 European), and 6,844 marriages (4,447 European).

Religion.—The religious statistics for 1911 are:—

Churches.	Whites.	Others.
Dutch Churches	204,058	24,634
Anglican	89,805	51,355
Presbyterian	24,739	6,670
Methodists	27,938	92,969
Roman Catholics	22,312	6,439
Lutherans	6,618	101,271
Other Christians	13,801	24,353
Jews	25,892	...
Hindus, &c.	89	13,672
No Religion	2,460	943,616

Education.—There were 892 schools (15 for coloured children) in 1916, with a total enrolment of 86,877 and an average attendance of 72,946, and 3 normal colleges. There were also 298 native schools, with 19,863 pupils.

The Capital is PRETORIA, pop. 1912, 48,609 (white 29,660, coloured 18,949); the principal town being JOHANNESBURG (the centre of the Witwatersrand goldfields), population in 1912, 237,220 (white 120,411, coloured 116,809).

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 36 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. A. G. Robertson.

Executive Committee, B. D. G. Pienaar, C. T. Z. van Veyerer, G. Hartog, D. Dingwall.

Provincial Secretary, A. B. Roberts.

Pretoria is distant from London 7,200 miles; transit, *via* Capetown, 19 days.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 50,389 square miles, and is divided into 24 districts. The population at the last three censuses was:—

Year.	White.	Coloured.	Total.
1890	77,716	129,787	207,503
1904	142,679	244,636	387,315
1911	175,189	352,985	528,174

In 1911, of the whites, 94,488 were males and 80,701 females; and of the coloured races, 183,030 were males and 169,955 females.

Religion.—In 1911 the adherents of the Dutch Reformed Church numbered 175,311; Wesleyans, 88,857; Anglicans, 42,401; Presbyterians, 7,549; Congregationalists, 8,368; Lutherans, 8,727; Roman Catholics, 5,696; Jews, 2,808; and "No Religion," 173,336 (173,192 natives).

Education.—Higher education is under the control of the Union Ministry. In 1916 there were 817 public and aided private schools, with an enrolment of over 35,600 pupils, and, except when the parents object, both official languages are taught.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 26,929 (14,760 whites, 12,169 coloured) in 1912. A new sewerage system and an additional water

supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members. Administrator, Hon. C. H. Wessels.

Executive Committee. D. J. de Villiers, General F. J. W. J. Hattingh, A. A. Cilliers, D. J. Malan.

Provincial Secretary, A. M. N. de Villiers. Bloemfontein is distant from London 6,700 miles; transit, *via* Capetown, 19 days.

GERMANY'S LOST COLONIAL EMPIRE.

THE German Colonies, at the commencement of the War, had a total area of 1,134,239 square miles, with a population of about 14,890,000, of whom 24,170 (including garrison and police) were whites. Of these whites, about 18,500 were settled Germans. Details are given below.

	Area in Sq. Miles.	Receipts.	Expenditure.	Imports.	Exports.
		£	£	£	£
AFRICA—

Imperial Crown Colonies and Protectorates.

NOTE.—The Indian Empire, Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa are shown separately. The following list includes the British Dominions and Protectorates which have not yet received "Responsible Government."

ASCENSION.

an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat., and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. The island is under the Board of Admiralty, by whom an officer is appointed as commandant. The inhabitants consist of officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being about 100 (exclusive of 40 members and servants of the Eastern Telegraph Co.), with about 35 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is fortified, and is connected by the Eastern Telegraph Co. with St. Vincent, St. Helena, Sierra Leone, and Buenos Aires. It now possesses a steam factory, while there is also an excellent hospital and sanatorium. Partridges are being preserved for sporting purposes, and steps are being taken to exterminate the rabbits, which were formerly preserved and now prove a pest. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand, 122 being "turned" during 1914, their weight being from 500 to 800 lb. The sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month, their eggs being much appreciated by the inhabitants. In 1915 there were about 15 acres of ground under cultivation, producing vegetables and a small quantity of fruit, and there is also a small amount of pasturage for sheep and cattle.

Commandant, Major H. C. Bennett, C.M.G., R.M.L.I.
Surgeon, F. J. D. Twigg, M.B., R.N.
Staff Paymaster, A. H. Payne, R.N.

Imports from U.K. (1917) £7,666
Exports to U.K. (1917) 120

Transit from London, about 14 days.

BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1917 of 59,928, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma,

Harbour Island, Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay, Ragged Island, and Bimini. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1917 being valued at £164,415. The fruit trade is principally with the United States, bananas, coco-nuts, fruit and vegetables being exported. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being about 20,000 acres, and the value of Bahamas hemp fibre exported in 1917, £181,700. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members, and an elective Representative Assembly of 29 members.

BARBADOS.

the most windward of the West India Islands, is situated in 130° 5' N., and longitude 59° 41' W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The estimated population, Jan. 1, 1918, was 186,656. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by

which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1912, 16,648), on the shores of an open roadstead (Carlisle Bay).

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long, comprising an area of about 19 square miles, and containing (Census 1911) a population of 18,994, of whom 6,691 are white, exclusive of army and navy. The estimated population on Jan. 1, 1917, was 21,629 (7,396 white, and 14,233 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly fortified dockyard.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine

parishes. There are 1,303 electors, whose individual qualifications are the possession of freehold property of not less value than £60.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 6° 10' S., and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celebes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within the Dutch possessions in the East Indies. The remainder of the island is under British protection.

BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population is 227,000, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large num-

ber of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 7 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

	1915.	1916.	1917.
*Revenue	\$1,992,067	\$2,130,203	\$2,384,553
Expenditure ...	1,035,974	1,085,331	1,155,699
Exports	7,419,294	8,692,644	9,223,427
Imports	4,479,847	4,323,711	5,352,746

The imports from the U.K. in 1917 amounted to £18,239, and the exports to the U.K. to £600,736.

The chief products are timber, tobacco, rubber, sago, rice, gums, gutta-percha, coco-nuts, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Gold has been found.

	1916.	1917.
Exports of Leaf Tobacco...	\$1,519,155	\$1,479,458
" Rubber	4,327,195	5,439,123
" Timber	774,944	375,387

Coal.—Coal of good quality is now being produced at the rate of 7,000 tons per month at Sebatik, in the south-eastern corner of the territory. Large sums have been expended in equipping the colliery with modern machinery, and it is anticipated that the industry will become a most important factor in the progress of North Borneo.

Railway.—A railway has been constructed from Jesselton, the chief port on the west coast, to Melalap in the interior, a distance of about 100 miles. From Jesselton it runs down the coast to Beaufort, the centre of the rubber industry, whence it turns inland. There is a branch from Beaufort to Weston on the coast, a distance of 20 miles additional.

There are four wireless stations in the country. These are situated at Sandakan, Jesselton, Kudat, and Tawau.

There is a native military force of 800 men under European officers, with one machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton. There are numerous Chinese settlements.

The British North Borneo Company.

Court of Directors.

Rt. Hon. Sir West Ridgeway, G.C.B., G.C.M.G., K.C.S.I. (Chairman).

BRUNEI.

Sultan, H. H. Mohamed Jema'ul-alam, C.M.G., suc. May 11, 1906.

A native State on the north-west coast of the island of Borneo. The total area is about 4,000 square miles, the estimated population being 30,000 (1911). The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 10,000, and is built entirely on the water, except the Chinese quarter which is on land, communication being possible only by boat.

High Commissioner, The Governor of the Straits Settlements.

British Resident, Brunei, G. E. Cator.

Executive Engineer, P. W. D., Edmund Roberts (who also acts as Officer-in-Charge).

Treasurer & Supt. Customs, E. G. Goldfinch.

Chief Police Officer, G. McAfee.

Brunei is 5 hours by steamer from Labuan, and communication is now regularly maintained.

BRITISH GUIANA.

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 90,277 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1917, was estimated at 313,999, of whom 137,959 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate is hot, but not unhealthy. The cultivated portion of the country, amounting to about 172,747 acres (of which acres 75,154 are in sugar-cane), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like Holland, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River

is the Kaieteur Falls, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The birth-rate in 1917 was 28.4, and the death-rate 30.4 per 1,000. The chief product is sugar, which forms 66 per cent. of the export trade. The leading exports for the year 1917 were as follow:—Sugar, value £2,500,029; rum, £558,111; diamonds, 16,985 carats, valued at £38,706; timber, £5,447; balata, £198,863; and rice, £236,418. There are about 13,000 aboriginal Indians; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected, and a Combined Court including the members of the Court of Policy together with six elected Financial Representatives; with an Executive Council, consisting of the Governor, 5 official and 3 unofficial members nominated by the Crown. There are 1,804 miles of post-office telephone wire and 556 of telegraph lines, with 73 post-offices. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29' 5" to 15° 53' 55" N. latitude and 89° 9' 22" to 88° 10' W. longitude. Its extreme

length and breadth are 174 m. and 68 m. respectively; it is bounded on the north by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 7,652 sq. miles, with a population (Census 1911) of 40,458—20,374 males and 20,084 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood; export of mahogany, 1916, 6,986,476 ft. Sugar is grown, and rubber and cacao plantations have been started. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes, grow well, while inland there are extensive regions of good pasturage, and there are indications that gold and other minerals exist. About 60,000 acres are under cultivation. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at \$2 per acre, plus cost of survey, which averages about \$1.25 per acre, or leased at an annual rental of 25c. to 30c. per acre. There are 56 primary schools in the colony, and 5 schools with secondary departments in Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 3 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, are situated between the meridians 79° 44' and 81° 26' W., parallels of 19° 15' and 19° 46' N., and consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 225 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas."

The islands were originally a rendezvous for pirates, as is evidenced by the finding every now and again of "treasure" buried in the earth close to the sea coast.

There is very little sickness attributable to the climate and no malarial fever or other tropical or sub-tropical disease. The birth rate in 1915-16 was 34, the death rate 10 per 1,000. The population in June, 1911, was 5,564 (2,322 white, 2,211 coloured, and 1,031 black). The inhabitants lead a seafaring life; the principal industries are coco-nut planting, turtle fishing, and cattle raising.

The government is administered by a Commissioner, assisted by the "Justices and Vestry," in the same manner as the government of the Turks Islands. The principal town is Georgetown, in Grand Cayman, population (1911) 1,449.

Commissioner & Judge of the Grand Court,

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55' - 9° 50' N. lat. and 79° 42' - 81° 53' E. long. Its area is (with outlying islands) 25,481 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1911) was 4,110,367, the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but five years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and dry grain. The principal exports are tea, coffee, and products of the coco-nut palm, cinchona, rubber, cocoa, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fourth of the island is under cultivation, and the leading areas in 1917, in acres, were:—Rice, 702,165; other grain, 133,028; tea,

508,779; coffee, 810; coco-nuts, 904,674; rubber, 294,160; cinnamon, 41,753; cocoa, 45,783; and tobacco, 12,625. The live stock in 1917 included 1,577,464 horned cattle, 86,103 sheep, 193,204 goats, 62,721 pigs, and 3,086 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Mannar, off the N.W. of the island, yielded a revenue of Rs.2,405,645 in 1905. The manufacture of salt is a Government monopoly.

There are 706 miles of railway open, 605 being 5 ft. 6 in. gauge and 101 miles 2 ft. 6 in.; and in 1916 the post and telegraph offices numbered 516, there being 6,952 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by an Executive Council of 7 members, and a Legislative Council of 21 members, including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island. Four of the ten unofficial members are elected, the rest nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

THE MALDIVÉ ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been hominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muhammadans. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coconut coir, and tortoiseshell.

Colombo, distant from London 6,300 miles; transit, 16 days.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 32° 17' and 34° 35'. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The estimated population on Dec. 31, 1917, was 298,775, of whom 20.59 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, ashestes, aniseed, sponges, sumac leaves, terra umbra, gypsum, and salt. The fertility of the soil has for centuries been proverbial. In 1916 the wine export was 1,243,186 gals., and that of spirits 43,638 gals., the bulk of the wine and spirits going to Egypt. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was, until November, 1914, when it was formally annexed to the British Empire, still nominally part of the Ottoman Empire, the amount payable to the Sublime Porte yearly being £87,800 for revenue, £5,000 in respect of the produce of State lands, and 4,166,220 oke of salt in kind (an oke = 28 lb.). This sum was not actually paid to the Sultan, but retained as part payment of the loss sustained by England and France in paying the deficiency on the

Guaranteed Turkish Loan of 1855. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of 18 members, 6 being official and 12 elected. The island is divided into three electoral districts, each returning one Muhammadan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Muhammadan. There is also a Supreme Court for the whole island, consisting of two English judges.

The capital is Nicosia (Lefkosa), near the centre of the island, with a population of 16,052 in 1911; the other principal towns are Larnaca (population 9,262), Limassol (10,302), Famagusta (5,327), Kyrenia (1,726), and Paphos (3,435).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Evrychou, 15 miles, in 1915. There is a regular service of steamers from Egypt.

EAST AFRICA PROTECTORATE.

A British Protectorate was announced over the territories of the Imperial British East Africa Company on June 18, 1895, and the Company handed over the administration on July 1, 1895. The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3, 1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased to it by the Sultan of Zanzibar, or acquired by treaties entered into with native chiefs.

These territories are now comprised under the name of "The East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, as also the vast territories in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the Juba) and north-east, by an agreement with Italy (1891), and on the north by an agreement with Abyssinia in 1908. On the west the Protectorate adjoins that of Uganda.

The administration of the Protectorate is carried on under the Colonial Office. The title of "Commissioner" was changed to "Governor" in 1907, and Legislative and Executive Councils were instituted.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into eight provinces, which are subdivided into districts and sub-districts: (1) Seyidie, (2) Ukamba, (3) Tanaland, (4) Jubaland, (5) Kenya, (6) Naivasha, (7) Nyanza, (8) Northern Frontier District, of which the centres of administration are respectively Mombasa, Nairobi, Lamu, Kismayu, Nyeri, Naivasha, Kisumu, and Moyale. Of the provinces Ukamba and Naivasha are best suitable to colonisation by Europeans. There is also a considerable region within the boundaries of the Protectorate which is still undeveloped, and has not yet been included in any administrative district. The population of the Protectorate has been estimated lately at 4,000,000, but no accurate census has ever been taken. Its area is approximately 200,000 square miles.

The East Africa Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the river Tana. The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31, 1893. Witu is now regarded for administrative purposes as part of Tanaland.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 30,000, of whom 300 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between

Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions radiating from the main Uganda Railway telegraph system to Teveta, Fort Hall, Southern Masai Reserve, Eldema Ravine, Keriche, Usin Gishu, Machakos, Kisii and Mumias; also telegraph connexion between Mombasa and Tanga. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. Nairobi, the capital of the Protectorate, and central station of the Uganda Railway, has a population of about 25,000, of whom 1,200 are Europeans. There are also some 400 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are hides and skins, grain, rubber, fibre, and copra; the principal imports are piece-goods, rice, grain and flour, building materials, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

Communication with England by Union Castle Line *via* Suez Canal.

Suez, Vice-Consul, W. A. Fox Strangways.

Council of Ministers.

Interior, Hussein Rushdi Pasha, G.C.M.G. (President of the Council).

Finance, Yûsuf Wahba Pasha.

Public Works and War, Isma'il Sirri Pasha, K.C.M.G.

Justice, Abdul Khâliq Sarwât Pasha.

Education, Adli Yeghen Pasha.

Agriculture, Ahmad Hilmi Pasha.

Waqfs (Pious foundations), Ibrahim Fathi Pasha.

GOVERNMENT DEPARTMENTS.

Finance, Financial Adviser, Lord Edward Cecil, K.C.M.G., D.S.O.

U.S. of State, Hon. R. C. Lindsay, M.V.O.

Interior, Adviser, J. Haines.

U.S. of State, Ga'far Wali Pasha.

Public Works and War, U.S. of State (Public Works), Sir M. Macdonald, K.C.M.G.

Justice, Adviser, Sir W. E. Brunyate, K.C.M.G.

U.S. of State, Muhammed Shukri Pasha

Education, Adviser, D. Dunlop, LL.D.

U.S. of State, Isma'il Hassanein Pasha.

Agriculture, U.S. of State, J. Langley.

Consulting Agriculturist, G. C. Dudgeon.

Foreign Affairs, U.S. of State, Negib Ghâli Pasha.

State Railways, General Manager, Col. Sir George Macauley, K.C.M.G.

Area and Population.—Egypt is a British Protectorate, by proclamation of December 18, 1914, and lies in the north-eastern corner of the African continent, between 22° 31' 35" N. lat. and 16° 30' E. long. The total area is 363,181 square miles, with a population at the census of 1927 of 12,566,000, of whom 10,366,046 are Egyptians, 635,012 Bedouins, 65,162 Nubians, and 221,139 foreigners (69,725 Turks, 61,973 Greeks, 34,926 Italians, 20,653 British, 14,591 French and Tunisians, 7,704 Austro-Hungarians, 2,470 Russians, 1,847 Germans, 2,216 other

Europeans, and 1,385 Persians). At the same date, Muhammadans numbered 10,466,286, Christians 881,692, Jews 36,635, and other religions 206.

Government.—By firman of 13 Feb., 1841, the office of *Vahî*, or governor, was made hereditary in the person of Muhammad Ali (1805-1848) under the title of Khedive, subsequent rulers being Ibrahim (1848), Abbas I. (1848-1854), Said (1854-1863), Ismail (1863-1879), Tewfik (1879-1892), Abbas II. (1902-1914), Hussein Kamil, the first Sultan of Egypt (1914-1917), and the present ruler, Sultan Fuad I. There is a Council of Ministers appointed by the Sultan, with a President who acts as Prime Minister. The various Ministers prepare drafts of administrative decrees, which are submitted to the Council. When approved and signed by the Sultan these decrees become law. The British Financial Adviser attends the meetings of the Council, but has no vote. There is a Legislative Council consisting of (a) the Ministers, (b) 66 elected members, and (c) 17 nominated members. This body is mainly consultative, the legislative power resting with the Sultan and his Ministers.

Local Government.—For the purposes of Local Government, the chief towns (Alexandria, Cairo, Ismailia and Port Said, and Suez) constitute governorates (*muhâfazas*), and the remainder of the occupied country is divided into provinces (*mudîrias*), subdivided into districts (*markaz*). There are provincial councils, with restricted powers of local government.

Justice.—Justice is administered under four distinct systems, all except the Consular Courts being supervised by the Ministry of Justice, to which a British Judicial Adviser is attached. The systems are (1) *Mehkemehs*, or Courts of the Cadis, administering Muhammadan Law following the Hanafite Rite; (2) *Native Tribunals*, containing native and foreign judges, and dealing with criminal charges against natives and with civil charges in which both plaintiff and defendant are local subjects; (3) *Mixed Tribunals*, founded in 1876 and dealing principally with civil actions between foreigners of different nationalities and between foreigners and natives; and (4) *Consular Courts* (of the 15 Powers possessing rights to them by treaty), with criminal jurisdiction over foreigners, and judging civil actions between foreigners of the same nationality.

Defence.—The Egyptian Army is recruited by compulsory service, from which exemption is granted to professors, students, &c., and may be purchased for £500. The Commander-in-Chief is appointed by the Sultan, with the consent of the British Government. The British Force in Egypt, since the outbreak of war in Europe, has undergone many changes, and it is impossible to give any definite information as to the number and nature of the troops stationed there. The Commander-in-Chief at present is Gen. Sir E. H. H. Allenby, K.C.B.

Education.—Primary education is conducted in *maktabs*, or elementary vernacular schools, some of which are under native management and some under the control of the Ministry of Education. Native education is completed at the Azhar University at Cairo, the principal university of the Moslem world. There are also Government Secondary, Special and Technical Schools, and Professional Colleges of Law, Medicine, Education, and Engineering. A National University, under entirely Egyptian management, has been founded at Cairo.

Production and Industry.—The total area of Egypt is estimated at 232,440,000 statute acres, of which about 7,000,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Such portions of the alluvial tracts as can be irrigated by the Nile (about 5½ million acres in 1912) are cultivable, irrigation being employed for this purpose on (a) the basin system, the land being divided into rectangular areas of varying size and surrounded by banks, between which the waters of the Nile are admitted during the flood season (August), and there retained for about 40 days, when it is run off and seed is sown broadcast on the land; and (b) the *perennial* system, consisting of deep canals containing water all the year round and enabling two or more crops to be grown. For irrigation purposes barrages have been built at Esna and Assiut, and others in the Nile delta have been restored and improved; while a storage dam has been constructed at Aswân, and a barrage built at Zifta. The increase in the value of the land owing to these labours is enormous, and some 2,000,000 acres have been added to the cultivable area.

The corn crops include wheat, barley, maize (autumn and summer), rice (autumn and summer), and beans; while cotton of excellent quality is grown, the crop in 1916 being 6,020,000 *kantars* (99 lb.). The live stock in 1915 included 553,632 cattle, 538,209 buffaloes, 35,015 horses, 21,611 mules, and 546,707 donkeys.

Minerals.—Building stone, clays, gypsum, gold, lead and zinc ores, manganese ores, natron, nitrate of soda, petroleum, phosphate of lime, peridot, salt, and turquoise are produced on a commercial scale; and alum, copper ores, emeralds, granite, iron ores, nickel, ochres, ornamental stones, and sulphur are known to exist in more or less important quantities.

Manufactures.—There are some cotton mills in the Delta for the manufacture of rough calico and in Upper Egypt are sugar, rice, and flour mills, and a certain amount of pottery is made. Cigarette factories centre at Cairo and Alexandria, from imported tobacco.

Communications.—The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway), on 31 March, 1917, was 1,666 miles. 30,867,749 passengers and 6,392,965, including service transports, tons of merchandise were carried during 1916-17, the net receipts being £21,413,222. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are 816 miles of light railways exploited by public companies. The principal port is Alexandria, where 346 vessels (641,050 tons) entered and 366 vessels (687,684 tons) cleared in 1917. The traffic through Port Said amounted in 1915 to vessels entered 285, cleared 290. There were, in 1916, 2,028 post offices and stations, dealing with inland correspondence, 44,792,000; foreign, 37,716,000; and on March 31, 1917, 4,610 miles of telegraphs, with 18,930 miles of wire, over which 1,540,878 messages were transmitted.

Upper Nile (Malakal), Maj. C. H. Stigand.

Area and Population.—The Sudan extends from the southern boundary of Egypt at 22° N. lat. to the northern shore of the Albert Nyanza at 2° 19' N. lat. and reaches from the French Sahara (about 18° 15' E. long.) to the north-west boundary of Eritrea (38° 30' N. long.), being about 1,400 miles from north to south and 1,200 miles from east to west at its extreme limits, with a total area of 984,520 square miles.

The estimated population is close on 3,000,000, composed of Arabs, Negroes, and Nubians (of mixed Arab-Negro blood), with a small foreign element, including some 3,000 Europeans.

Government.—The Anglo-Egyptian Sudan is administered by a Governor-General, aided (since 1910) by a Council, nominated from amongst the officials of the Government. All ordinances and laws are made by the Governor-General in Council. The Sudan does not fall under the jurisdiction of the Mixed Tribunals of Egypt, and has its own civil and criminal codes based on those of India and Egypt.

Local Government.—The Anglo-Egyptian Sudan is divided into 15 Provinces (*mudirias*) under governors, and is sub-divided into districts (*mamurias*). The governors are all British, and are British officers of the Egyptian Army or Members of the Sudan Civil Service.

Defence.—Several regiments of the Egyptian Army are stationed in the Sudan, which forms an excellent recruiting ground, and the Sirdar of the Egyptian Army is Governor-General of the Sudan. A detached body of the British Army is quartered at Khartoum, under the command of the Governor-General. The police and the locally recruited irregulars (*jehadias*) are under provincial administration.

Education.—In addition to native Koran schools there are over fifty elementary vernacular schools under the control of the Education Department; seven primary schools at Khartoum, Omdurman, Berber, Wad Medani, Halfa, Suakim and Athara, where instruction is given in English as well as Arabic; a secondary school at Khartoum (Gordon College); a training college (also at Gordon College); and technical and trade schools at Khartoum, Omdurman, and Kassala.

Production and Industry.—About 2,500,000 acres were under cultivation in 1915, and this area is being extended by irrigation canals, from which the Nile water is distributed over the land by means of water canals, and by the basin system (see Egypt) in the Dongola province. The chief crop is *dura* (African millet), which forms the staple food of the Sudanese. Wheat, barley, dates, lentils, beans, onions, and melons are also grown, and ground nuts and sesame are produced for oil, while an excellent quality of cotton is also grown. The exports of cotton in 1914-15 amounted to about 8,500,000 lb. The forests of the south-west and south contain valuable timber, and gum and rubber are derived from the forests of Kordofan and the valley of the Blue Nile. The live stock includes camels, horses, cattle, sheep, goats, and asses, while ostrich farms are established in the central region. Gold was once worked in large quantities, and the mines of Um Nabardi and Gabait have been reopened. Lignite, iron, and copper are known to exist, and the last two are worked by natives in the Bahr-el-Ghazal *mudiria*.

Communications.—In 1915 about 1,500 miles of railway were open for traffic. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal; and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telephone lines being 5,000 miles in 1915. There are 78 post and telegraph offices.

	1917.	1918.
Revenue & Expenditure	£21,806,000	£21,255,000
Imports

CAPITAL, Khartoum, at the junction of the White and Blue Niles. Population about 30,000. Opposite Khartoum, on the Blue Nile, is Khartoum North (35,000), and on the White Nile is Omdurman (60,000), the former Mahdist capital. The journey from Cairo to Khartoum by Egyptian State Railways takes 4½ days. The mails leave Cairo twice weekly.

THE SUEZ CANAL.

The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares, the purchase price being £4,000,000, and their value on 31 March, 1915, £29,993,000.

The Suez Canal was opened in 1869. The total length of the canal is 99 miles, with a width of 37 metres (121 ft. 5 in.), having cost £24,000,000 to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9·14 metres (30 feet). By a convention, signed on 29 Oct., 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest). By the completion of a swing-bridge at Kantara, there is now direct railway communication from Cairo to Palestine.

The transit receipts in 1869 were £2,178; in 1911, £5,331,779; in 1912, £5,397,731; in 1913, £5,012,024; in 1914, £4,832,340; in 1915, £3,611,259; and in 1916, £3,044,794.

The present rate of transit dues is 8fr. 50c. per ton, and 8fr. 50c. for vessels in ballast.

The net dividends for the year 1915 amounted to 120 fr. on the ordinary 500 fr. shares, and 97·915 fr. on the Actions de Jouissance. In 1916 these were respectively 90 fr. and 67·378 fr.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1910, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
1911	4,969	18,324,800	63·0
1912	5,373	20,275,120	63·4
1913	5,085	20,033,884	60·2
1914	4,802	19,410,000	66·5
1915	3,708	15,266,000	76·3
1916	3,110	12,325,347	79·6

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'–53° S. lat. and 57° 40'–62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1916 of 3,220. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the

sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Argentine Republic established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonised, and from that time to the present have so continued, being, as a whole, the most southerly organised colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep; kitchen-gardens occupy the only cultivated part, with the exception of one station situated in a sheltered position on the West Falkland, where a considerable crop of hay is grown. The population is mainly British, and is principally engaged in sheep-farming and seafaring industries. The chief exports in 1916 were wool, whale-oil and guano, tallow hides and sheepskins. The total tonnage of vessels entered and cleared in 1916 was 510,047. There are three places of worship (one Church of England, one Roman Catholic, and one Nonconformist). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

On Dec. 8, 1914, a brilliant naval action was fought off the Falklands between a British squadron under Adm. Sir Doveton Sturdee, and a German squadron under Adm. von Spee, resulting in the sinking of four of the five German vessels engaged, without any loss on the part of the British.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is a dependency of the Falkland Islands. Among other dependencies are the South Shetlands; the South Orkneys (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station); the Sandwich Group; and a part of the mainland of the Antarctic, known as Graham's Land.

CHIEF TOWN, Port Stanley. Population (1911), 925.
Port Stanley is distant about 8,130 miles; transit, 25 days, monthly from Liverpool. Telegrams by cable and wireless telegraphy *via* Montevideo.

FIJI.

This is a group of 200 to 250 islands (of which some are, however, more uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45' 21' 10" S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,068 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), coco-nut, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, rubber, maize, hides and pelts, and beche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 6 members. Laws are passed by a Legislative Council of which the Governor is president containing 12 nominated members (one specially representing Indian interests), 7 elected members, and 2 native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (Dec. 31, 1916) was estimated at 163,565 (90,429 native Fijians, 59,565 East Indian immigrants, 4,705 Europeans, and some Polynesians and others).

Suva is 11,000 miles from London; transit from London, *via* Vancouver, about 30 days; and *via* Sydney, about 50 days.

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the Treaty of Versailles, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 2, 1911, was 7,700, and that of the Protectorate 138,401. The climate is unhealthy during the rainy season, *viz.*, from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form seventy per cent. of the total exports. They were sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil, but, since the outbreak of war, the export trade has been mainly with the U.K. Beeswax, palm kernels, hides, and calabashes are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 92 men), which performs both civil and military duties. The government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

GIBRALTAR.

a rocky promontory, $2\frac{3}{4}$ miles in length and $\frac{3}{4}$ of a mile in breadth, and 1,439 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1917 5,298 vessels entered, with a total tonnage of 9,711,227. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. There is an enclosed harbour with an area of about 400 acres, three graving docks, and docking accommodation for the largest battleships in the British Navy. The civilian population (Census of April, 1911) was 19,120.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation, there being no executive or legislative council.

GOLD COAST.

The Gold Coast Colony comprises a portion of the coast of the Gulf of Guinea from about 3° 7' W. to 1° 14' E. of Greenwich, with a protectorate extending inland to an average distance of 440 miles, or to the 11° of N. latitude, bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by the German colony of Togoland. The total area of the colony and its dependencies is estimated at 80,235 sq. miles. The population (Census of April 2, 1911) was: Gold Coast Colony, 857,516; Ashanti, 287,814; Northern Territories, 357,519; total, 1,503,386, of whom about 1,000 are Europeans. The natives are almost all Pagans, but the number of Muhammadans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Kormantyne, and subsequently many forts and factories were established by the English and other nations. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the coast, and also built forts at Dixcove, Sekondi, Kommenda, Anamabo, Winnebah, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1867, when an exchange was effected which gave all those on the west of the Sweet River to Holland and those on the east to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the Ashanti

war of 1873-4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. In this war, as in those of 1896 and 1900-1, the British arms were completely victorious, and the kingdom of Ashanti has now been added to the dominions of the British Crown.

The trade is principally with the United Kingdom. Gold is found in considerable quantities. The principal exports in 1916 were: Cocoa, £3,847,720; gold, £1,440,635; lumber, £93,980; rubber, £75,865; palm kernels, £85,899; and kola nuts, £130,566. The chief imports are textiles, alcohol, and hardware. The climate, generally, is hot and moist and very malarious, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters, and has established schools of its own. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1916 was 1,565,258 (British 1,286,302), in 1915, 1,628,698 (British 1,354,217). 1,613 miles of telegraphs have been established in the colony, of which 290 miles are in Ashanti and 203 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi (168 miles). Another line runs from Accra to Mangoase (39 miles), and further developments are being surveyed.

The seat of government is Accra* (population 19,588). The other principal towns are: Cape Coast (11,269), Ada (1,572), Elmina (5,079), Sekondi (9,122), Tarkwa (2,426), Kwitta (3,630), Axim (3,285), Kumasi (18,853), Saltpond (3,540), and Winnebah (5,840). The government is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 6 official and 4 unofficial members.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, in $22^{\circ} 10' - 22^{\circ} 34'$ N. lat. and $113^{\circ} 52' - 114^{\circ} 30'$ E. long., and of a portion of the mainland.

Hong Kong is an island about 10 miles long and from 2 to 6½ miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lycem-moon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; British Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 392 square miles, with an estimated population (1917) of 535,100 of whom 521,600 were Chinese. The white residents, including naval and military, numbered about 9,000.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. The port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1916) 18,190,729 tons; (1917) 17,052,534 tons. A railway, of which 23 miles belong to the Government, runs from Kowloon to Canton; the length north of the Sham Chun River (which is the boundary of the British territory) is

controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tau-kok, a distance of 7 miles. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,820 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 62° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 83 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly sugar, opium, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

Much encouragement is given by the Government to education in the colony. In 1917 there were 492 schools subject to Government supervision, attended by 23,935 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

CAPITAL, Victoria; population (1917), 280,700.

JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 32' North lat. and 76° 11'—78° 31' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1911, of 831,383; the whites numbered 15,605; coloured, 163,301; blacks, 630,181; East Indians, 17,380; Chinese, 2,111; not specified, 2,905.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 198 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the savings banks was 40,393 (1918). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 10, as the King or the Governor may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1911) 57,379; the next in importance are Spanish Town, pop. 7,119; Montego Bay, 6,616; and Port Antonio, 7,074. Chief exports (1917): Fruit, £249,020; coffee, £116,976; sugar, £704,050; dye-woods, £159,173; pimento, £71,635; rum, £55,739; cocoa, £117,853; minor products, £732,622.

* The Government publishes annually a *Handbook of Jamaica*, full of information respecting the history and personnel of the island.

LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombrero, under Commissioners, all, except the latter, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The population of the federal colony at the Census of 1911 was 127,189. The General Legis-

* Seconded for duty in India as Asst. Emigration Agent.

lative Council consists of 8 *ex-officio* and 8 elective members, with the Governor as President.

(1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6' N. lat. and 61° 45' W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,080 acres, of which nearly 17,000 are undercultivation. The population (with Barbuda) in 1911 was 32,265, including 13,980 males and 18,276 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is being planted, and the island also exports molasses, tamarinds, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

	1915-16.	1916-17.	1917-18.
Revenue	£51,526	£63,929	£66,768
Expenditure	56,687	56,100	64,398

Total exports	216,640	366,894	368,378

CAPITAL, St. John's, population (1911), 7,910.

President & Island Sec. (the Colonial Secretary of the Leeward Islands)	
Treasurer, F. W. Griffith	£350
Magistrate, R. H. K. Dyett	500
Supt. of Public Works, C. K. Stretch	400
Postmaster, A. C. K. Tibbits	250

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35' N., long. 61° 42' W. Area, 62 square miles. Population, 1,000. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Magistrate, O. Nugent	£50
-----------------------	-----

Manager, B. H. Jarvis £200
Redonda, a small island with a phosphate industry, has a population of about 20.

(2) ST. KITTS-NEVIS (WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population at the Census of 1911 of 43,303, and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 78° to 85°.

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 4,314 feet (Mount Misery). The capital, Basseterre, pop. (1911) 8,159, is a port of registry, and had 67 vessels of 1,213 tons in 1916.

Nevis (separated from St. Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1911 of 12,495. Sugar-cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1911), 912.

Anguilla is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1911), 4,075. Cotton is the principal product, and small stock are raised.

	1915-16.	1916-17.	1917-18.
Public revenue	£45,324	£60,086	£60,221
Expenditure	56,675	54,123	61,330
Public debt	42,975	41,158	10,876
Imports	169,112	206,515	206,594
Exports	167,557	455,142	372,515

Administrator, Maj. J. A. Burdon, C.M.G.

Clerk and Clerk of Councils, G. C. Johnson	£750 to £900
Treasurer, Registrar of Shipping & Shipping Master, Edward R. Jones	£300 and fees
Magistrates: St. Kitts, W. M. Wigley, £400; Nevis, C. C. Greaves, £300; Anguilla, S. B. Jones	£350
Supt. of Public Works, F. D. Pougnet, A.M.I.C.E.	425

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20' 15' 45' N. lat. and 61° 13' 61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55 to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coffee and fruit. The population was estimated at 39,800 on Jan. 1, 1918; included in this total are 420 Caribs, of whom 170 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic

invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population about 6,500, and Port-au-mouth, population about 1,000.

	1915-16.	1916-17.	1917-18.

(4) MONTSEERAT

is situated in 16° 41' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (Census 1911) of 12,196. Discovered by Columbus in 1493, it was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The chief exports during the year 1917 were cotton, £33,080; limes and its products £18,397; sugar, £7,827; papaine, £1,560; animals of all kinds, £2,806. The chief town is Plymouth, with a population (1911) of 1,534.

	1914-15.	1915-16.	1916-17.

Senior Medical Officer, J. C. McPherson	250		
Magistrate, &c., The Commissioner	300		

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1911 was 5,562. There is good pasturage for cows, sheep, and goats. Sugar and cotton are grown in increasing quantity; fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin

Gorda. The capital of the group is Road Town, on the south-east of Tortola; population (1911), 420.

	1915-16.	1916-17.	1917-18.
Revenue	£4,030	£5,041	£6,148

Exports	6,836	7,750	8,817
Commissioner and Treasurer (vacant)	£300		
Medical Officer, T. L. E. Clarke	250		

MALAYA.

(1) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,596 square miles, with a population in 1911 of 1,036,999. The principal towns are Kuala Lumpur (Sel.), pop. 46,718; Ipoh (Pk.), 23,978; Taiping (Pk.), 19,556; Kampar (Pk.), 11,604; Seremban (N.S.), 8,667; Klang (Sel.), 7,657; and Teluk Anson (Pk.), 6,927.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 876 miles of railway all constructed from revenue, including the Johore State Railway (120½ miles), which is leased from the Johore Government. There is through communication between Penang and Singapore. Lines on the West Coast through Kelantan are being constructed, to connect with the Southern Siamese Railways and afford free communication with Bangkok. The journey between Bangkok and Penang will then take 36 hours instead of, as at present, 6 days by sea. There are 2,468 miles of road, and 1,688 miles of bridle-paths, while the principal rivers are navigable for small boats.

One of the regions contributing largely to the raw products of the British Empire is the Malay Peninsula, and the most productive portion of the peninsula is that embraced by the four Federated Malay States. In the first half of 1917, the aggregate trade of these States was valued at over £20,000,000, an increase of more than £3,500,000 over the corresponding period of 1916, in which year a new trade record was established with £34,069,124 for the twelve months. Of course, the territory is greatly endowed by having tin and plantation rubber as its two richest products, but the figures given below show that it has other exports of great value. Last year the total export of rubber was 79,831 tons, and of tin 39,833 tons.

With the growth of the rubber industry, there has been a tendency to neglect some of the older products of the country, such as indigo, coffee, sugar, and pepper; and it may be mentioned that as recently as 1910 no less than 420 tons of pepper and 9,322 tons of sugar were exported from the Federated Malay States, apart from what was exported from other States of the peninsula. Gold has always been found in small quantities, chiefly in Pahang, and the export in

1916 amounted to 17,375 ozs., compared with 16,161 ozs. in 1915 and 13,319 ozs. in 1914.

The following table shows the relative importance of the exports from the Federated Malay States over a period of three years:—

	1914. tons.	1915. tons.	1916. tons.
Rubber	31,014	44,626	62,848
Tin	49,041	46,766	43,870
Copra	14,509	13,937	14,824
Rice and padi	17,491	17,204	11,239
Tapioca	2,912	2,471	1,747
Areca nuts.....	1,461	1,242	1,100
Gambier	562	710	668
Wolfram and scheelite ..	261	291	544
Coffee	556	496	367
Pepper	19	14	5
Sugar	10	4	4

The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 90°, and the minimum 70°.

The States maintain a regiment of Northern Indian troops (the Malay States Guides), and are policed by a mixed force of Indians and Malays, officered by Europeans.

(2) THE MALAY STATES NOT INCLUDED IN THE FEDERATION.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadism.

JOHORE, with an area of 9,000 square miles and a population (Census, 1911) of 180,412, occupies the southern extremity of the Malay Peninsula. Capital: Johore Bahru, population, 9,359. The rubber estates are important.

Revenue.....	\$7,976,862
Expenditure.....	4,602,433
Public Debt	4,000,000
Imports	12,565,727
Exports	41,825,980

Sultan, H. H. Ibrahim, G.C.M.G.; born, 1873; succeeded his father, 1895.

General Adviser, D. G. Campbell, C.M.G.

Legal Adviser, M. H. Whitley.

KEDAH, between 5° 5' - 6° 35' N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1911 was 245,986, and the approximate area 3,800 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 12,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 38 British officials, employed in the Public Works, Survey, Police, and Medical departments.

Revenue.....	\$3,276,732
Expenditure (including special services) ..	3,021,873
Public Debt	1,712,718

* Exclusive of allowances.

* Exclusive of allowances.

Sultan, H. H. Abdulhamid, K.C.M.G.
Regent, H. H. Ibrahim.
British Adviser, G. A. Hall.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 300 sq. miles, and the population is 32,740. The capital is Kangar, a few miles up the Perlis River. Rice is the principal crop.

	1916.
Revenue	\$224,774
Expenditure	178,593
Public Debt	556,838

Raja, H. H. Syed Alwi.
British Adviser, H. C. Eckhardt (acting).

KELANTAN lies between 4° 38' - 6° 15' N. and 101° 26' - 102° 45' E. on the east coast of the peninsula, with a total length of about 120 miles and a breadth of 50 miles. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut, and affording pasturage for large quantities of live stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and barren. The capital, Kota Bharu, 8 miles from the mouth of the Kelantan River, has a population of 12,000.

	1916.
Revenue	\$822,860
Expenditure	722,125
Public Debt	3,432,078

Sultan, H. H. Muhammed, K.C.M.G.
British Adviser, R. J. Farrer (acting).

TRENGGANU, between 4° 30' - 5° 45' N. and 102° 15' - 103° 30' E., lies south of Kelantan on the east coast of the peninsula. Area, about 6,000 square miles. Population (1911), 154,037. Industries of agriculture (mainly rice), silk weaving, shipbuilding, and tin mining. The principal exports in 1916 were dried fish (\$601,672), tin ore (\$478,501), wolfram (\$366,578), and copra (\$115,796). The capital, Trengganu, on the river of that name, contains 13,991 inhabitants.

	1916.
Revenue	\$236,798
Expenditure	234,687
Public Debt	193,126

Sultan, H. H. Sir Zainal Abidin, K.C.M.G.
British Agent, T. L. Humphreys.

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24½ square miles; COMINO—the site of the *Sultan's* disaster in 1889 and now a sanitary station—and several islets. The estimated civil population of the whole group, on April 1, 1918, was 224,323. In religion the Maltese are Roman Catholics. The lower orders are mainly Punie in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and

potatoes; figs and honey are plentiful. It was estimated that in 1917-18 the area under cultivation in Malta and Gozo was about 48,849 acres. It is estimated that 8,000 females are employed in making lace. The principal occupation of the people is in connexion with shipping. On Census day 1911 there were 22,882 persons living in Valletta, but the total population of the Colony was 1,820 to the square mile. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet; and an additional graving dock was opened on Feb. 12, 1892. There is also a hydraulic dock, originally constructed by private enterprise, which has been taken over by the Admiralty. Two new dry docks and both arms of the breakwater at the mouth of the principal harbour have now been completed. The military expenditure for 1917-18 amounted to £782,976. The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1917 (June, July, August and September) was 76° 1°. In winter the range is from 50° 6' to 58° 8'. In 1917-18 the highest temperature in the shade was 93° 6', and the lowest 41° 2'. Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 436, but its suburb, Rabato, had about 9,474 inhabitants in 1916-17. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. Malta possesses a University and Lyceum; 168 elementary and infant schools, 2 secondary schools, and 39 night schools, maintained at a total cost to the Government of £38,877 in 1917-18; in addition there are garrison schools, a Dockyard school, and 71 private schools which receive no grants-in-aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 20 official and 2 unofficial members, and by a Legislative Council, called the Council of Govern-

ment—9 official and 8 elected members. The Governor is President in both.

Since the commencement of the war Malta has contributed some 24,000 men to the various services.

In 1917-18 the Port of Valletta was entered by vessels (tonnage,).

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17' 57" 46' E. long. and S. lat. 19° 58'—20° 33', and comprising an area of 720 square miles. The permanent population at the Census of 1911 was 370,393, of whom 257,887 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 203,198 acres, 167,560 are under sugar, 20,000 under fibre, and 16,638 under other crops; the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1916, amounted to 837,858 tons, of which 660,722 were British. In 1916 there were 129½ miles of railway (119½ of 4 ft. 8½ in. gauge and 10 of 2 ft. 6 in.), 63 post-offices, 56 telegraph and 41 Government telephone offices in the island, with 621 miles of telegraph, including block telegraph for the railway, and 140 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of 4 official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, 8 being *ex-officio*, 9 nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has 2 members, and each of the country districts 1.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1916 amounted to Rs. 586,235. Of the pupils in the Government and aided schools, 59 per cent. are Roman Catholics, 2 per cent. Church of England, 1 per cent. other Christian denominations, 11 per

cent. Muhammadans, and 27 per cent. Hindus and others.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1911), 4,829. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, W. B. Lloyd Rs. 7,000

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1911, 517), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1911) is 1,344.

Transit from London to Mauritius, 28 to 30 days.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kameruns on the east. The Protectorate is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group

* Census figure (31 March, 1911). Estimated population on 31 December, 1916, 48,067.

with the former Protectorate of Southern Nigeria. The headquarters of Government is at Lagos, but it is proposed to establish a new capital at Kaduna, in the heart of the country. The area of the whole territory is 336,000 sq. miles, and the population roughly 16,500,000.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides and skins, and the export of ground-nuts is steadily increasing. During the last few years a considerable industry has arisen in connexion with tin-mining in the Northern Provinces. The Udi coalfields are of great extent and the coal promises to be of excellent quality. A railway is in operation between Lagos and Kano, a distance of 712 miles. Branch lines run from Minna and Baro (on the Niger), and from Zaria to Bukuru. Further railway extensions are in progress; the first train left Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (150 miles) in June, 1916. It will eventually be extended to Kaduna, to form a junction with the main line from Lagos to Kano. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

Transit to Lagos from Liverpool, 16 days.	
Cable communication to Lagos and Bony. In-	
land telegraphs, Lagos, Kaduna, Zungeru, and	
majority of important places.	

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern shore of Lake Nyassa and the Country southwards nearly to the Zambesi. The control of the administration was transferred from the Foreign Office to the Colonial Office on the 1st of April, 1904. The remainder of the territory is administered by the British South Africa Company.

The population of the Protectorate is estimated at 1,140,000, including 731 Europeans and 397 Asiatics, and it has a total area of 39,073 square miles.

The principal exports are cotton, tobacco, chillies, coffee, ground-nuts, maize, wheat, fibre, and tea. The cultivation and export of cotton and tobacco are considerable, and there are prospects of a steady development of these industries. Ivory and rubber are also exported. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. There are also twenty-five steamers on the Zambesi and Shiré rivers. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a piece of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

Chief towns: -Blantyre (population about 291 Europeans and 7,000 natives) and Zomba, the headquarters of the Government. Communication is maintained between Port Herald and Chinde by the African Lakes Company's steamers and the British Central Africa Co.

Between Chinde and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's line *via* Natal, and the British India Steam Navigation Co.

A railway, 113 miles in length, connecting Port Herald (the nearest port to the coast) with Blantyre, is open for traffic, and will probably be extended to Lake Nyasa *via* Zomba. A railway, 61 miles in length, connects the north bank of the Zambesi River with the existing line at Port Herald. Communication between the south bank of the Zambesi and Beira is also being undertaken, and when this line is completed Nyassaland will be linked to the South African railway system. The Protectorate is connected by telegraph overland with the Cape *via* Fort Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

PACIFIC ISLANDS.

High Commissioner, His Excellency Cecil	
Hunter Rodwell, C.M.G.	£1,000
(In addition to £3,000 as Governor of Fiji, and	
allowance of £150 as Consul-General for	
Western Pacific.)	
Chief Judicial Commissioner, Sir C. S.	
Davson, K.C.	£300
(In addition to £1,000 as C.J. of Fiji.)	

(1) *The British Solomon Islands*, protected since 1893, and consisting of Guadalcanar, Malaita, San Cristoval, New Georgia, and other islands situated east of New Guinea, with a total area of about 15,000 square miles. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1917-18 was £31,697, and the expenditure £25,000; exports, 1917-18, £149,743; imports, £154,743. White pop. 660; native pop. 150,000. The seat of government is Tulagi.

Resident Commissioner (actg.), C. H. Workman (and £50 allowance) £800 to £1,000

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group.

* Exclusive of allowances.

situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58' W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52' S. and long. 169° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1911), 30,523 natives, 301 Asiatics, and 297 Europeans. Revenue (1916-17), £24,142; expenditure, £25,166; imports (1915-16), £108,783; exports (1915-16), £183,248.

The Union or Tokelau Group, Fakaofu, Nukunono and Atafu, were included in the Protectorate in 1909, and annexed to H.M. Dominions in Feb. 1916 as part of the Gilbert and Ellice Islands colony.

Fanning Island, in lat. 3° 30' N., long. 159° 13' W., and *Washington Island*, 66 miles N.W. by W. of Fanning Island. Pop., 21 Europeans in connexion with Pacific cable station, and about 400 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of 27 Jan. 1916.

Resident Commissioner, E. C. Elliot £700 to £800 (and £50 allowance).

(3) *The Tonga or Friendly Islands*.—A protectorate over the Tonga Islands was proclaimed 19 May, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population on Dec. 31, 1914, of 23,121 natives of Tonga. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Tongatabu is the seat of government, the late King George Tubou II., who died in 1918, being the last of the independent kings in the Pacific. Soil generally is fertile; the principal exports are copra, fungus, green fruit, kava, and candle-bush. Revenue, 1916-17, £32,769; expenditure, £30,543; imports (1917), £114,290; exports, £125,443. The total shipping entered and cleared in 1917 was 47,180 tons, all of which was British. *Agent and Consul*, Islay Mcowan £850

(4) *The Phoenix Islands* (Wilkes, Gardner, Birnie, Hull, Enderbury, Phoenix, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (April, 1907), 144, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

Deputy Commissioner, Dr. W. T. Williams (H.M. acting Consul for the Society Islands). *Chief Magistrate*, Gerard R. B. Christian.

(6) *The New Hebrides Group* lies west of Fiji and south-east of New Caledonia. In 1906 a Convention was signed under which the administration of the group was assumed by Great Britain and France. British and French Resident Commissioners were appointed in 1902. Nat. pop. about 65,000, European 800. Principal exports, maize, copra, and coffee. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia.

French High Commissioner, J. Repiquet (Governor of New Caledonia).

British Resident Commissioner, M. King ... £940

French Resident Commissioner, M. Lippmann.

President of Joint Court, Count de Buena Esperanza £900

(7) There are also a large number of scattered groups and isolated islands.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1911) of 3,520. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 59° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 51°, and the total rainfall (1917) 49·43 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it circ. 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there May 5, 1821), when it was ceded by them to the Crown. In 1900 the island was used as a place of internment for prisoners of war from South Africa. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the East Indies. The tonnage dues on calling ships were abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port; the number which called in 1917 was 51. The phormium (flax fibre) industry and lace-making, both under Government control, were established during 1907. It is of strategical importance as a coaling station. St. James's Bay, on the north-west of the island, possesses a good anchorage. The garrison was withdrawn in October, 1906.

The government is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of 400 miles, an area of about 42,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 50, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The

Lawas River was added in 1904. The country produces sago, gutta-percha, india-rubber, bees-wax, birds'-nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. A large petroleum field has been discovered in the Baram district, and is now a valuable asset. Gold exports, (1912) \$1,070,200; (1913) \$1,077,400; (1915) \$1,250,500; (1916) \$1,209,050; (1917) \$675,600. Oil exports, (1916) 86,940 tons; (1917) 93,000 tons.

CHIEF TOWN, Kuching. Population (1911), 30,000. Distance from London, 8,700 miles; transit, 25 to 30 days. Kuching, Sadong, Sibn, and Miri are in wireless communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday in normal times. At present they run fortnightly. There is also direct communication with Sibn and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 148½ square miles, of which Mahé occupies nearly 56 square miles. The population of all the islands (Census 1911) was 22,691 (Mahé 17,721, Praslin 2,018, La Digue 1,364, other islands 1,688), an increase since the Census of 1901 of 3,454. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour; it is an Admiralty coaling station, and dépôt for patent fuel. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1917 being 20·63 per 1,000. There are 22 Roman Catholic and Church of England primary schools, and a grant-in-aid of Rs. 12,000 was voted for 1917; there is a Government college (King's College) and a school (Victoria School), maintained at an annual cost of nearly Rs. 34,101, for higher education.

The principal exports are copra, vanilla, coconuts, coco-nut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. Mahé is in telegraphic communication with all important parts of the world *via* Mauritius and Zanzibar. The Governor is assisted by an Executive Council of 3 members (2 *ex-officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 220 miles, with an estimated area of 4,000 square miles. In 1911 its population was 75,572, of whom 650 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40' and 13° 21' W. long. Its estimated area is 27,000 sq. miles, and its population about 1,327,560. For administrative purposes it is divided into 5 districts, under District Commissioners: the principal peoples being the Limbas and Korankes in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, and palm oil; but ginger, piassava, hides, and rice are also exported. The value of the palm kernels exported in 1915 reached £504,033. Before the outbreak of the war, the trade in this commodity was chiefly with Hamburg. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 104 miles in length extends in a north-easterly direction from Boia to Kamabai. By the extension of the railway and the development of a system of roads in the Protectorate, it is estimated that the output of Sierra Leone products into the European market is capable

of being more than doubled. There are 825 miles of combined telegraph and telephone service.

With regard to its constitution, Sierra Leone is a Crown Colony, possessing a Legislative Council nominated by the Crown, and having full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.

(The Somaliland Protectorate.)

In 1884 a Protectorate was declared over part of Somaliland, a region where the coast is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 300,000. The boundaries are defined by treaties with Abyssinia, France and Italy: the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. His Majesty's Government having decided to increase the forces of the Protectorate, in order to preserve the necessary grazing grounds of the friendlies from dervish attack, and to maintain peace among the tribes living in the west, the strength of the Indian contingent has accordingly been raised to 400 rank and file, and the Camel Corps reconstructed with an establishment of 18 officers and 500 men.

The Protectorate was transferred in 1898 from the administration of the India Office to that of the Foreign Office, and on April 1, 1905, to that of the Colonial Office.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, His Excellency the Right Honourable Viscount Buxton, P.G., G.C.M.G. (also receives £10,000 as Governor-General of the Union of South Africa) £3,000

Imperial Secretary and Accountant, H. J. Stanley, C.M.G. 1,700

Chief Clerk, C. L. O'B. Dutton 750

Resident Commissioner, Southern and Northern Rhodesia, C. D. Douglas-Jones 1,800

Private Secretary, C. Dalby 900

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner; by a similar Commission issued in 1905 in Lord Selborne; by a similar Commission, dated March 30, 1910, in Lord Gladstone; and by another, dated May 14, 1914, in Lord Buxton, who is also Governor-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern and Northern Rhodesia. The Southern Rhodesia Order in Council, 1898, and the Northern Rhodesia Order in Council, 1911, provide respectively for a control by the High Commissioner over legislation, important appointments, and Native Affairs in Southern and Northern Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government.

BASUTOLAND.

(*The Territory of Basutoland.*)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1911 showed 403,111 natives and 1,396 whites.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

* Exclusive of allowances.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, Post-office, and licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mohale's Hoek, and Quthing. There are 286 schools, with 22,410 scholars, a large proportion being in the schools of the French Protestant Mission. The amount spent on education in 1917-18 was £20,453. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

	1915-16.	1916-17.	1917-18.

Clerk att'd. to H.C. Office, Shirley Eales ... 500

Chief Clerk and Registrar, E. G. Dutton (*actg.*) 485

Maseru is distant from London 7,668 miles; transit, through the Cape, about 20 days.

BECHUANALAND.

(*The Bechuanaland Protectorate.*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north by Rhodesia and the Zambesi, and on the west by South-West Africa. It is about 400 miles long and 450 miles broad, with a total area of about 275,000 square miles. The population at the Census of May 7, 1911, was 125,350, of whom 1,692 were whites.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kaffir corn and mealies are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 323,911 at the Census of 1911. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by procla-

mation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakatila), of Sebele II. (Bakwena), of Kgosisotse (Bangwaketse), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *via* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Gaberones, Francistown, and Serowe, whither the Chief (Khama) and all his people moved a few years ago from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

	1915-16.	1916-17.	1917-18.
Revenue	£70,223	£69,348	£71,469
Expenditure	68,632	65,977	67,439

The annual deficiency was formerly made good by an Imperial grant-in-aid. The grant for 1911-12 amounted to £10,000. It has since been met from an accrued balance.

RHODESIA.

BRITISH SOUTH AFRICA COMPANY.

Board of Directors:—Rochfort Maguire; P. Lytton Gell; Hon. Sir Lewis Michell, C.V.O.; Sir Henry Birchenough, K.C.M.G.; The Marquess of Winchester; Otto Beit; H. Wilson Fox, M.P.; Baron E. B. d'Erlanger; D. O. Malcolm; Brig.-Gen. Hon. E. Baring, C.V.O.; The Duke of Abercorn.

Acting Secretary, A. P. Millar.

Registrar, R. C. Bolton.

Chief Accountant, P. J. Baird, A.C.A.

Head Office, 2 London Wall Buildings, E.C. 2.

Emigration and Information Office, 166 Strand, W.C. 2.

Capetown Agency, Local Secretary, F. B. Philip, Rhodes Buildings, Cape Town.

Commercial Representative in South Africa (Bulawayo), W. Olive (acting).

Resident Mining Engineer in Rhodesia, A. H. Ackermann, Bulawayo.

Director of Land Settlement, F. W. Inskipp, Salisbury.

Administrators, Southern Rhodesia (Salisbury), Sir Drummond Chaplin, K.C.M.G.; **Northern Rhodesia (Livingstone),** Sir Laurence Wallace, K.B.E., C.M.G.

AREA AND POPULATION.

	Sq. m.	Pop.
Southern Rhodesia (Salisbury)	149,000	776,500
Northern Rhodesia (Livingstone)	291,000	877,100

The total area of Rhodesia is about 440,000 square miles, the total population being estimated at 1,653,600 in 1916. The territory is named after Cecil Rhodes, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south.

COMMUNICATIONS.

Railways.—The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, *via* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (301 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles. The section from Bulawayo *via* the Wankie coal-fields to the Victoria Falls (282 miles) was completed in June, 1904. The line crosses the Zambesi at the Victoria Falls, traverses Northern Rhodesia, and, crossing the border (507 miles), extends a further 450 miles *via* Kambove to Bukama, in the Belgian Congo State. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (78 miles), and has been extended to Sinoia (4 miles). A standard-gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (73 miles). A line connects Gwelo with Selukwe (24 miles); another runs from Bulawayo *via* Gwanda to West Nicholson (104 miles), opening up the mining district to the south-east; another connects Bulawayo with the Matopo Hill, where the founder of Rhodesia is buried, and a branch line from Gwelo to Umvuma has been extended to Victoria (123 miles).

Telegraphs.—The African Transcontinental Telegraph Line ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 3,250 miles from the Cape.

SOUTHERN RHODESIA.

Area and Population.—The total area is 149,000 square miles, and the estimated population (1916) 776,500, of whom 31,500 are Europeans. The native population is estimated at 745,000, with 4,000 Asiatics and other coloured persons, including those of mixed race.

Constitution.—Southern Rhodesia is administered by the Company under the Charter of 1889, amplified from time to time by Orders in Council. The Administrator is advised by an Executive Council consisting of the Resident Commissioner and not less than three members, appointed by the Company with the approval of the Secretary of State for the Colonies. There is a Legislative Council consisting of the Administrator, the Resident Commissioner (*ex officio*), and 18 members, of whom six are nominated by the Company with approval of Secretary of State, and 12 are elected by the registered voters. A Supplemental Charter was issued on March 13, 1915, giving effect to the arrangement to which the Directors of the Company had agreed to render possible the establishment of Responsible Government in Southern Rhodesia, should the Legislative Council desire it, and should H.M. Government concur at some date other than that the Charter permits.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner and by ordinances passed by the Legislative Council. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

Industrial Progress.—Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and for the cultivation of European fruit-trees, cereals, and vegetables, in addition to tobacco and the indigenous products of the country. The local breeds of cattle are constantly restocked by importation of pedigree stock.

The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1917, was of the value of £40,076,043. The output for the year ended December 31, 1917, was valued at £3,495,391. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, and other minerals have also been produced in considerable quantities.

Administrative revenue, 1917-18.....	£736,128
Administrative expenditure, 1917-18...	751,086
Imports, 1917	£3,276,252
Exports, 1917	5,127,538
Imports to U.K., 1917	£853,056
Exports to U.K., 1917	643,475

SALISBURY, the seat of government, is situated on the Mashonaland plateau, 4,880 ft. above sea-level (white population, census, 1911, 3,979). BULAWAYO, the largest town in Matabeleland, 4,460 ft. above the sea-level, had a white population of about 4,800 in 1916.

NORTHERN RHODESIA.

This territory, a large portion of which was first opened to British influence by David Livingstone, is partly occupied by the native tribes living under their own chiefs, but large tracts are being opened up for European settlement. Nearly 1,000,000 acres of land are under settlement by white farmers, whose operations are chiefly stock-raising; over 50,000 head of cattle are being grazed by them. Extensive mineral deposits, copper in particular, have been discovered. Indigenous rubber is found in large areas. The country is well timbered, and well watered by the Zambesi and Kafue rivers and their affluents. There are large herds of native cattle. Game is also abundant.

The total area is about 291,000 sq. miles, and the population was estimated in 1916 at 877,100, of whom 2,100 are Europeans.

Administrative revenue, 1916-17	£140,789
Administrative expenditure, 1916-17 ...	189,545

Resident Commissioner for Southern and Northern Rhodesia, C. Douglas Jones, Salisbury.

SWAZILAND.

(The Swaziland Protectorate.)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). By the Convention of 1894, Swaziland was placed under the administration of, but not incorporated with, the South African Republic; the British Government now controls the Territory. The total area is 6,678 square miles, and the population (1911) 99,959, of whom 1,083 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower;

and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

On June 25, 1903, an Order in Council was issued conferring on the Governor of the Transvaal authority over Swaziland; and by Order in Council of December 1, 1906, this authority was transferred to the High Commissioner for South Africa. A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The Paramount Chief, Sobhuza, son of the late Paramount Chief Bunu, is about 20 years of age, and the regency is in the hands of his grandmother, Labotsibeni, widow of Mbandeni.

The numerous mineral and land concessions and monopolies granted by Mbandeni, of which many of the latter carried exemption from Customs dues or invested private individuals with powers properly exercisable by the Crown, rendered satisfactory government difficult. A Commission was therefore appointed under Proclamation to inquire into these concessions and monopolies. Under this Proclamation the High Commissioner has exercised the power to expropriate monopolies conferring exclusive rights, compensation for which has been made out of loans raised for the purpose. The Commission also determined the validity and extent of all concessions. In order to avoid the exercise of conflicting interest by Europeans and natives over the same area, a Special Commissioner was appointed by Proclamation to demarcate certain areas for the sole and exclusive use of natives. Under this Proclamation the agricultural and grazing rights of the natives have been fully safeguarded. A general survey of the country took place in connexion with the work of the Concessions Commission and the Special Commissioner. The sum of £177,412 has been spent on the expropriation of monopolies and in connexion with the Swaziland Concessions Commission and the demarcation of native areas.

The soil is generally fertile, particularly so in the Low and Middle Veld, but pastoral pursuits are followed more than agricultural, though there are indications that more attention will be paid to the latter now that the certainty of land tenure has been determined. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were 150,000 head of cattle in the Territory at the end of March, 1918.

In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the sub-tropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended March 31, 1918, 511 tons of cassiterite tin, valued at £60,221, were exported. A few gold mines

were being worked on a small scale, but these have had to close temporarily owing to the war. In addition to any rentals payable on the concessions, gold is subject to a tax of 10 per cent. on profits, and base metals to a royalty of 2½ per cent. on output.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are nine schools for Europeans at various centres; and the Government has established a school for natives at Zombode, the kraal of the Regent, at which, until recently, the young Paramount Chief attended. Sobhuza is now continuing his studies at the Lovedale Institute, in Cape Colony. There is also a school for coloured children. Grants are also made to the various native missions for educational purposes.

There is a tri-weekly communication by motor-car between Mbabane and Carolina, a distance of about 80 miles. Elsewhere the communication is by cart or runners. There are ten post offices, and a telegraph office at Mbabane, Pigg's Peak, Bremersdorp, and Ezulweni.

	1915-16.	1916-17.	1917-18.

CAPITAL, Mbabane.

Resident Commissioner, D. Honey.

Deputy Resident Commissioner and Government Secretary, B. Nicholson, D.S.O., M.C.

SPITZBERGEN

comprises a group of islands in the Arctic Ocean, due north of Sweden and Norway, between Greenland and Nova Zemlya, consisting of five large and several smaller islands. The principal islands are West Spitzbergen, Edge Island, North-East Land, Hope Island, and King Charles Land. They are all mountainous. Large deposits of both coal and iron are stated to exist, but are at present entirely undeveloped.

The British Government assumed effective occupation of the principal ports in 1918 by means of an expedition despatched by the Northern Exploration Company under the authority of the Foreign Office, and is now permanently established in Spitzbergen.

STRAITS SETTLEMENTS.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements* (Singapore, Penang, Malacca, Labuan, Cocos Islands, and Christmas Island), the *Federated Malay States* (Perak, Selangor, Negri Sembilan, and Pahang), the *Feudatory Malay States* (Kelantan, Trengganu, Kedah, Perlis or Palit, and Brunei), and the *Protected State of Johore*.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan. These Settlements have an entire area of about 1,600 square miles, with a population (1911) of 714,069.

The Government consists of a Governor, assisted by an Executive Council of 7 members, and a Legislative Council of 10 official and 7 un-

official members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang respectively. The Resident Councillor of Penang has a seat in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1914 amounted in Singapore to 85·84 inches, in Penang to 89·54 inches, and in Malacca to 84·17 inches.

The railway from Singapore to Bangkok was opened for passenger traffic in July, 1918.

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, para rubber, shells, sago, tapioca, spices, dye-stuffs, copra, rattans, coffee, gums, tin, preserved pine-apples, &c.

The chief imports are rice, cotton piece goods, opium, petroleum, and coal.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 217 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. $1^{\circ} 16' N.$ and long. $103^{\circ} 53' E.$, with 303,321 inhabitants in 1911. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. The railway from Singapore to Bangkok was to be open for passenger traffic on July 1, 1918.

The number of merchant vessels entered and cleared in 1917, exclusive of native craft, was 10,685, with a tonnage of 10,773,847. The total for the whole colony was 16,479, with a tonnage of 15,784,369. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 51,481 (tonnage, 2,321,797). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and the Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of \$29,000,000. The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was \$3,500,000.

Singapore is a free port; no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The aggregate trade returns for 1916 (including inter-settlement trade) amounted to \$1,030,614,272, the value of exported tin being \$60,827,634.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in $5^{\circ} 16' N.$ lat. and $155^{\circ} 15' E.$ long., and forms part of the Settlement of Singapore. Its area is about 28 square miles; and its population is 6,546. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1917), \$1,539,553; exports, \$60,827,634.

Resident, J. W. Goldthorp.

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The population is about 700, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

CHRISTMAS ISLAND, in the Indian Ocean, about 800 miles south-west of Java, and 700 miles east

of the Cocos-Keeling Islands, has an area of about 56 square miles and a population of about 1,500. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1917 was 89,889 tons.

PENANG is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (population, 1911, 141,559), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (population 1911, 128,978), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. $5^{\circ} 18' N.$, long. $100^{\circ} 21' E.$, and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1917 (including inter-settlement trade) amounted to \$320,541,127; the export of tin from the port being \$59,084,092 in 1917.

Province Wellesley is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1798, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, and rubber plantations.

The Dindings Territory (area 183 square miles, population in 1911, 7,466) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor. The territory comprises a group of islands (of which Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The population in 1911 was 124,081.

Aggregate trade, 1917 \$68,083,088
 (Including para rubber, \$21,112,085, exported in 1917.)

Singapore, distant 8,700 miles; transit, 22 days.
 Penang, 20 days; and Malacca, 23 days.

TRINIDAD and TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between $10^{\circ} 3' - 10^{\circ} 50' N.$ lat. and $60^{\circ} 55' - 62^{\circ} 56' W.$ long., and is about 69 miles in length by 54 in breadth.

with an area of 1,974 square miles (350,775 acres cultivated), and a population at the Census of 1911 of 333,552 (including Tobago). The estimated population on Dec. 31, 1917, was 377,021. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 66,000), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 9,568), about 30 miles south of the capital; Princetown (pop. 4,497), and Arima (pop. 4,020). A remarkable phenomenon is the asphalt lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1917, 109,890 tons (£139,399) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coconuts, and various kinds of timber and fruits. The chief exports (1917) were sugar 62,654 tons, value £1,459,620; rum 187,192 gallons, value £15,485; molasses 1,398,324 gallons, value £51,432; bitters 22,667 gallons, value £22,667; cocoa 70,144,898 lb., value £1,650,544; coconuts 16,595,222, value £90,857; and copra 7,201,448 lb., value £109,773. Coal is found in Manzanilla, and is indicated in other parts of the island. The petroleum industry has made considerable advance, boring operations being carried on by 11 different companies. There are 124 miles of railway open, electric lighting and tramway service, and waterworks and sewage operations have been established. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

OIL INDUSTRY.—The development of the oil-fields is progressing satisfactorily. The number of Companies operating at the close of 1917 was eleven, and other substantial concerns are preparing to commence operations. During 1917, 56,080,194 imperial gallons of crude oil were extracted, and of this 35,890,511 gallons were exported. Petrol, kerosene, and lubricating oil continue to be manufactured in local refineries. 1,248,897 imperial gallons of petrol, 549,431 gallons of kerosene, and 67,792 gallons of lubricating oil were exported in 1917.

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9' N. lat. and 60° 43' W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population (Census 1911) of 20,749. It is one of the most

healthy of the West Indies; the temperature varies from 81° to 88°.

There are two towns in the island, viz., Scarborough (pop. 720) and Plymouth (pop. 535).

Governor, His Excellency Maj. Sir John Robt. Chancellor, R.E., K.C.M.G., D.S.O. £5,000

CAPITAL, Port of Spain (pop. 66,000); transit, 14 days.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Trisão da Cunha), after whom they are named. The population numbers about 100, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stollenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square

* For the nine months, Apr.-Dec., 1915. The financial year was changed to coincide with Calendar Year as from Jan. 1, 1916.

miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-west of which they are distant about 420 miles. They have an area of about 170 square miles. The population in 1911 was 5,615, of which the principal island, Grand Turk, contains 1,681. Salt is the principal industry of the islands, and Sisal hemp and sponges are exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

UGANDA.

(The Uganda Protectorate.)

A British Protectorate over the territory of Uganda was proclaimed in the *London Gazette* of June 19, 1894, and included only the country subject to King Mwanga, known as Buganda, bounded by the territories known as Busoga, Bunyoro, Ankole, and Toro. This Protectorate has since been extended, and now includes Ankole, Toro, and Kigezi, which form the *Western Province*, Bunyoro, the territories east of the Nile to the south boundary of the Sudan and the land on the west bank of the river between the Nile, the Belgian-Congo Frontier and the Sudan forming the *Northern Province*, the districts of Busoga, Bukedi, Teso, Lango, and Karamoja forming the *Eastern Province*, and the territory between Lake Rudolf and the south boundary of the Sudan and the eastern boundary of the Northern Province, which is known as the *Rudolf Province*. The Buganda Province lies on the north-west shore of Lake Victoria, about 800 miles by railway and steamer from Mombasa, the coast port. It is situated on and to the north of the Equator. Bunyoro lies further to the north between the Victoria Nile and Lake Albert. The Eastern Province extends from the Victoria Nile to Mount Elgon and the N.W. boundaries of the East Africa Protectorate. Toro lies to the W. of Buganda, and Ankole to the S.W. The population in March, 1917, was estimated at a total of 2,954,861—809 Europeans, 3,548 Asiatics, and 2,950,504 natives. The total area is 109,119 miles (92,744 land and 16,377 water).

The principal town of Buganda is Kampala, but the headquarters of the Protectorate Administration is at Entebbe, 25 miles distant, on the

shores of Lake Victoria. The port on Lake Victoria for Kampala is Port Bell, which is connected with Kampala, $\frac{7}{8}$ miles away, by a railway. The export trade, which is increasing, is mainly in cotton, £348,914; coffee, £113,939; chillies, £27,328; ghee, £18,310. The trade in ivory has decreased owing to the war. The principal imports in 1916-17 were:—yarns and textiles, £338,286; provisions, £140,873; cotton blankets, £30,984; bicycles, £17,012; apparel, £12,815; bags and sacks, £24,589; soap, £24,281; petroleum, £15,068; agricultural implements, £15,030; stationery, £11,332. Uganda is connected by telegraph with Mombasa (E. Africa Protectorate), and there are six Government steamers on Lake Victoria, including two of 600 and two of about 1,000 tons displacement. There are three stern-wheel steamers on Lake Kioga, and one paddle-steamer, a launch and several sailing craft on Lake Albert.

A railway 61 miles in length has been constructed between Jinja, in Busoga, and Namagali, at the entrance of the Nile on Lake Kioga. Motor transport is increasing with the development of the country, and regular services are established in the Baganda Province, the Eastern Province and in the Northern Province on the system of roads constructed for the purpose.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son, Daudi Chwa, was declared King of Uganda, with a native council of regency. King Mwanga died in May, 1903. In Sept., 1897, a mutiny broke out among the Sudanese troops in the Protectorate, which was only suppressed after several months' fighting, in circumstances of great difficulty and danger, in which several British officers lost their lives (*Parly. Paper, Africa*, No. 10, 1898). The military forces have since been completely reorganised.

The *Uganda Railway*.—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1895 construction was commenced, and the last rails were laid at the terminus on Victoria Nyanza (584 miles) on December 20, 1901, on which date the first locomotive completed the journey from the sea to the lake. The administration of the railway (with the Busoga railway and railway marine, and the Kampala Port Bell railway) is under the management of the Uganda railway in the East Africa Protectorate. A three-wire telegraph line has been erected along the railway, and this is linked to the Uganda system which connects all principal administrative posts by telegraph with the Government headquarters at Entebbe. A volunteer reserve has been organised which was called out for local defence purposes after the outbreak of war.

WEIHAUWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37° 30' N., longitude 122° 10' E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1911 of 147,177, in which are included 3,000 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 121° 40'—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the port of Shanghai.

Commissioner, Sir J. H. Stewart Lockhart, K.C.M.G.
Judge of the High Court, Hiram Parkes Wilkinson.
Crown Advocate, Allan G. Mossop.

Senior District Officer and Magistrate, R. F. Johnston, C.B.E.

Imports from U.K., 1917 £2,315

WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian Islands includes Barbados, St. Lucia, St. Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (Census 1916) of 175,278. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. There is a Court of Appeal, consisting of the judges

of the three colonies and of Barbados, a common Audit, and a common Lunatic Asylum; but, with this exception, each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him, Governor and Commander-in-Chief, Sir

G. B. Haddon-Smith, K.C.M.G. £2,500
Private Secretary & A.D.C., 200
Auditor, W. Cuddeford (and £50) 500
Staff Officer, Maj. G. W. Smith (and £90) 350

GRENADA

(AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30'—11° 58' N. lat. and 61° 20'—61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,750 (1911). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1917), 7,478.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (1917-18) of 53,788. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point

being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1917) are sugar (84,265 cwt.), rum (668 gals.), cocoa (11,716 cwt.)—which is now extensively cultivated—fuel, and sticks. Limes are being planted, and the industry promises to become important. In 1917, 23,377 gallons of lime juice were exported. The chief places are Castries, the capital (pop. 1911, 6,266), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1917, 346 steamers (tonnage 1,181,292) entered Port Castries.

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (March 31, 1918) of 50,669. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

ZANZIBAR.

(The Zanzibar Protectorate.)

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tughli Bay and north as War-sheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of

Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 10 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the East Africa Protectorate (q.v.). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

The principal imports are piece-goods, ivory, copra, groceries, rice, and coal; the exports are ivory, cloves, copra, hides, gum-copal, and many minor articles.

The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. There is direct communication with the United Kingdom by the Union Castle and Ellerman-Harrison Lines, and also a monthly cargo service by the British India Steam Navigation Company. There are through steamers to and from Europe of the Messageries Maritimes, and a three-weekly service to and from Bombay.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1910) was 198,914, the area of the former 640 square miles, and of the latter 380 square miles.

Trade of the Port of Zanzibar in 1916:—

Country.	Imports from.	Exports to.
	£	£
British India	448,937	305,153
U.K.	459,758	94,856

IMMIGRATION.

Statistics concerning the arrival of aliens are available for nearly a century, but the Government exhibits little interest in those who leave its shores. Since 1790 over 31,000,000 alien passengers have arrived in the U.S. The following figures (from the *Statistical Abstract*) show the number of arrivals at certain periods from 1820-1917:—

YEAR.	IMMIGRANTS.	YEAR.	IMMIGRANTS.
1820	8,385	1910	1,041,570
1840	84,066	1911	878,587

1904	781,145	44,010	22,189	66,199
1905	804,787	45,756	22,220	67,976
1906	853,290	48,607	23,455	72,062

BIRTHS AND DEATHS.

There are no complete statistics of Births or Deaths. The former are practically ignored, while the latter are reported only in the "Registration Area," which covers little more than half the United States. The following table shows the Deaths recorded in the Registration Area for the decade 1907-1916:—

YEAR.	DEATHS (Reg. Area)	YEAR.	DEATHS (Reg. Area)
1907	687,034	1912	838,251
1908	691,574	1913	890,848
1909	723,538	1914	898,059
1910	805,412	1915	909,155
1911	839,284	1916	1,001,921

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are qualifying offences.

PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25° – 49° North and longitude 67° – 124° $30'$ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminium; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

HISTORY.

EARLY COLONISATION.—A natural factor, the great expanse of ocean which divides the American continent from Asia, has saved America from Asiatic domination; and it required many centuries of progress before the European adventurer dared to attempt the passage of the narrower Atlantic. The aboriginal inhabitants were comparatively few in number, and being generally backward in development, except in Mexico, have left few permanent traces of their presence.

American history may therefore be said to commence with the colonising expeditions from Europe in the sixteenth and seventeenth centuries; for, although Columbus discovered America in the fifteenth century (Oct. 12, 1492), no definite European settlement was attempted until the last quarter of the sixteenth century, when England, Holland, Sweden, France, and Spain made determined efforts to bring into account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount

influence, through their natural aptitude for colonisation, which continues to distinguish that race (and in a greater degree the Scotch) amongst the nations of Europe. In the seventeenth century a chartered company founded *Jamestown* (1607), and many Royalist settlements were established in the district which had been named *Virginia*, after Queen Elizabeth, in the previous century. But step by step with the Church and Royalist foundations in the south a similar series of Puritan and Separatist centres was established in the north. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire, and other east coast English towns, and *New England* became rapidly prosperous. Between these two settlements the Dutch had established themselves in *New Netherlands* (1621), and the Swedes in *New Sweden* (1638). Other English foundations were *Maryland* (1632), *Carolina* (1663), *New York* (1664), *New Jersey* (1665), and *Pennsylvania* (1681). From that date Continental enterprise may be said to have ceased for half a century, and *Georgia* (1732) was the last of the English settlements.

EIGHTEENTH CENTURY.—A continuous struggle was waged between the English and French settlements in America, but until the War of 1754-1763 little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. It secured the possession of the Pacific coast for the inhabitants of the Atlantic slope, and roused the interests of the British Government in the possibilities of its American colonies. The Home Government endeavoured to recover from the colonies part of the cost of the war by which their existence had been secured, but "taxation without representation" was bitterly resented. In December, 1773, some English ships laden with tea arrived in the harbour of Boston, where a non-importation agreement was strictly enforced. A mob of colonists, disguised as Indians, boarded the vessels and threw their contents into the sea. This *Boston Tea Party* of December 16, 1773, remains as an outstanding incident in the quarrel between America and Great Britain. In spite of the counsels of Chatham the King persisted in repressive measures, generally with inadequate forces and at inopportune moments. The colonists resisted in arms, and bloodshed ensued at the first engagement at *Lexington*, April 19, 1775, and continued until the *Capitulation of Yorktown*, October 19, 1781, when *Lord Cornwallis* surrendered with the whole of his forces to *General Washington*. When peace was concluded, Sept. 3, 1783, between America and Great Britain, no vestige of territory over which the dispute had raged remained under British rule.

The Declaration of Independence.—On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence.* "We, the representatives of the United States of America, in Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, solemnly publish and declare that these United Colonies are, and of right ought to be, Free and Independent States." This Declaration was at length acknowledged by Great Britain, and the United States of America from this beginning has become one of the greatest Powers of the world. The Declaration of Independence was followed by the framing of a *Constitution*, which was ratified in 1787 to 1790 by the 13 *Original States* (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). This Constitution established a legislature of two houses, and vested the executive power in an elective President; and on April 30, 1789, *George Washington* entered office as the first of a line of Presidents of the United States of America.

NINETEENTH CENTURY.—The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connexion with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost invariably victorious on the sea. A land engagement at *Chateaugay* on October 26, 1813, gained lasting glory for the troops of Canada; and earlier in the same year—June 1, 1813—a duel at sea between the *Chesapeake* and the *Shannon* did much to restore the prestige of the British Navy. Peace was concluded by the *Treaty of Ghent* on December 24, 1814, after a purposeless war, which Canada alone has reason to remember with satisfaction.

* On April 30, 1819, the Raleigh (N.C.) Register published the following document, said to have been adopted by the Committee of Mecklenburg County, North Carolina, on May 20, 1775, the day after the receipt of the news of the battle of Lexington. "In the third session of the Second Continental Congress, Richard Henry Lee proposed, and John Adams, of Massachusetts, seconded, a resolution, declaring the United Colonies free and independent States: and Thomas Jefferson, John Adams, Roger Sherman, and Robert Livingston were appointed a committee to draw up a Declaration of Independence. This famous document, composed almost entirely by Jefferson, was adopted unanimously on July 4, 1776."

The Gold Rush.—In 1846 a dispute arose between the United States and Mexico in connexion with the boundaries of *Texas*, recently (1845) admitted as a State of the Union, and after hostilities of several months the war ended in the *Treaty of Guadalupe Hidalgo* (1847). Under this treaty Mexico surrendered the disputed portions of Texas and New Mexico, part of Arizona, and California. In 1848 immense excitement prevailed through the discovery of gold in Upper California, and a great rush of goldseekers entered the newly acquired territory, which remains the principal gold-producing State of the Union.

The Civil War.—Among the industrial classes of America in 1860 nearly 4,000,000 were negro slaves, descendants of those planted in the Colonies by Britain. The question of their emancipation led to a bitter dispute between the Northern and Southern States of America, the latter seceding from the Union in 1861. Two years earlier *John Brown*, an advocate of emancipation, had embittered the relations between the North and South by a raid upon the Government arsenal of *Harper's Ferry*, which he captured and held until forced to surrender; and although he was hanged by the Government his object was eventually achieved by President Lincoln's *Emancipation Proclamation* of January 1, 1863. The *Secession of the Southern States* was followed by hostilities, which included many pitched battles, fought with astounding tenacity and prolific slaughter on both sides. The *Battle of Gettysburg*, July 1-3, 1863, and of *Antietam*, Sept. 17, 1862, have never been surpassed for proportional losses of those engaged. Hostilities ceased soon after the surrender of *General Lee* at *Appomattox* on April 9, 1865, and the bitterness engendered by the war was buried in a lasting peace. By a careless observance of the Foreign Enlistment Act Britain permitted the departure from Liverpool of the *Alabama*, which committed depredations upon the Federal shipping, and was also guilty of other acts of negligence. Thus Britain became involved in a dispute which was settled by arbitration under the Treaty of Washington, May 8, 1871, by which she was called upon to pay £3,250,000 damages to the United States. In the four years' war the Confederate (Southern) States lost over 200,000 men by death and disease, while the victorious Federal (Northern) States lost close on 350,000 from the same causes.

War with Spain.—The continuous misgovernment of the neighbouring island of *Cuba* brought America into conflict with Spain in 1898. A succession of revolts, which the Spanish forces were unable to suppress, left Cuba the prey to anarchy, and induced the United States to despatch to Havana the warship *Maine*. By accident or design that vessel was destroyed by an explosion (Feb. 15), and the United States declared war against Spain on April 25, 1898. The outcome of the hostilities was the freedom of Cuba and the acquisition by the United States of the Spanish possessions in the *Philippine Islands*, in addition to *Guam* (Pacific) and *Porto Rico* in the West Indies.

TWENTIETH CENTURY.—On June 28, 1902, Congress appropriated the sum of \$40,000,000 for the purchase of all outstanding rights in the work inaugurated on the *Panama Canal*, and on April 28, 1904, a further sum was granted for the purchase of a strip of territory on each side of the proposed waterway from the Republic of Panama. Operations were immediately undertaken, and the Canal was completed in 1913, and was opened to traffic with no inaugural ceremony on August 1, 1914.

Reciprocity with Canada.—Conferences between United States and Canadian representatives took place in November, 1910, at Ottawa, and in January, 1911, at Washington, and concurrent legislation in Washington and Ottawa was contemplated with a view to establishing permanent reciprocal trading relations. In view, however, of the change of Government after the Canadian General Election of October, 1911, further progress in the direction of Reciprocity is improbable.

Anglo-American Arbitration.—A Treaty of Arbitration between the United Kingdom and the United States was signed at Washington, August 3, 1911, but it was mutilated by Congressional amendments until it became unrecognisable. The original Treaty contained seven Articles, which were stated in the 1912 Edition of *Whitaker's Almanack*. An Anglo-American Peace Commission Treaty was signed by Mr. Bryan and the British Ambassador on Sept. 15, 1914.

War with Germany.—On April 6, 1917, war was declared against Germany.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to fifteenth Jan. 8, 1793, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, and March 30, 1870), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE.

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the second Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States, Woodrow Wilson, of New Jersey (born at Staunton, Va., 28 Dec., 1856; educated at Princeton Univ. 1875-1879; President of Princeton Univ. 1902-1910; Governor of New Jersey 1911-1913), elected 5 Nov., 1912, and came into office 4 March, 1913, until 4 March, 1917, when he was re-elected for a further term. *Democrat*.

1. *Vice-President of the United States (and ex-officio President of the Senate)*, Thomas Riley Marshall, of Indiana (born 1854, admitted to the Bar 1875, Gov. of Indiana 1909-1913).

THE CABINET.

(In order of succession to the Presidency.)

2. *Secretary of State*, Robert Lausling, of New York (born 1864, admitted to the Bar 1889), *Secretary of State, ad interim*, 9 to 23 June, 1915, appointed 23 June, 1915.

3. *Secretary of the Treasury*, William Gibbs McAdoo, of New York (born 1863, admitted to the Bar 1884), appointed 5 March, 1913 (resigned Nov. 1918).

4. *Secretary of War*, Newton D. Baker, of Ohio (born 1871, admitted to the Bar 1897), appointed 7 March, 1916.

5. *Attorney-General*, Thomas Watt Gregory, of Texas (born 1861, admitted to the Bar 1885, Special Assistant Attorney-General 1913-1914), appointed 19 August, 1914.

6. *Postmaster-General*, Albert Sidney Burleson, of Texas (born 1863, admitted to the Bar 1884, member of Congress 1899-1913), appointed 5 March, 1913.

7. *Secretary of the Navy*, Josephus Daniels, of North Carolina (born 1862, Chief Clerk Dept. of the Interior 1893-95), appointed 5 March, 1913.

8. *Secretary of the Interior*, Franklin Knight Lane, of California (born 1864, Interstate Commerce Commissioner 1905-1913), appointed 5 March, 1913.

Secretary of Agriculture, David Franklin Houston, of Missouri (born 1866, Chancellor of the Washington University, St. Louis, 1908-1913), appointed 5 March, 1913.

Secretary of Commerce, William C. Redfield, of New York (born 1858, Member of Congress 1911-1913), appointed 5 March, 1913.

Secretary of Labour, William Bauchop Wilson, of Pennsylvania (born 1862, Member of Congress 1907-1913), appointed 5 March, 1913.

DEPARTMENT OF STATE.

(New York and Pennsylvania Aves., Washington, D.C.)

The *Department of State* has cognisance of all matters appertaining to Foreign Affairs, including correspondence with Representatives of the U.S., both diplomatic and consular, and with accredited Representatives of Foreign States in the U.S. The *Secretary of State* is the custodian of the Seal of the U.S., which is affixed by him to all proclamations, to various commissions, and to warrants of extradition; he is also the Custodian of the Laws of the U.S. and of Treaties made with Foreign Powers. He grants and issues Passports, and communicates to Congress reports made by Diplomatic and Consular officers of the U.S. He is the medium of correspondence between the President and the chief executives of the States of the Union.

DEPARTMENT OF THE TREASURY.

(15th Street, Washington, D.C.)

The *Secretary of the Treasury* is charged by law with the management of the national finances. He prepares plans for the improvement of the revenue and for the support of the public credit; superintends the collection of the revenue, and directs the forms of keeping and rendering public accounts and of making returns; grants warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury; and annually submits to Congress estimates of the probable revenues and disbursements of the Government. He controls the construction and maintenance of public buildings; the coinage and printing of money; the administration of the Coast Guard and the Public Health branches of the

public service, and furnishes generally such information as may be required by either branch of Congress on all matters pertaining to the foregoing. He is *ex-officio* chairman of the Federal Reserve Board, created by Act approved December 23, 1913, known as the Federal Reserve Act; *ex-officio* chairman of the Federal Farm Loan Board, created by Act approved July 17, 1916, known as the Federal Farm Loan Act; and president of the central executive council of the International High Commission, and chairman of the United States section of that Commission.

BOARD OF INDIAN COMMISSIONERS, Washington, D.C.

The Board of Indian Commissioners is appointed by the President, and its members serve without salary. In 1917 the Indian population of the U.S., exclusive of Alaska, was 335,998 (Oklahoma containing 119,108, Arizona 44,617, New Mexico 20,853, S. Dakota 21,246, California 15,362, Washington 11,181, Montana 11,525, Minnesota 11,777, and the 40 remaining States less than 10,000 each). Total disbursements for the fiscal year ended 30 June, 1917, for Indian Service were \$9,885,135. The total wealth of U.S. Indians on June 30, 1917, amounted to \$655,512,661.

Chairman, George Vaux, jr., Pa.
Members, Merrill E. Gates, D.C.; Warren K. Moorehead, Mass.; Samuel A. Eliot, Mass.; Frank Knox, N.H.; Edward E. Ayer, Ill.; Daniel Smiley, N.Y.; Isidore B. Dockweiler, Cal.; Malcolm McDowell, Ill.
Secretary, Malcolm McDowell.

CIVIL SERVICE COMMISSION, Washington, D.C.

The Civil Service Commission holds frequent examinations for the general public service in various parts of the country for close on 60 per cent. of the 500,000 positions in the Executive Civil Service.

President, John A. McIlhenny, La. \$4,500
Commissioners, Charles M. Galloway, S.C.; Hermon W. Craven, Wash. each 4,000
Chief Examiner, George R. Wales, Va. 3,500
Secretary, John T. Doyle, N.Y. 2,500

NATIONAL COMMISSION OF FINE ARTS, 1729, New York Avenue, N.W., Washington, D.C.

The Commission of Fine Arts was created by Congress 17 May, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, Detroit, Mich.
Vice-Chairman, Frederick Law Olmsted, Mass.
Members, J. Alden Weir, N.Y.; Charles A. Platt,

N.Y.; Wm. Mitchell Kendall, N.Y.; John Russell Pope, N.Y.; Herbert Adams, N.Y.
Secretary and Executive Officer, Col. C. S. Ridley, U.S. Army.

Assistant to the Secretary, Arno B. Cammerer.

UNITED STATES GEOGRAPHIC BOARD, Washington, D.C.

By Executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board and its duties enlarged. The Board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determines, changes, and fixes place names within the United States and its insular possessions, and all names suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority.

Advisory powers were granted the board concerning the preparation of maps compiled, or to be compiled, in the various offices and bureaus of the Government, with a special view to the avoidance of unnecessary duplications of work; and for the unification and improvement of the scales of maps, of the symbols and conventions used upon them, and of the methods of representing relief. All such projects as are of importance shall be submitted to this board for advice before being undertaken.

Chairman, Andrew Braid.

Secretary, Charles S. Sloane.

GOVERNMENT PRINTING OFFICE, North Capitol Street, Washington, D.C.

The Government Printing Office was established in 1861, and represents an expenditure of close on \$16,000,000, the annual cost of operation and maintenance being \$14,000,000. In addition to the printing of all Government publications, the office issues a Style Book, which regulates the spelling and treatment of all words employed in such publications.

Public Printer, Cornelius Ford, N.J. \$5,500
Deputy do., Daniel V. Chisholm 4,500
Chief Clerk, John L. Alverson 2,750
Private Secretary, Joseph P. O'Lone 2,500
Purchasing Agent, Edward S. Moores 3,600
Superintendent of Work, T. Frank Morgan 3,600
Foreman of Printing, Fletcher Bowden ... 2,500
Congressional Record Clerk, Wm. A. Smith 2,500
Supt. of Documents, Josiah H. Brinker ... 3,500

INTERSTATE COMMERCE COMMISSION, Washington, D.C.

The Interstate Commerce Commission has supervision over all common carriers engaged in interstate transportation of passengers or property wholly by railroad, or partly by railroad and partly by water, when both are used under common control, management, or arrangement for a continuous carriage or shipment, including express, sleeping and parlor car companies, telephone, cable, telegraph and wireless companies, also pipe lines.

Chairman, Winthrop M. Daniels \$10,000
Commissioners, Edgar E. Clark, James S. Harlan, Charles C. McChord, Balthasar H. Meyer, Henry C. Hall, Clyde B. Aitchison, Robert W. Woolley, George W. Anderson each 10,000
Secretary, George B. McGinty, Ga. 5,000
Assistant Secretary, Alfred Holmead, D.C. 3,600

LIBRARY OF CONGRESS, Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and replenished in 1851-1852, and since that date increased (1) by regular annual appropriations by Congress (\$98,000 for books and periodicals); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. It comprises 2,614,523 printed books and pamphlets, the floor space of the building (erected at the cost of \$6,347,000, and first occupied in 1897) being 430,255 square feet, and the capacity of the book stacks 3,540,000 octavo volumes and 84,000 volumes of newspapers, the shelving extending to nearly 100 miles. The library is maintained by Congress, the appropriation in 1919 being \$707,925.

Librarian of Congress, Herbert Putnam, LL.D.	\$6,500
Chief Assistant Librarian, Appleton P. C. Griffin	4,000
Chief Clerk, Allen R. Boyd	
Secretary, Jessica L. Farnum	

U.S. MILITARY ACADEMY, West Point, N.Y.

The United States Military Academy for training cadets for commissions in the U.S. Army was founded at West Point, on the west bank of the Hudson River, in 1802.
Superintendent, Col. Samuel E. Tillman, U.S. Army.

NAVAL ACADEMY, Annapolis, Maryland.

The United States Naval Academy was founded in 1845 for the education of officers for the Navy. Students are called midshipmen, and must be citizens of the U.S. The course of instruction comprises four years at the Academy.
Superintendent, Rear-Adm. Edward W. Eberle, U.S. Navy.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The Senate consists of 96 members. The salary of a Senator is \$7,500 per annum, with mileage at 20 cents per mile, coming and returning, for each regular session. The House of Representatives consists of 435 representatives and territorial delegates. The salary of a Representative is \$7,500 per annum, with mileage as for Senators.

THE SIXTY-FIFTH CONGRESS.

President of the Senate, Thomas R. Marshall, Ind.	\$12,000
President (pro tempore), Willard Saulsbury, Delaware	
Speaker of the House of Representatives, Champ Clark (re-elected, 1917)	12,000

THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The Circuit Courts of Appeal, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The District Courts, eighty-seven in number, served by a District Court Judge.

THE SUPREME COURT.

(The Capitol, Washington, D.C.)

Chief Justice, Edward D. White, La., born 1845, apptd. 1910 \$15,000

Associate Justices (each \$14,500.)

Name.	Born.	Apptd.

Philippine Rebellion, 1899-1902	140,038
Relief of Chinese Legations, 1900-1901	6,983
War with Germany, 1917	

THE ARMY OF THE U.S.

Prior to March 17, 1916, the maximum enlisted strength of the line organisations of the Regular Army was limited to 100,000 men. On the date mentioned, the President was authorised, by joint resolution of Congress, to recruit the line organisations to the maximum strength prescribed by existing law, without regard to the

limitation mentioned. Under the provisions of the Act of Congress, approved June 3, 1916, the total enlisted force of the line of the Regular Army was limited, except in the event of actual or threatened war or similar emergency, to 175,000 men. The Act last mentioned also provided that the Regular Army shall consist of 64 regiments of infantry, 25 regiments of cavalry, 21 regiments of field artillery, a coast artillery corps, the brigade, division, army corps, and army headquarters, with their detachments and troops, and the various staff corps and departments.

Under date of April 6, 1917, the U.S. declared the existence of a state of war between it and the Imperial German Government. This was followed, on May 18, 1917, by the passage of the Selective Service Law, under the provisions of which the President was authorised immediately to raise all organisations of the Regular Army to the maximum enlisted strength authorised by law, to draft the National Guard (State Militia) into the military services of the U.S., and to raise by draft, organise, officer and equip two additional forces of 500,000 men each, the men so drafted to be between the ages of 21 and 30, both inclusive. Under subsequent legislation the drafting of additional forces has been authorised, and the age limits have been extended to include men between the ages of 18 and 45, both inclusive.

There were approximately 9,500 officers and 202,500 enlisted men in the military service of the U.S. on April 6, 1917. Eighteen months later the strength of the Army had been increased to approximately 193,000 officers and 3,100,000 enlisted men. A further increase to 10,000,000 men would be made if necessary.

Losses in the War.—It was estimated in Washington that the total casualties in the war amounted to 100,000.

U.S. WAR PENSIONS, 1880-1917.

Year.	Number of Pensioners on Roll.			Total Payments.
	Invalids.	Widows, &c.	Total.	
1880	145,410	105,392	250,802	\$ 56,689,229
1890	415,654	122,290	537,944	106,093,850
1900	752,510	241,019	993,529	138,462,130
1905	717,761	280,680	998,441	141,142,861
1910	602,180	318,903	921,083	159,974,056
1913	503,633	316,567	820,200	174,171,661
1914	470,331	314,908	785,239	172,417,546
1915	437,448	310,699	748,147	165,518,266
1916	403,120	306,452	709,572	159,155,090
1917	369,936	303,175	673,111	160,895,054

The total disbursement in pensions since the War of Independence is \$5,215,528,780, of which \$4,917,245,599 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in 1917 amounted to \$1,562,855.

THE NEW UNITED STATES PROGRAMME.

(The execution of the following programme may have been modified in consequence of the labour, space, and material required for carrying out the emergency destroyer and merchant ship programmes, estimated to cost respectively 70 and 359 millions sterling.)

After discussion extending over several months, the United States Government, in September, 1916, received the necessary authorisation to proceed with the largest and most costly naval programme ever sanctioned for any country. The Act as finally adopted covers the shipbuilding for the financial years (ending June 30) 1917, 1918, and 1919, and makes provision for laying down the following vessels:—

	In 1917.	In 1918 and 1919.	Total.
Battleships	4	6	10
Battle-Cruisers	4	8	12
Scout Cruisers	4	6	10
Destroyers	20	30	50
Fleet Submarines	9	—	9
Coast Submarines	38	30	68

In addition, there were to be begun in 1917 3 fuel ships, 2 destroyer tenders, 2 ammunition ships, 2 gunboats, 1 repair ship, 1 hospital ship, and 1 transport. The authorised expenditure for the year 1917 is £65,625,000, as compared with a British vote of £51,550,000 in 1914-15, and, provided the whole of the ships are put in hand, there will necessarily be an increase in succeeding years. Of the vessels to be laid down in 1917, the battleships will be named *Colorado*, *Washington*, *Maryland*, and *West Virginia*, and they will be principally noteworthy for carrying a main armament of eight 16-in. guns, mounted on the same plan as the 15-in. of the *Queen Elizabeth*. It is interesting to note the development of the main battery in American Dreadnoughts:—

First of Type.	Length.	Tons.	Main Guns.	Broadside.
<i>S. Carolina</i> ...	1908	16,000	8 12-in.	6,960 lb.
<i>N. Dakota</i>	1908	20,000	10 12-in.	8,700 lb.
<i>Wyoming</i>	1911	26,000	12 12-in.	10,440 lb.
<i>Texas</i>	1912	27,000	14 12-in.	14,000 lb.
<i>Pennsylvania</i> ..	1915	31,400	12 14-in.	16,800 lb.
New class	—	32,600	8 16-in.	16,800 lb.

The new ships will be some 5,000 tons heavier than our *Queen Elizabeths*, but will be 4 knots below their designed rate of 25; and as the difference in displacement can hardly be accounted for by the increased calibre of the guns, while both groups are of the "all oil" type, it is to be assumed that the American vessels will have superior protection. On that subject, however, nothing has been made public. Converting the dollar at 4s. 2d., the estimated cost of the new battleships complete is £3,916,666. The *Queen Elizabeth*, without her guns, was estimated to cost £2,314,762, while the *Iron Duke* was built outright for £2,080,918, which is equivalent to £83'24 per ton compared with an estimated £120'14 per ton for the *Colorados*. In the first bids tendered by contractors, the time required for construction varied from 39 to 48 months. The battleships following these will be of 42,600 tons, armed with twelve 16-in. guns.

The battle-cruisers will be very remarkable vessels, their design providing for a length of 850 feet (the *Lion* is only 660 feet), a tonnage of 35,000, and a speed of from 32 to 35 knots with turbine-cum-electric-drive machinery of 200,000 horse-power, working through four shafts. The main armour belt will be 8 in. thick, and the heavy armament will consist of ten 14-in. guns in centre-line turrets. The completed cost of these vessels is estimated at £4,256,584, of which the machinery alone will account for £1,666,666, which is more than the entire cost of the British battle-cruiser *Indefatigable*, or of the battleships *Lord Nelson* and *Agamemnon*. The

reason for putting smaller guns into the battle-cruisers than in the battleships is that the former would not, save under very exceptional conditions, be called upon to fight vessels so heavily armoured as battleships, and therefore need not embody such a high degree of smashing power. The scout-cruisers, though displacing only 7,100 tons, will have a length of 550 feet (compare with the 555 feet of our 18,750-ton *Indefatigable*), and are intended for a speed of 35 knots, carrying eight 6-in. and a number of smaller guns. One of their unique features is that each will be equipped to house, launch, and recover four seaplanes—a detail that should add very considerably to their value as scouts. For the destroyers also a speed of 35 knots is intended, and, displacing 1,185 tons, they will be armed with four 4-in. guns and four triple torpedo-tubes. The programme is a very ambitious one, even if the first year's shipbuilding be viewed alone. It must be regarded as in some degree an attempt to make good the leeway of recent years, particularly as regards battle-cruisers and scouts, none of the former having been built at all, and none of the latter since 1906. During the year 1916 the principal additions to the fleet have been the *Pennsylvania* and *Arizona*, the first battleships to carry twelve 14-in. guns; while the degree of completion per cent. on Oct. 1, 1916, of other battleships under construction was as follows: *Idaho*, 64·8; *Mississippi*, 55·9; *New Mexico*, 48·6; *California*, 3·2; and *Tennessee*, 0·8. The number of American Dreadnoughts built, building, and to be laid down in 1917 was 27—one fewer than the corresponding German total at the outbreak of war.

EDUCATION.

The system of public instruction extends from the kindergarten to the university. Control is vested in the State and local authorities, the only central organisation being the Bureau of Education charged with statistical and advisory functions only. The number of illiterates is swollen by immigrants, and by the fact that some 44 per cent. of the coloured population receive no instruction. It is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at public expense. (i.) *Primary*: Age 8–14 years, free and comp. in majority of States, though in all the machinery is fully maintained. Eight grades of public primary schools, numerous kindergartens, and evening continuation classes in towns. Very many and well-equipped private institutions. Public schools are maintained by local taxation, Federal subsidies taking the form of income derived from grants of land. (ii.) *Secondary*: Numerous high schools, both public and private, including many so-called "colleges" and "universities," whose curriculum corresponds rather to that of a German gymnasium or an English public school. A salient feature of the American system is co-education of the sexes throughout, there being comparatively few institutions where the tuition is not dual. Powerful aid is afforded by private and philanthropic initiative. (iii.) *Special Schools and Professional Establishments* are too numerous to mention, well-equipped and well-attended. (iv.) *Universities*: Those corresponding most closely to the British definition are California, the Catholic University of America, Chicago; Clark, Columbia, Cornell, Harvard, the Johns Hopkins, Michigan, Pennsylvania, Princeton, Stanford, Virginia, Wisconsin, and Yale.

EDUCATIONAL STATISTICS.

Year.	Public Schools (Average Attendance).	Colleges, Universities, and Schools of Technology.		
		Men.	Women.	Total.
1909	12,684,837	119,480	62,997	182,477

Cash in Treasury	3,809,135,055
Total Debt less Cash in Treasury	1,908,635,223

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Hawaii and Alaska, is 1,903,289,600 acres, of which in 1910 873,729,000 were farms (478,451,750 acres improved). The total number of farms is 6,340,357, of which about 2,500,000 are between 100 and 500 acres, about 1,500,000 between 50 and 100 acres, and about 1,500,000 between 20 and 50 acres. The total value of the farm produce of the United States in 1910 was estimated at \$8,928,000,000—the greatest value ever yet reached, and an increase over 1909 of \$104,000,000.

Wool.—The total number of fleeces in 1917 was 34,900,000, producing 245,573,000 lb.; pulled wool, 40,000,000 lb.; total, 285,573,000 lb.

The total value of metallic minerals produced in 1916 was \$1,621,832,177 (pig iron, \$663,478,118; copper, \$474,288,000; gold, \$92,590,300), and of non-metallic minerals the total value was \$1,878,507,232 (bituminous coal, \$665,116,077; Pennsylvania anthracite, \$202,009,561; petroleum, \$330,899,868; clay products, \$207,260,091; stone, \$79,041,699; natural gas, \$120,227,468; cement, \$104,698,090; and mineral paints, \$23,515,803).

Manufactures.—The manufacturing establishments enumerated at the five-year Census of 1914 numbered 275,791, the value of their products being \$24,240,435,000, as compared with a value in 1909 of \$20,672,052,000. The leading manufacturing States are New York, Pennsylvania, Illinois, and Massachusetts. The principal industrial centres are New York (clothing, printing and publishing, sugar-refining, textiles); Chicago (meat, clothing, iron and steel); Philadelphia

CROP ACREAGE AND PRODUCTION, 1918.

Preliminary estimates; subject to revision in December, 1918.

Crop.	Acreage.	Average yield per acre.	Production.	Average price received by producers.
	Acres.	Bushels.	Bushels.	Per bushel.
Corn	113,835,000	23'5	2,671,840,000	\$1'657

(textiles, laundry products and machinery, sugar, printing and publishing); Boston (shoes and shoes, rubber, meat, printing and publishing); Pittsburgh (iron and steel); St. Louis (meat, tobacco); Baltimore (clothing, copper); Cincinnati (liquors, laundry products and machinery); Cleveland (iron and steel); Buffalo (iron and steel); Minneapolis (flour mills, lumber); San Francisco (meat); Providence (textiles and jewellery).

UNEMPLOYMENT.

The subject of unemployment has received but a limited amount of attention in the States, and, as in the United Kingdom, the statistics available do not enable any accurate estimate to be made of the total number of unemployed persons at any time. The Bureau of the Census has made attempts to collect information in the census years, but the reliability of the returns secured by them so far is still undetermined. The details for the 1910 census are not yet available, but according to the census of 1900, 22.3 per cent. of all persons having "gainful occupations" were reported as not working at their regular occupations or any other occupation at some time during the census year.

The Department of Labour for the State of New York has, however, published statistics showing the amount of unemployment among organised workers in that State for a continuous period since March, 1897, and these figures may be taken as fairly reliable. The statistics are of two kinds, viz., those furnished by selected unions, and those returned by all unions in the State. The former are received every month, and the latter at the end of the first and third quarters of the year. The returns from the selected unions are considered the more accurate, and the statistics relating to these are therefore dealt with below.

These selected unions number nearly 200, and have a membership of about 100,000, or about one-fourth of the total organised workers in New York. The aim in their selection is to maintain as nearly as possible the same proportionate representation of different industries as appears in the total of all unions. The secretary of each of these unions reports monthly the membership of his union, the number at work and the number idle on the last working day of the month, and the causes of idleness.

The following table shows the percentages of members reported idle on the last day of each month, from January, 1906, exclusive of those returned as idle owing to sickness, accident, or old age, or on account of labour disputes; in other words, the statistics represent approximately idleness due to business or trade conditions:—

It will be noticed that the percentages in the foregoing table are much higher than those relating to the United Kingdom, but in considering the two sets of figures it must be borne in mind that the proportion of workers in the trades which they cover are not similar. The high percentages of unemployed in New York State are to some extent explained by the importance which the returns from seasonal trades assume in the reported figures. The building trades include slightly more than one-fourth of all union men, and the clothing trades account for almost as many members. But, allowing for these facts, the statistics clearly establish that the amount of unemployment is by no means constant, but that it fluctuates violently from month to month, from season to season, and from year to year.

FEDERAL EMPLOYMENT BUREAUS.

Something like two years ago the Federal Government launched a comprehensive scheme for the purpose of bringing the jobless man and the manless job together. Authority for this undertaking was found in the Immigration Act of 1907, which created, as an adjunct to the Federal Bureau of Immigration, a Division of Information, the duty of which was to furnish information concerning opportunities for employment to aliens and other persons within the United States. With this as a nucleus, the Federal Department of Labour has established a nation-wide system of employment offices, which is achieving noteworthy success in its efforts towards effecting a solution of the problem of unemployment. As far as we can ascertain, New York has discontinued publishing statistics in regard to unemployment. The following figures show the work done by the Federal Employment Bureaus during the past three years:—

Statistics for the year ended June 30.	Number of applications for help.	Number of persons applied for.	Number of applicants for places.	Number referred to employment.	Number actually employed.
1916	25,640	109,771	184,481	84,955	75,195
1917	189,491	418,810	413,649	363,189	283,799
1918	750,472	2,993,798	2,381,392	2,440,052	1,890,593

In the table attached hereto figures, which have been obtained from the latest annual State reports, where available, are given, showing the activities of the State Employment Bureaus in various States.

WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are the same as those of the United Kingdom, except that the old wine gallon (·8331 British gallon) and the Winchester bushel (·6964 British bushel) are retained. There is also a short ton of 2,000 lb., in addition to the long ton of 2,240 lb. The Metric System of Weights and Measures is permissive, but is little used. The unit of currency is the dollar of 100 cents.

\$1 = d. 49 ³²	\$1 = francs 5 ¹⁸ 13

<i>Wellington</i> —Agent, Arthur E. Whyte.	

Dependencies of the U.S.A.

THE PHILIPPINE ISLANDS

are situated between $4^{\circ} 40' - 21^{\circ} 10'$ N. lat. and $116^{\circ} 40' - 126^{\circ} 34'$ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 121,935 square miles, of which total 106,823 square miles are contained in the eleven largest islands, the 3,130 other islands having a combined area of 14,572 square miles.

Population.—At the Census of 1903 the population was ascertained to be 7,635,426, almost all of Malayan stock, of whom nearly 7,000,000 were Christians (Roman Catholics), about 275,000 were Muhammadans; about 725,000 are pagans. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the U.S.A. (8,200 in 1903). The population in 1913 was estimated at 8,831,618.

Government.—The islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1543 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion was at its height under Aguinaldo, a native leader, whose assistance was secured by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898. Co-operation with Aguinaldo and his undisciplined troops proved to be impossible, and the U.S. forces were eventually increased to 60,000

men engaged in a war of pacification which ended with the capture of Aguinaldo on March 23, 1901. The garrison has again been reduced to 12,000 American and 5,000 native troops. The first civil governor of the Philippines was William H. Taft (afterwards President of the U.S.), appointed July 1, 1901, and he was succeeded by General L. E. Wright (1904-5), H. C. Ide (1906), General J. F. Smith (1906), and W. C. Forbes (1909). The present Governor was appointed in 1913.

Governor-General (Manila), Francis Burton Harrison.

Vice-Governor-General, N. W. Gilbert.

Towns.—Capital, Manila, in the island of Luzon; estimated population, 250,000. The next largest towns are Cebu (about 60,000) and Iloilo (about 50,000); there are several others with populations from 25,000 to 40,000.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in $13^{\circ} 26'$ N. lat. and $144^{\circ} 39'$ E. long., at a distance of about 1,450 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 207 square miles, with a population on July 1, 1916, of 14,142, of whom 857 are foreigners (including 651 U.S. naval force), the natives being of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

Governor, Capt. Roy C. Smith, U.S.N.

PUERTO RICO.

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between $17^{\circ} 50' - 18^{\circ} 30'$ N. lat. and $65^{\circ} 30' - 67^{\circ} 15'$ W. long., with a total area of 3,606 square miles and a population of 1,118,012 at the census of 1910. Almost all the inhabitants are Roman Catholics. The island is about 100

miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 300 miles of railway were in operation in 1915, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 48,716 inhabitants in 1916, other towns being Ponce (35,500), Mayaguez (17,000), and Arecibo (10,000). The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

Governor, Arthur Yager\$10,000

TUTUILA.

Under an agreement between Great Britain, Germany, and the U.S., of Nov. 14, 1899 the first-named Power abandoned all claims to the islands of the Samoan Archipelago, which were divided by the remaining parties to the agreement, the islands east of 171° W. long. being reserved to the U.S. The territory thus acquired consists of the island of Tutuila and Aunuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population estimated at 7,250 in 1912.

Tutuila, the largest of the U.S. group, has an area of about 40 square miles and a population of 5,250, and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles and a population of about 2,000. Rose Island being uninhabited. Copra and cocoa beans are exported.

WAKE AND JOHNSTON ISLANDS.

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Midway).

ALEUTIAN ISLANDS.

The *Aleutian Islands*, or Catherine Archipelago (also known as the Santa Barbara group), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°-53° N. lat. and 172° E.-163° W. long. They have a population estimated at 2,000. The principal settlement is at Iliuliuk, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the Government of the United States for the sum of £5,000,000, and the American flag hoisted on 1 April, 1917. The total area of the islands is 138 sq. miles, with a population in 1911 of 27,086. St. Thomas (33 sq. m.) has a population of 10,898, mostly negroes; St. Croix, or Santa Cruz (84 sq. m.), has a population of 16,188, the capital being Christianstad (or Bassin);

St. John (21 sq. m.) has a population of 875, the capital being Cruxbay. St. Croix exports sugar, rum, and cotton. St. John is practically undeveloped.

CAPITAL, Charlotte Amalie (St. Thomas) contains one of the finest harbours in the West Indies.

Governor, Rear-Adm. Oliver, U.S.N.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 20, 1882. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness, interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

The interest of the United States in a canal across the Isthmus dates from 1825, and surveys under the auspices of that Government, or of companies organised in the United States, have been made at every available point between the Isthmus of Tehuantepec and the Atrato River. Actual construction, by an American company, of a canal across Nicaragua was begun in 1890, and abandoned in 1893, when the company failed for lack of funds. The failure of this company influenced the United States Government to take an active interest, and a commission was appointed in 1895 to make further studies and investigations. As a result of these investigations, the Congress of the United States authorised the President in 1902 to purchase the effects of the French company in Panama for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force; after which operations on a large scale

were begun on all parts of the canal. The labour force varied from 700 on May 4, 1904, 17,000 in 1906, 29,000 in 1907, to 50,000 in 1913. At its maximum, the force was composed approximately of 6,000 Americans, 5,000 European labourers, and 30,000 negro labourers from the West Indies and the mainland bordering the Caribbean Sea. The total cost is estimated at \$375,000,000, including, in addition to the canal construction, the \$40,000,000 paid to the French canal company, \$10,000,000 paid to the Republic of Panama, and the cost of terminal facilities.

The canal is fifty miles long, and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

There are three essential parts: a lake formed by damming the Chagres River, and two channels leading from the Atlantic and Pacific Oceans to this lake. The surface of the lake is normally at 85 feet above sea-level, and the channels connecting it with the sea are at sea-level. Ships are lifted from the sea-level channels to the lake, or lowered from the lake to sea-level in locks. These locks have a usable length of 1,000 feet, width of 110 feet; least depth of water over the sills when lake is at normal level, 41½ feet. These dimensions limit the size of ships using the canal. The dam which forms the lake is situated at Gatun, about seven miles inland from the Atlantic. It is built of earth, with an impermeable core of fine sand and clay, and is 1½ miles long, half a mile wide at bottom, and 100 feet at the top, which is 105 feet above sea-level. The lake is known as Gatun Lake, and is 164 square miles in area. At its southern end is Culebra Cut, the channel through the continental divide. This is the most extensive excavation ever made. The French canal builders dug about 12,000,000 cubic yards out of this section of the canal, and the Americans have completed an excavation that amounts to over 100,000,000 yards. The total excavation for the whole canal is about 220,000,000 cubic yards,

about 130,000,000 yards of which have been excavated in the dry and the balance by dredges. The amount of concrete used in the locks is 4,500,000 cubic yards.

The administration and construction of the canal were under Maj.-Gen. George W. Goethals, U.S. Army. The canal was opened for traffic on August 15, 1914, when the first steamer passed from deep water in the Atlantic to deep water in the Pacific, returning the following day. The journey was made in about 10 hours each way. Since that date several landslides have occurred, necessitating a temporary suspension of traffic. From the opening, to the end of March, 1917, 3,056 ships with a total tonnage of 12,861,567 had passed through the canal.

POSTAGE, PARCEL and TELEGRAPH RATES from the United Kingdom will be found in the *Postal Guide*.

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies and Legations in London.

In statistics of trade the term "Domestic" Exports signifies the produce and manufactures of the Country whence they come, and does not include articles re-exported after having been already received there from abroad.

ABYSSINIA or ETHIOPIA.

Empress, Waizeru Zauditu, elected 1916; crowned 1917 (daughter of late Emperor Menelek).
Heir, Ras Taffari Makonnen.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with a total population of 7,000,000, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, the British Somaliland, East Africa and Uganda Protectorates.

Abyssinia is volcanic and mountainous. It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

The Abyssinians are Christian (a branch of the Coptic Church), and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. There is no popular literature, and little education. In 1916 the Emperor Lij Eyasu was deposed, and the present Empress elected to the throne. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture, cattle breeding and hunting. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, and is increasing. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire Dawa and Harrar 8 per cent. *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway has been built under French auspices from Jibuti to the capital, *via* Dire Dawa. The posts and telegraphs are under French management, and Abyssinia has been admitted to the Postal Union. Telegraphs and telephones have been constructed, and admission to the International Telegraph Convention has been sought. The principal towns of Abyssinia, besides Adis Ababa, are Adwa, the capital of Tigré, Gondar, Debra-Markos, Saiyu, Aksum, Antalo, Ankober, Goré, Dembecha, Ijubé, Jimma, and Harrar. There are ancient architectural

remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

	1916.	1917.
Imports from U.K.	£3,817	£3,880
Exports to U.K.	3,330	

CAPITAL, Adis Ababa (population fluctuates, but is ordinarily about 50,000).

BRITISH LEGATION.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Capt. Hon. Wilfred G. Thesiger, D.S.O. (1909) £1,500
Hon. Attaché, Capt. A. W. D. Bentinck.
Consul, Gerald Campbell. £600 to 700
Vice-Consul, P. C. Zaphiro, C.M.G.
Harrar—Consul, Maj. J. H. H. Dodds. £700
N.W. Ethiopia (Gondar)—Consul (vacant).
Western Ethiopia—Consul, C. H. Walker, M.B.E.
Southern " —Consul, Arnold W. Hodson.

Adis Ababa is 500 miles from Zaila, *via* Harrar; letters from London are from 22 to 23 days in transit if the mail connects with steamer service from Aden; caravans take from 35 to 45 days.

AFGHANISTAN, see p. 522.

ALBANIA.

Albania lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Strait of Otranto. The independence of Albania was declared at the Conference of London, 30 May, 1913, at the close of the first Balkan War, when the Kingdoms of Bulgaria, Serbia, Greece, and Montenegro wrested the western portion of the peninsula from Turkey. The political neighbours are, on the north Montenegro and Serbia, on the east Serbia, and on the south-east and south Greece. The boundaries are subject to delimitation by International Commissions, the estimated area being 22,000 square miles, with a population of about 2,000,000. The principal towns are Durazzo and Scutari.

Valona—British Rep. on International Commission of Control, Harry H. Lamb, C.M.G. £1,200
Scutari—Vice-Consul, N. J. Summa.....

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARGENTINE REPUBLIC.

President (1916-1920), Hypolite Irigoyen \$96,000
Vice-President, Pelagio Luna 36,000

Minister of the Interior, Dr. Ramon Gomez.

Foreign Affairs, Dr. H. Pueyrredon.

Finance, Domingo Salaberry.

Justice and Public Instruc., Jose Salinas.

Agriculture, Alfredo Demarechi.

War, Dr. Julio Moreno.

Marine, Federico Alvarez da Toledo.

Public Works, R. Torello.

Minister in London (vacant),

2, a Palace Gate, W.

Chargé d'Affaires and 1st Secretary, Don Luis H. Dominguez.
2nd Secretary, Don Eduardo Racedo.
Military Attaché, Lt.-Col. Don Luis J. Garcia.
Attaché, Don Carlos Dominguez.
Naval Attaché, Capt. Don Enrique Moreno.
Consul-Gen., Dr. Sergio Garcia Uriburu, 120 Oxford Street, W. 1.
Asst. Consul, Don Arturo Parker.

There are also Consulates at *Liverpool, Southampton, Cardiff, Manchester, Newcastle-on-Tyne, Newport, and Glasgow.*

The Argentine Republic of South America is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 8,215,199 in 1917. The constitution is modelled on that of the U.S. of America. The Government has enjoyed considerable stability since 1890. The principal productions are wheat, maize, oats, linseed, sugar, wool, hides, cattle, sheep, and horses. There were in 1914 25,866,763 cattle, sheep 43,225,452, horses 8,323,815, 565,069 mules, 4,325,280 goats and 2,900,585 pigs, the total value being placed at £130,000,000. The export of frozen beef and mutton is an important industry. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. There were (1914) 21,880 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £150,000,000 of British capital. Telegraphs about 43,153 miles, mostly Government lines. Immigration is encouraged and comes principally from Spain and Italy, the immigration of the British working-man not being attended with success. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. The number of steam and sailing vessels which entered Argentine ports in 1917 was 11,202 of a total tonnage of 8,515,385. Of these 1,324 were ocean-going vessels of an aggregate tonnage of 3,261,435.

The Navy consists of 2 super-Dreadnought battleships, 2 river monitors, 4 armoured cruisers, 3 cruisers (old), 4 torpedo gunboats, 7 destroyers, and 2 first class and 6 second class torpedo boats. Strength about 5,000 men. There is a naval post at Bahia Blanca.

The climate is moderate and healthy. Spanish is the language of the country.

ARMENIA.

A district of W. Asia, lying between Georgia and Mingrelia in the N., the mountains of Kurdistan in the S., the Caspian Sea in the E., and the river Euphrates in the W. It possesses great historical interest as the reputed seat of the oldest civilised people in the world. It has an area of about 137,000 sq. miles, and is about 450 miles in both length and breadth. The inhabitants have always possessed definite racial characteristics, but have seldom been politically independent, the country having been held successively by Assyrians, Greeks, and Romans, it ultimately becoming a province of the Ottoman Empire in 1583. Subsequently it was divided between Turkey and Persia, Russia receiving a share at a later date. The rivers Euphrates, Tigris, Aras, and Kur take their rise within its boundaries. In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, hemp,

tobacco, and raw silk. It has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield gold, silver, copper, lead, iron, and valuable marbles. The chief Turkish towns are Erzerum, Kars, and Van.

German and Turkish statistics are stated to show that, in 1916, the number of Armenians who had been deported amounted to 1,396,350, of whom 1,056,550 were massacred.

AUSTRIA-HUNGARY.

The largest Empire, prior to the war, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30'–26° 20' E. long. It embraces an area of 240,456 sq. miles, and a population (1910) of nearly 51,340,603. The break-up of the "ramshackle Empire" is in active progress. The Czechs-Slavs in the North have already declared their independence; the Poles in the N.E.; the Ruthenians; Transylvania in the S.E., who propose to join Rumania, the Jugo-Slavs in the S.W., to unite with Serbia; and the Italian districts of Trent and Trieste, while Hungary has become a separate republic.

A large number of races are included in the Austrian populations, of whom the Slavs (Slovenes) are the most numerous. They form most of the inhabitants of Bohemia, Moravia, Carniola, Dalmatia, Croatia, Slavonia, and Galicia. They are divided into the Czechs or Bohemians (Slovacks), the Ruthenians, and the Poles. Germans form about a quarter of the whole population, and exist chiefly in Austria, Salzburg, Tyrol, Styria, Carinthia, and the west of Hungary. Other inhabitants are the Romanes, Latins, and Friulians. Magyars are found chiefly in Hungary and Transylvania, while the remainder of the inhabitants consist of Jews, Armenians, and gipsies.

The following table shows its area and chief divisions in 1918:—

Austrian Lands.	Sq. Miles.	Tyrol and Vorarlberg	Sq. Miles.
Lower Austria	7,654	11,324
Upper Austria	4,631		
Bohemia	19,980	Total for Austria }	115,823
Bukovina	4,035		
Carinthia	4,005	Hungarian Lands.	
Carniola	3,856	Hungary and Transylvania	107,858
Dalmatia	4,940	Fiume	8
Galicia	30,307	Croatia and Slavonia	16,767
Görz, Gradiska, Istria, and Trieste	3,084	Total for Hungary }	124,633
Moravia	8,583	Total for Empire }	240,456
Salzburg	2,767		
Silesia	1,987		
Styria	8,670		

(Bosnia and Herzegovina are shown in the next column.)

The Austro-Hungarian Monarchy consisted of two States, the Empire of Austria and the Kingdom of Hungary, and of the provinces Bosnia and Herzegovina. Each of the States had its own Constitution and Parliament, and for most branches of State affairs its own Ministry and Administration; but they were closely bound together by the identity of the Ruler and by a permanent Constitutional Union, which, upon the common principle of possession and defence, was first proclaimed by the Pragmatic Sanction of 1723, and was subsequently regulated by the

so-called "Compromise" (Ausgleich-Kiegyezés) of 1867. According to the Constitutional Union foreign affairs and the greater part of war affairs (Army and Navy), together with the finances concerning them, were dealt with by common ministries. The control of the official actions of these ministers and the voting of the common budget was exercised by two Delegations, each consisting of 60 members, of whom 20 were chosen from the Upper House of Austria (Herrenhaus) and of Hungary (Förendiház), and 40 from the Lower House of Austria (Abgeordnetenhaus) and of Hungary (Képviselőház). In every other respect legislation concerning the common affairs belonged to the two Parliaments, and each State provided separately for its contribution to the common expenses. The proportion to be contributed by each State was fixed by mutual agreement, renewable every 10 years, and the last so made, which expired in 1897, was renewed in 1907. According to this agreement Austria contributed to the common expenses with 63·6 per cent., and Hungary with 36·4 per cent. From 1897 to 1907, no new proportion having been agreed, the quota was fixed by the Emperor-King's decision.

Common expenses were estimated (for the year 1914-5) at £24,405,105, towards which the Customs revenue contributed £9,018,956, leaving £15,386,149 to be covered by the matricular contributions of Austria and Hungary.

COMMERCE is carried on principally with Germany, Italy, Russia, France, and Switzerland, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England.

In connexion with the Ausgleich-Kiegyezés the two States also entered into a commercial and customs union in 1867, by which the two States formed one commercial and customs territory, and possessed the same system of coinage, weights and measures, and a joint bank of issue. In the same way as the quota agreement, this union was renewable every ten years, and failing a renewal each State provides separately for these matters. The Union was so renewed in 1877, 1887 and 1907. In 1897, no agreement having been attained, the Union was provisionally maintained.

The principal exports are sugar and confectionery, timber and woodwork, eggs, coal and fuel, animals, hides, glass, woollens, paper and stationery, cottons, leather goods, malt, iron and manufactures, horses, and cereals; the principal imports being raw cotton, textiles, iron and metals, coal and fuel, raw wool, machinery, hides and skins, cereals, coffee, raw silk, leather, tobacco, and books. The total value of merchandise imported in 1912 was £146,093,342; the exports being valued at £118,199,093.

On 28 June, 1914, the Archduke Ferdinand, heir presumptive to the throne, was assassinated in Bosnia. Serbia was charged to be responsible for this, and on 23 July the Austro-Hungarian government presented an ultimatum to that country, and war was declared on 28 July. At the end of October, 1918, Austro-Hungary asked for an armistice, which was granted by the Allies, and hostilities ceased on 3 Nov. of that year.

Bosnia and Herzegovina.—Formed, in the 14th century, an independent kingdom, but was captured by the Turks in the 15th century. By the Treaty of Berlin, in 1878, the two provinces were handed over to the military occupation of Austria, and were annexed to that country in

1908. It was in Bosnia, on 28 June, 1914, that the Archduke Ferdinand was assassinated, a crime which led directly to the Great War. These provinces will probably be handed to Serbia at the Peace settlement. The country is situated between $42^{\circ} 40'$ to $40^{\circ} 15'$ N. lat. and $33^{\circ} 25'$ to $38^{\circ} 45'$ E. long., and contains a total area of 51,028 sq. kilometres, and a population of 1,898,379. The seat of administration is Sarajevo. The local Revenue was estimated at Kr. 118,596,600 in 1916, the expenditure at Kr. 118,573,500. CAPITAL, Sarajevo (Bosna-Serai). Civil population (1910), 51,872.

AUSTRIA.

Austria contains an area of 300,005 sq. kilometres, and a population of 28,567,808 (1910). The Central Government of the Empire is conducted by the Reichsrath, consisting of an Upper (Herrenhaus) and Lower House (Abgeordnetenhaus). There are 17 provinces, viz.:—Lower Austria, Upper Austria, Salzburg, Styria or Steiermark, Carinthia or Kärnten, Carniola or Krain, Coast Districts (Istria, Görz and Gradisca, Trieste), Tyrol, Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukowina, and Dalmatia, each possessing a separate Diet (Landtage) and also sending representatives to the Reichsrath. Of the inhabitants, there were in 1900, 9,171,614 Germans, 5,955,397 Bohemians and Moravians, 4,252,483 Poles, 3,381,570 Ruthenians, and 1,192,780 Slovenes. There are 23,797,000 Roman, Greek and Armenian Catholics, 607,000 Orthodox Greek, 494,000 Protestants, and 1,225,000 Jews in the country. In addition to Vienna there are seven cities with over 100,000 inhabitants, and nine in addition with over 50,000.

The principal industry is agriculture, in which 13,700,000 were employed in 1900; trade and manufactures accounting for about 9,600,000, while mining occupied 538,819. The chief products are grain, cereals, wine (6,252,571 hectolitres in 1909), and minerals (coal, iron, lead, zinc, silver, quicksilver and copper); the manufactures being woollens, cottons, and glass.

In the Budget for 1918-19, the aggregate expenditure is estimated at £972,840,000, assuming that the war continues to the end of the fiscal year. The permanent expenditure includes £100,400,000 for interest on all war debts, including the eighth War Loan. The total revenue is estimated at £194,200,000. The total deficit amounts to £778,640,000, to cover which the Government demanded a credit of £840,000,000.

The purely military expenditure of Austria for the first four years of the war amounted to £1,545,000,000, and for the fifth year £480,000,000 was asked. The indebtedness from all war credits amounted on 30 June, 1918, to £2,280,000,000.

Before the war, Austria had to pay 489 million crowns in interest for all Austrian debts, while at the end of the current year no less than 4,335,000 crowns will be required for this purpose.

CAPITAL, Vienna. Population (1910), 2,031,498. Vienna is distant 955 miles from London.

HUNGARY.

Hungary was declared a Republic on 17 Nov., 1918.

Hungary, with its dependent states, has an area of 324,851 sq. kilometres, about 125,430 sq. miles, with a population of 20,886,487 at the census of 1910: to this Croatia and Slavonia contribute 2,621,954. The country is divided into 71 counties

with 474 districts for those of Hungary. The country was raised to its present status in 1867, when the kingdom of the Magyars obtained legislative independence, the Austrian Emperor being King of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia formed an annexe of the Crown of Hungary, with autonomy in home affairs, justice, and public instruction.

Of the inhabitants in 1910, 10,050,575 were Hungarians, 2,949,032 Rumanians, 2,037,435 Germans, 1,967,970 Slovaks, 1,833,162 Croatsians, and 1,206,471 Serbians. By religions (1910) there were 10,888,338 Roman Catholics, 2,025,425 Greek Catholics, 2,986,874 Orthodox Greeks, 1,340,195 Lutherans, 2,621,501 Calvinists, and 932,406 Jews. In addition to Budapest, which had, in 1910, 881,601 inhabitants, there are ten cities with over 50,000 inhabitants.

All the great plains produce grain of excellent quality. The live stock in 1911 included 7,320,000 cattle, 2,350,000 horses, 8,550,000 sheep, and 7,580,000 pigs. The chief mineral products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, and sulphur. The mines, however, are not well worked, and might be made a much greater source of income.

Estimated Revenue, 1914-5:—

Ordinary	£81,400,234
Extraordinary	12,939,678

Total

Estimated Expenditure, 1914 5:—

Ordinary	£78,261,288
Extraordinary	16,076,079

Total

The public debt of Hungary on 1 Jan., 1917, was stated as £673,750,000.

CAPITAL, Budapest. Pop. (1910), 881,601.

Budapest is distant 1,126 miles from London.

BELGIUM.

King, Albert, born 8 April, 1875; succeeded his uncle, Leopold II., 17 Dec., 1909; mar. Oct., 1900, the Duchess Elizabeth in Bavaria, and has issue two sons, (1) the Heir Apparent; (2) Charles Theodore, b. 10 Oct., 1903; and a daughter, Marie-José, b. 4 Aug., 1906. Heir Apparent, H.R.H. Prince Leopold, Duke of Brabant, born 3 Nov., 1901.

Attaché, Prince Reginald de Croy.

Head of Military Mission, Count de Jonghe d'Ardoye.

Military Attaché, Capt. Guy Reyntiens.

Consul-Gen. M. E. Pollet, 37 Bedford Square, W.C.

A Kingdom of Central Europe, with a total area of 11,373 square miles and a population (at the census of 1910) of 7,516,730.

There are nine provinces: Antwerp, Brabant, Flanders (E. and W.), Hainaut, Liège, Limburg, Luxembourg, and Namur. BRUSSELS, pop. 1910, 195,630 (with suburbs, 720,347 inhabitants) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (320,650 exclusive of suburbs); Ghent (165,149), the centre of the iron industry, which has also large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (174,768). Its great harbour and commercial entrepôt is Antwerp, a strongly fortified city on the Schelde. The other harbours are Ghent, Bruges, Ostend, Nieuport, Blankenberg, and Zeebrugge. French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

In 1830 Belgium separated from Holland, and her neutrality was guaranteed by a Conference of the European Powers, and by a further treaty, in 1839, signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 110 senators (with the exception of 27 elected by the provincial councils) and 166 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

Belgium has a frontier of 831 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (381 miles), on the east by Germany (60 miles) and the Grand Duchy of Luxemburg (80 miles), with a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

DEFENCE. — There is universal liability to service, but in practice the Army on a peace footing consists of about 50,000 men. The war strength amounts to somewhere about 350,000. Belgium has no navy.

Antwerp is the principal fortress, and Liège and Namur are also fortified, forming

"Têtes-de-pont" on the line of the Meuse against a violation of neutrality by either France or Germany. (On the 2nd Aug., 1914, this neutrality was violated by an entirely unprovoked invasion of the German army at Visé. They met with the most stubborn resistance from the valiant though numerically inferior Belgians at Liège and Namur. The Germans celebrated their occupation of the greater part of the country by debauching and subsequently destroying Louvain, Termonde, and other places and settling up generally a reign of terror. They have levied a war contribution on Belgium of no less than £93,200,000, apart from enormous fines on localities, firms, and private persons. On Friday, 15 Nov., 1918, Antwerp was re-occupied by the victorious Belgian army, and Brussels a few days later.

EDUCATION. — Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The State Universities are at Ghent and Liège; others at Louvain and Brussels.

COMMERCE. — Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant), glass, textiles (Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

Exports to the U.K., 1916, £1,290,912.

Imports from U.K., 1916, £265,715.

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1912) of 105 vessels (181,637 tons), in addition to which there were 453 fishing boats. In 1912, 9,268 foreign vessels entered at Belgian ports (tonnage 14,497,101). In 1912 there were 4,719 kilometres of railway (including branch lines and 250 kilometres of private lines rented by the State); the telegraphs had a length of 7,975 kilometres (1911), and the post-office carried 218,000,000 letters, 123,000,000 post-cards, while 22,000,000 telegrams were sent in 1911. The navigable rivers and canals have a length of 2,179 kilometres (1911), and there are 9,757 kilometres of roads.

BRITISH CONSULAR OFFICES

(Suspended)

THE BELGIAN CONGO.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated at not more than 15,000,000. The total European population (Jan. 1912) was 5,465, of whom 379 were British, 48 Americans, 278 Italians, 303 Portuguese, 177 Swedes, 150 Germans, and 3,307 Belgians. The river is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 240 miles in length. A narrow-gauge line runs from Lukula to Boma, cocoa planting district of Mayumbe. The Congo River above Leopoldville and its numerous affluents are navigable by steamer on about 5,000 miles. To avoid the falls on the Upper Congo River the Great Lakes Railway Company built a metre-gauge line from Stanleyville to Ponthierville (125 kilometres), and another from Kindu to Kongolo (355 kilometres). The line from Kabalo to Albertville on Lake Tanganyika (270 kilometres) was completed in 1916, connecting the West Coast of Africa with German East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1918, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway has been constructed, 200 of which have been laid during the war. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway. A telegraph line is laid from Banana to Coquilhatville (85 kilometres). There is telegraphic communication with Europe. Fourteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. Powerful wireless stations were being erected at the outbreak of the war at Brussels and Boma, to connect Belgium with the Lower Congo. The West Coast District has a rather scanty rainfall (40 inches), but on the Maimbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Extensive forests cover the central districts; oil-palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Para and Ceara rubber and cotton are successfully planted. Mines are very extensive. The copper district of Katanga has enormous deposits of copper ore, and the melters at the Lubumbashi produced about 30,000 tons of copper last year. A rich tin-belt extends from Bukama towards Lake Tanganyika. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south. Imports during the year 1916, 140,677 tons, value

46,391,000 frs.; exports, 62,829 tons, value 129,203,000 frs., mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold and diamonds. Sleeping sickness, once very prevalent and destructive, is now decreasing. Revenue (1916), 32,049,082 frs.; expenditure, 54,755,912 frs. Capital, Boma (pop. 500 whites, 2,000 natives). Principal towns, Elisabethville (Katanga) (pop. 1,000 whites, 6,000 natives); Stanleyville (200 whites, 8,000 natives); Coquilhatville, Kinshasa (Stanley Pool), and Leopoldville.

(CZECHO-SLOVAK REPUBLIC.)

President, Professor Masaryk.

MINISTRY (November, 1918).

Premier, Dr. Kramarz.

Foreign Affairs, Dr. Benes.

Education, M. Habermann.

Finance, M. Rasin.

National Defence, M. Klofac.

Interior, M. Svehls.

Formerly an independent kingdom, Bohemia passed into the hands of Austria in the seventeenth century, and formed portion of that Empire until the disruption following the late war, when a republic was declared. Bohemia has an area of nearly 20,000 square miles, and touches Saxony and Prussian Silesia, Moravia, Upper and Lower Austria, and Bavaria. It is surrounded on all sides by lofty mountain ranges, though the country generally is undulating and the soil very fertile. Agriculture is widely spread, and the manufactures are of high importance. Dyeing and calico printing, woollens, chemicals, porcelain ware, are among the chief industries, while the glass production is celebrated. The chief towns are PRAGUE, the capital, Pilsen, Reichenberg, Budweis, Leitmeritz, and Rumburg.

A legation has been established in London.

BOLIVIA, Republic of.

(Aug., 1917.)

President, José Gutierrez Guerra (1917-1921).

Foreign Affairs, Señor Julio Zamora.

War, Dr. Andres Muñoz.

Justice & Industry, Julio Gutierrez.

Interior, Ricardo Mujia.

Finance, Alfredo Ballivian.

Instruction, Dr. Salinas Vega.

Envoy Extraordinary, Minister Plenipotentiary & Consul-General, Señor Adolfo Ballivian.

1st Secretary, Gaston Mujia.

2nd Secretary, Mamerto Uriulagoitia.

Offices of Legation, 74 Compayne Gardens, N.W.

Consul-General (acting), Gaston Mujia, 81 Cannon Street, E.C.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is about 567,498 square miles, with a popu-

lation in Jan. 1917 estimated at 2,800,000. The peace army amounts to about 5,000 men, the war effective being about 105,000. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible; while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is very large, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with tin, gold, silver, and copper are its principal exports; its chief imports being iron, cotton and woollen goods, hardware, and silks. There are about 900 miles of trunk lines of railway and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication with La Paz from Antofagasta (Chile), and from Rio Mulato (near Uyuni) to Potosi; branch lines run from Oruro to Cochabamba. Railway from Arica to La Paz has long been completed and open to traffic. Proposed railway from Guaquí to Puno temporarily abandoned, the connexion between these towns being still maintained by steamers across Lake Titicaca. Construction on the railway between La Quiaca and Tupiza, in Bolivia, continues this year by a French firm. Communication with Peru is effected by rail to Guaquí and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. Its construction has recently been begun by means of a loan made in New York. A line from Potosi to Sucre, the legal capital, is under construction. A line from Buenos Aires to Bolivia is complete to La Quiaca, placing La Paz within 4-5 days of Buenos Aires. The gap between Tupaza and La Quiaca is crossed by an automobile service taking one day.

Diplomatic relations with Germany were broken off on April 14, 1917.

House, South Place, Finsbury, E.C. 2.

Consul-Gen. in Liverpool, Dario Freire.

The Republic of the U.S. of Brazil was founded on Nov. 15, 1889, by a bloodless revolution which drove Dom Pedro from the throne. (In 1821 a constitution was granted by Portugal, but afterwards repudiated, in consequence of which the independence of the country was proclaimed under the sovereignty of Pedro I.)

The diplomatic representation of both England and Brazil was raised to the status of an Embassy in 1918.

Brazil, the most extensive State of South America, extends between lat. 4° 22' N. and 33° 45' S. and long. 34° 40' and 73° 15' W., and comprises an area of 3,298,870 square miles, with a population estimated at 24,309,000, of whom about 1,000,000 are "wild" Indians. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea.

Diplomatic relations with Germany were broken off on April 20, 1917.

The Navy (1913) consisted of 3 Dreadnoughts, 2 old battleships, 5 protected cruisers, and other smaller craft, including 11 t.b.d.'s, 3 submarines, and some seaplanes. There are 42 ports along the coast, of which the principal are Rio and Santos, with a shore line of 123 miles. Brazil is unequalled for the number and extent of its rivers: the Amazon, with its immediate tributaries, and the Tocantins, San Francisco, and others.

The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its forests are immense. Its agricultural produce is abundant. Cattle-raising is an important industry, the number being computed at 31,000,000. Cotton is being largely cultivated. Sugar-cane is grown in

large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The chief products of the country are coffee and rubber: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. The exports include also meat, hides, maize, beans, and "herve matte" (tea). The imports consist principally of every description of manufactured articles, but there were in 1915 no fewer than 1,541 industrial establishments, including 161 cotton-mills, giving employment to 45,942 hands, and representing an invested capital of \$50,000,000. The enormous protective duties were again increased in 1887, 1893, 1896, 1906, and 1916.

In December, 1917, there were 28,127 kilometres of railway open, and 3,600 under construction. Length of telegraph wires in 1916, 68,792 kilometres.

	1917.
Revenue	£35,000,000
Expenditure	35,000,000
External Debt (funded)	115,448,198

The Republic of Bulgaria is bounded on the north by Rumania, on the west by Serbia and Greece, on the east by the Black Sea, and on the south by the Turkish province of Adrianople and the Aegean Sea.

Bulgaria was created by the Treaty of Berlin, 13 July, 1878, and in 1885 Eastern Roumelia was added to the newly created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. In Oct. 1915 Bulgaria decided to participate in the European conflict, and, siding with Germany, Austro-Hungary, and Turkey, attacked Serbia. The participation in the Great War resulted in her unconditional surrender to the Allies on 29 Sept., 1918, and King Ferdinand abdicated his throne on 4 Oct. He was succeeded by his eldest son Boris, who also abdicated a few weeks later (1 Nov., 1918), when a Republic was declared. The present area of Bulgaria is about 42,000 square miles, with a population of about

5,500,000. The prevailing religion of the Bulgarians is the Orthodox Greek Church.

In 1916, the Gregorian was substituted for the Eastern Calendar, used hitherto.

EDUCATION is free and compulsory. There are few technical schools. Sofia has a University.

TRADE, &c.—The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. The principal towns, with their populations at the census of 1910, are Sofia (102,812), Philippopolis (47,981), Varna (41,491), Rustchuk (36,255), Sliven (25,142), Plevna (23,019), and Shumla (22,225). The principal ports are Varna and Bourgas. In 1910, 6,820 vessels (1,988,492 tons) entered and cleared at ports on the Black Sea. There were 1,384 miles of railway open in 1913 and about 239 miles under construction; 4,112 miles of telegraph and 1,254 of telephone wires. In 1912 there were 2,342 post offices, handling 79,896,000 letters; 374 telegraph offices, the number of dispatches being 2,499,600.

CHILE, Republic of.

President (1915-1920), J. Luis Sanfuentes \$60,000

Ministry (13 Oct., 1917; resigned 16 Nov., 1918).

Prime Minister and Minister of the Interior, Señor Eleodoro Yanez.

Foreign Affairs, Religion and Colonisation, Señor Edouard Suarez.

Justice and Public Instruction, Señor Arturo Alemparte.

Finance, Señor Ricardo S. Edwards.

War and Marine, Señor Oscar Viel.

Industry and Public Works, Señor Malaquias Concha.

Envoys Extraordinary and Minister Plenipotentiary, Agustín Edwards.

Legation, 23 Grosvenor Square, W. 1.

1st Secretary, Manuel Salinas, 22 Grosvenor Square, W.

2nd Secretaries, José Nixon; Gonzalo Moutt.

Naval Attaché, Capt. F. E. Merino.

Consul, Vicente Echeverría L., 94 Gracechurch Street, E.C.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 10' and 56° 35' S., and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest are the Gualatiri, 19,884 feet; the Baya, 19,993 feet; Cocorputi, 22,162 feet; El Muerto, 21,227 feet; and others nearly as lofty. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable

highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,798 square miles, with a population (1910) of about 3,789,864. In 1916, the births numbered 144,193; marriages, 20,121; and deaths, 9,856. The principal towns, with their estimated populations (1916), are:—Santiago (397,550), Valparaíso (201,507), Concepción (68,902), Talca (41,618), Iquique (45,502), Chillan (38,541), and Antofagasta (56,295). The National Congress consists of a Senate of 37 members and a Chamber of Deputies of 118 members elected by direct vote every three years. There is universal adult male suffrage for those who can read and write. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The live stock includes about 2,500,000 cattle, 5,500,000 sheep, 500,000 horses, 200,000 goats, and 225,000 pigs. The mineal wealth is considerable, the country being extremely rich in copper-ore, and some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tasapacá, Guanaco, and Cachinal in Atacama, and Curacoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. The nitrate exports in 1916 were valued at £24,000,000. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. There were (1916) about 5,105 miles of railway open and 250 miles under construction, over 19,359 miles of telegraph, 927 post-offices, and 28,126 miles of telephone, some worked by English companies. The commercial marine numbers (1915) 101 steamers (51,221 tons) and 28 sailing vessels (24,764 tons). In 1915, 13,123 vessels of a total tonnage of 15,150,830 entered at Chilean ports. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 14,500. The navy consists of 1 battleship, 2 armoured cruisers, and 3 protected cruisers, 3 torpedo gunboats, 13 destroyers, and 2 submarines; 2 Dreadnoughts under construction in England, one of which was acquired by the British Navy on the outbreak of war.

EDUCATION is free but not compulsory, and 50 per cent. of the population are still illiterate. There is a State University at Santiago. The National Library contains 162,682 volumes.

	1915.	1916.
Revenue (Estimate)	£9,253,113	£13,760,146

Counsellor, Sir John McLeavy Brown, C.M.G., 1st Secretary, Tsung-ye Lo.
 2nd Secretary, Lo Yu-hsing.
 3rd Secretaries, Kuo Yu-cheng; See Ping.
 Attachés, Tsai Tsung-chang; W. C. Chen; L. V. Pan.

AREA AND POPULATION.

Territory.	Square miles.	Population.
China Proper	1,501,000	402,000,000
Manchuria	360,000	11,000,000
Mongolia	1,076,000	3,000,000
Tibet	750,000	3,000,000
Eastern Turkestan	600,000	2,000,000
Total	4,287,000	421,000,000

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles, its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000. The government of the 18 provinces is entrusted to civil and military governors, and under them each province is subdivided into circuits superintended by tao-yins or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Kiakhta, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question, and contributed towards the first China War of 1840. A treaty was signed at Nanking as the result of these operations.

ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government was by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Korea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of \$325,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties—(1) between the U.K. and China (5 Sept., 1902); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatungkow, Chang-sha, and Antung in Manchuria, were made Treaty ports.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsin-min-tun, Tung-chiang-tzu (on the Liao River), and Fa-ku-men in Fengtien Province; Chang-ch'un, Kirin, Harbin, Nungta, Hunch'un, and Sausing in the Kirin Province; and Tsitsihar, Hailar, Aihun, and Mauchuli in the Heilungchiang Province.

In October, 1911, a revolution broke out in Hankow, which resulted finally in February, 1912, in the abdication of the Manchu Dynasty in favour of a Republican form of Government. In 1913, a second revolution, engineered by the Southern Party, was successfully put down by President Yuan Shih-kai. Since that date the Central Government has been gradually consolidating its position, and bringing about a centralisation of power in Peking. In May, 1915, a new treaty with Japan was concluded by which additional privileges are granted to Japanese in Manchuria and Mongolia. Towards the end of 1915 President Yuan Shih-kai engineered a campaign to revert to a Monarchical form of government, and, as the result of elections held all over the country, was invited to ascend the throne as Emperor. The Southern Provinces, however, immediately rose in revolt,

and the attempt failed and finally ended with the death of Yuan Shih-kai in May, 1916. The Vice-President, Li Yuan-hung, succeeded to the Presidency, and all traces of the Yuan Shih-kai régime were rapidly abolished. The first Republican Parliament reassembled, and the government reverted to the Republican form adopted after the overthrow of the Manchu Dynasty in 1912. Both Houses of Parliament are elected by a system of limited franchise, and the government of the country is vested in them. The President, who is elected by Parliament, is assisted by a Premier and a Cabinet of Ministers, whose appointments have to be approved by Parliament, and to whom they are responsible for their actions. An abortive attempt to restore the Monarchy was suppressed in June, 1917. On 14 Aug., 1917, China declared war on Germany and Austria-Hungary.

The estimated foreign population of China during the year 1914 was as follows: British, 8,914; Japanese, 84,948; Russian, 56,319; American, 4,365; Portuguese, 3,187; German, 3,013; French, 1,864; other nationalities, 2,197, the total being 164,807. Out of a total of 3,421 foreign firms in China, 534 were British, 1,237 Russian, 955 Japanese, 273 German, 136 American and 113 French.

DEFENCE.—The army is undergoing reorganisation. The total strength of all forces in August 1913, just after the Rebellion of that year, was estimated at 500,000, but no authenticated statistics are obtainable. China now possesses 2 protected cruisers built in 1911 (2,750 tons), 4 older protected cruisers (4,300–3,000 tons), 3 torpedo gunboats (850 tons), 11 gunboats (750–550 tons), 4 destroyers (400 tons), and 8 small torpedo boats (120 tons). No figures are available as to the complement of the Navy.

EDUCATION.—Many changes in administration and development are under discussion including a proposal to establish universal compulsory primary education. There is a University in Peking and a number of colleges all over China under foreign management. In 1911, there were 545 foreigners employed in educational work.

COMMERCE.—The net trade of the open ports for the years 1911–1916 is stated as follows, in *taels* (7½ = £1).

Year.	Imports.	Exports.	Total.
1911	471,503,943	377,338,166	848,842,109
1912	473,097,031	370,520,403	843,617,434
1913	570,162,557	403,305,546	973,468,103
1914	557,109,048	345,280,874	902,389,922
1915	442,048,632	407,408,025	849,456,657
1916	645,508,797	602,246,700	1,247,755,497

The import of Indian opium is now prohibited. The foreign trade of China was shared by the nations of the world as under in 1914:—

Nations.	%	Foreign.	%
Great Britain	12	Japan	20
Hong Kong	28	U.S.A.	9
India	4	Europe (exc. Russia)	11
Other British Dominions	2	Russia	6
		Other countries	8
% British	46	Foreign	54

TRADE WITH UNITED KINGDOM.

Imports of British produce and manufacture, 1917, £10,691,205:—

Chemicals	£106,822	Machinery	£293,800
Cottons	7,395,031	Tobacco	397,368
Iron Manufactures	250,982	Woolens	731,186

Exports to U.K., 1917, £8,497,356:—

Antimony	£208,425	Silk Manufactures	£219,054
Basties	367,217	Skins and Furs ..	251,451
Hair	186,922	Straw Platings ..	82,742
Oil	136,284	Tallow	79,051
Peas and Beans ..	801,675	Tea	444,153
Raw Silk	1,080,927	Wool	295,763

COMMUNICATIONS.—*Railways*.—About 6,500 miles were open in Jan. 1915, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1914 the total tonnage of vessels entered and cleared at the treaty ports was 96,326,276, an increase of 2,991,446 on that of the previous year. Of these 40 per cent. were British, 25 per cent. Chinese, 5 per cent. German, 20 per cent. Japanese, 2 per cent. French, and 3 per cent. Russian.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1913 there were 37,000 miles of land lines and 51,000 miles of aerial wires.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the *Inspector-General*. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a *Postmaster-General* (foreign) was appointed. Already letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices is 8,324; 538,981,400 postal packets and 5,385,260 parcels were handled in 1914.

Revenue 1913.....	£33,000,000

CAPITAL OF THE CHINESE REPUBLIC, Peking. Population, 1,000,000.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000. Outer Mongolia is now, by the Treaty of Kiakhta of 1915, an autonomous state under Chinese suzerainty. Its ruler, the Hutukhta Khan of Urga, receives his title from the Chinese Government. China appoints a Resident at

Urga, with three Assistant Residents in other towns. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, *q.v.*

CHINESE TURKESTAN has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Ürümchi and Kulja.

COLOMBIA, Republic of.

President (1914-1918), Dr. Marco Fidel Suarez.
 Interior, Marcelino Arango.
 Foreign Affairs, Pedro A. Molina.

Envoy Extraordinary and Minister Plenipotentiary in England, Dr. Ignacio Gutierrez Ponce, 42 Holland Road, Kensington, W. 14.
 Secretary, Eduardo Perez-Triana.
 Consul-General, Joaquin Orrantia, 7 Sicilian Avenue, Southampton Row, W.C.
 Consul in Liverpool, Luis E. Bonilla.
 Consul at Southampton (vacant).

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between $2^{\circ} 40' 8''$ S. to $12^{\circ} 25' 1''$ N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population estimated at 5,475,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants.

Its mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of about 4,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 650 miles being open in 1918, with 8,680 (1907) miles of telegraph. The rate of exchange is about \$5 gold = £1 (approximately).

	1916-17.	1917-18.
Revenue (estimate) gold	\$17,650,000	\$13,859,395

COSTA RICA, Republic of.

(27 Jan., 1917.)

President (1917-1919), Frederico A. T. Granados.
 Minister of Foreign Affairs, Carlos Lara.
 Commerce & Finance, Manuel F. Jiménez.
 Public Works, Juan B. Quirós.
 Interior, Amades Johanning.
 War and Marine, José Joaquín Tinoco.
 Public Instruction, Roberto Brenes Mesén.

Envoy Extraordinary and Minister Plenipotentiary, Wenceslao de la Guardia (Legation closed).

Consul-General, W. J. Le Lacheur, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between $8^{\circ} 17'$ and $11^{\circ} 10'$ N. lat. and from $82^{\circ} 30'$ to $85^{\circ} 45'$ W. long., contains an area of about 23,000 English square miles, and a population (1916) of 441,342. The chief exports (1916) are coffee (£873,043), bananas (£962,559), gold and silver bullion (£207,223), cacao, hardwoods, rubber, skins, and hides. The imports are dry goods, hardware, provisions, railway material, machinery, paints, and general merchandise (in 1916, 70.25 per cent. from United States, 12.21 from United Kingdom, 2.78 from France, and 14.74 from other countries).

Diplomatic relations with Germany were broken off on 26 Sept., 1917, and war was declared on 23 May, 1918.

The chief ports are Limon, on the Atlantic coast, through which the whole of the important banana trade with the United States and England is done, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast. In 1916, 433 foreign vessels (849,255 tons) entered at Costa Rican ports. About 405 miles of railroad were open in 1916. In 1916 there were 177 post offices, dealing with 5,915,305 packets, and 132 telegraph offices (one wireless), transmitting 375,272 dispatches over 1,518 miles of line. Telephones, 513 miles. A considerable amount of English capital is embarked in the Republic.

Vice-Consul, Frederick Gordon.

San José is 5,687 miles from London; transit *via* New York, up to 30 days.

CRETE (or CANDIA).

Governor-General, Sotirios Krokidas (1918.)

Crete (or Candia) is an island in the Mediterranean, a seat of early civilisation, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles; the population is 336,151, of whom 307,812 are Christians, 27,852 Mussulmans, and 487 Jews. The island formed part of the early and later Roman Empires, and in 1669 was captured by the Turks, who retained it until 1898, when Great Britain, Russia, France and Italy set up a semi-independent government in the island under a High Commissioner, subject to the suzerainty of the Sultan of Turkey. At the outbreak of war between Greece and Turkey in Oct. 1912 Crete was declared to be part of the Hellenic kingdom. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are olive oil, wine, raisins, carobs, citrons, soap, vallonene, and oranges. The chief towns are Candia (pop. 31,000), Canea, the capital (pop. 28,000), and Rethymo (pop. 11,000). When the National movement took place in Greece in 1916, Crete was the first of the Greek islands to declare itself in favour of the Provisional Government in Salonica. Public works on a large scale are in contemplation, including road construction, harbour improvements, and utilisation of water power.

	1916.	1917.
Imports from U.K.	£7,207	£15,777
Exports to U.K.	40,724	1,880

1st Secretary (vacant).

2nd Secretary, Dr. Luiz Mazon.

Attaché, F. Gonzalez de la Campa.

The island of Cuba lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 2,150,112 (1910). Cuba suffered many years of internal discord, from its discovery by Columbus

until its liberation in 1898, having been a Spanish possession until the Spanish-American War, of which it was the main bone of contention. A Cuban constituent convention met at the end of 1900 and agreed upon a Constitution (1901), which was ratified on certain conditions by the U.S.A. in 1902. In 1906 disturbances broke out and resulted in the renewed occupation by American troops and the establishment of a provisional administration, which ceased when President Gomez took over the administration in 1909.

Cuba declared war against Germany on April 7, 1917.

The chief products of the island are tobacco and sugar (estimated crop in 1919, 3,500,000 tons); 2,516 miles of railroad were open in November, 1911, and 5,065 miles of telegraph line (1908).

CAPITAL, Havana (pop. estimated 1914, 635,000); other towns are Santiago (45,000), Matanzas (36,000), Cienfuegos (30,000), Cardenas (24,000), and Camaguey (29,000). In 1915 there were 32,795 immigrants.

	1916-17.	Estimated. 1917-18.
Revenue	\$46,679,942	\$64,460,000
Expenditure	44,153,201	62,730,774

Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Guernsey, and Newcastle-on-Tyne.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—13° 40' E. long., with an area of 15,042 square miles, and a population in 1916 of 2,921,000, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade.

The Danish flag was hoisted throughout Slesvig on 19 Nov., 1918, after 52 years' occupation by Germany.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1918, 1,070,000 hectares were under corn crops, 387,600 ha. sugar and other beets, and 787,200 ha. hay crop. In July, 1918, the live stock numbered 544,900 horses, 2,123,400 cattle, 470,000 sheep, and 620,800 swine. The crops in 1917 included 3,733,400 qrs. of oats, 1,971,900 of barley, 1,051,100 rye, 1,697,800 mixed corn and 520,100 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a sea-going mercantile marine of 490 steamers, with a tonnage of 409,248. There are (1916) 2,556 miles of railway and 843,248 miles of telegraph wire.

DEFENCE.—The Army consists of about 14,000 trained men, but during the war an increased number were kept under arms, the vote for 1918-19 amounting to Kr. 16,796,020. The Navy consists of 4 coast-defence ironclads and 1 launched, 2 small cruisers, 26 torpedo-boats (built and building), 18 submarines (built or building). Vote, 1916-17, including supplementary estimates, Kr. 23,398,908; for 1917-18, Kr. 27,929,160.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

Consul, Octavio Ventura.
Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. It comprises an area of about 18,045 square miles, with an estimated population of nearly 700,000. Sugar and cocoa are the most important crops, and coffee, and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, bananas, and divi-divi. There are about 150 miles of public railroad, and telegraphic (3 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curaçao, and Porto Rico. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since 1907 not less than 55 per cent. of the Customs Collections has been deposited in a New York Bank to pay the interest and sinking fund charges of the Foreign Loan.

On 29 Nov., 1916, a military Government by U.S. officers was proclaimed. All the Government departments are being administered by these officers, while the entire control of finance and police is in their hands. A native constabulary under American officers is being formed.

British trade is hampered by the absence of direct maritime communication.

A State of South America, extending from lat. 1° 38' N. to 6° 26' S. (according to the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70 and 81° W. long., comprising an area of 116,530 English sq. miles. It has a population of about 1,300,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Ecuador is divided into 15 provinces and one territory.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. A railroad connecting Guayaquil and Quito was opened in 1908. Guayaquil is the chief port (population, 1908, about 60,000); other chief towns being Quito, 55,000; Cuenca, 25,000; and Riobamba, 12,000. The Galapagos Islands (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

ESTHONIA.

The most northerly of the Baltic provinces, with Livonia and Courland, which now claims independence, is bounded E. by the river Narova, S. by Livonia, W. and N. by the Baltic. It has an area of 7,800 square miles, with a population of about 460,000. It was conquered by Denmark in 1219; in 1346 was sold to the Teutonic

Knights and incorporated with Livonia. From 1561 it belonged to Sweden, but in 1710 was seized by Peter the Great, who united it to his own dominions. A large portion of the surface consists of forests, moors and small lakes. Agriculture is the chief industry, rye, oats, barley, and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, sugar refining, oil pressing, woollen, cotton, tobacco, cork, soap, and petroleum. The capital is Riga; other towns are Dorpat, and Wenden.

The provisional independence of the country has been recognised by Great Britain, France, and Italy.

Representative in Great Britain (Provisional),
Prof. Antonius Piip.

FINLAND.

Regent, Gen. Mannerheim.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808. Resulting from the revolution in Russia, Finland proclaimed its independence in 1918, but up to Nov. 1918, the Allies had withheld recognition. The area is 144,254 square miles, with a population of about 3,000,000 in 1907, of whom about 2,600,000 are Finns, 400,000 Swedes, 19,000 Russians, 3,000 Germans, and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,512 students, of whom 518 are women. The leading crops are rye, barley, oats, potatoes. Saw mills and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export; dairy produce is also exported. There are 2,582 miles of railroad; and a merchant fleet of 3,617 vessels (mostly small), of which 570 are steamers.

The country was formerly governed by the Imperial Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people. This form of government gave way on 1 Jan., 1907, to a new Constitution involving a single Chamber elected by universal suffrage of both sexes. Women are likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it has been gained without agitation.

The revenue in 1914 was £6,764,152, and the estimated expenditure £7,415,723; the debt amounts to £5,556,410. The imports in 1915 were £23,136,400, and the exports £10,655,800 (of which 60 per cent. was timber). The capital is Helsingfors; population, 137,000.

FRANCE.

President of the Republic (1913-1920), Raymond Poincaré £24,000

Ministry (16 October 1917).

Premier and Minister of War, M. Clemenceau.

Consul-General, M. Kahn.

Consul (suppléant) (vacant).

Chanceller, M. Mattel.

Consul at Liverpool, M. Marie A. P. de la Barrière.

Do. at Southampton, M. Jean A. Feer.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its area at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory lost in 1871 amounted to 5,602 square miles. The population at the census of 1911 was 39,601,509, and in 1913 there were 745,539 births, 298,760 marriages, and 703,638 deaths. France has always been attractive to foreigners, of whom (1906) 1,046,905 were resident there, or 2.51 per cent. of the legal population; this number included 377,638 Italians, 310,433 Belgians, 87,836 Germans, 35,990 English, 14,863 of the latter residing in the Department of the Seine. 20 per cent. of the foreign population was born in France. About 26,000 Frenchmen are stated to be resident in England. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent (971,778,632 gallons of wine were produced in 1913; as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1913 amounted to 661,868,702 gallons. The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root, for the manufacture of sugar, hops, &c. Its mineral resources include, coal (1912, 40,394,177 metric tons), pig iron (4,939,194 metric tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. The culture of oysters is an important industrial feature, and in the year 1911 244,593,150 oysters were produced, representing a value of £39,333.

EDUCATION.—Educational system highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *prefet*, charged especially with *primary* education. By the Law of July, 1904, all congregationalist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary* *Secular, comp. and free.* Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary:* State lycées, communal colleges, and many private establishments, 7-ys. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

COMMUNICATIONS.—The system of railroads in France is very extensive; they are almost entirely *concedés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1915, was 25,579 miles, the total receipts from passenger and goods traffic, &c., being £49,406,200. The length of telegraph wires is 151,700 miles, and of telephone lines 107,150 miles. At the 1st of January, 1913, the mercantile marine, comprising boats of 2 tons and upwards, amounted to 17,670, vessels of 1,518,518 net tons (of which 15,813 were sailing ships, representing 614,024 net tons). The sums voted by Parliament for construction and navigation Bounties to Shipping and to Deep Sea Fisheries in 1912 amounted to £1,530,000, and £1,106,732 for Postal and Cable Service Subventions.

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Shipping.—During the year 1913 the total number of French and foreign vessels entering French ports amounted to 27,409, representing a tonnage of 31,302,807 tons, of which 7,581,374 tons were French, while the total clearings amounted to 28,440 ships of a tonnage of 21,472,968 tons, of which 7,763,519 tons were French.

ALSACE-LORRAINE.

French troops occupied Metz on 19 Nov., 1918, and High Commissioners have been appointed.

The "Reichsland" of Alsace-Lorraine (Elsass-Lothringen), formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and surrendered to Germany by the Treaty of Frankfurt, after the sanguinary Franco-Prussian War, much against the wishes of the inhabitants, in 1871. It embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco, hops, iron, and coal are among its leading productions, and the cotton industry is most flourishing. There is a Landtag of two chambers, of which the first consists of representatives of the churches, university towns and professional classes, and the second of 60 members elected by secret ballot. The area is 5,635 square miles, divided for administrative purposes into three districts, Ober- and Unter-Elsass and Lothringen. The population in Dec., 1910, was 1,874,014, of whom 965,625 were males and 908,389 females; while 1,428,343 were Catholics, 408,274 Protestants, and 30,483 Jews. French was spoken by about 200,000 persons. Principal towns, Strassburg (pop. 178,891), Mülhausen, and Metz. Revenue and Expenditure (1912-13)... £3,508,600 Debt (1912)..... (Rentes £65,588) ... 2,186,300

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36' W. to 6° 15' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated in 1906 at about 1,119,416 square miles, with a population (1911) of 5,563,828, of whom 752,043 were Europeans and 4,740,526 natives. The revenue in

1917 was estimated at £5,283,653, and the expenditure at £5,213,226. The bulk of the trade is with France, the exports to France amounting in 1917 to 81·3 per cent, and the imports from France to 67·8 per cent. of the total; the exports to the U.K. in 1917 were valued at £2,300,000, and the imports from the U.K. at £2,159,000. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1917 there were 2,172 miles of railroad open for traffic; and in 1917 the number of ships engaged in foreign trade entering and clearing Algerian ports was 4,075, of a net tonnage of 4,357,365 tons. The principal town is Algiers, the capital (population, 1911, 172,397), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemçne. Governor-Gen., M. Jonnart.

Paris is distant from London 267 miles; transit, 7 to 8 hours.

FRENCH COLONIES.

The Colonial possessions of the French Republic have a total area of 4,084,410 square miles, including Algeria and Morocco. The population of this vast area is estimated (1911) at 54,730,039.

In ASIA.—French India includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanaon, in the Godavery delta; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of 277,700. French Indo-China comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898-9 the port of Kwangchow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1912) estimated at 16,600,000.

In AFRICA.—Algeria (see above) is an integral part of France. Morocco (see p. 668), is now predominantly French. Tunis has been a

French protectorate since 1881. French West Africa extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of Senegal (74,000 sq. ms., pop. 1,250,500), capital, St. Louis; Upper Senegal Niger (304,000 sq. ms.), and the Niger Military Territory (533,000 sq. ms.), which have a total population of about 6,036,200; French Guinea (92,600 sq. ms., pop. 1,737,350); Ivory Coast (126,100 sq. ms., pop. 1,216,300); and Dahomey (38,000 sq. ms., pop. 378,500); while the hinterland of these colonies forms the French Sahara, which has an estimated area of 924,160 square miles and a population of about 450,000. French Equatorial Africa consists of the French Congo (513,000 sq. ms., pop. 9,000,000). French East Africa consists of the Somali Coast (46,300 sq. ms., pop. 208,000) and of the large island of Madagascar (226,000 sq. ms., pop. 3,153,500) with its dependencies (Réunion, and the Mayotte-Comoro Islands). Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen, and Amsterdam. The total area of French Africa is thus 3,812,200 square miles with an estimated population of 39,948,300. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean. The establishment of regular communication between Egypt, the Red Sea, Cameroon and Nigeria is in contemplation.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadeloupe (with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin) and in South America, Cayenne or French Guiana. The total area of French possession in North and South America is 35,320 square miles, with a population of 428,850.

In AUSTRALASIA.—New Caledonia (7,300 sq. ms., pop. 50,500) is a large island with many dependencies, and the Society Islands (Tahiti &c.) and other islands have a total area in the Pacific Ocean of 8,378 square miles, with a population estimated at 81,100. The New Hebrides are under joint Franco-British administration.

GERMANY.

PROVISIONAL GOVERNMENT. (13 November, 1918.)

Interior and Military Affairs, Herr Ebert.
Foreign Affairs, Herr Haase.
Finance and Colonies, Herr Scheidemann.
Demobilisation, Transport, Justice, and Health, Herr Dittmann.
Publicity, Art, and Literature, Herr Landsberg.
Social Policy, Herr Barth.

Following the signature of the armistice the representatives of the Central Powers, German Emperor fled to Holland, and up to time of going to press no stable government had been substituted for that of the Empire.

The Country, according to the Constitution of 18 April, 1871, was a Confederate League, bearing the name German Empire, under the hereditary presidency of the King of Prussia, holding the title of German Emperor, and representing the Empire in all matters affecting international law; in the name of the Empire he declared war and made peace, concluded alliances and treaties with foreign States. Except to repel an attack on the territory or the coasts of the League, the Emperor could not declare war in the name of the Empire without the consent of the Federal Council, *Bundesrat*, which represented the sovereignty of the Federated States of the Empire. The consent of the Federal Council and Reichstag was necessary in regard to certain specified treaties (cf. Art. 4 of the Constitution). The Emperor had the right to summon, open, adjourn, and close the Reichstag.

The Federal Council and Reichstag must be summoned to meet every year; the Reichstag cannot be summoned without the adherence of the Federal Council. All Bills are brought before the Reichstag in the name of the Emperor after acceptance by the Federal Council. Laws are promulgated by the Emperor in the name of the German Empire after acceptance by the Federal Council and the Reichstag. All edicts and orders of the Emperor made in the name of the Empire must be countersigned by the Chancellor, who is thereby responsible for them. The Emperor is the *Bundesfeldherr*, or Federal Commander-in-Chief of the whole German Army. In time of war he holds supreme command; in time of peace the Kings of Bavaria, Saxony, and Württemberg retain their sovereign rights as heads of their respective armies. In time of peace the Bavarian army administration is wholly independent of that of the rest of the German army, and only falls under the direct command of the Emperor when the army is mobilised for war. The rights of the Kings of Saxony and Württemberg in time of peace are not quite so extended as those of the King of Bavaria; but their armies remain distinct and form separate army corps. The contingents of all the other Federal States are under the direct command of the King of Prussia, and under Prussian administration. The troops of all the Federal States swear loyalty to their respective sovereigns and obedience to the orders of the Emperor—in the case of Bavaria this obedience is limited to war-time. On the other hand, the German Navy is Imperial (*kaiserlich*), and the Emperor as such is the supreme Admiral-in-command of the Imperial German Navy in peace as well as war. The Reichstag, or Imperial Diet, consists of 397 Deputies; the principal idea was that there should be one deputy to every 100,000 inhabitants of the Empire. The Reichstag sits for a period of five years, unless previously dissolved by the Emperor. Amongst the matters belonging to the jurisdiction of the Empire are all those that refer to the army and navy; the common, civil and penal law of the Empire; posts and telegraphs (excluding Bavaria); inland navigation; the Customs of the Empire; weights and measures; coinage; banking; patents; copyright; foreign trade; the German mercantile marine; the Press; everything relating to the right of mining corporations; police; sanitation; colonisation. The railways, as a result of the defeat of Bismarck's plan to imperialise them, remain

subject to State legislation; but the Constitution (Art. 42) requires that they shall be administered as a homogeneous network, and this aim, as regards rates, regulations, rolling-stock, &c., has to a large extent been achieved. The movement to imperialise the railways still exists, but makes little progress. A majority of the Federal Council and Reichstag is necessary, and also sufficient, for the validity of a law. The laws of the Empire take precedence of the laws of the Federated States within the scope of the Constitution of the Empire; they are compulsory on all Governments of the Empire.

At the end of the war Germany had a total area of 208,780 sq. miles, consisting of the following 26 States:—Prussia (including Lauenburg and—since 1890 Heligoland); Bavaria; Saxony; Württemberg; Baden; Hesse; Mecklenburg-Schwerin; Saxe-Weimar; Mecklenburg-Strelitz; Oldenburg; Brunswick; Saxe-Meiningen; Saxe-Altenburg; Saxe-Coburg-Gotha; Anhalt; Schwarzburg-Sondershausen; Schwarzburg-Rudolstadt; Waldeck; Reuss (elder line); Reuss (younger line); Schaumburg-Lippe; Lippe-Deimold; Reichsland (Alsace-Lorraine); Lübeck; Bremen; Hamburg.

The census of 1910 showed a total population of 64,925,993, of whom 32,031,967 are males and 32,871,456 females.

The population of Germany is to that of England as 5 to 3. As to crime, the proportion of bigamy is 1 to 2 nearly; in incest, about 13 to 1; in procuring it is 264 to 1; in procuring abortions it is 29 to 1; in unnatural offences it is 7 to 1; in rape and other sexual crimes it is about 9 to 1; in murder, manslaughter, and other death-causing crimes it is 5 to 1; in arson it is about 4 to 1. With regard to divorces it is 22 to 1. As to illegitimate births it is 5 to 1. The number of suicides is four times as great as in England.

The religious confessions were divided in 1910 as follows:—39,991,421 Protestants, 23,821,453 Roman Catholics, 283,946 Christians of other categories, 615,021 Jews, and 214,152 adherents of other religions, or unknown. The number of registered Socialists has decreased from 1,085,905 in 1914, to 243,061 in 1917.

There were in 1900 4,231,129 persons residing within the limits of the Empire who spoke a non-German language, viz. 1—80,361 Dutch, 20,677 Frisians, 141,061 Danish (and Norwegians), 8,998 Swedish, 20,217 English, 211,679 French, 11,841 Walloons, 65,961 Italians, 2,059 Spanish, 499 Portuguese, 3,086,489 Poles, 142,049 Massurians, 100,213 Kassubians, 93,032 Wends, 64,382 Moravians, 43,026 Czechs, 9,617 Russians, 106,305 Lithuanians, 8,158 Hungarians, 14,535 not above specified.

There are 48 large towns with over 100,000 inhabitants, and of these 33 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 in Baden, and 1 each in Württemberg, Hesse, Reichsland, and Brunswick, while two of the three Hanse Towns also exceed 100,000.

PRODUCTION AND INDUSTRY.—Germany, up to the commencement of the war, was becoming more and more a manufacturing country. In 1907, 32.6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11.5 per cent. by trade and traffic. Of the total area in 1907, 78,632,140 acres were under cultivation, and 34,272,141 acres were woods and forests. Germany supports about nine-tenths of her

population by her own produce. The mineral produce was valued in 1912 at £592,250,000, and included 190,109,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore; rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracic, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Muhlhausen, Chemnitz, and the provinces of Westphalia and Silesia are the great centres of the textile industries.

COMMUNICATIONS.—The total length of the Railroads in 1913 was 37,823 miles, of which about 92 per cent. belong to the different States. There are 1,500 miles of inland canals and 1,600 miles of ship canals. The number of registered automobiles and motor cycles (January 1, 1913) was 77,789.

IMPERIAL POST (including Bavaria and Württemberg, 1911).—Length of telegraph lines, 228,600 kilometres (length of wires, 1,907,200 kilometres); telegrams handed in, 49,533,000; post offices, 41,415; telegraph offices, 50,013; wireless stations, 14; telephone call-stations, 37,970; letters delivered, 5,994,300,000; cash on delivery orders, £640,100,000; money orders, £4,626,500,000; telegrams despatched, 49,533,000; telegrams received, 49,643,000. The number of employes in the service of posts, telegraphs, and telephones was 310,363.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in the Empire a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses—in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codifies previous legislation, establishes new Insurance Authorities, reduces working-class influence in the Accident Insurance organisations, provides pensions for widows and orphans, and makes other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employes and others above the class of manual workers, became law in 1911.

	1916-17.	1917-18.

FORMER GERMAN COLONIES.

The German Colonies, at the commencement of the war, had a total area of 1,134,239 sq. miles, with a population of about 14,800,000, of whom 24,170 (including garrison and police) were whites. Of these whites about 18,500 were settled Germans. The whole of these have since been captured and occupied by the Allies.

AFRICA.—Togoland: Area, 33,659 sq. miles; population about 1,000,000. Capital, Lome. Budget, 1912: Receipts, £152,000; expenditure, £176,000; trade (1910), imports, £573,300; exports, £361,100.—Cameroon: Area, 295,000 sq. miles; population, 3,500,000. Capital, Buea. Budget for 1912: Receipts, £361,500; expenditure, £882,500; trade (1912), imports, £1,712,100; exports, £1,105,000.—German South-West Africa: Area, 322,348 sq. miles; population, 120,000. Capital, Windhoek. Budget, 1912: Receipts, £860,500; expenditure, £2,250,000; trade (1912), imports, £2,265,000; exports, £1,425,000. On July 9, 1915, Gen. Botha accepted the unconditional surrender of all the German forces in South-West Africa.—German East Africa: Area, 384,079 sq. miles; population, 7,645,000. Capital, Dar-es-Salaam. Budget, 1912: Receipts, £624,000, of which State aid, £151,135; expenditure, £1,828,500; trade (1912), imports, £2,295,000; exports, £1,570,900.

PACIFIC.—German New Guinea (now in occupation); Total area, 90,000 sq. miles; population, 463,300. Capital, Rabaul. Trade (1910), imports, £194,500; exports, £181,250.—Solomon, Caroline, Peller, Marianne, and Marshall Islands: Area, 5,160 sq. miles, population, 122,000. Capitals, Ponape and Yap. Budget, 1912: Receipts (with New Guinea), £78,000; expenditure (with New Guinea), £138,000; trade (1910), imports, £117,750; exports, £502,100.—Samoa: Consists of two main islands, Savaii and Upolu. It was taken possession of by a force of N.Z. troops on 29 Aug., 1914, and is still held by a New Zealand garrison. It possesses a powerful Telefunken wireless station, only completed in July, 1914, by which communication is maintained with Honolulu (2,000 miles), Awani, N.Z. (1,600 miles), and Fiji (500 miles). Area, 1,050 sq. miles; population, 1917, native, 36,000; white, 1,650, exclusive of Government officials. Estimated Revenue (1917-18), £80,000; Expenditure, £75,000. CAPITAL, Apia. The chief articles of export are copra, cacao, and rubber.

ASIA.—Kiao-Chao (capitulated to an Anglo-Japanese force in November, 1914, and is now in occupation by Japan): Leased for a period of 99 years from China in 1898. Area, 193 sq.

miles; leased territory and sphere of interest, 2,750 sq. miles; population, 84,000. Chief seat of government, Tsingtau. Budget, 1912: Receipts, £312,000; expenditure, £732,000; trade (1910), imports, £2,500,000; exports, £2,500,000; the ocean shipping entered in 1913 being 936 vessels of 1,309,294 tons. The German garrison in Kiao-Chiao consisted of 92 officers, 2,374 German non-commissioned officers and men, and one battalion of the East Asiatic Garrison Brigade. It was further agreed that within a 50-kil. zone (31 English miles) from all points of the leased territory the Chinese Government should no longer, for the space of 99 years, be entitled to take any steps without previous authorisation from the German Government. Germany also received mining and railway concessions in the province of Shan-Tung, which was called "the sphere of influence," area about 2,750 English sq. miles, population 84,000. The leased territory, as it was called, comprised the bay up to high-water mark, its islands, and the north and south tongues of land at the mouth of the harbour.

Germany's share in the trade with her colonies in 1912 was about 36 per cent.

German States.

PRUSSIA.

GOVERNMENT (15 November, 1918.)

Interior, Herr Drews.

Finance, Herr Hergt.

War, Gen. von Stein.

Public Works, Herr von Breitenbach.

Agriculture, Woods and Forests, Herr von Eisenhart-Rothe.

Trade and Commerce, Herr Sydow.

Instruction and Worship, Herr Schmidt.

Minister of Justice, Herr Spahn.

Prussia comprises the larger portion of Germany, and consists of 13 provinces, with a population in 1910 of 40,165,219.

The provinces with their area are as under:—

	Sq. m.		Sq. m.
East Prussia.....	14,446	Schleswig.....	
West Prussia	9,989	Holstein	7,360
Brandenburg	15,560	Hanover	15,031
Pomerania	11,762	Westphalia	7,802
Posen	11,311	Hesse-Nassau	6,128
Silesia	15,743	Rhenish Prussia	20,543
Saxony	9,863	Hohenzollern	447
Total			136,075

The Napoleonic wars brought humiliation to Prussia, but the peace following Waterloo enabled her to recover and improve her status. Hesse Cassel, Nassau, part of Hesse Darmstadt, Hanover, Schleswig-Holstein, and Frankfort were, one after another, incorporated in the kingdom, until the triumphal march of Prussia, from a poor, semi-barbarous State, led her to a position of primacy amongst the German peoples. Austria had long been her rival for the position, but the Austro-Prussian conflict of 1866 ended in humiliation for the Austrians, and the victorious Franco-Prussian war of 1870, resulted in the final exclusion of Austria from the German Confederation.

Of the total population 19,847,725 are males and 20,317,494 females. There are 33 towns with over 100,000 inhabitants. The number of births in 1914 was 1,202,528, against 1,209,500 in 1913, while in the year ending April 30, 1916, they were 10,700

fewer than in 1915, a decrease of 28 per cent. The number of deaths in 1914 was 802,776, against 656,490 in 1913. Marriages were 286,197, against 323,709. Between 1904 and 1914 the excess of births over deaths fell from 562,508 to 399,752.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 20,435,491 acres, chiefly consisting of fir. Minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	1915.	1916.
Revenue (Estimate) ..	£242,311,950	£240,818,196
Expenditure do. ...	242,311,950	240,818,196

CAPITAL, Berlin. Population (1910), 2,070,695.

BAVARIA.

A Republic was proclaimed, Nov. 7, 1918.

President, Herr Kurt Eisner.

The second State in size and population of Germany. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'—50° 34' N. lat. and 9° 01'—13° 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine, Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,286 square miles, and a population (in 1910) of 6,887,291. The capital (556,467) and Nuremberg (333,142) are the largest towns. Bavaria contributes three *corps d'armée* to the forces of the German Empire; their strength is fixed at 69,143 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are

sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c.

Budget, 1917-1918 £38,286,556
Public debt, 1 Jan., 1914 (including railway debt. £97,033,260) 123,931,980
CAPITAL, Munich. Population (1910), 596,467.

SAXONY.

A State of Germany, the third in importance and population, comprising an area of 5,856 English square miles, with a population (1910) of 4,806,661. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, lace, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden (pop. 551,697), Leipzig (pop. 587,635), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912-13); Freiberg (pop. 36,237), in the mining district; Plauen (pop. 121,278); Zwickau (pop. 73,542), and Chemnitz (pop. 287,807), the Manchester of Saxony.

Revenue and expenditure, 1916-17 ... £24,661,470
Debt (railways), 1916 46,680,490

CAPITAL, Dresden. Pop. (1910), 551,697.

WÜRTTEMBERG.

(The king abdicated, Nov. 30, 1918.)

A State of South Germany, with an area of 7,534 English square miles, and a population (in 1910) of 2,437,574, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 24,523 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pastureland being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, staves, beer, wine, &c.

Revenue 1916-17. 1917-18.

GREECE.

King of the Hellenes, Alexander, G.C.B., born 1 Aug., 1893; succeeded to the throne 13 June, 1917.
His Presumptive, his brother Paul, born 1901.

(The ex-king Constantine, who had married the Princess Sophia, sister of the German Emperor, and was secretly favouring the interests of the Central Powers, was deposed by the guaranteeing Powers, England, France, and Russia, on 13 June, 1917, and his second son, Alexander, appointed in his stead.)

THE MINISTRY, 27 June, 1917.

Prime Minister and War, M. Venezelos.
Interior, M. Ractivan.
Justice, M. Tsirimokos.
Foreign, M. Politis.
Marine, Admiral Condouriotis.
Finance, M. Negropontis.
Communications, M. Papanastasiou.
Education, M. Dingas.
Food Supplies, M. Bourlourimis.
National Economy, M. Spirides.
Domains and Agriculture, M. Michalacopoulos.
Public Assistance, M. Simos.
Without Portfolio, M. Repoulis.

Envoy Extraordinary and Minister Plenipotentiary in London, M. D. Caclamanos, 14 De Vere Gardens, Kensington Palace, W. 8.
Secretary, M. J. Caradjia.
Cons.-Gen., T. Stavridis, 40 Old Broad St., E. C.

A maritime kingdom in the south-east of Europe, situate in lat. 35° 50'–41° N. and long. 19° 20'–26° 15' E., comprising an area (in 1912) of 24,822 square miles, with a population (in 1907) of 2,631,952, and enlarged by the addition of portions of Macedonia, Albania, and Thrace, and by the capture of many of the Turkish islands (in the war of 1912–13), to an estimated area of 43,522 square miles, with a population of close on 5,000,000. The country is composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Aegean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, and sponges.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the war. The Navy, consisted (July, 1913) of 4 ironclads, 1 modern cruiser, 14 destroyers, 4 corvettes, 12 torpedo-boats, and 2 submarines. In 1912–13 Greece, with the other members of the Balkan League (Bulgaria, Montenegro, and Serbia), waged a successful war against Turkey, and during the progress of hostilities the island of Crete (q.v.) was annexed. Certain islands in the Aegean were occupied by Greek troops, and Salonica and other centres were captured. In 1913 a second war of Bulgaria against the remaining members of the League (and the threat of an invasion by Rumania) ended in a division of the conquered territories that proved to be very favourable to Greece, whose boundaries now extend northwards to those of Albania and Serbia.

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Communications.—There are 993 miles of railroad open for traffic, and a line of about 70 miles in length is under construction in order to link up with the European system. There is a ship canal cutting through the Isthmus of Corinth, but it is rarely used by foreign vessels. The post offices number 1,150, dealing with 36,000,000 postal packets; telegraphs, 4,951 miles. The mercantile marine consists of 110 sailing vessels above 100 tons capacity, and 298 steamers (449,184 tons). About 100 have been sunk by submarines.

GUATEMALA, Republic of.

President (1910–1917), Manuel Estrada Cabrera, born 1857.
Min. of Foreign Affairs, Dr. Luis Toledo Herrera.
Consul, D. Bowman, 11 Queen Victoria Street, E. C. 4.

Guatemala, the most northerly of the Republic States of Central America, is situated in N. lat. from 13° 40' to 17° 40', and in W. Long. from

88° 15' to 92° 30', and comprises an area of 47,424 square miles, and a population in 1910 of 2,000,000. The Republic is divided into 23 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. About 430 miles of railway were open for traffic in 1911. There were 5,954 kilometres of telegraph and 619 of telephones working in 1908. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being sugar, rubber, hides, bananas, and timber.

Diplomatic relations with Germany were broken off on 27 April, 1917, and war was declared on 23 April, 1918.

	1915-16.	1916-17.
Revenue	£325,000	£331,000

Guatemala—Vice-Consul, Do., Edward Bellingham	£300 to 500
Livingston and Puerto Barrios—Vice-Consul, Quezaltenango—Consul, Hugo Fleischmann.	
San José—Vice-Consul, David Savage.	

Transit to New York via Puerto Barrios and New Orleans, 7 days, thence to London, 8 days.

HAITI, Republic of.

President (1915-1921), M. Dartingnave £4,800 Foreign Affairs, Louis Borno.

Chargé d'Affaires, Abel Théard, 76 Victoria Street, S.W. 1.

Consul, Maurice Erdmann, 32 Fenchurch Street, E.C. 3.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. The area of the republic is 10,200 square miles, with a population estimated at 2,020,700. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U.S.A., establishing a virtual protectorate over the Republic. It came into effect in May, 1916. The Constitution is undergoing revision. An armed

Constabulary, rural and urban, under American officers, has recently been constituted. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany.

Diplomatic relations with Germany were broken off in April, 1917.

HEDJAZ.

(The Place of Pilgrimage.)

Formerly a Turkish vilayet and province of W. Arabia, extending along the coast of the Red Sea from the Gulf of Akaba in the north, bounded by Asir in the south. In length it is about 750 miles, containing an area of 97,000 square miles, with a population of 300,000. It consists very largely of stony desert, but in the south is more cultivated, yielding dates, wheat and barley. It is chiefly interesting on account of its sacred cities: Mecca and Medina. Its chief ports are Jiddah and Yambu. The railway from Damascus to Medina was opened in 1908. In 1916 the country revolted against Turkish rule and formed itself into an independent State, under British protection.

King of the Hedjaz and Grand Sherif, H. H. El Hussein ibn Ali.

HONDURAS, Republic of.

President (1916-1920), Dr. Francisco Bertrand. Vice-President, Dr. Alberto Membreño. Foreign Affairs, Dr. Silverio Lainez.

Con.-Gen. in London, J. de Toró, 8 Idol Lane, E.C.

The Middle State of Central America, stretching in N. lat. between 13° 10' and 16°, and W. long. between 83° 10' and 88° 40'; containing 44,275 English square miles, with a population estimated at 650,000 (1915). It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortez, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island, port on main and is San Lorenzo, 3 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5-6 hours. Road from Tegucigalpa to N. coast now nearly reaches Comayagua and by taking auto to end road

* Is Chargé d'Affaires in the absence of the Minister.

only 4 hours by mule to Comayagua. From there to end of railroad, 4 days by mule). The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being mahogany, fruit, cattle, cotton, sugar, rubber, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, fustic, rose, and Lima wool. There is an immense amount of uncultivated land. The number of cattle in 1915 was approximately 500,000. The forests are practically inexhaustible, but there is a lack of communications and transport. Its mineral wealth is great. In 1917 there were 580 kilometers of railway open, all on the North Coast.

Diplomatic relations with Germany were broken off on 17 May, 1917, and war declared 19 July, 1918.

	1914-15.	1915-16.	1916-17.

HUNGARY. (See p. 639.)

ICELAND.

Minister for Iceland (Resident), Einar Arnorsson. Presidents of Al-thing, Olafur Briem; Stefan Stefansson.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated in 1914 at 86,500.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on 1 Dec., 1918, but since the constitution granted in 1915 the assembly (Al-thing) has been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1915): estimated, £1,500,000; exports, £3,000,000. Iceland is now in direct telegraphic communication with the United Kingdom.

* The external debt remains the same. No interest has been paid since 1872, and arrears of interest amounted on 1 Jan., 1917, to nearly £21,000,000.

CAPITAL, Reykjavik. Population, about 13,000.

E.C. 2.

Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands.* It is situated between lat. 36° 38' 30" 46° 40' 30" N. and long. 6° 30' 18° 30' E., and comprises a total area of 110,623 square miles.

* Italy is also in temporary occupation of a group of Turkish islands lying between Crete and Asia Minor (Rhodes, Carpathos, Cos, Astropalia, &c.).

(91,277 mainland, 19,346 islands), with a population (1911 census) of 34,686,683. The peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. The principal towns are Rome (579,285), Naples (723,208), Milan (599,200), Turin (427,733), Palermo (341,656), Genoa (272,077), Florence (232,860), Bologna (172,639), Venice (166,727), Catania (111,699), Leghorn (105,322), and Bari (103,522). Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. In 1914 there were 11,165 miles of railway open for traffic, and 33,451 miles of telegraph line. The sea-going commercial marine (1913) consisted of 839 steamers (762,274 tons) and 4,693 sailing vessels (374,835 tons). The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c.

In 1914 the produce of the vines amounted to 947,612,000 gallons, and that of the olive crop to 236,324,000 gallons.

The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption. There is a large settled and floating population of Americans and English, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others.

Defence.—The Army is organised in 12 corps, each of 2 divisions, the first line consisting of 310,000 men; there is, in addition, a considerable active reserve, and a mobile militia of 250,000. In consequence of the outbreak of the war, the effective strength of the Army has been greatly increased. The Navy in 1914 included 9 battleships (5 building), 9 armoured cruisers, 11 light cruisers (3 building), 3 scouts, 25 destroyers (10 building), 76 torpedo-boats (24 building), and 12 submarines (8 building). Spezia, the chief naval and military port of the kingdom, is securely fortified.

On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to 30 Apr., 1918, amounted to 36 millions of lire (£1,440,000,000).

Education is free and compulsory, and evening continuation classes are also compulsory for

military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

In 1914, 162,233 Italian and 10,430 foreign vessels (total tonnage 55,282,200) entered and 161,880 Italian and 10,390 foreign vessels (55,085,460 tons) cleared at Italian ports.

It is proposed to construct a harbour at Ostia, at the mouth of the Tiber, which will convert Rome into a seaport.

COLONIES.—The total area of Italian Colonies and possessions is 1,113,020 square miles, with an estimated population of 1,600,000, made up as follows: *Eritrea*, 60,000 square miles (pop. 280,000); *Somaliland*, 131,000 square miles (pop. 300,000); *Pientsin Concession*, 20 square miles (pop. 17,000); *Libya*, *Tripoli* and *Cyrenaica*, 922,000 square miles (pop. 1,000,000). In Africa Italy obtained in 1912 the territories of Tripoli and Cyrenaica by conquest and cession from the Ottoman Empire, and possesses the colony of Eritrea, and a protectorate over part of the Somali coast, extending from Cape Guardafui to the Juba river, on which they have a station; an annual rent is paid to the Sultan of Zanzibar for the Benadir ports leased by him to Italy. The Colony of Eritrea includes also the Dahlak Archipelago. The protectorate includes Aussa and the Danakil country, the Somali countries of the Sultans of Miguertini and of Obbia, as well as the Benadir, which is now a colony. By new

conventions signed with the Emperor Menelek in May, 1908, Italy obtains a slight extension of frontiers, and obtains the country between Dolo and Bardera. The commencement of Italian influence was made in 1880, when the district of Assab was transferred from a trading company to the Government. The tract of land now known as Eritrea ("Red Sea") consists of a triangular portion of barren and sandy lowland between 12° and 18° N., containing in all a coastline along the Red Sea of about 700 miles, with a total area of 60,000 square miles, and a population of about 280,000, of whom about 3,000 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour, and the principal product, salt, of great value as being the monetary currency of Southern Abyssinia.

For TRIPOLI, see p. 687.

In China Italy obtained in 1902 a concession of land fronting the Pelho river, with a total area of 20 square miles and a population of about 17,000 natives.

JAPAN.

Emperor, Yoshihito, born 31 Aug., 1879; succeeded 30 July, 1912; accession ceremony, 10 Nov., 1915; mar. Princess Sadako, 10 May, 1900, and has issue 4 sons.

Heir Apparent, Prince Hirohito, born 29 April, 1901.

(29 Sept., 1918.)

Prime Minister & Minister of Justice, Takashi Hara.

Minister of Foreign Affairs, Viscount Yasuya Uchida.

Agriculture and Commerce, Tutsuo Yamamoto.

Finance, Baron Korekio Takahashi.

War, Lieut.-Gen. Giichi Tanaka.

Marine, Admiral T. Kato.

Communications, Utao Noda.

Education, Tokugoro Nakahashi.

Home Affairs, Takejiro Tokonami.

Ambassador in London, Viscount Suteni Chinda, 20 Grosvenor Square, S.W. 1.

Councillor, Matsuo Nagai, C.B.E.

1st Secretary, Isaburo Yoshida, C.B.

2nd Secretaries, Kiujiro Hayashi; Shichitaro Yada.

3rd Secretaries, Hiroshi Saito; Kensuke Horiuchi; Yoshiatsu Murakami; Eiji Anan.

Attache, Manji Harada; Hajime Matsuniya;

Seijiro Yoshizawa; Junzo Sakane.

Chancellors, T. Fuchi; H. Yunoiki; Akira Tajima.

Military Attache, Maj.-Gen. Kunishige Tanaka, C.B.

Asst. Military Attache, Capt. Hitoshi Imamura.

Naval Attache, Rear-Adm. Hisatsune Iida.

Asst. Naval Attache, Com. E. Hamano, C.M.G.

Financial Attache, Kengo Mori.

Consul-General, Keiichi Yamazaki, 1 Broad Street Place, E.C. 2.

Consul at Glasgow, A. S. Younger.

" at Liverpool, P. E. J. Hemelryk.

" at Manchester, D. Ford Smith.

" at Middlesbrough, Wayman Dixon.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu (the name of the Empire being Nippon), Shikoku, Kyu-shu, Hokkaido or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The

Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 235,886 square miles, with a population (1916) of 76,684,558. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, antimony, and zinc abound, whilst agate, cornelian, and rock crystal are also found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in large quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the *Paulownia imperialis* is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit, for the most part of inferior quality, is abundant; English fruits, such as apples, strawberries, pears, grapes, figs, and peaches are being produced.

Commerce and Industry.—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain, and bronze, and shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from the Dutch East Indies and Formosa; indigo from Germany and British India; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton yarn, rice, tea, fish, copper, matches, coal, camphor, straw plait, porcelain, earthenware, lacquer ware, and marine products.

Communications.—There were 7,500 miles of railroad open in 1916, in addition to 1,066 miles open in Korea and 328 miles in Formosa, while the South Manchurian Railway (China) is under Japanese control. The mercantile marine consisted in 1916 of 2,159 steamers above 20 tons (447 of them over 1,000 tons), and 1,626 sailing vessels over 100 tons. The total tonnage entered

and cleared at open ports in 1916 was 41,024,584 (20,035 vessels). In 1916 there were 7,358 post offices dealing with 1,936,693,044 postal packets and 25,711 miles of telegraph line carrying 34,503,501 messages.

Defence.—Service in the Army is universal and compulsory between the ages of 20 and 40. The peace effective is 355,618 of all ranks. The war strength is: First line, field army, about 479,922; second line, fully trained, about 1,023,190. The Navy includes 13 battleships, 7 battle cruisers, 19 cruisers, 16 coast defence ships, 8 gunboats, 72 destroyers, 24 torpedo boats and 17 submarines (1918).

Japan declared war against Germany on 23 Aug., 1914, and has since that date done excellent service with her fleet, while her troops are assisting to restore order in Siberia.

Education is in the lower grades free and compulsory. Secondary schools are State-aided, and prepare for a 3 years' course at the Universities, which is largely devoted to the study of European languages. There are high schools for girls, and the technical and special schools are well attended. There are three State Universities, at Tokio, Kyoto, Tohoku and Kiushu.

Estimated Revenue:—

	1916-17.	1917-18.
Ordinary	£54,470,260	£57,091,027
Extraordinary	7,082,377	16,096,942

Estimated Expenditure:—

	1916-17.	1917-18.
Ordinary	£40,741,126	£44,787,599
Extraordinary	20,947,185	28,400,368
Total Debt (31 March, 1917)... *Yen	2,467,701,937	

	1915.	1916.
Imports.....	Yen 532,449,938	Yen 756,427,910
Exports	708,306,997	127,468,128

The imports of British produce and manufactures in 1917 were valued at £5,521,015:—

Arms & Ammunition	£12,027	Machinery	£1,275,644
Chemicals	465,399	Manures	78,887
Cotton	699,688	Electrical Apparatus	31,995
Cycles, Motor, &c. ..	25,520	Wool Tops	232
Iron and Steel ..	594,221	Woollens	1,002,682

The exports to the United Kingdom in 1917 were valued at £15,293,338:—

Copper, unwrought ..	£2,277,522	Brooms & Brushes ..	£18,277
Oil, Fish and Seed ..	728,534	Rice, Corn & Grain ..	3,353,455
Soya Beans	185,238	Silk & Manuf.	1,071,966
Buttons & Studs ..	107,183	Straw plaits	843,908

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (2 June, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with about 3,643,034 inhabitants (1916). Imports, £6,659,838; exports, £11,506,709, in 1916. The colony has been self-supporting since 1906. Estimated revenue and expenditure (1917-18), £4,862,719.

CAPITAL, Taihoku. Population, 102,249.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1917) of 83,124. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue (1917-18), Yen 2,692,728, expenditure Yen 2,437,452.

* The local exchange value of the yen is about 2s. 1½d.

The *Kwantung Peninsula* (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,320 sq. miles; population, 555,104. Dairen provides Japan with a mainland port, ice free all the year round, and the peninsula is fertile. Imports (1916), Yen 76,519,416; exports, Yen 84,138,926. Estimated revenue and expenditure (1917-18), Yen 4,702,796.

CAPITAL, Dairen. Population, 95,865.

The *Pescadores* (Hokoto) consists of about 14 islands, with a total area of 85 square miles, and a population of 57,433.

Korea (Cho-sen).—By a treaty of 23 Aug., 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Governor-General, Marshal Count Y. Hasegawa (1916).

Estimated revenue (1917-18), Yen 62,589,309; expenditure Yen 62,562,277.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of some 71,000 square miles. Population estimated at about 16,648,129 (Dec. 1916); there are about 320,938 (Dec. 1916) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. About 8,790,580 acres are under cultivation, the staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. About 80 per cent. of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is 1,066 miles.

Imports, 1916	£7,626,427
Exports, 1916	5,818,082

CAPITAL OF THE JAPANESE EMPIRE, Tōkiō, formerly called Yedo, the residence of the Emperor; population (1915), 2,244,796. Other cities are—Osaka (1914), 1,424,596; Kiōto, the ancient capital, 517,334; Nagoya, 469,315; Kōbē, 457,116; Yokohama, 410,765; Hiroshima, 163,035; Nagasaki, 164,272; Kanazawa, 128,660; Kure, 115,629.

War, Isaac Moort.

Interior, Benjamin W. Payne.

Education, Walter F. Walker.

Envoy Extraordinary and Minister Plenipotentiary in London, J. P. Crommelin, 13 Eaton Place, S.W. 1.

Consul-General in London (vacant).

Consul, J. T. Grein, 27 Mincing Lane, E.C. 3.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 40,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European powers since 1847 as an independent State. The population is estimated at 2,050,000, including about 10,000 American-Liberians. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, piassava, rubber, and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass and earthenware, rum, gin, timber, and beads. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fourteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The organisation of the customs is being carried out by officers lent by the British, American and French Governments, with successful results.

There are 15 ports of entry along the 350 miles of coast, viz.: Robertsport, Monrovia, Marshall, Grand Bassa, River Cess, Greensville, Nanna Kroo, Harper Half Cavalla, Jenne, Webo, Grand Cess, Garraway, Niffo and Batoo. In 1913, 502 vessels (1,230,058 net tons) entered and cleared at Monrovia.

On April 9, 1917, Liberia broke off diplomatic relations, and on Aug. 7 declared war with Germany.

Revenue, Customs (1915-16)	*\$295,230
Expenditure (1915-16)	\$22,330
External Debt (1914)	1,638,800
Imports (1913)	1,150,500
Exports (1913)	1,338,000

Imports from U.K. ...	1916.	1917.
Exports to U.K. ...	£113,949	£123,468
	194,116	211,270

CHIEF TOWN, Monrovia. - Population, 6,000.

British Cons.-Gen., R. C. F. Maugham £950 to 1,050
Vice-Consul, Montague Y. H. Parks.

Do., H. J. R. Bell (actg.).

Monrovia, 3,650 miles distant; transit, by fortnightly English steamer from Liverpool, 12 days.

LIECHTENSTEIN.

Prince, Johann II., b. 5 Oct., 1840; suc. 12 Nov., 1858.

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59.6 square miles, pop. (1909) 9,854. The main industries are agriculture (chief products being corn, wine and turf), textiles and embroidery. Revenue (1915), 1,158,550 kronen; expenditure 1,137,880 kronen (24 kronen = £1); no debt. CAPITAL, Vaduz. Pop. 1,376.

LUXEMBURG.

Grand Duchess, H.R.H. Marie Adelaide, b. 14 June, 1894; suc. 26 Feb., 1912.

Minister of State, M. Eyschen.

Consul-General in London, H. S. J. Maas, 28 Langham Street, W. 1.

Occupied, 1914, in defiance of treaty guarantee, by Germany.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, 23 Nov., 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918, U.S. troops entering the capital on Nov. 22. The area is 999 square miles; the population (1910) 259,889, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1912 was estimated at £8,695,137 francs, expenditure 20,629,710 francs; debt (1 Jan., 1912) 12,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 20,848), is a dismantled fortress.

British Envoy, Sir W. B. Townley, K.O.M.G. (The Hague).

Consul, N. le Gallais.

MECCA. (See HEDJAZ.)

MESOPOTAMIA.

A name given by the Greeks to the land lying between the two rivers Tigris and Euphrates, stretching eastward from North

Syria to the mountainous region dividing the steppes and plains at the head of the Persian Gulf. Much of the country is unexplored, but it contains the ruins of many ancient cities and centres of former civilisations, as well as the network of ancient canals that formed Babylonia. The country was conquered by the Turks in the sixteenth century. The partially constructed railway to Bagdad and the Persian Gulf traverses the country. A scheme for the irrigation of large tracts of land was projected by Sir W. Willcocks, and a beginning was made in 1913 by the inauguration of the Hindî Barrage, but the work has been hindered through lack of funds. Since the British occupation very substantial progress has, however, been made. Large tracts of land have been brought under the plough. The opening up of the country by road, rail, and improved water transport, and the establishment of security on the highways, have resulted in an increase of trade. Thirteen Government primary schools, four municipal schools, a teachers' training school, and a survey school have been opened, and extension classes in agriculture have also been started. A large number of Nestorian Christians are settled in the country.

MEXICO, Federal Republic of.

The Government of which General Venustiano Carranza is at the head, with the title of *First Chief of the Constitutional Army, in charge of the Executive Power of the Nation*, was recognised in the autumn of 1915 by Great Britain, the U.S.A., and other principal countries of the world, as being the *de facto* Government of Mexico.

CABINET (June, 1917).

Foreign Affairs, Señor Garza Perez.

Interior, Señor Aguirre Berlanga.

Industry and Commerce, Señor Alberto Pani.

Public Works, Señor Nestor Ruiz.

Finance, Señor Nieto.

War (vacant).

Communications, Señor Rodríguez Gutierrez.

Minister in London (vacant).

Consul in London, Don F. R. Villavicencio, 2 Fenchurch Avenue, E.C. 3.

Liverpool—Consul-Gen., Luis A. Peredo, 15 South John Street.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 127° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a population of (1910) 15,063,207. The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,804 miles of railroad open on 16 Sept., 1912, and 40,687 miles of telegraph. The railroads have in a large measure been built by American and English companies. The principal crops are

* \$482 = £1.

maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguery, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

The finances are at present in a chaotic condition owing to the prolonged civil hostilities which have occupied the various factions for the past eight years. In September, 1916, the value of the *peso* had fluctuated between *1d.* and *2d.* in Mexico City. No paper money is now in circulation. The President has recently placed the monetary system on a gold basis. The extent of the public debt is unknown, and no reliable figures can be given for trade and revenue.

MONACO.

Sovereign Prince, Albert, born 13 Nov., 1848; suc. 10 Sept., 1889; mar., 1869, (1) Lady Mary Douglas-Hamilton, daughter of 11th Duke of Hamilton; (2) Oct., 1889, the Duchesse de Richelieu, born 10 February, 1858.

Heir, Prince Louis, born 12 July, 1870.
Minister of State, Emile Flach.

Consul-General in London, Theodore Lumley, 37 Conduit Street, Bond Street, W.
Vice-Consul, Paul Crémieu-Javal, 39 Ennismore Gardens, W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1913) 22,990 inhabitants, and a yearly average of over 1,500,000 visitors. The whole available ground is built over, so that there is no cultivation. There is a local police force of 200 men.

British Consul, J. W. Keogh (Nice).
British Vice-Consul, C. J. Sim.

MONTENEGRO.

On 29 November, 1918, King Nicholas was deposed by the Skupstina, and a decision was made to reunite Montenegro with Serbia under King Peter.

Consul-General, Col. Sir J. Roper Parkington, 21 Mincing Lane, E.C.
Vice-Consul, Charles Cary-Elwes.

A Principality until 1910, in which year it was proclaimed a Kingdom by virtue of a resolution of the National Skupstina, on the 50th anniversary of the accession of Prince Nicholas. It was formerly a province of the old Serbian Empire which came to an end after the battle of Kossovo in 1389, since which date it has always claimed to be independent, and recognised to be so by the Treaty of Berlin (1878). It has an area of 5,800 square miles (including the territory acquired from Turkey in 1913) and a population

estimated at 500,000. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, cattle, castradina (smoked mutton), hides, and tobacco, which has been created a monopoly, and conceded for 25 years to an Italian company. The only manufactures are coarse woollens. Agriculture is the principal occupation. The ports are Antivari and Dulcigno. There is a railway from Antivari to Lake Scutari. A representative parliament was granted in 1905. In 1912 Montenegro joined with Bulgaria, Servia and Greece in a war against Turkey, the successful outcome of which resulted in an extension of Montenegrin territory at the expense of Turkey. At the outbreak of the present war, she joined forces with Serbia against the Central European Powers, who are in military occupation of the entire country at the present time. The temporary seat of Government is at Neuilly-sur-Seine, France.

MOROCCO (French Protectorate).

Sultan, Moulay Yusef, K.C.M.G., acceded 1912.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°–36° N. lat. and 1°–12° 40' W. long., with a total area of about 220,000 square miles, and an estimated population of 4 to 5 millions. In 1912 a Franco-Spanish agreement fixed the boundaries between the French and Spanish zones, and the principal part of Morocco now forms a French protectorate, while Tangier is to be internationalised. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. There are no railways, except the narrow gauge strategic lines of the military service. All the principal towns are now connected by wire and wireless telegraph systems, and from Tangier there are submarine cables to Europe and Algeria. The trade is principally with France (and Algeria), U.K. (and Malta), Germany, and Spain.

	1916.	1917.

Consul-Gen., H. S. J. Maas, 28 Langham Street, W. 1.
Agricultural Commissioner, Dr. J. J. L. van Rijn, 50 Mount Park Road, Faling, W.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population in Nov., 1916, of 6,554,053. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder

are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seeds, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of canals is about 2,000 miles. There were 2,315 miles of railroad open in 1915, and 5,110 miles of telegraph line. The mercantile marine, on the 31st Dec., 1915, consisted of 397 steamers, tonnage 725,530, and 390 sailing vessels of 44,617 tons. The tonnage amounted in 1915 to—entered, 6,621,000, and cleared, 6,631,000. An Act for the damming and draining of the Zuyder Zee was passed in 1918.

Defence.—The Home Forces consist of a modified militia, purely defensive, recruited by voluntary enlistment supplemented by conscription. Military service is unpopular. The numbers on a peace footing of the army are 22,000. The first and second lines can be raised to a war strength of 200,000. The Royal Navy consisted, on 1 July, 1916, of 117 vessels (7 of them ironclads, 4 protected cruisers, 13 coast and harbour defence vessels, 3 river gunboats, 8 torpedo-boat destroyers, 38 torpedo-boats, 8 mine-layers, 7 submarines, 20 special service vessels and 10 for special service in the colonies, while 2 cruisers were under construction.

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 95 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, Utrecht.

Trade and Commerce.—The Netherlands figure largely in the trade returns of the United Kingdom. The following are the figures for imports of British produce and manufacture in the year 1917. Total, £20,796,425:—

Apparel.....	£78,745	Leather.....	£5,387
Carriages, Motors	67,912	Machinery.....	152,000
Chemical products	272,472	Metals (Iron, &c.)	374,513

NETHERLANDS COLONIES.

TOTAL AREA, 832,473 square miles.
 POPULATION, 37,861,513.

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop. about 130,000) are very considerable, comprising the whole of the SUNDA ISLANDS and *MOLUCCAS*: *Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (115,000 sq. miles), *Celebes Island* (50,000 sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles); with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA, with a total area of 738,000 square miles, and a population (1905) of 37,717,377, of whom as many as 30,098,000 live in the islands of Java and Madura. JAVA and MADURA (customs receipts, 1910, £1,675,960) produce a sufficient supply of food for a dense population, besides furnishing sugar, tobacco, tea, coffee, and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There was (1916) a colonial army of 1,139 officers and 38,196 men. The colonial revenue for 1917 was estimated at 346,111,605 guilders, and was largely derived from the sale of coffee, salt, bark, and tin; whilst the estimated expenditure was 404,357,117 guilders. The exports, for private account, amounted in 1913, for Java, Madura, and the other outlying islands, to 677,734,494 florins, while the imports for the same year amounted to 464,964,620 florins.

In South America the colony of SURINAM, or Dutch Guiana (imports, 1915, 5,445,866 guilders; exports, 6,949,315 guilders), embraces 49,845 square miles and contains (1913) 96,618 inhabitants; and in the West Indies, CURAÇAO (imports, £263,525; exports, £77,115; population, 32,585) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,884 (imports, £33,783; exports, £65,958).

 Vice-Consul, H. Ohlsen.

Norway, an independent kingdom, founded in 872 (fundamental law of 17 May, 1814), was united with Sweden under the same King from 4 Nov., 1814, to 7 June, 1905, when the union was dissolved. The Parliament of 123 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western

* CS = Cordoba, worth \$2 U.S.

and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,130 sq. miles with a population (1910) of 2,391,782. The coast-line is extensive, deeply indented with numerous fjords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. The fisheries give employment to a large part of the population throughout the year. The most important are cod and herring; the exports of these with other sea-products and fish-oil were valued at 98,128,000 kroner* in 1914. The mineral products are increasing of late. Timber-dressing, mechanical engineering, textile manufactures, ship-building, and pulp-making are the principal departments of Norwegian industry. The exports of produce of the forests were valued at 85,000,000 kroner in 1914. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, matches, fish, oil, and other products of the fisheries, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, &c.

The total value of minerals produced in 1914 was 22,725,000 kroner.

Defence.—Service in the National Militia is universal and compulsory. The war effective is about 110,000 of all ranks. In time of war all males between the ages of 15 and 55 are liable for service. The Navy consists of 4 ironclads, 2 coast defence monitors, 27 torpedo-boats, 3 gunboats, 3 destroyers, 5 submarines, and a few smaller vessels.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are 10 special schools and industrial and technical institutes. The University of Christiania was attended in 1913 by 1,500 students.

Communications.—The total length of railways open in 1916 was 1,973 miles, of which 281 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1916, was 14,070 miles. The mercantile marine, 1 Jan., 1916, consisted of 3,325 vessels, of 1,784,470 tons. During the war, to 1 June, 1918, 698 Norwegian vessels had been sunk by torpedo or mine, 970 seamen have been killed, and £37,000,000* has been paid by war insurance.

OMAN.

Sultan, or Sovereign, Seyyid Tahmur bin Faisal, born 1886, suc. 1913.

Oman (area 82,000 sq. miles, estimated pop. 550,000) is a Mohammedan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Oman, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Oman proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1916-17 to £408,046, and in 1917-18 to £323,915, a decrease owing to interior disturbances due to the war. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports.

CAPITAL, Muscat. Population, 24,000.
 British Consul and Political Agent, Maj. Lionel B. H. Haworthper mensem Rs. 2,250
 Transit, 17 days.

 Consul in Manchester, F. A. Cortez-Leigh.
 One of the nine Departments of Colombia revolted in Nov. 1903, and established a separate

Government. The area of the Republic is 31,890 square miles, the population (1910) about 400,000. A railway 47 miles in length joins the two oceans. Diplomatic relations with Germany were broken off on 10 April, 1917.

Revenue (1913)	\$3,842,214
Expenditure (1913)	3,842,214
Revenue (1915)	(U.S.Cy.) \$3,375,288.92
(Government obtained a loan of \$2,200,659.75 for Chiriqui Railway.)	
Expenditure.....	(U.S.Cy.) \$3,179,101.79

Exports (1912)	2,051,980

Imports from U.K.	1916. £279,349	1917. £255,717
Exports to U.K.	34,346	20,248

Total value of exports from the Republic of Panama (excluding the Canal Zone) during 1915, \$3,348,261.60 (U.S.Cy.).

Total value of imports during 1915 has not been published. During 1914 the total value of imports into the Republic of Panama (excluding the Canal Zone) was \$9,910,434.71 (U.S.Cy.).

The total value of imports into the Canal Zone for the fiscal year ended June 30, 1916, was \$15,640,566.22 (U.S.Cy.) of which \$10,034,613.49 is for material for the Panama Canal and \$5,605,952.73 for the commissariat. The exports consisted of scrap iron and other metals (\$222,735.24), hides, bones, fats, casings, and other by-products of the slaughterhouse (\$97,000); cacao (\$8,008).

PAPACY, The.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the sovereign pontiff of the western church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire) by the Italian Government.

Sovereign Pontiff, His Holiness Benedict XV. (Della Chiesa), born 21 Nov., 1854, elected Pope 4 Sept., 1914.
 Envoy Extraordinary & Minister Plenipotentiary (Special Mission), Count de Salis, K.O.M.G., Q.V.O.

PARAGUAY, Republic of.

President (1916-1920), Dr. Manuel Franco.
 Minister in London, Dr. Cecilio Baez, 9 Ashburn Gardens, S.W. 7.
 Consul-General in London, Alfred James, 18 Eldon Street, E.C. 2.

* Under the superintendence of Bergen.
 † Under the superintendence of Christiansand.

An inland State of South America, situate between 20°–6° 30' S. lat. and 54°–62° W. long. Its area, exclusive of the Chaco territory, claimed by both Paraguay and Bolivia, is computed at 65,000 square miles, and contains a population of about 800,000. The chief products are tobacco, yerba maté, oranges, timber, quebracho extract, hides and cassava (mandioca), maize, rice, sugar-cane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising is the chief industry. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk.

Consul (with local rank of First Sec. and Chargé d'Affaires, ad int.), F. A. Oliver £1,000 to £1,100

PERSIA.

Sovereign, Sultan Ahmed Mirza, Shah, b. 29 June, 1898; suc. 17 July, 1909; crowned 21 July, 1914. *Heir Presumptive*, Mohammed Hassan Mirza, b. 19 Feb., 1899.

Envoy Extra. and Minister Plen. in London, H.H. Prince Ala-es-Saltaneh, 47 Bramham Gardens, S.W. 5.

Consul-General in London, Sir Harry Foster, 82 Victoria Street, S.W. 1.
Sheffield (acting Consul), J. A. Hill.

Persia—called by the natives Irán—comprises an area of 630,000 sq. ms., with a population estimated at 10,000,000. By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are only 8 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals. The cost of carriage is, therefore, very heavy. The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The

minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The principal towns are Tehran (pop. 200,000), Tabriz (180,000), Isfahan (80,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000). The Persians are mostly Shiah Muhammadans; but there are many adherents of Babiism and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, admitting the need for reforms, granted a Constitution, but after much vacillation he was deposed by the National Council, and his son, aged eleven years, appointed to succeed him. In 1911 the ex-Shah, Mohamed Ali Mirza, invaded Persia from Russian territory, but was defeated and driven out.

The revenue (£1,480,780 in 1913-14) is derived from land tax, Crown lands, customs, opium, salt, and lease of monopolies. The foreign debt of Persia amounted (31 Dec., 1916) to £6,325,700. The total imports of merchandise into Persia in 1915-16 amounted to £7,735,000, and the exports to £6,286,000. Russia had about half of the imports and nearly three-fourths of the exports; the British Empire 35 per cent. of the imports and 84 per cent. of the exports. Turkey and France were the other chief participants. The sea-borne trade of Persia passes chiefly through the ports of Bushire, Bunder Abbas, and Mohammerah, and via Baghdad. The shipping of the Persian Gulf is principally British. Persia's chief imports are cotton piece-goods (mainly from England, India, and Russia) and sugar (from Russia and France), with tea, cotton yarn, metal wares, gold and silver, petroleum, and indigo. The principal exports are dried fruits, raw cotton, pearls, opium, rice, wool, fish, hides and skins, carpets, and silk cocoons.

	1914-15.	1915-16.
Imports	£8,322,000	£7,735,000
Exports	6,601,000	6,286,000

	1916.	1917.
Imports from U.K.	£577,342	£934,217
Exports to U.K.	485,285	572,986

Peru is a maritime Republic of South America, situated between 10° 31' 20" and 18° 13' S. latitude and between 62° 6' and 81° 20' 45" W. The territory between 17° 47' S. and 18° 13' S. is still occupied by Chile. The area of the Republic is estimated at 680,026 square miles, and the population at 3,530,000. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by the Brazils and Bolivia, and on the south by Chile and Bolivia. The country is traversed throughout

its length by the Andes, running parallel to the Pacific coast. The coast region is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper, and coal (of inferior quality) are conspicuous; while in the department of Tumbes, along the coast, there are important beds of petroleum. Gold is found in many districts, but especially in the province of Carabaya, where mining on an important scale is carried on. The eastern provinces are of vast extent and fertility, with a tropical climate. The medicinal productions of that region are of great value, comprising cinchona, or Peruvian bark (of which little is now exported), sarsaparilla, copaiba, &c. India-rubber is an important product of the country. Coca, cocoa, and coffee are grown on a small scale. Sugar is the staple agricultural article of the country. The Lobos and other islands on the Pacific coast provide guano. The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthenware and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are sugar, copper and other ores, guano, gold, silver, cotton, llama and alpaca wool, rubber, and cocaine. A small quantity of coffee is also exported.

The total length of the railways open (1915) was 1,724 miles. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places, and several are contemplated in the near future.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 5,000 of all ranks; the Navy includes two swift cruisers built at Barrow, an armored cruiser bought from the French Government, 2 submarines, and certain auxiliary cruisers.

Diplomatic relations with Germany were broken off on 5 October, 1917.

POLAND.

A Kingdom which was founded in the tenth century, and had at the time of its first partition in 1772 an area of 283,000 sq. miles, with a population of 13,000,000. It extended from the Baltic Sea, between Dantzic and Riga on the north, to the Ukraine, Moldavia, and the Carpathians in the south, and from Pomerania, Brandenburg, Bohemia, and Silesia on the west, to the Dvina and the Dniiper on the east. In 1772, on the pretext of internal dissensions, Russia, Prussia, and Austria divided a large part of the kingdom among themselves. This process was repeated in 1793, and again in 1795, when a final partition of the remainder was made between the three Powers, and Poland, as a separate political unit, ceased to exist.

Russian Poland was established as a separate kingdom under a Russian Czar in 1815, but was deprived of its constitution in 1830, when it became a province of Russia, and a further rising in 1863 was repressed with such severity that the last trace of independent nationality disappeared. The country was broken up into provinces and the estates of the nobles given to the peasants. The country is rich in minerals, but the main industry is agriculture, there being abundant crops of rye, wheat, barley, hemp, with extensive forests and pasture land.

The railways are about 1,000 miles in extent. Chief towns: Warsaw (pop. 909,500), Cracow (170,000), Lemberg (212,000), Posen (157,000), Buehen (68,000).

Owing to the victorious war the country has at length regained its long lost independence, and a Directorate of five members has been formed at Cracow with a view to establish a National Government.

A ministry has (Nov. 6, 1918) been formed with M. Swiezynski as Premier, M. Glombinski as Foreign Minister, and Gen. J. Pilsudski as Minister of War. A Diet of 200 members has been convoked.

PORTUGAL, Republic of.

President (28 April, 1918), Sidonio Paes.

(10 Oct., 1918.)

Prime Minister and Foreign Affairs, Senhor Egas Moais.

Interior, Major Bernardino Ferreira.

Justice, Senhor Conceicao Costa.

War, Lt.-Col. Alvaro C. Mendonca.

Marine, Senhor J. Arantes Pedroso.

Finance, Capt. Temagnini Barboza.

Colonies, Senhor Jardim de Vilhena.

Instruction, Senhor Affredo Magalhaes.

Ambassador Extraordinary and Plenipotentiary, Senhor Augusto de Vasconcelles, 12 Gloucester Place, Portman Square, W. 1.

1st Secretary, Count de Tovar, 37 Warwick Gardens, Kensington, W. 14.

Secretary, Snr. João A. de Bianchi, O.B.E., 32 Cumberland Mansions, Bryanston Square, W. 1.

Naval Attaché, João Manuel de Carvalho, D.S.O.

Military Attaché, Major J. B. Casqueiro.

Commercial Attaché, Snr. Jayme de Seguiro.

Vice-Consul, Major M. C. V. Hurst, 34 Clement's Lane, Lombard Street, E.C. 3.

Portugal lies in 37°-42' 8" N. lat. and 6° 15'-9° 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1911 of 5,960,056, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork. the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1912) numbered 75 steam and 106 sailing vessels, with a tonnage of 108,336. In 1915, 7,555 vessels, of 13,045,901 tons, entered the ports of the Republic. Railways 1,760 miles in extent were open for traffic in 1909, and there were 6,267 miles of telegraph line in 1907. For many years the national income was considerably less than the expenditure; this deficiency has added to the national debt.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 32,000. War strength, about 150,000. The Navy consists of 1 coast-defence ship, 4 protected cruisers, some old pattern gunboats, 4 destroyers, and 1 submarine, manned by about 4,898 sailors.

On 9 March, 1916, owing to the seizure of German ships in Portuguese harbours, the German Minister in Lisbon was instructed to ask for his passports, and at the same time the Portuguese Minister at Berlin was handed his, and war was declared by Germany. Active hostilities have since ensued both in France and in the continent of Africa.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and over 75 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lycéums. There are also military, naval and others special schools. The University of Coimbra (1291) had 7,100 matriculated students in 1910.

	1916-1917.	1917-1918.
Revenue (estimate).....	£12,300,000	£12,225,589
Expenditure (estimate).....	12,663,000	12,176,091
Total debt	128,603,600	128,603,600
	1913.	1914.
Imports	£18,218,000	£20,117,160
Exports	11,406,000	12,113,460
	1916.	1917.
Imports from U.K.	£5,031,574	£4,041,659
Exports to U.K.	5,250,639	3,850,261

* An additional estimate of £20,000 for war purposes is not included.

CAPITAL, Lisbon. Population (1900), 336,009 : Oporto had a population (1900) of 167,955.

PORTUGUESE COLONIES.

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 606,000, and includes Goa, Damaun, and Diu. Revenue,

1909-10, £223,000; imports, £1,316,000; exports, £220,000.

MACAO, in China, on the Canton River, has an area of 3 square miles and a population of 80,000. Revenue, 1909-10, £127,300; imports, £1,520,000; exports, £1,700,000.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,430 square miles, with a population of 300,000. Revenue, 1910-11, £40,000; imports, £80,000; exports, £64,000.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,475 square miles and a population of 150,000. Revenue, 1909-10, £90,000; exports, £70,000; imports, £320,000.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 400,000. Revenue, 1909-10, £62,000; exports, £90,000; imports, £180,000.

SAO THOME and PRINCIPE ISLANDS, in the Gulf of Guinea (area 442 square miles, population 45,000). Revenue, 1909-10, £186,500; imports, £520,000; exports, £650,000.

PORTUGUESE WEST AFRICA (Angola and Kabinda) has a total area of 480,000 square miles, with a population of 5,000,000. Revenue, 1909-10, £460,000; exports, £700,000; imports, £1,150,000.

PORTUGUESE EAST AFRICA (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyasa, Quilimane, and Tete) has a total area of 300,000 square miles, with a population of 3,200,000. Revenue, 1909-10, £1,100,000; total trade (imports and exports), £6,000,000.

Vice-Consul, N. Gologan, 28 Crescent Road,
Norbiton.

The Kingdom of Rumania contains an area of about 53,000 square miles, with a population (1899) of 5,956,690, (1913) 7,200,000. The dominating religion is that of the Greek Church.

The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The wheat crop for 1916 was estimated at 21,370,000 quintals, against 24,436,000 for 1915. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle and sheep. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, petroleum (1,500,000 metric tons in 1910), rock-salt, spirits, hides, wood, and cattle. The total length of railways is 2,230 miles (1910). An extensive scheme of railway construction has been undertaken at a proposed outlay of over £17,000,000. The work will be spread over a period of seven years, and there are 3,127 telegraph offices with 9,915 miles of wire.

An International Commission, exercising sovereign powers over the navigation of the Danube, has its seat at Galatz.

Defence.—Service in the Army is universal and compulsory. On a war footing the Field Army numbers 250,000, and with reserves Rumania can put at the utmost limit 700,000 men under arms. There is a small navy on the Black Sea (30 vessels) and on the Danube, and 4 destroyers are building in Italy.

On 27 Aug., 1916, Rumania declared war against Austria-Hungary, and Germany handed his passports to the Rumanian Minister at Berlin. At the present time (Nov. 1917), a large part of the country is in the military occupation of the enemy. In March, 1917, the British Government advanced a loan of £40,000,000 to Rumania.

Education is free and nominally compulsory, but owing to inadequate provision over 60 per cent. of those above 7 years of age are illiterate. Secondary education is relatively better, and the schools are well attended. There are also special schools and Universities at Bucharest and Jassy. A Government High School of Commerce was opened in 1913.

Rumania is not a Balkan State, and took no part in the operations of the Balkan League (Bulgaria, Servia, Montenegro, and Greece) against the Ottoman Empire in 1912-13; but during the second war (1913), when Bulgaria was in opposition to the remaining members of the League, Rumania was able to exact terms from Bulgaria at the Treaty of Bucharest, by which a "quadrilateral" of Bulgarian territory, amounting to 7,609 square miles, with a population of 285,000, was surrendered to Rumania. Principal towns, Silistria and Dobritzi.

	1912-13.	1913-14.
Revenue	£23,519,330	£22,357,600
Expenditure	19,503,078	21,292,720
Public debt	72,800,000	72,600,000

(The National Debt is stated to have been in July, 1918, £210,700,000).

	1911.
Total imports	£22,812,710
Total exports	27,668,816

	1916.	1917.

Transit, 2½ days.

RUSSIA.

A Revolution, which took place in the early days of March, 1917, resulted in the abdication of the Tsar Nicholas II., and subsequently to his assassination. On 15 Sept. 1917, a Republic was proclaimed on a basis of Universal Suffrage, and a Provisional Government appointed.

A new Cabinet was constituted on 9 Oct. 1917, on the basis of an agreement between the democratic and bourgeois parties, with M. Kerensky as Premier and Commander-in-Chief.

This attempt at a definite Administration was shortly afterwards upset, and the reins of Government seized by W. Oulanof Lenin on 8 Nov., 1917. The infamous peace treaty (Brest-Litovsk) with the Central Powers was ratified on 24 March, 1918, and under Bolshevik rule the country has been given over to anarchy and promiscuous assassination. Innocent people, men and women, have been and are packed into stifling and filthy prisons. Murder by bullet, bayonet, knife, and drowning has raged without respect of sex, age, or religion. Robbery and pillage, espionage, and terrorism have blighted the land. Under the present régime the worst excesses of the French Reign of Terror have been far exceeded, and the condition of Russia at the present time causes much anxiety.

Ambassador Extraordinary and Plenipotentiary (vacant), Chesham House, Chesham Pl., S.W. 1.
Chargé d'Affaires in London (ad int.), M. Constantin Nabokoff, 44 Curzon Street, W. 1.
Councillor, M. E. Sabline (absent).
and Secretary, M. G. Wolkoff.
Attachés, M. Léonide Zarine; J. Gruenman; D. Sokoloff.

Military Attaché, Gen. Yermoloff, K.C.B., K.C.V.O.
Naval Attaché, Rear-Adm. Wolkoff, C.B., A.D.C.
Financial Attaché, M. Serge Ermolaeff.
Commercial Attaché, M. Ostrogradsky.

A country comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominions under British rule.

<i>European Russia :</i>	English Sq. Miles.	Population 1 14 Jan. 1912
Russia Proper.....	1,862,524	122,550,700
Poland	49,078	12,776,000
Finland	144,178	3,140,100

Asiatic Russia:

	English Sq. Miles.	Population 1/24 Jan. 1912.
Caucasia	180,703	12,288,100
Central Asia	1,325,530	10,727,000
Siberia	4,786,730	9,577,900

Dependencies:

Khiva	26,028	800,000
Bokhara	78,524	1,500,000

Inland Lakes	317,468	...
	8,770,703	173,359,900

The largest towns in European Russia are Petrograd (2,018,596), Moscow (1,173,427), Warsaw (509,000), Riga (500,000), Odessa (449,673), Lodz (351,570), Kiev (600,000), Kharkoff (197,405), Vilna (162,633), Saratov (143,431), Kazan (143,707), Ekaterinoburg (135,552), Rostoff (119,889), Astrakhan (121,580), Tula (109,279), and Kishineff (125,787); whilst Nijni Novgorod, Nicolaieff, Samara, and Minsk have populations between 90,000 and 95,000. In Asiatic Russia the Caucasus contains two towns with over 100,000 inhabitants, Baku (179,133) and Tiflis (160,645); Turkestan contains five large towns, Tashkend (156,000), Namangan, Samarkand, and Andijan; in Siberia Tomsk, Irkutsk, and Ekaterinburg have each about 50,000 inhabitants. Nijni Novgorod, though small, is a station on the Trans-Siberian Railway, and has annually the largest fair in the world. As a result of the Revolution of 1917, what was once the Imperial Russian Empire has been broken up into a number of separate States. Finland and the Baltic Provinces each claim independence, the Ukraine (Little Russia) and Siberia also proclaiming themselves independent Republics. The whole country is in a state of chaos and awaits definite settlement.

Nationalities (1905). The various nationalities were represented about as follows:—Russ, two-thirds of the whole population, or 65·5%; Poles, 6·2%; Lithuanians, 2·4%; Germans, 1·6%; Armenians, 0·9%; Jews, 3·9%; Caucasians, 0·9%; Finns, 4·5%; Turco-Tartars, 10·6%; Mongols, 0·4%; various, 2·0%.

The Census for 1915 showed a total population of 182,182,600, an increase of 2·1 per cent. on that of 1914.

Religions (1905).—The established religion of the country is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there were:—Orthodox, 69·9%; Mussulman, 10·83%; Roman Catholics, 8·91%; Protestants, 4·85%; Jews, 4·05%; other Christian beliefs, 0·96%; other non-Christian beliefs, 0·50%.

European Russia consists mainly of an immense plain; the Valdai hills in the west rise only to about 1,000 ft., and the Lublin hills in the south-west to about 1,500 ft. On the right bank of Lake Inandra, in the Kola peninsula, is an elevation of 3,300 ft. The Timanski range, in the province of Archangel, rises to about 3,000 ft., and Mount Lujaur-Ort in Finland to about 3,400 ft. In the Crimea and Caucasus various heights are over 4,500 ft., and the Obdorsk and Ural Mountains, which form the borderland between Europe and Asia, rise in many places to between 4,000 and 5,000 ft. In Siberia the principal ranges are the Altai, Sayansk, Baikal, Yablonoï, and Verkhioiansk mountains, with a volcanic chain in Kamchatka. In Russian Turkestan are portions of the Thian Shan range, and in Bokhara are the Pamirs, the "Roof of the World," and in all these ranges are heights

of over 5,000 ft. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries. The river Amur, dividing Manchuria from Eastern Siberia, is navigable from its mouth to Chita, in the Trans-Baikal province, by shallow draught steamers, and is of importance, together with the Trans-Siberian Railway, in spreading Russian influence in the outlying portions of the Chinese Empire.

Agriculture.—A great portion of Russia is unfit for cultivation; in the north the *tundras* are almost constantly frozen, but in a short summer provide good pasture and certain berries fit for human food; in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst some of the interior provinces (to the extent of about 460,000,000 acres) and nearly the whole of Siberia are clothed with forests, in which the fir, pine, birch, oak, lime, maple, and ash predominate. The country between the Baltic and Black Sea, however, is eminently fertile, producing abundance of grain. The total area under cereals, potatoes, &c., in 1912 was 361,045,636 acres, of which 78,137,333 acres were under wheat, 72,245,482 under rye, 46,903,878 under oats, and 29,899,754 acres under barley. The harvest of cereals for 1912 is officially stated to be as follows:—wheat (spring and winter sown), 21,478,312 tons; rye (spring and winter) 25,842,956 tons; barley, 10,321,593 tons; oats, 15,569,348 tons; millet, 2,354,006 tons; maize, 2,861,106 tons. Hemp and flax are extensively cultivated, and of late years potatoes (37,399,474 tons in 1912) and tobacco (7,716,926 pounds of 62 lb. in 1911).

The Live Stock in 1914 included 52,052,000 cattle, 72,273,000 sheep, lambs and goats, 14,995,000 pigs, and 34,973,000 horses.

Minerals.—The Obdorsk and Ural Mountains contain very great mineral riches, and, with the Altai range, are the principal seat of mining and metallic industry, producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. Russia is now the largest producer of petroleum in the world, the output amounting to 530,000,000 pounds in 1914, and to 592,000,000 pounds (of 56 lb.) in 1915. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). The coal output for the whole of Russia in 1913 was 2,066,180,000 pounds (of 36 lb.) and in 1914 2,060,340,000 pounds. Other mineral products in 1910 were gold-ore (schlich), producing 2,916 pounds of pure gold; platinum, 337 pounds; pig iron (256,264,000 pounds in 1912); steel and rails (1912, 274,946,000 pounds), copper, 2,046,780 pounds in 1912 (in 1913, 2,095,289), quicksilver (2,900 pounds in 1908), salt (122,940,000 pounds in 1911), and lead (75,585 pounds in 1911).

Ports.—The principal ports are Petrograd, the naval depot and fortress Kronstadt, Narva, Riga, Libau, Pernau and Vindau (Baltic), Hango (Gulf of Bothnia), Revel, Helsingfors and Wiborg (Gulf of Finland), Archangel and Ekaterinsk (Arctic and White Seas), Odessa, Nicolaieff, Sevastopol, Nova-Rossiisk, Berdiansk, and Batoumi, Taganrog, Mariupol, Rostoff and Kerch (Black Sea and Sea

of Azov), Astrakhan, Derbent and Baku (Caspian Sea), and Nicolaieffsk, Vladivostok, and Petropaulovsk in Kamtchatka (Pacific).

Education.—With the exception of Finland, education is very backward, especially in country districts. Probably not more than 10 per cent. of the population have received instruction of any kind. The control and maintenance of primary schools is divided between the Ministry of Public Instruction and the Holy Synod. Conditions are, however, improving. Secondary institutions comprise gymnasia and good schools, but numbers and attendances are small. Special schools are increasing in number, especially in the European cities. There are universities at Kazan, Kiev, Kharkov, Moscow, Odessa, Petrograd, Saratov, Tomsk, Yuriev, and Warsaw.

Communications.—The total length of lines open for regular traffic on January 1, 1913, was 46,839 miles, inclusive of 2,347 miles in Finland, and 1,079 miles of the Eastern China Railway. New lines under construction in 1913 extended to 4,991 miles, of which 2,823 were Government lines; projected lines authorized (1-14 Jan., 1914) totalled 4,205 miles. In 1914 the gross revenue amounted to £112,213,200. The number of passengers carried was 235,179,382, and goods traffic amounted to 229,283,479 tons.

There were (1913), excluding Finland, 15,261 post-offices, carrying 2,663,900,000 letters, &c. Of telegraphs there were (1911) 8,423 offices, with 476,177 miles of wire, and 15 wireless stations.

The sea-going commercial marine consisted in 1914 of 1,044 steamers, with a total tonnage of 513,003, and 2,597 sailing vessels of 256,726 net tons. In 1911 the total estimated value of the steam fleet was £15,300,000 and of the sailing vessels £1,700,000. The steam fleet was manned by 17,157 persons and the sailing ships by 12,333 persons; the ocean shipping of Russia is comparatively insignificant, but the internal (lake and river) shipping is considerable.

Budget Revenue:—

	1913. *Roubles.	1914. *Roubles.
Ordinary	3,240,599,006	3,521,697,282
Extraordinary	10,000,000	13,400,000

Ordinary	3,012,264,284	3,302,675,714
Extraordinary	288,294,722	255,585,785

The Budget for 1916 showed Revenue £329,114,000 and Expenditure £364,656,000.

National Debt.—The National Debt amounted on 1 (14) January, 1916, to Rs. 16,795,000,000. The total of gold in the State Bank at 1 (14) November, 1914, was 1,832,742,908 roubles.

Trade and Commerce.—The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables; the principal exports are wheat and other cereals, raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow, and bristles.

CAPITAL, Petrograd.*

2,018,596.

BOKHARA.

Emir of Bokhara, H.H. Said Mir Alim Khan, b. 1880, succeeded 1911.

Bokhara is a vassal State of Russia in Central Asia, and has an estimated area of 85,000 square miles, with a population of 1,250,000, the majority being Muhammadan Uzbeks. The capital (Bokhara) is a station on the Trans-Caspian Railway, and has a population of about 75,000. The principal products are rice, wheat, fruit, hemp, cotton, and silk. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar.

KHIVA.

Khan, H.H. Said Asfendiar, b. 1871, succeeded 1910.

Khiva lies between Bokhara and Russian Trans-Caspia, and has a total area of about 26,000 square miles, with a population of 800,000, of whom about half are nomads. The country occupies the fertile delta of the Oxus, and is highly productive. The capital (Khiva) has about 10,000 inhabitants.

Petrograd, *via* Calais, is 1,709 miles from London; transit, 7 days, *via* Scandinavia.

SALVADOR, Republic of.

President (acting until 1 March, 1919), Señor Carlos Melendez.

Foreign Affairs, Señor F. Martinez Suarez.

Chargé d'Affaires and Consul-General in London, Dr. Arturo R. Ayala, 7, Union Court, Old Broad Street, E.C. 4.

Salvador extends along the Pacific coast for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 7,225 square miles, with a population estimated at 1,271,336. It is divided into 14 departments, and has three ports, Acajutla, La Libertad, and La Unión. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. A British railway nearly 100 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre; and another line is in course of construction from the port of La Unión to the capital. This has been completed to San Vicente (112 miles), whence a motor service to San Salvador has been organised. Earthquakes are frequent, and on June 8, 1917, a series of seven shocks nearly destroyed the capital, and ruined the towns of Santa Tecla, Armenia, and Apopa. The British railway was cut by the flow of lava, and Acajutla isolated from Salvador. The volcano on Mount Salvador was actually in eruption in Oct. 1917. There are 120 post-offices and 215 telegraph offices, with 3,000 miles of wire.

* The name St. Petersburg was changed by Imperial Order, 1 Sept., 1914.

* Roubles 9'45 = £1.

British Minister, Sir C. Alban Young,
K.C.M.G., M.V.O. (Guatemala)

BRITISH CONSULAR OFFICES.

San Salvador—Consul, Arthur Hastings-
Medhurst

Vice-Consul, W. Gibson

Salvador is 5,700 miles from London; transit,
21 days via Puerto Barrios (Guatemala).

SAN MARINO.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 33 square miles, the population 12,000. There is an army of about 1,000. The city of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. Agriculture and viticulture flourish.

British Consul-General for San Marino, M. Carmichael (Leghorn).

Consul-General for San Marino in Great Britain,
Commandatore Arthur Serena, J.P., F.R.G.S.,
34 Leadenhall Street, E.C.

SERBIA.

(C.V.O.).

Legation, 195 Queen's Gate, S.W. 7.

Military Attaché, Col. G. Ostovitch, C.V.O.

Secretary, M. Pavlé Karovitch.

A Kingdom of Eastern Europe, separated from Hungary by the Danube and Save, and bounded on the east by Bulgaria, on the west by Albania and Montenegro and on the south by Greece. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people; this constitution was re-established by the present king. By the Berlin Treaty, 1878, it received a large accession of territory, and

in 1912 it had an area estimated at 18,757 square miles, with a population in 1910 of 2,911,701. In 1913 Serbia, as a member of the *Balkan League* (Bulgaria, Greece, Serbia, and Montenegro), waged a successful war against Turkey. In August, 1913, Serbia and Greece were attacked by Bulgaria, their former ally, owing to disputes concerning the division of the spoils. The second war collapsed in a few weeks through the threatened intervention of Rumania, and ended in the Treaty of Bucharest. Serbia also became involved with the Austro-Hungarian Monarchy on a question of the Albanian frontier, where desultory fighting had taken place for some months, but eventually the smaller Power withdrew from the disputed area. The outcome of the military operations was the inclusion of the whole of "Old Serbia" (the greater parts of the vilayets of Macedonia) within the Serbian boundaries, which thus embrace an area (1914) of close on 34,000 square miles, with a population estimated at 5,000,000. The cost of the wars to Serbia exceeded £18,000,000. The assassination of the Austrian Heir Presumptive in June, 1914, brought about an invasion of Serbia by the forces of Austria-Hungary, and started the pan-European war. The whole country has been overrun, and, until the unconditional surrender of Bulgaria in 1918, was still occupied by the forces of Austria, Germany, and Bulgaria. On 28 Aug., 1916, the Serbian Parliament met at Corfu. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The imports consist mainly of cottons, sugar, and colonial goods, hardware, woollens, &c.; the export, of dried prunes (11.5 per cent.), pigs, and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. There were (1911) 580 miles of railway, and (1908) 2,200 miles of telegraph, with 1,460 post-offices and 1,100 miles of telephone wires.

The Army on a peace footing consists of 30,000 officers and men, the war strength being about 250,000.

The Navy.—In 1916 Serbia acquired a destroyer, and each of the Allies presented her with two units to form the nucleus of a Serbian navy.

Education.—Primary education is free and nominally compulsory, but the attendance does not exceed 25 per cent. of the young. The State also maintains Secondary and Girls' High Schools. The University is at Belgrade.

SIAM.

King, Somdetch Phra Paramendr Maha Vajira-
 vudh Mongkut Klao, G.C.B., G.C.S.I., G.C.V.O.,
 born 1 January, 1880; succeeded 23 October, 1910.
Foreign Minister, H.R.H. Prince Dewawongse.
Envoy Extr. and Min. Plen. in London, Phya
 Sudham Maitri, 23 Ashburn Place, S.W. 7.
Consul-General, Sir John Anderson, 5 Whittington
 Avenue, E.C. 3.

The Kingdom of Siam, or Muang T'ai (area
 about 195,000 square miles; population, 1914,
 8,150,000), is a buffer State between British Burma
 and French Indo-China, and its integrity is
 guaranteed by the British and French Govern-
 ments by the Anglo-French Agreement of April,
 1904. The upper part of Siam is mountainous,
 the lower flat. Siam contains many Chinese
 (largely engaged in trade and industry), besides
 Shans, Laos, Malays, Burmese, and Cambodians,
 and over 1,600 Europeans. The principal religion
 is Buddhism. Education is now under the
 Minister of Public Instruction. There are 394
 public schools and 4,137 schools of all kinds,
 attended by 122,800 children. A University is
 in process of organisation. Bangkok is the only
 much-frequented port. Over two-thirds of
 Siamese sea-borne trade, which centres at
 Bangkok, is with the British Empire, and is
 largely in the hands of British firms or of
 Chinese trading from Singapore and Hong Kong.
 German shipping, which has held the lead in
 tonnage for many years past, has ceased to visit
 Bangkok since August, 1914, and, as a conse-
 quence, there has been a large increase in
 Norwegian and British shipping. The chief
 products of Siam are rice, teak, and tin (from
 Lower Siam). The area under rice is being much
 enlarged by irrigation. There is a large number
 of rice mills, mostly in or near Bangkok. The
 teak industry in the great forests of N. Siam is
 mainly in English hands. In 1915-16 rice consti-
 tuted 83 per cent. and teak 5 per cent. of the
 exports from the port of Bangkok; while hides
 and marine products are also exported in con-
 siderable quantities. Among imports are treasure,
 cotton goods and yarn, silk goods, provisions,
 gunny bags, kerosene, sugar, opium, metals and
 metal wares, machinery, &c. The general tariff
 rate is 3 per cent. *ad valorem*. Burma imports
 teak and cattle overland from Siam, and exports
 thither cotton and silk goods, &c. Except tin,
 wolfram, rubies and sapphires, there are no impor-
 tant mineral products as yet. The King is an
 absolute monarch, and appoints his successor.
 There is an Executive Council of Ministers and a
 European general adviser, and, since 1895, a
 Legislative Council of State, consisting of the
 Ministers, eight royal princes, and over twenty
 members appointed by the King, who has an
 absolute power of veto. A number of English,
 French, Italians, Danes, and Americans are em-
 ployed in the various State departments. Siam
 has an army of nearly 50,000 men, and a few
 small gunboats; compulsory military service has
 been introduced. About 1,200 miles of railroads
 (mostly State-owned) are now open for traffic.
 Railways from Bangkok run to Korat (165 miles
 N.E.), Nakawn Lampang (400 miles N. of Bang-
 kok), Petrii (440 miles E.); while the northern

line is being extended to Chiengmai, and the
 southern line to Trang, on the west coast of the
 Malay Peninsula, was open to traffic in October,
 1916. In July, 1918, the southern line was com-
 pleted to the Kedah border where junction with
 the Federated Malay States Railway system was
 effected. There is no through railway connexion
 between Bangkok and Penang and Singapore.
 Good roads are few. There are 3,000 miles of
 telegraph lines.

The currency is the silver tical, worth about
 18. 6d. The Mint was closed to the free coinage
 of silver in Nov., 1902. In N.W. Siam the
 Indian rupee is more or less current. The
 Government issues notes.

War against Germany and Austria was declared
 on 22 July, 1917.

	1916-17.

 40 Trinity Square, E.C.
Vice-Cons., Roger Fuentes Bustillo.

A Kingdom situate in the south-west of Europe,
 between 36°-43° 45' N. lat. and 4° 25' E.-9° 20'

W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Jan. 1914, of 20,356,000—102½ to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. The Constitution upon which the present Government is formed is dated 30 June, 1876. The principal towns are Madrid (pop., 597,573), Barcelona (587,219), Valencia (233,348), Seville (155,366), Malaga (136,192), Murcia (125,380), Saragossa (111,701), Cartagena (96,983), Bilbao (93,536), and San Sebastian (92,514); and there are also twelve towns with over 50,000 inhabitants. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quick-silver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the war, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is rigidly protected by high customs duties.

In 1914 there were 9,377 miles of railway open, and 59,895 miles of telegraph line. The sea-going mercantile marine on Jan. 1, 1915, consisted of 640 steamers and 217 sailing vessels over 50 tons, of a total tonnage of 904,727. Many of these vessels have since been sunk by German submarines. In 1915, 16,045 vessels of 14,868,874 tons entered and 15,147 vessels of 13,542,970 tons cleared at Spanish ports.

Defence.—The authorised peace establishment, including forces in North Africa, was, in 1915, 13,500 officers and 122,000 men. War strength: Field Army, first line, 280,000. Second line, 120,000.

The Navy is being rebuilt and reorganised, and consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 8 torpedo-boat destroyers, 24 torpedo-boats, 4 submarines, and 10 gunboats.

Education. Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation.

Many private schools are under clerical control, and supervision is lacking. Secondary High Schools are in each province, but the curriculum is defective. Universities at Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

Madrid, 1,150 miles; transit, about 36 hours.	

The **BALEARIC ISLES** are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1910) of 325,703. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of about 13,000.

The **CANARY ISLANDS** are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 419,809. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

SPANISH COLONIES.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part of the kingdom) consist of certain settlements and islands of Western Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

Fernando Po.

FERNANDO PO (Fernando Pó) lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annobon Island (Anno Bom), in the Gulf of Guinea, in 1° 24' S. lat. and 50° 35' E. long. The roadstead at the capital (San Antonio de Baia) is much frequented by passing vessels, which also obtain water and vegetables from the islanders.

Corisco Islands, consisting of Corisco, Bana, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio de Oro and Rio Muni.

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20'–26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs. There are valuable fisheries off the coast, and cattle, sheep, and camels are bred where vegetation permits.

Rio Muni (or Spanish Guinea) is a coastal settlement of West Africa between Cameroon and French Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast. Cocoa, coffee, and bananas are cultivated, and rubber, palm oil, palm kernels, and other forest produce are exported.

Spanish Morocco.

On the Moroccan seaboard are certain Spanish presidios, formerly used as convict settlements. **Mcilla** is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is about 9,000, and the settlement exports goatskins, eggs, and beeswax, and imports cotton goods and provisions.

Alicemas is a settlement on the bay of that name, and includes six islands.

Peñon de la Gomara (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay.

The *Chaffarinas* (or *Zaffarinas*) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population about 1,000.

Ifni, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

Vice-Consul, N. L. Jaenson.

Swedish Church, Harecourt Street, Marylebone Road, W.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 172,876 square miles, and a population, 31 Dec., 1910, of 5,521,943, nearly all Protestant. This area includes the great lakes of Hjälmaren, Mälaren, Vänern, and Vättern. Nearly 49 per cent. of the population are devoted to agriculture, about 298,000 being owners and 50,000 tenants of the land they cultivate. The country for the most part is flat with pleasant undulations, rising in the north-west to the Kolen Mountains, which separate Sweden from Norway; and may be divided into three separate districts—the northern, forest; central, mining; the southern, agricultural. The climate in the

south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and also the chief fuel. The mineral products are extremely rich: iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, skins, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c.

The *Åland Islands* consist of a group of some 300 small islands at the entrance to the Gulf of Bothnia, the largest being 25 miles from the Swedish coast. The total population is about 16,000, of whom two-thirds inhabit the largest island, Åland, 18 miles in length. Formerly Swedish, they were acquired by Russia in 1800.

Commercial travellers in Sweden are compelled to take out a licence, costing 100 crowns a month, or they incur the risk of being fined.

Railroads, 9,228 miles in length (of which 3,044 are the property of the State) were open on 1 Jan., 1916; and 21,700 miles of telegraph wires (exclusive of 19,121 railroad telegraph wires), 177 stations, and 1,729 railroad and 940 other telegraph stations (1912). There were at the same date 245,750 miles of telephone wires.

Defence.—Service in the *Army* is universal and compulsory. The peace effective is about 80,000 trained men. The first line can be raised to war strength of about 110,000; second line, 85,000. The *Navy* consists of 92 fighting vessels (438 guns), 23 being ironclads, with submarines, submersibles, and some training ships, &c.

Education.—*Primary*: Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities*: Lund, Upsala, and a few private faculties.

The Helvetia of the Romans, a Federal
Republic of Central Europe, situated between
45° 50'—47° 48' N. lat. and 5° 58' 10 30' E. long.
It is composed of 23 Cantons, of very dissimilar
size, united under a Constitution dated 29 May,
1874, and comprises a total area of 15,950 square
miles, with a population of 3,877,210 in 1913,
who are divided between Roman Catholics, 40
per cent., and Protestants, 59 per cent. Jews
numbering 7,400 and others 11,000. The popula-
tion is formed by three nationalities, distinct by
their language, as German 71 per cent., French
21 per cent., Italian 6 per cent., and Romansh
(in the Grisons), 1½ per cent. The most impor-
tant cities are Zurich, pop. (1915) 203,265, Bale
137,155, Geneva 138,688, Berne 98,000 (1916), and
Lausanne 66,125. It is the most mountainous
country in Europe, having the Alps, covered
with perennial snow and glaciers, rising from
5,000 to 15,213 feet in height, not only along
its southern and eastern frontiers, but through-
out the chief part of its interior; and the Jura
mountains in the north-west. Agriculture is
followed chiefly in the valleys, where wheat,
oats, maize, barley, flax, hemp, and tobacco are
produced, and nearly all English fruits and
vegetables are grown. The forests cover about
one-sixth of the whole surface. The manufac-
tures consist chiefly of silks, cottons, linen,
lace, thread, woollens, &c.; clocks and watches
have long been the staple products of Geneva
and Neuchâtel, while leather, gloves, pottery,
tobacco and snuff, cheese, &c., are made. Being
an inland country, the direct trade with the
United Kingdom is comparatively small. In
1914 there were 3,530 miles of railway in working
order, 17,333 miles of telegraph line, 317,493
miles of telephone line, and 2,099 post-offices.

The legislative power is vested in a Parliament,
consisting of two Chambers, a National Council
of 189 members, and a Council of States of 44
members; both Chambers united are called the
Federal Assembly, and the members of the
National Council are elected for three years, an
election taking place in October. The executive
power is in the hands of a Federal Council of 7
members, elected by the Federal Assembly, pre-
sided over by the President of the Confederation.
The President has a salary of 20,000 francs; the
Vice-President and other members of the Federal
Council 18,000 francs each. The members of the
Federal Council are elected for three years; each
year the Federal Assembly elects from this council
the President and the Vice-President; they are
elected for one year, the five other members for
three years. Not more than one of the same
canton may be elected member of the Federal
Council.

Defence: Militia. Active Army, 12 yrs.; initial
trg., 65–90 days. Subsequently 11 days per ann.;
then Landwehr, 8 yrs.; 1 trg., 11 dys. for dismtd.

branches only; then (Landsturm to age 48). War Strength, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. No central organ. Military rare in Protestant cantons. (i.) *Primary*: Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary*: Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

SYRIA, see TURKEY.

TRIPOLI (Italian Colony).

This Vilayet of the Ottoman Empire, on the northern coast of Africa, was occupied by Italy in 1911–12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Sultan. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutasarrifliks of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 410,000 square miles, with a population of over 1,000,000. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle, and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The town of Benghazi has a population of about 21,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. Imports from U.K., 1916 £39,982
 Exports to U.K., 1916 280

CAPITAL, Tripoli. Population, about 50,000.

CABINET, 10 Nov., 1918.

Prime Minister, Tewfik Pasha.

Foreign Affairs, Naby Bey.

War, Abdullah Pasha.

	Area (sq. miles).	Estimated Population.
Turkey in Europe.....	12,000	2,755,000
Turkey in Asia:—		
Anatolia	193,800	9,175,000
Armenia and Kurdistan	72,600	2,500,000
Mesopotamia and Syria	244,460	4,650,000
Turkish Arabia	172,000	1,100,000
Total.....	694,860	20,180,000

In its earliest beginnings, the Ottoman Empire dates from the commencement of the thirteenth century, and in the fifteenth it reached its zenith. In 1717 Turkey lost Belgrade, and her power began to diminish. Her influence has since declined steadily until her influence as a nation has gone. Corrupt administration, accompanied by periodical massacres, has characterised her government, and her final and complete disappearance as a European power may be expected.

Until the disastrous war of 1912-3 with the States of the Balkan League (Bulgaria, Greece, Serbia, and Montenegro) the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria). Under the Treaty of London (30 May, 1913) the north-west portion of Turkey was a line drawn from Enos, in the *Ægean*, to Midia, in the Black Sea, thus excluding Adrianople, which had capitulated to the Bulgarians after a prolonged siege. During the second Balkan War (Bulgaria against the other members of the Balkan States) Turkey took advantage of the military difficulties of Bulgaria and re-occupied Adrianople, thus recovering a considerable portion of the vilayet of that name. In 1912-13 Turkey lost the remaining portion of her African possessions through the occupation by Italy of Tripoli and Cyrenaica, which were ceded under the Treaty of Ouchy (1912). Turkey joined forces with the Austro-Germans in November, 1914, attacked Russia and invaded Egyptian territory. On 30 October, 1918, an armistice, dictated by the Allies, was granted to Turkey, and hostilities ceased.

EUROPEAN TURKEY consists of the Vilayets, or Provinces, of Adrianople and Constantinople, with the Mutesarrifat of Chatalja, and is separated from Asia by the Bosphorus at Constantinople and by the Dardanelles (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the only political neighbour being Bulgaria, on the north-west. The principal towns of European Turkey are Constantinople, the capital, with a population of about 1,200,000, and Adrianople (100,000).

TURKEY IN ASIA comprises geographically Asia Minor, Syria (including Palestine), the greater part of Armenia and Kurdistan, Mesopotamia, and the western portion of Arabia, bordering on the Red Sea:—

Anatolia, which is practically identical with Asia Minor, consists of the Vilayets of Adana, Angora, Archipelago, Broussa, Castamuni, Konia, Sivas, Smyrna, and Trebizond, with the Mutesarrifat of Bagla (Dardanelles) and Ismid. Of the total population (9,175,000) about 5,000,000 belong to the Orthodox Greek Church, over 4,000,000 are Muhammadans, and the remainder

principally Jews. The Archipelago Vilayet of Anatolia formerly comprised a number of islands with a total area of close on 3,000 square miles, and other islands were under Turkish suzerainty. In 1911-12 Italy occupied Rhodes, with the neighbouring islands, while in 1912-13 almost all the remaining islands of the vilayet, and Crete and Samos, were obtained by Greece. Cyprus (see p. 582) has been administered by Great Britain since 1878, and was formally annexed to the British Empire in 1914.

Armenia (see also p. 637) comprises the vilayets of Bitlis, Erzeroum, and Mamuret el Aziz, and Kurdistan those of Diarbekir and Van. Of the population (2,500,000) about 650,000 are Armenian Christians (the massacres of 1915 have, however, resulted in their practical extermination), 250,000 other Christians, and 1,600,000 Muhammadans. Mesopotamia (the land of the Tigris and Euphrates) includes the vilayets of Bagdad, Basra, and Mosul, and part of the vilayet of Zor. A large part of the country is now in occupation by the British, who are developing its enormous potentialities as a granary.

The Bagdad Railway starts from the Anatolia system at Konia. The Taurus section has been practically finished by the piercing of a tunnel through the mountains. South of the city of Bagdad is Kerbela, the sacred centre of the Shiite Muhammadans. H.H. the Grand Sherif of Mecca, in June, 1916, proclaimed the independence of that province of Turkish rule.

Syria includes the vilayets of Aleppo, Beyrout, and Syria, and part of the vilayet of Zor, with the Mutesarrifliks of Jerusalem and Lebzon. The Biblical district of Palestine now forms the Mutesarrifliks of Jerusalem (El Kuds), Lebanon, Acre, and Nablus. The total area of this cradle of Christianity is about 11,000 square miles, its present population being about 700,000, of whom 150,000 are Jews, and the remaining principally Muhammadans. The foundation stone of a Hebrew University at Jerusalem was laid in 1918.

The principal towns of Asiatic Turkey are Smyrna (260,000), Bagdad (150,000), Damascus (150,000), Aleppo (125,000), Beyrout (120,000), Scutari in Anatolia (80,000), and Broussa (80,000).

Estimated Revenue (1912-1913) ... £128,665,992

Estimated Expenditure .. 34,553,000

Total pre-war debt £155,000,000

Loans by Central Powers 200,000,000

Additional war expenditure 100,000,000

Total £455,000,000

Paper currency ($\frac{1}{2}$ of face value)... 175,000,000

If Turkey therefore meets her obligations in respect of the new as well as the pre-war debt, the whole of the revenue of about £230,000,000 will be required.

Imports from U.K. 1916. 1917.
Exports to U.K. 857,216 444,317

A Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30° 35' S. and long. 53° 25'—57° 42' W., containing an area of 72,210 square miles, and a population on 1 Jan., 1918, of 1,407,247, of whom about 500 are British born. The Republic consists mainly of undulating grassy plains, there being no heights above 2,000 ft. The principal river is the Uruguay and its affluents, of which the Rio Negro is the chief. Wheat, barley, and maize are cultivated, but the export is at present prohibited. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (9,000,000 in 1908) and sheep (26,000,000 in 1908), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, and bloodstock. Since the war the trade has declined enormously. The imports from the U.K. are numerous, the principal being woollen and cotton goods, hardware, and coals. There are 1,639 miles of railway open (1918), all in British hands, and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 101,638,265 letters and packets.

Uruguay severed diplomatic relations with Germany on 5 Oct., 1917.

The most northerly Confederation of South America, situated approximately between 1° 40' N. lat. and 12° 26' N. lat. and 59° 52'—73° 15' W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1891 gave the population as 2,323,527; it was estimated to be 2,796,448 at 31 July, 1914. The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are coffee (£2,597,890 in 1915-16); cacao (£942,955 in 1915-16); balata gum, goatskins, asphalt, and hides. The U.S. is the principal customer.

The Year's Weather (British Isles), 1917-1918.

1 NOVEMBER, 1917, TO 31 OCTOBER, 1918./

(1917) November was warm, but windy and sunless: wet in the far north, dry in the south. The wind was westerly on nearly every day, and as a rule was light in force. The strongest gale came on the 24th-25th, when a gust velocity of 85 miles per hour (38 metres per second) was recorded at Southport. Temperature was above the average in all districts, by as much as 3·6° F. (2° Absolute) in the Midland counties. The highest of the maxima was 62° F. recorded at Torquay on the 21st, and at Scaleby (Cumberland) on the 28th. The lowest temperature was 22° F. at Dungavel, Co. Lanark, 800 ft. above sea, on the 26th. At many stations no frost was recorded. Rainfall was above the normal in Scotland and the north of Ireland, but below it elsewhere. In the west of Scotland the excess was very large, and the Rothsay amount was the largest reported in November during the last 100 years. At Kinlochquich, in the Western Highlands, 560 ft. above sea, the total for the month was 36 in. There was not much snow. Sunshine was deficient very generally. Ventnor reported the highest amount, an average of 2·6 hours per day. At Ilfracombe the average daily amount was only 35 minutes. Aurora was observed on the 18th and 13th, and solar haloes on four days.

December was cold but dry and sunny. There was but little south wind, and in the south-western counties there was a high proportion of east wind. The strongest gale was experienced on the 15th-16th, when at Scilly the wind exceeded gale force for 24 consecutive hours, and a gust velocity of 96 miles per hour (43 metres per second) was recorded. Temperature was below the average in all districts, by as much as 4·6° F. (2·6° Absolute) in England S.E. and S.W. The highest reading reported was 58° F. at Ruthin on the 6th, the lowest being 5° F. at Braemar on the 22nd. Rainfall was also below the normal in all districts. At Haverfordwest it was the driest December for at least 55 years. At Ilfracombe the total fall was only 0·5 inch, or one-ninth of the average amount. Sunshine was in excess, except in Scotland N. and in Ireland. The sunniest district was England S.W., and the sunniest station was Rousdon (Devon), with an average of 3½ hours per day. Fog was reported on 10 days in the Thames Valley. Aurora was

observed on five days, that on December 16th being exceptionally brilliant.

(1918) January was very cold and windy at first, but afterwards became quite spring-like. The winds at first were mainly from the east, north or north-west, but from about the 18th became southerly. There was a severe gale on the 16th, which did much damage in the south-eastern counties, but the highest gust velocity was on the 20th, 78 miles per hour (35 metres per second) at Plymouth. Temperature for the whole month did not differ greatly from the normal, except in Scotland N. and E., where it was nearly 3° F. below the average. The highest reading was 58° F., reported at several stations, and the lowest was -3° F. at West Linton (Peebles) on the 14th. Rainfall was less than the average, in Scotland N., England N.W., Ireland N., and the Channel Islands, but was above it in other parts. Some heavy falls were reported during the gale of the 16th, and in many places floods followed the thaw on the 18th. Sunshine was in excess, except in Scotland and Ireland. The sunniest district was the English Channel, and the sunniest station was St. Aubins, with a daily average of 3½ hours. Solar haloes were seen on six days, the Zodiacal Light on four days, and Aurora on two days. Thick fog was reported during the last week.

February was very mild, with little snow and frost, but with much rain in the north and west. Winds were generally from between south and west. The most serious disturbance of the month came about the 28th, when in the north there were heavy gales, with much snow and much damage. The highest gust velocity in this gale was 76 miles per hour (34 metres per second) at Southport. Temperature was above the normal in all districts, the excesses ranging up to 4·5° F. The highest reading was 61° F. at Halstead (Essex) on the 23rd, and the lowest 15° F. at Wokingham on the 18th. Rainfall was in excess in Scotland and Ireland and the N.W. of England, but was in defect elsewhere. Represented in percentages of the average fall, the total in Scotland N., was 163, while in the English Channel it was only 54. Very heavy falls were registered at individual stations. Sunshine was below the average very generally,

the deficiency exceeding one hour per day in England S.W. London, however, reported an excess approaching an hour a day, and several places on the south and east coasts also reported amounts above the normal. Fog was not very prevalent. Thunderstorms occurred on the 8th and 9th. Aurora was observed on five days.

March was warm and dry, with strong winds at the beginning and close of the month. A gale on the 1st and 2nd did much damage on the south-east coast, but the highest gust velocity was reported at Falmouth on the 31st, when 72 miles per hour (32 metres per second) was reached. Temperature was above the average in all districts. The highest reading observed was 72° F. at Gledeston, Bennington and Shrewsbury on the 23rd, and at Hodsock on the 24th; the lowest reading was 4° F. at Braemar on the 2nd. Rainfall was below the normal in all districts. In many places only half the usual amount was observed, and at some only one-third. At Aylesbury there was no rain measured for 22 days, 4th-26th. Sunshine was deficient in Scotland, the N.E. of England, and the Midland counties, but was in excess in other districts. Midhurst and Portsmouth were the sunniest stations, with a daily average of 5½ hours. Aurora was observed on five days. The Zodiacal Light was seen on six days.

April was cold, with many dull days; wet in the south-east and east of England, but very dry in the northern districts. Winds were generally from between north and east. Gales were rare, and the highest gust velocity was only 54 miles per hour (24 metres per second), which was recorded at Valencia on the 3rd. Temperature was below the average in all districts, the greatest deficiency being 2.1° F. in England E. The weather became spring-like during the last week of the month, and the highest reading at nearly every station was reported during this period. Maxima above 70° F. were rare, the highest reading being 75° F. at Killarney on the 26th. Frost was experienced in all districts, except the English Channel, the lowest of the minima being 20° F. on the 15th. Rainfall was in excess in the Midlands and in England E. and S.E., but in defect elsewhere. At Glasgow it was the driest April since 1873. On the other hand, at many places on the east and south-east of England the rainfall was double the usual amount. The sunniest district was Scotland W., with a daily average of 6½ hours. The sunniest station was Douglas, with a daily average of 7¼ hours. Aurora was observed on seven days.

May was cold at first, then very warm. Winds were light generally, very few gales were reported, and the highest gust velocity recorded was 63 miles per hour (28 metres per second), at South Farnborough, on the 23rd. Temperature for the month was above the normal in all districts, and in several places the month was noted as the warmest May for many years. The highest readings were 88° F. at Camden Square (in a "Glaisher" screen) on the 21st, and 86° F. at Reading on the 22nd. Frost was experienced in all the northern districts, the lowest reading being 25° F., in Scotland, on the 1st. Rainfall was irregular, being greatly affected by thunderstorm falls. Thus England N.E., with 11 rainy days, had 0.4 in. above average, while England S.W., with the same number of rain-days, had 0.6 in. less than average. There were numerous falls of 1.0 in. and upwards in 24 hours, the

highest daily amount being 2.9 ins. at Fulbeck, on the 17th. Sunshine also was irregular. The sunniest district was the English Channel, with a daily average of 8¼ hours. The sunniest station was Bournemouth, with 9½ hours. Thunderstorms with heavy hail were reported, those on the 17th and 23rd being widespread. Aurora was seen on three days.

June was dry and sunny, but with cold nights, and the month proved unfavourable for agriculture. Winds were mainly between north and west. There were not many gales, but that on the 9th was severe, and caused much damage to trees and crops. Temperature on the whole was below the normal, but not to any great extent, the deficiency not exceeding 1.2° F. in any district. The highest reading reported was 84° F. at Kensington Palace and at Killarney on the 1st and 2nd, while the lowest was 27° F. in Scotland on the 13th and 25th. Rainfall was below the average except in Scotland N., where it was slightly above. In England N.E. the total collected was less than one-third of the usual amount. At Spurn Head the total, on three days, was only 0.16 inch compared with an average of 1.54 ins. Sunshine was in defect in Scotland N., but in excess elsewhere. The excess averaged as much as 1¼ hours in England S.W. At Salcombe the daily average was almost 10 hours, while in Guernsey it slightly exceeded that amount.

July was a sunny month, but with excessive rainfall; very warm during the first week and at the end, but cool during the middle weeks. Gales were rare, and the highest gust velocity recorded was only 54 miles per hour (24 metres per second) at Shoeburyness on the 11th. For the month as a whole temperature was almost normal, the greatest variation being an excess of 0.7° F. in the Midland counties. The highest of the maxima were 83° F. at Weymouth on the 1st (84° F. at Camden Square, in a "Glaisher" screen, on the same day), and 82° F. at several stations on the 31st. The lowest reading reported was 28° F. at West Linton (770 feet above sea) on the 10th, and only once during the last 60 years has so low a temperature been recorded in Scotland in July. Rainfall was much in excess, and in England S.E. it was more than double the average. At Greenwich the total collected was 7.4 inches, which is more than three times the normal fall, and is the highest July amount since 1815. Much of the rain fell in thunderstorms, and thus, in spite of its unusual wetness, the month was bright. Sunshine was in excess in all districts except England S.E., where it was slightly in defect. In Ireland S. the average daily duration was 1h. 48 mins. in excess of the normal. In Guernsey the daily average duration exceeded 9½ hours.

August was warm and dry, with, on the whole, deficient sunshine. The winds were mainly westerly, and gales were rare. The highest gust velocity reported was 60 miles per hour (27 metres per second), at Aberdeen on the 23rd. Temperature was above the average in all districts, the excess varying from 0.5° F. to 2.1° F. The highest reading recorded was 93° F. at Canterbury on the 22nd, when also 92° F. was observed at Cambridge. These high temperatures were associated with the southerly wind in front of a depression, while the subsequent rapid fall occurred with the northerly wind in the rear of it. The lowest reading was 35° F. at Garforth, near Leeds, on the 24th. At Cambridge the

variation in temperature from the 22nd to the 25th was 48° F. Rainfall was below the average in all parts except Scotland N., where it was 35 per cent. in excess. In the extreme north the month, following a July which was the wettest on record, appears to have been the wettest August since 1889. Sunshine was above the average in England N.E. and E., but below it elsewhere. In Ireland S. the daily mean was only 3¼ hours, or 1¼ hours below the normal. At Valencia the daily amount was 3¼ hours, while at Shoburness, in almost the same latitude, it was nearly 7½ hours. Aurora was seen on the 15th and 31st.

September was very wet and cold, and proved disastrous to agriculturists. The winds were mainly from south-west and west, and while there was much strong wind, there were no very violent gales. The highest gust velocity was 69 miles per hour (31 metres per second) at Quilty (Ireland) on the 23rd. Temperature was everywhere below the average, and in Scotland the month was the coldest September for the past 60 years. The highest reading reported was 75° F. at Manchester on the 7th. In Scotland N. and in Ireland N. the temperature did not rise above 65° F. The lowest reading was 23° F. at Braemar on the 15th. A notable feature of the month was the low temperature on the 29th, when, at many stations, the maximum was under 45° F. Rainfall was much above the average in all districts, and in many places the month proved to be the wettest September on record. At Meltham (Yorks) the total fall was more than four times the normal. The number of wet days was also in excess, and at many stations rain was measured on every day of the month. Sunshine varied a good deal, the daily mean ranging from +0.34 hr. in Scotland E. to -0.68 hr. in England S.W. The sunniest station was Ryde, with a daily average of 6½ hours. Thunderstorms were frequent, and were often accompanied by hail. At Salisbury, on the 4th, the hailstones were as large as marbles, and stripped foliage from trees. Aurora was observed on 8 days.

October was dull and damp, with much fog and mist. Winds were mainly from between south and west. There were severe gales during the first ten days, the most widespread of which was on the 6th-7th, when the highest gust velocities of the month were recorded—87 miles per hour (39 metres per second) at Quilty, and 76 miles per hour (34 metres per second) at Aberdeen and Edinburgh. Temperature on the whole was about normal. The highest reading reported was 66° F. at Killarney on the 9th, and at several English stations on the 10th. The lowest reading was 21° F. at Logie Coldstone (Co. Aberdeen) on the 26th. Rainfall was in excess in Scotland N. and W., and in Ireland, but was in defect elsewhere. In the Midlands, England S.E. and England S.W. the total was but little more than half the usual amount. Falls exceeding 1 inch in 24 hours were registered at Beddeleget on 6 days, the maximum being 3¼ ins. on the 9th. Sunshine was less than the average in all districts, the deficiency ranging up to an hour a day in England, E. The sunniest station was Penzance, with an average daily duration of 4 hours. Thunderstorms with hail were experienced at many stations about the 7th. Aurora was observed on the 6th and 8th, that on the 8th being the more brilliant and widely observed.

THE YEAR'S WEATHER AND THE CROPS.

1 NOV., 1917, TO 31 OCT., 1918.

(1917) November proved a good month for field work except in Wales and the north-west, where much of the land was too wet to be worked. At the end of the month about 70 per cent. of the land intended for wheat had been sown and, speaking generally, under favourable conditions. Where the plant was up it everywhere looked healthy and promising. The potato crop had been harvested, except in some western districts, and was for the most part in good condition. The total yield was about one-third more than in 1916, and was the largest for more than 30 years. The yield per acre, 6.57 tons, was very good. Turnips and swedes were below average, but mangolds were considerably above. Live stock had done well owing to the mild weather, and stocks of winter food promised to be sufficient.

December on the whole proved a favourable month for agriculturists, being generally dry with light frosts until towards the latter half of the month, when frost and snow caused delays, especially in the south-east. Good progress was accordingly made everywhere, and at the close of the month work was fully as forward as usual. Nearly 80 per cent. of the wheat had been got in, and the young crops looked promising except that some of that sown late had been checked by the frosts. Seeds generally were strong and healthy. Swedes were of good quality nearly everywhere, but turnips varied and in parts were poor. Flocks were doing well, and lambing prospects were satisfactory. Other live stock were healthy.

(1918) In January the hard frosts and snow stopped field work during the first half of the month, but did little harm to the crops. Towards the end of the month good progress was made, and at the close of the period cultivation was well forward for the time of year. Wheat everywhere was looking well, especially the early sown, but the later wheat was backward. Oats were satisfactory, and so also were beans except in some eastern districts, where the plant was backward and thin. Flocks were doing well, and the fall of lambs in Dorset and neighbouring counties was up to average and without many losses. Live stock was generally healthy.

February weather was mild and open and proved very favourable for field work, though with rather too much rain in some northern districts. Ploughing and sowing made rapid progress during the month, and much spring wheat was got in under favourable conditions. At the close of the month spring work was well forward; autumn sown wheat was everywhere looking well, winter oats were promising, and beans, though thin in places, were satisfactory in most districts. Seeds were a good plant and growing well in all parts except the north-eastern side of the country. Flocks were doing well and lambing prospects were everywhere satisfactory. Other live stock were generally healthy and in fair condition, except that fattening cattle were making slow progress owing to the shortage of artificial feeding stuffs.

March was everywhere most favourable for farming operations, and cultivation of the land for the spring crops proceeded without interruption, the land working well. By the end of the month much of the spring corn had been sown under favourable conditions, and the

wheat, generally speaking, was very satisfactory. In the potato districts of the Fens and Lancashire the planting of this crop was in full swing. Elsewhere some early potatoes had been got in, but only a beginning had been made with the main crop. Seeds gave promise of a good crop except in the east and north-east. Lambing was general all over the country, and the fall of lambs was satisfactory and with little mortality either among ewes or lambs. Work generally was very well forward for the time of year.

April was a cold month and growth was slow. Bad weather in the middle of the month interrupted work in many parts, yet on the whole much work was done, and by the end of the month the spring sowing of corn was practically complete, the autumn wheat was looking well, and winter oats and beans were satisfactory. Potato planting had been nearly completed in the Fen districts, but elsewhere a large area remained to be sown. In the south-western counties some damage was done to the early potatoes by frost. Pastures were bare owing to the cold weather, and all the crops were wanting warm weather. In some districts rain was also required. Except in the latest districts lambing was practically over, with results up to or above average. Live stock generally was healthy but in poor condition.

May weather was generally very favourable for agriculture, the rains and increased warmth bringing the crops on well. In some few areas the month was too dry, and at the end of the month rain was wanted in most parts for the corn. As a rule the corn crops were looking well, but on newly-ploughed grass land a good deal of damage had been done by wireworm. Beans and peas were good, potatoes promised well, mangold sowing had been completed and the crop was coming up well, though a good deal of trouble had been caused by insect pests. Hops had developed well, but aphids was prevalent. Orchard fruit was very poor, particularly plums, but bush fruit was better, and strawberries about the average. The hay prospects were good, although the area under hay was about 10 per cent. less than in 1917. With the warmer weather and consequent growth of grass live stock had made good progress.

June was cold and dry very generally, and the lack of moisture checked growth, particularly on light soils. At the end of the month potatoes, though somewhat backward, were strong and healthy. Roots had suffered from the dry weather and attacks of "fly." Much hay had been secured in good condition. Stock was doing well, but pastures were now getting bare. Orchard fruit had done badly, and the yield of small fruits was below average. Expressing an average crop by 100, the prospects at the end of June were, wheat 103; barley 98; oats 95; beans 101; peas 99; potatoes 100; mangolds 93; seeds hay 99; meadow hay 97, and hops 70.

July was a favourable month, and the prospect for most of the crops improved. The rains that came about the middle of the month proved most beneficial, and though in cases the heavier crops were laid by the violent storms, the damage done was slight compared with the general improvement observed. At the end of the month potatoes were uniformly vigorous and promising; turnips and swedes had suffered a good deal and had to be re-sown in many cases. Mangolds

on the whole had improved. The later cut hay had suffered from the rain, especially in the north. Stock was healthy, and pastures had become fairly full of grass again. Compared with the prospects at the end of June, wheat had improved by 1 per cent., oats, potatoes and mangolds by 2 per cent., while beans and peas had gone back by 1 per cent., and meadow hay by 2 per cent.

August weather was very favourable for harvest operations, and much corn was got in under excellent conditions. The rains which occurred, mostly towards the end of the month, caused little delay or damage. Wheat proved to be the best crop of the year throughout the country, with a yield estimated at 5 per cent. above the average. At the end of the month potatoes were very satisfactory and, upon the whole, unusually free from disease. Turnips and swedes had improved somewhat, but had not recovered from the dry weather of the early summer, and promised only a poor yield. Hops showed some improvement owing to persistent washings. Orchard fruit was extremely scarce. The rains had benefited the pastures, and at the end of the month there was a sufficiency of grass. Live stock was generally in satisfactory condition.

September was very wet, and work in the fields was greatly hindered. Corn which had been cut in the first week was, in many cases, still in the fields as the month closed, and had sprouted a good deal, most damage being done in the north and west. Corn harvested during September was generally not in good condition. At the end of the month potatoes still promised to be about 3 per cent. above the average, but only a small proportion of the main crop had been lifted. Roots had benefited by the rain and the prospects for turnips and swedes had somewhat improved; the roots, however, were still of small size, and fields were often patchy. Autumn cultivation was upon the whole backward for the time of year. Seeds were fairly satisfactory. Pastures were full, but the grass was of poor feeding quality owing to the excessive wet. Live stock had done only moderately well during the past month.

October was wet at first, and work was hindered a good deal, but during the latter part of the month good progress was made, and at the end of the month most of the corn had been secured throughout the country. The late corn, especially barley and oats, had suffered a good deal from rain, and much of it had sprouted. Most of the wheat had been got in earlier in satisfactory condition. Towards the end of the month good progress was made with potato lifting, and while more disease was met with in the south than had been anticipated, the quality of this crop generally was satisfactory. Mangold pulling had started in some areas, but in others it was only just commencing; the quality of the roots was good generally. The sowing of wheat and other winter crops was well in hand by the end of the month, and in some counties the plant was showing above ground. Seeds were variable, but on the whole were satisfactory; in the west and north damage had been done by the stocks standing too long in the field. Live stock had done only fairly well, and the grass in the pastures, though generally plentiful, was of poor quality.

(1917) November.—1. Floods still serious in Victoria and New South Wales. 20. Destructive floods in Siam. 21. Heavy rains and floods in Natal, much damage done to sugar crop. 25. Storm at Hamburg, water rose over 14 feet, much damage to shipping.

December.—4. Storm in North Sea, dyke broken at Elburg (Gelderland), railway flooded. 9. Severe weather in Greece, ground in Athens covered with snow for the first time for many years. 16. Very heavy rains in Central and Southern Queensland. 17. Blizzard on southern and south-western coasts of England, Newquay life-boat wrecked and crew saved by being hauled up the cliffs by ropes.

(1918) January.—3. Violent storm in Norway, 30 vessels destroyed at Bodo. Devastating grass fires in New South Wales, fires visible for 70 miles. 5. Heavy floods in Bangkok, water up to the roofs of houses, great damage to crops. 14. Many grass fires in Victoria and New South Wales caused by lightning. 20. Cyclone, followed by a tidal wave, in Mackay district, North Queensland, causing great damage. 24. Floods in Northern Queensland, country under water for miles. 28. Floods in the United States, causing much damage, half the tonnage of the Ohio and Mississippi rivers lost.

February.—16. Terrific rains in South Africa, 14 inches collected in 12 hours in Johannesburg; great floods in Zululand and Natal; at Umfolosi "the water came down like a wall 75 feet high," carrying away railway bridge and causing many deaths. Half the town of Ladysmith was under water from 2 feet to 5 feet deep. 27. Flood in River Don, East Toronto, train passengers forced to take refuge on the roofs of the coaches.

March.—20. Cyclone in Northern Queensland, towns of Badinda and Innesfall destroyed with

loss of life, damage to sugar crop estimated at £400,000. 23. Cyclone with very heavy rain in Victoria, 16 inches of rain fell in 24 hours at Cardwell.

May.—14. Drought in Australia. 16. Violent hailstorms in Brandenburg, causing great damage to crops, large areas of land under water.

June.—10. Northern Tasmania swept by a most violent storm. 22. Snow in Buenos Aires for the first time on record. 25. While a great part of New South Wales was suffering from a dry winter, a considerable extent of Victoria was practically under water. 27. Frost and snow all over Germany, causing havoc among the fruit trees, the cold wave being regarded as an "economic catastrophe." 30. Many fresh fires in Alberta and British Columbia owing to the dry weather.

July.—6. Typhoon at Guam Island, Mariana Archipelago, half the inhabitants rendered destitute. Serious floods in Austria and South Germany, the Danube at Vienna reached the highest level recorded for 30 years, great damage to crops and houses. 25. Weather in Melbourne colder than had been recorded since 1903, water freezing in the taps. 27. Drought in New South Wales, 2,000,000 sheep and lambs estimated to have been lost owing to the dry weather.

August.—1. Storm in Styria, doing great damage to crops and buildings. 20. Floods in China, 5,000 persons rendered homeless on Canton River, 250,000 persons without proper food. 21. Tornado at Tyler, Minneapolis, causing many deaths, railway train blown off the rails.

September.—5. Great devastation caused in Livonia by waterspout, which completely laid waste a district six miles in length and some 300 yards in width.

The Weather.

THE question is often put by friends who may suppose us to be more weather-wise than themselves: "Is it going to rain?" &c.—a question which cannot always be answered positively, yes or no, yet which any fairly observant person may answer for himself by paying attention to certain premonitory signs which may be observed.

For instance, beasts and birds, being generally more sensitive to climatic changes than are human beings, afford rough indications of coming bad weather. Sea birds, as stormy weather comes on, fly inland in search of food; wild-fowl leave the marshy ground for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees, and in hill countries come down to the plains at the approach of bad weather.

The indications of the barometer, taken in conjunction with those of the thermometer, help us much in prognosticating changes in the weather. The former is not, as some folks imagine, simply a weather indicator, though it serves this purpose inferentially. From the indications of these instruments we learn generally that:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been about its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly

wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer below its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A rapid and considerable fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

The state of the atmosphere also affords pretty accurate indications of the kind of weather that may be expected in the near future.

(1 Nov. 1917 to 31 Oct. 1918.)

THE administrative changes which were in progress when last year's ALMANACK went to press were practically concluded by the announcement on Dec. 26, 1917, that Vice-Admiral Sir Rosslyn Wemyss had been appointed to succeed Sir John Jellicoe as First Sea Lord and Chief of the Staff. Sir Rosslyn Wemyss had been appointed nominally Second Sea Lord in August, though his actual position in the Admiralty was that of Deputy First Sea Lord. He had done excellent work during the naval operations connected with the Gallipoli campaign, but was otherwise unknown to the public—as, indeed, most naval and military officers are until they are called upon to fill positions of high importance. In recognition of his distinguished services, Sir John Jellicoe was raised to the peerage, under the title of Viscount Jellicoe of Scapa. Shortly after—Jan. 14, 1918—there was issued a detailed official memorandum describing the organisation of the Naval Staff and the functions of its various members. The First Sea Lord and Chief of the Staff took responsibility for “naval policy and general direction of operations”; the Deputy Chief of Staff (Rear-Admiral S. R. Fremantle) for war operations in Home waters; the Assistant Chief of the Staff (Vice-Admiral Sir A. L. Duff) for trade protection and anti-submarine operations; and the Deputy First Sea Lord (Rear-Admiral G. P. W. Hope) for general policy questions and operations outside Home waters. These four officers, together with the First Lord, comprised the Operations Committee of the Board of Admiralty. Each of them had a section of the Staff placed under his immediate supervision, the arrangement being shown below, and the names of the divisional Directors being given in each case:—

Under the Chief of the Staff: Intelligence Division (Rear-Admiral Sir W. R. Hall); Training Division (Rear-Admiral J. C. Ley, succeeded by Capt. H. W. Richmond).

Under the Deputy Chief of the Staff: Operations (Home waters) Division (Capt. A. D. P. R. Pound); Plans Division (Capt. C. T. M. Fuller); Air Division (Wing-Capt. F. R. Scarlett); Signal Division (Act. Capt. R. L. Nicholson).

Under the Assistant Chief of the Staff: Anti-Submarine Division (Capt. W. W. Fisher); Minesweeping Division (Capt. L. G. Preston); Mercantile Movements Division (Capt. F. A. Whitehead); Trade Division (Capt. A. G. Hotham).

Under the Deputy First Sea Lord: Operations (Foreign) Division (Capt. C. P. R. Coode).

The above may be described as a summary of the first fully organised Naval Staff ever possessed by this country. It will be observed that all save two of the Directors of Divisions were below flag rank, and that one of the two rear-admirals has since been replaced by a captain. No other changes of importance have occurred except in the departments responsible for shipbuilding, and these will be more appropriately dealt with in the section relating to the submarine war. On Dec. 15, 1917, however, it was announced that, as a result of a conference held in Paris, it had been decided to form an Allied Naval Council “in order to ensure the closest touch and complete co-operation between the Allied Fleets.” Great Britain, France, Italy, the United States, and Japan were represented, and the following explanatory note was issued:

“The task of the Council will be to watch over the general conduct of the naval war, and to ensure the co-ordination of effort at sea as well as the development of all scientific operations connected with the conduct of the war. The Council will make all the necessary recommendations to enable the Government [sic] to make decisions. It will keep itself informed as to the execution of plans decided upon. The members of the Council will report to their respective Governments as may be necessary. The individual responsibility of the Chiefs of Staffs and of the Commander-in-Chief [sic] at sea towards their Governments as regards operations in hand, as well as the strategic and tactical disposition of the forces placed under their command, remains unchanged.” No explanation was forthcoming as to which Government was to be entrusted with the making of decisions, and although several meetings of the Council were reported during 1918, nothing transpired as to what occurred at them, with the exception of one in Rome, early in the year, which led to the unification of the anti-submarine command in the Mediterranean.

On the other side of the North Sea a series of important changes in administrative and executive appointments occurred in the summer of 1918, making a curious parallel with those which took place in the British Navy at the end of 1916. Then, the Commander-in-Chief of the Grand Fleet (Jellicoe) went to the Admiralty as First Sea Lord, and later, Chief of Staff, replacing Sir H. B. Jackson, whilst Beatty moved up from the Battle Cruiser Force to the command of the entire fleet. On Aug. 3, 1918, it was announced that Adm. von Holtzendorff had resigned the post of Chief of Staff owing to ill-health; and in due course Adm. von Scheer, Commander-in-Chief of the High Sea Fleet, was appointed to succeed him, while Vice-Adm. von Hipper was raised from the command of the battle-cruisers to the principal appointment afloat. While these changes were in progress it was announced that Adm. von Capelle, who had succeeded von Tirpitz in March, 1916, as Secretary of the Navy, had been succeeded by Vice-Adm. Behncke. Later reports gave the name of the new holder of this office as Edler von Mann, Vice-Adm., formerly head of the Submarine Section of the Navy Office. It was further announced that by an order of the Kaiser greater rights than formerly were to be granted to the General Staff of the Navy, “with a view to naval warfare,” and that a special department for naval warfare was to be established at Main Headquarters. The functions of this department have not been further explained, but they would appear to be analogous to those of the British Plans and/or Operations Divisions. The general impression was that these changes were the outcome of an intense dissatisfaction with the work of the fleet, but this view is hardly borne out by what actually took place. Allowing that von Holtzendorff may have resigned owing to ill-health, it will be found that von Scheer was promoted to a post of greater all-round importance (whose importance, too, was enhanced on his taking it over); that von Hipper was given a very distinct “rise” afloat; and that von Mann’s elevation to the post of Secretary could not, at any rate, be regarded as a punishment for what he had achieved

as head of the Submarine Department. Finally, the officer selected to take charge of the new naval warfare department at headquarters was Captain von Lewetzow, "hitherto the chief of Germany's light naval forces." With high preference thus accorded to the executive chiefs of the battle fleet, the battle-cruisers and the light cruisers, and to the administrative chief of the Submarine Department, it cannot really be said that the evidence gives any support to the theory of intense dissatisfaction with the previous work of the fleet. Down to the time of going to press the changes had produced no apparent alteration in policy.

During the period now under review the influence of sea-power has been displayed in a manner probably more dramatic and decisive than in any other period of the world's history. It is a mere truism to say that the command of the sea has from the beginning been the keystone of the alliance against Germany, and that without it the war could never have been waged, to say nothing of its being carried to success. It is in the last twelve months, however, that the peculiar endowments of sea-power have been most strikingly brought home to the world. The magnificent work of the American armies in France, without which complete victory might have been indefinitely postponed, was rendered possible only by the inflexible grip of the Allied Fleets—principally, of course, the British—upon the four thousand miles of the Atlantic crossing. The Salonika expedition, which was suddenly galvanised into life in the middle of September, and within a fortnight had driven Bulgaria out of the war, was essentially a product of sea-power, more especially in relation to the Serbian section of the victorious army; for the shattered remnants of that heroic force, driven down to their own coasts, had been rescued in their entirety by French, Italian and British ships at the end of 1916, and within a few months had been thoroughly rested and re-established as an organised army, and transported to the base of operations in Macedonia. Every man and every ton of material employed in this expedition had to be transported through the Mediterranean at a time when those waters were much more dangerous than any others from the point of view of submarine attack, yet the whole movement was prepared with the very minimum of loss at sea. The place of sea-power in these operations is particularly significant in view of an important article which had appeared in the "Berliner Tageblatt," almost exactly three years before the surrender of Bulgaria. It was there claimed, with support from the military position as it then existed, that "Moltkeism," or land-power, had at last obtained the permanent upper hand over "Mahanism," or sea-power. The greatest monument to Moltkeism was to have been the long dreamed of Germanic highway from the Baltic to Bagdad—a dream which sea-power shattered at a single blow by means of the Salonika expedition, which cut a vast and irreplaceable link out of the Berlin-Bagdad chain. Following directly upon the Bulgarian debacle came the appeal by Austria for a separate peace, while the position of Turkey, driven completely out of Syria, grows daily more impossible. Such has been the decisive effect of sea-power in the Near East.

Although the influence of naval power during the past year has been so strongly marked, there

has been no sea fighting on a big scale, though the work of small craft and the raiding of harbours has been very effective, especially in the Mediterranean and, of course, at Ostend and Zeebrugge. The most essential part of the active naval work of the year has been concerned with one phase or another of the submarine campaign, which must therefore necessarily occupy the bulk of our attentions. It is not possible to treat the subject in narrative form, because the number of actual occurrences relating to it which have been published is very small, and are of the same general type, the usual policy of the Admiralty being to make the details public only when these have been of such a character as to throw additional light upon the brutal and depraved methods under which the U-boat campaign has been carried on.

It will be recalled that in Feb., 1917, there had nominally come into operation an "unrestricted" campaign directed by the enemy against all shipping, belligerent or neutral, found within a vast range of seas round the British Isles and the approaches to the Allied ports. The actual date mentioned by the German Government in this connexion was entirely fictitious, for the increased violence and indiscrimination of the U-boats' attacks had become apparent some time before. In the third quarter of 1915 the total losses of the world's merchant tonnage amounted to 529,481 tons gross, and in the corresponding quarter of the following year they rose to no more than 592,039 tons. In the last quarter of 1916, however, they went up with a leap to 1,159,343 tons, and in the first quarter of 1917 to 1,619,373 tons. That is to say, they had already doubled in six months; but in the first quarter which followed the nominal opening of the new campaign—that is, the three months April-June, 1917—the enormous total destruction of 2,236,934 tons was recorded. It should, perhaps, be observed at this point that although these figures relate to 1916-17 they have not previously appeared in the ALMANACK, as it was not until the spring of 1918 that the Government consented to state losses in the form of tonnage, instead of, as formerly, by the bare number of ships destroyed. It should further be stated that these and all other figures that may be given will, unless otherwise stated, include losses by "marine risk." The precise scope of this term is necessarily vague in war time, when a large proportion of coast lights and other aids to navigation are removed, and when merchantmen are compelled to sail in convoys, generally without lights, and with other conditions not making for navigational safety.

It was in April, 1917, that the United States declared war upon Germany, and in the very next quarter the record of tonnage destruction showed a remarkable decline, the world's loss for July-September, 1917, being only 1,494,473 tons as compared with 2,236,934 in the previous three months—a drop of 742,461 tons, or slightly over one-third. The temptation was irresistible, especially on the western side of the Atlantic, to ascribe this striking fall to the early participation of the United States naval forces; but although the first contingent of these—destroyers—had arrived in European waters in May (and, doubtless, had immediately begun to make their presence felt), their number was altogether too small to make any appreciable difference to the

progress of the campaign. Indeed, although the American forces in Europe were steadily and rapidly increased, official figures published in the United States in September, 1918—after America had been at war for seventeen months—showed the following remarkable results:—In British waters and the Eastern Atlantic generally, 14 per cent. of the Allied destroyers were American, and 3 per cent. of the auxiliary patrol craft. The corresponding British figures were respectively 80 and 86 per cent. In the Mediterranean 2 per cent. of the destroyers and 8 per cent. of the patrol craft were American, while 27 and 23 per cent. respectively were British.

It is fairly evident from these figures that no profound influence could have been exerted on the activities of the U-boats by the American forces that came across in the spring and early summer of 1917. Nor was the explanation to be found in the rapid destruction of the hostile submarines, though this was a factor which began to tell towards the end of the year. The immediate cause of the decline was the adoption in June, 1917, of a purely defensive measure, namely, the convoy system. Under this system, and as far as the available material would permit, arrangements were made to provide armed escorts for all important cargo and passenger ships passing through the danger zone; and although there was inevitably some loss in carrying power owing to the time occupied in collecting convoys (a ship completing for sea having to wait until the convoy to which she was assigned was ready), and also because of the fact that when ships are steaming together the speed of the whole must be the speed of the slowest, the net result was enormously advantageous to the general safety of shipping. Taking for the purposes of comparison only British steamships of over 500 tons gross, sailing to and from the United Kingdom in the main overseas trades, the period from April to June, 1917, before the convoy system was established, saw 541 per cent. of them sunk by enemy action. For August of the same year, when the system was getting into its stride, the losses were nearly 4 per cent.; but from September to November, when 912 per cent. of the ships were convoyed, the sinkings had already dropped to 211 per cent. of the total sailings. Since then the position has still further improved, though absolutely up-to-date figures are not available. For the period March–June, 1918, the losses on the main overseas routes fell to 123 per cent., 938 of the ships being convoyed. An official statement issued in August, 1918, showed that in all trades convoys had been furnished for 61,691 sailings, and that only 373 of the vessels had been lost, showing a proportion of losses to sailings in convoy of 61 per cent.

Under the beneficent influence of this system, the world losses of shipping declined in the last quarter of 1917 to 1,272,843 tons. It will be appropriate here to give a summary of the cumulative effect of the war upon the world's shipping (excluding enemy countries) down to the beginning of 1918. The losses sustained, from all causes, by the British mercantile marine subsequent to the outbreak of war were as follows, the figures in all cases showing gross tons: 1914, 468,728; 1915, 1,103,379; 1916, 1,497,848; 1917, 4,009,537. The corresponding figures for new construction were: 1914 (August onwards),

675,610 tons; 1915, 650,919; 1916, 541,551; 1917, 1,163,474. In the aggregate, therefore, 7,079,492 tons had been lost, and only 3,031,555 tons built, not only in replacement, but to meet the tremendously enhanced demands upon ocean transport. Our net loss in a little over three years of war thus amounted to 4,047,937 tons; but as a total of 780,000 tons of enemy shipping had been seized or captured, the deficit was reduced to 3,267,937. As will be seen later, this deficit has been considerably increased during 1918.

In the case of foreign (i.e., Allied and neutral) tonnage, the loss in successive periods has been as follows:—1914 (August onwards), 212,635 tons; 1915, 621,341; 1916, 1,300,019; 1917, 2,614,086. (It may be observed that the loss of both British and foreign shipping was practically quadrupled as between 1915 and 1917.) Foreign construction, however, took a course very different from British. For the war months of 1914 the Allied and neutral output was 337,310 tons; 1915, 551,081; 1916, 1,146,448; 1917, 1,539,881. Down to the end of 1917, therefore, Allied and neutral countries had lost in the war a total of 4,478,080 tons, while they had gained 3,574,720 by new construction; and as no less than 1,809,000 tons of enemy shipping had been captured or seized, mainly by the United States, the position at the beginning of 1918 was, therefore, that the merchant navies of these other Powers were actually 635,640 tons stronger than when the war began. They have further improved their position by a greater total than this during 1918.

The periodical destruction of shipping is still the only means available for tracing the progress of the submarine campaign. For various reasons it is not entirely satisfactory, but the objections are in the main ruled out if the temptation is resisted to compare very short periods—e.g., one month with another. Luck, the weather, or other uncontrollable circumstance, may easily affect very appreciably the figures for a single month, or even the sinking of a single large ship may do so, while it is possible that the enemy may occasionally send his submarines to sea in flotillas far more numerous than those which are normally at work at the same time. Having drawn attention to these considerations (some of many), the following table is given to show the losses recorded month by month during the past year:—

	British.	Allied and Neutral.	Total.
1917.			
October.....	289,973	197,364	487,337
November	196,360	136,883	333,443
December	266,356	155,707	422,063
1918.			
January	218,621	138,887	357,508
February	254,303	173,646	427,949
March	224,666	176,797	401,463
April	233,169	85,412	318,581
May	231,787	133,203	364,990
June	165,550	114,249	279,799
July	182,524	124,250	306,774
August	176,434	151,738	328,172
September	151,593	88,007	239,600

Generally speaking, the movement, although slow, has been in the right direction. Between the first and the last quarters represented in the above table, the loss of British shipping fell from 782,889 to 510,551 tons, or 34.8 per cent., while the aggregate losses for the world similarly fell from 1,272,843 to 892,546 tons, or 29.9 per

cent. It is a notable fact that, whereas in 1915 the proportion of British shipping sunk was 640 tons out of every thousand, the ratio fell in 1916 to 535 tons; but in 1917, when the enemy's submarines are popularly supposed to have made a special set against neutral shipping, the British proportion rose again to 605 tons out of every thousand, while for the first nine months of 1918 its share was 612 per thousand. These facts are of particular interest in view of the persistent propaganda efforts on the part of Germany to induce the world to believe that Great Britain, while affording every possible protection to her own shipping, is indifferent to the loss of that belonging to other Powers, if, indeed, she does not encourage it. The figures have a further significance when taken in conjunction with the details for new construction. In the three years, 1911-13, the mercantile output of British yards amounted to 61.6 per cent. of the total for the world. In 1914, *excluding enemy countries*, the British proportion was 69.1 per cent. of the total; in 1915, 54.1 per cent.; in 1916, 32.1 per cent.; and in 1917, 43 per cent. Detailed figures for the first nine months of 1918 are not available; but the British output is exceeded by that of one other country, viz., the United States, and the probabilities are that the British ratio for the year will be well below the low-water mark of 1916.

The work of British shipyards has, of course, been one of the biggest factors in deciding the issue of the submarine campaign. This work has fallen into three distinct compartments, each of which is not always given its full weight when the war contribution of British shipyards is under consideration. To begin with, although tonnage has been in this war, as it must be in any other of consequence, at least as vitally important as any other munition, merchant shipbuilding was from the start regarded in the light of a luxury trade. Not only was a large proportion of the industry turned over to the building of warships, which may have been highly necessary as a temporary measure, but large numbers of skilled and semi-skilled men were permitted to enlist in the Army or conscripted by the War Office. There is no doubt that this short-sighted policy contributed a great deal towards that shortage of shipping which became so acute from the middle of 1917 onwards; and yet, and in spite of the further fact that the War Office was induced early in 1918 to promise to send 20,000 skilled men back to the shipyards, men were still being taken out of them in the early autumn of the year. How extraordinary this policy was is the better appreciated when it is contrasted even in the vaguest way with the output of other important munitions of war, such as guns, shells, and motor lorries for land transport.

Of the three material demands upon the yards, the principal is represented by the maintenance and repair of the existing fleets, both naval and mercantile. Even in normal times this represents a big item, but its dimensions have been vastly expanded by the war. Not only has the Navy grown enormously, but the ships are subject to more wear and tear than in peace, while it is particularly necessary to dock frequently the vessels of the more important classes in order that they may at any time be able to reach the highest possible speed, and also that they

may be fitted with any improved devices that may have been adopted since they were last in dock. It has been officially stated that in a single quarter more than 3,000 naval vessels, from battleships to trawlers, have been docked, repaired and refitted, and there is no reason to believe that this figure is in any way exceptional. The general practice in regard to merchantmen is different, and the making good of wear and tear is postponed as long as possible. On the other hand, however, the effect of the U-boat campaign was, at times, to throw an almost unbelievable amount of mercantile war-repair work upon the shipyards. The volume of this work varied with the localities favoured (voluntarily or otherwise) by the submarines. If they worked far out at sea the chances of saving a ship damaged by torpedo or gunfire were obviously much less than if the enemy craft were operating close inshore; and as the counter-measures adopted by the British Navy forced the submarines first in one direction and then in the other, the amount of repair work varied accordingly. Over lengthy periods, however, the number of damaged merchantmen repaired and returned to service has averaged more than 150 a week, while in one particular week the tonnage in hand for repairs has reached the almost incredible figure of 2,120,301 tons, representing more than one-ninth of the total tonnage of the British mercantile marine at the outbreak of war, and being equivalent to 600 ships of 3,500 tons apiece. An increasing proportion of the merchant ships coming into British yards for repair are under Allied or neutral flags. This proportion will doubtless increase with the rapid growth of the United States merchant marine.

Second in importance among the demands on the shipyards is the construction of new ships for the Navy. This is a point upon which there is of necessity no information available, for although several statements have been made similar to that of Mr. Lloyd George on Aug. 7—when he declared that during the war the tonnage of the Navy had increased from 2½ millions to 8 millions, a large proportion of the addition is represented by vessels taken over from the mercantile marine and the fishing fleets. In the autumn of 1918, however, there were approximately 150,000 men employed on warship construction, and 120,000 on mercantile construction. The building of merchant ships came last in order of importance among the calls on the shipyards. This was not unreasonable. The first essential for victory was the maintenance of an unquestionably supreme fleet, while as regards the submarine campaign, the provision of means for destroying the U-boats very properly took precedence over the building of new merchantmen to replace those sunk, important though it was and is to maintain an adequate level of tonnage for transport purposes. The priority given to repairs over new construction is equally reasonable, since carrying capacity can be provided much more quickly and cheaply by repairing a damaged vessel than by building a new one.

Attention may now be given to the recent output of British shipyards. The figures for the years 1915-6-7 have already been quoted. The Table below, like the one of losses already given, covers the twelve months from October, 1917, to September, 1918, and shows (1) the mer-

cantile output of the United Kingdom, and (2) the extent to which this fell short of the tonnage lost during the same month.

	Output.	Deficit compared with Loss.
1917.		
October	148,309	141,664
November	158,826	37,734
December	112,486	183,870
1918.		
January	58,568	160,053
February	100,038	154,265
March	161,074	62,992
April	111,533	121,636
May	197,274	34,513
June	134,159	31,391
July	141,948	40,576
August	124,675	51,759
September	144,772	6,821

For the twelve months, therefore, there was an output of only 1,594,262 tons to set against the loss (see previous table) of 2,621,536 tons, the net deficit on the year's working being 1,027,274 tons. It may be observed, too, that with the exception of the second quarter, the last (July-Sept.) was the least productive of merchant tonnage, although the necessity for increased transport facilities was insisted upon by members of the Government on every possible occasion. It was mentioned in last year's ALMANACK that Mr. Lloyd George had spoken with confidence of an output of 4 million tons of merchant shipping from British yards in 1918, but a far more modest note was struck in a memorandum, prepared by the Admiralty (probably in the autumn of 1917), presented to the War Cabinet, and published in March, 1918. Here it was stated: "To produce in the United Kingdom 1,800,000 tons in 1918, and to reach an ultimate production at the rate of 3,000,000 tons per annum, is well within the present and prospective capacity of our shipyards and marine engineering shops." Thus, although we had lost over 7 million tons of shipping—more than 4,000,000 tons in 1917 alone—and although the demands for cargo and transport space were continually increasing, the authorities complacently looked forward to the construction in 1918 of a smaller tonnage than we had built in 1913, when the output was 1,920,000 tons. The actual output for the first nine months of the year was 1,174,641 tons, representing a monthly average of 130,516 in place of the 150,000 demanded by the official estimate. To reach the total of 1,800,000 tons it would be necessary for the rate of output to advance 60 per cent. in the closing three months of the year.

Fortunately for the Allied cause, the year 1918 saw a considerable increase in the output of Allied and neutral shipyards, the net result being that the world's shipping increased appreciably—that is to say, the construction was greater than the loss from all causes. How significant this fact is will be better appreciated if it is borne in mind that in the previous year the world had lost 6,623,623 tons against an output of 2,703,355. Full details regarding the construction of foreign Powers are not available, but the American output alone for September was 301,433 gross tons (more than double the British figure), and for the first nine months of the year 1,722,730 gross tons, or 46·7 per cent. above the British total. The rapid increase of foreign merchant-marines, coupled with the decline of our own and the abandonment of so many trades in order to permit of greater con-

centration upon war needs, is naturally leading to a certain amount of anxiety as to the future of the shipping and shipbuilding industries.

During the period under review a series of important new measures have been put into operation against the submarine. The system of patrol by surface craft, submarines, seaplanes and airships has been largely extended, and stories are frequently issued by the Admiralty describing encounters between these craft and U-boats, generally with results disastrous to the latter. Much more striking, however, has been the development of the system of barrages designed to impede the passage of hostile submarines in their progress in and out of the North Sea. The first reference to a barrage was made by the First Lord of the Admiralty in a statement following the loss of eight drifters and trawlers in a hostile destroyer raid on the Dover Straits in the early morning of February 15, 1918. It should be observed that at the beginning of the year Vice-Admiral Roger Keyes (since made a K.C.B.) took over the post of Vice-Admiral Commanding the Dover Patrol, in succession to Sir Reginald Bacon, who had held the appointment nearly three years. Sir Eric Geddes said (March 5, 1918): "I am told that it is commonly believed that the passage of submarines through the Dover Straits has been prevented by nets or other obstructions from the early days of the war. That is not the case, and undoubtedly a considerable number passed through the Straits towards the end of last year. A more vigorous policy was adopted quite recently. A surface barrage has been maintained across the Channel in order to obstruct the passage of enemy submarines. By day and night this barrage is maintained, and at night the patrolling craft burn flares, so that any submarine attempting the passage on the surface has a reasonable chance of being engaged." The patrol vessels on the surface would need to be supported by obstructions beneath, and it was allowed to become known later that these obstructions took the form of mines, none of which was anchored so near the surface as to interfere with ordinary navigation. The position created, therefore, was that U-boats desiring to enter the Channel *via* the Straits had to choose between the risk of the mines below and of the patrol craft above.

The next development in this policy was indicated by an official notice to mariners prohibiting from May 15, as "dangerous to all shipping," the navigation of a great belt of water in the upper part of the North Sea. This prohibited area is about 80 miles in width from north to south, and is shaped like a chevron with unequal arms. The western arm begins about 80 miles east of the Orkneys and stretches for nearly 200 miles in a north-easterly direction, when an angle is formed and the mined area slopes to the south-east until it meets the territorial waters of Norway. The total area covered is about 22,000 square miles. The precise measures taken to render this area dangerous have not been divulged, but they are known to include the employment of a vast number of mines. There is a wide gateway between the Orkneys and the western edge of the area, this being left for the necessary freedom of shipping and the Grand Fleet; but steps have been taken to render it a dangerous pathway for submarines. At the eastern end of the area another free

passage was perforce left, represented by the territorial waters of Norway. It had long been notorious that the U-boats had "turned the flank" of our North Sea patrols by stealing up through these neutral waters until a safe opportunity presented itself for a dash to the west, and the efforts of the Norwegian Government to protect its neutrality had not hitherto been conspicuously successful. In October, however, the Norwegian Admiralty announced that a minefield had been laid in territorial waters for a distance of about 25 miles north of the Stavanger Fiord. For about a half of its length this minefield is contiguous with our own, thereby completely sealing the barrier so far as the eastern side of the North Sea is concerned. It is true that the Norwegian notice prohibits the area concerned only to "ordinary shipping," and makes no special mention of submarines. The navigation of territorial waters by the latter is, however, forbidden by a decree of Jan., 1917, and the Norwegian Press has made no secret of the fact that the minefield is aimed against the passage of U-boats. British mine-layers are constantly at work in and around the Bight of Heligoland, while obstructions of the same character have been laid in the Kattegat. The first intimation of the latter came in the winter and spring of 1917-18, when groups of German sweepers in this neighbourhood were attacked by our patrol craft and sunk. Having failed to get rid of the mines in this way, the Germans complained to the Swedish and Danish Governments that they were a menace to neutral shipping; but the British Government replied to the effect that all the mines were at a minimum depth of 35 feet below the surface. This left the passage perfectly safe for the heaviest of ordinary traffic; but a U-boat travelling on the surface would be in danger from our patrols, while the mines would be waiting for her below if she dived. These barrages are by no means perfect. In all probability nothing could ever make them so; but they are constantly being strengthened and improved, and, short of steaming in and destroying the enemy's harbours, they probably represent the most effective method of combating the submarine that has yet been devised. It is mainly in the improvement of these barrages that the British Navy is laying some 10,000 mines a month.

The splendidly conceived and executed attacks on Zeebrugge and Ostend in April and May were designed to prevent the use of those places as sally-ports for hostile torpedo craft and submarines. The U-boats based upon them (or upon Bruges, with which the coast towns are connected by canal) were mainly of the smaller types, used for minelaying and other short-distance work in the North Sea. The destroyers never presented any material danger, but their existence necessitated the constant employment of ample covering forces by the Allies between Dunkirk and the S.E. coast. There is no need to give a lengthy account of the operations. On April 23 the old cruisers *Intrepid* and *Iphigenia*, heavily laden with cement, were successfully run into the canal exit at Zeebrugge and sunk across the fairway, while a storming party of seamen and marines from the *Vindictive* and other vessels fought themselves into temporary occupation of the mole which encircles half of the artificial harbour. A third blockship—the *Thetis*, actually the leader—went aground before reaching the spot on which she was intended to

be sunk, but she was able to signal valuable directions to the others. The attempt on Ostend the same night failed completely, the blockships *Brilliant* and *Sirius* grounding some hundreds of yards distant from the harbour entrance. On the night of May 9-10 this failure was splendidly redeemed, the *Vindictive* being taken fairly into the harbour mouth and sunk between the piers, leaving an altogether inadequate channel for the passage even of small craft. No attempt is made to describe these operations in detail, as space would not permit, but in view of the difficulties and defences that had to be overcome they have been described, and not improperly, as constituting the most daring adventure in naval history. After a few half-hearted attempts to shift or destroy the obstructions, the Germans gave up the task. It is estimated that somewhere about 50 submarines and torpedo craft were immobilised by these attacks, while a number of U-boats, ignorant of what had happened, were probably trapped on their way back from their cruises. The strain on the Allied forces in the southern area of the North Sea was reduced considerably, but, owing to the type of U-boat using the Belgian coast ports, there was no appreciable effect on the campaign against shipping. It is worth remarking that in the middle of October the Germans, being then about to evacuate the coastal region, were themselves sinking additional ships to reinforce the British obstructions.

With regard to the actual destruction of U-boats, the first and only figure was given by Mr. Lloyd George on Aug. 7, 1918, when he said, after surveying the general work of the Fleet: "Elsewhere our British ships are convoying, patrolling, minelaying, minesweeping, escorting, chasing submarines over vast and trackless areas. They have destroyed at least 150 of these ocean pests—more than a half in the course of last year." In reply to German statements that the number was exaggerated, the Admiralty published shortly afterwards the names of the commanding officers of 150 German submarines who had been killed or taken prisoner in the destruction or capture of their vessels, or interned in neutral countries. The only German attempt at an answer to this was a complaint that in some cases the rank of the officer was not given correctly! It is fairly obvious that in a large number of cases the Admiralty must have been unable to ascertain the name of the officer commanding a destroyed U-boat, while many of these must have been lost without our knowing it. The total of 150 might therefore be expanded by 33 or even 50 per cent. without any great danger of exaggerating the enemy's losses, but the official total was one in which each individual case could be verified. The general impression had been that the number was very much higher than this, but such ideas were based on a very inaccurate view as to the opportunities presented to the patrol craft. As Vice-Admiral W. S. Sims, U.S.N., stated in October, the average number of enemy submarines working at any one time, outside the Mediterranean, was eight or nine, while sometimes it ran up to twelve or thirteen. When it is remembered that these boats were working from the White Sea to the Azores and far out into the Atlantic—an area of some 2,000,000 square miles—it will be seen that the chances of catching one were apt to be remote, even with 5,000 chasers and patrol craft constantly at work. It is generally admitted

that the German rate of U-boat output is from eight to twelve boats a month, so that we must sink well over a half of 150 a year to keep pace with it. During certain periods in 1917-8 boats were being sunk faster than they could be built, but the withdrawal of vessels for the Atlantic convoy affected the results adversely. The German writer was probably correct who stated at the end of September that about five a month were being destroyed.

From the fact that destruction has equalled output only for very brief periods, it would seem to follow that Germany must have a fair number of submarines in hand with which to attempt mischief on a large scale. At the moment of writing there is a feeling that such a campaign will be opened before long. The visit to America of Sir Eric Geddes, First Lord of the Admiralty, and Vice-Admiral Sir Alexander Duff, chief of the anti-submarine sections of the Naval Staff, strengthens the general impression. Indeed, in the course of a statement made in New York Sir E. Geddes declared that "a great renewed effort is impending," and that the submarine menace "is to-day greater than ever it was." According to report, a number of very large, fast, and powerful submarines had been prepared for this effort, but there is at the moment no actual evidence either as to the boats or as to the campaign. The original "super-submarines," or "cruiser submarines," which are understood to be armed with two 5·9-inch guns and to have a cruising capacity of three months, made their appearance early in the year. One of them was torpedoed and sunk in May by a British submarine. Of the later U-boats nothing is known. They are probably faster and have a longer cruising radius than their predecessors, but it is unlikely that they carry a heavier gun than the 5·9-inch, which, by the way, should be compared with the 4-inch, the heaviest gun mounted in our destroyers before the war, and the 4·1-inch, the standard weapon of German light cruisers. Thanks to the statement of the First Lord, to Germany's undoubted strength in U-boats, and to the desperate straits to which the enemy has been reduced, the period under review closes with a feeling of rather anxious expectation, strongly tempered by the belief that peace may intervene at any moment.

In Home waters there has been only one action of importance that was not concerned directly or indirectly with the submarine campaign. The enemy had made one successful attack on a North Sea convoy in October, 1917, and the operation was repeated two months later, unfortunately with equal success. A convoy, consisting of one British and five neutral ships (8,000 tons in all), was proceeding from Scotland to Norway under the escort of the destroyers *Partridge* and *Pellew* and four armed trawlers, when an attack was delivered by four enemy destroyers about noon on Dec. 12. The destroyers engaged, but in a short time the *Partridge* was sunk and the *Pellew* disabled (she subsequently reached port safely), while the enemy proceeded to the destruction of the trawlers and the merchantmen. The convoy should have been effectively screened from attacks of this sort by patrol forces to the south, and a committee of admirals was appointed to inquire as to the reasons why the enemy was not rounded up on either his outward or his homeward journey. It was stated that, as a result of the inquiry, new arrangements had been made, and there has

been no repetition of such attacks. In the early morning of the same day enemy destroyers had appeared off the Tyne, and destroyed two neutral merchantmen and a trawler.

In the Mediterranean there have been several outbursts of activity, the result mainly of the enterprising character of the Italian fleet. A special type of fast motor torpedo-boat has been revised for work in the Adriatic, and very effective work has been done with it. On Dec. 9, 1917, Commander Rizzo, in one of these craft, made his way into the harbour of Pola and torpedoed and sank the battleship *Wien* (5,500 tons, launched 1895), while it is believed that on the same occasion the *Budapest*, a sister ship, was irreparably damaged. On May 14 the enterprise was repeated with even greater success. A motor-boat, commanded by Capt. Pellegrini with a crew of three volunteers, again made its way past the formidable defences of the port, which was obstructed by minefields, cables, nets and a vigilant patrol system, and succeeded in firing two torpedoes at close range into the Dreadnought battleship *Viribus Unitis* (20,000 tons, launched 1911). The Italians then destroyed their boat and were made prisoners. Nor is this the latest of these daring adventures. In the early morning of June 9, two motor-boats, commanded by Commander Rizzo (destroyer of the *Wien*) and Midshipman Aozzo, were on patrol in the Adriatic when they sighted two Austrian battleships steaming south, escorted by ten destroyers. The Italians seem to owe a good deal to the inefficiency of the Austrian personnel; but, at any rate, Rizzo cut through the destroyer line, fired two torpedoes into the leading battleship, and escaped in safety, while his consort slipped in at the end of the convoy and planted one of her two torpedoes in the stern of the other ship. Neither of the Italian boats was hit, but Rizzo's victim, the Dreadnought battleship *Szent Istvan* (20,000 tons, launched 1914) went to the bottom. The other battleship reached port in a damaged condition. This splendid work on the part of such insignificant units of the Italian fleet must have tended very greatly to reduce the moral of the Austrian seamen, and several outbreaks of mutiny have in fact been reported through neutral capitals.

Outside the Adriatic, where British and Italian naval forces have lent their gunfire wherever possible in support of the land operations, the only event of importance in the Mediterranean occurred on Jan. 20, 1918, when the *Goeben* and *Breslau* (Turkish *Sultan Selim* and *Midilli*) made a dash out of the Dardanelles—the first enterprise of the sort since they took refuge in Turkish waters in the first week of the war. Proceeding to the north of Imbros, the *Goeben* destroyed by gunfire the monitors *Raglan* and *M28*, after which the enemy vessels set out to return. On the way, however, both of them struck mines. The *Breslau* sank, but the *Goeben* steamed into the Dardanelles with a list of 15 degrees, finally grounding on Nagara Point. Here for several days she was submitted to the unremitting attacks of Allied aircraft. On Jan. 27 submarine *E14* went into the Straits with the object of torpedoing the vessel, but was herself sunk, while aerial observation carried out the same night "established the fact that the *Goeben* was no longer ashore on Nagara Point." This remarkable vessel had once again survived apparently irretrievable disaster. Later in the

year the Germans seized practically the entire Russian Fleet in the Black Sea, but in the vicissitudes of revolution and counter-revolution the material strength and value of this force had been reduced considerably. The losses inflicted upon Austria more than compensated for Germany's gain in this direction. Nothing has happened in the Baltic, where German supremacy is undisturbed, but in April seven British submarines (four "E" class and three "C" class) were blown up off Helsingfors to prevent them from falling into the hands of the enemy. The example was not followed by the Russian naval authorities. In the extreme north, on the Murman Peninsula, the Germans, by political intrigues with Russia and Finland, practically obtained possession of the ice-free port of Kola, which it was intended to use as a U-boat base outside the North Sea barrages. Allied sea-power completely frustrated this move, and the disputed points, including Archangel, are now in the joint naval and military occupation of the Allies.

PRINCIPAL WARSHIP LOSSES.

In continuation of the list given on page 696 of the ALMANACK for 1918.

Batt. = Battleship; Ar. Cr. = Armoured Cruiser; Cr. = Cruiser; Mon. = Monitor; Ar. Li. = Armed Liner; Aux. = Auxiliary; T.B.D. = Destroyer; O.T.S. = On Transport Service. Sloops and large minesweepers are included among auxiliaries.

Date.	Type.	Name.	How lost.
British.			
—11.17 Mon.	Not stated		T. by sub. in Med., 26 lost.
—11.17 T.B.D.	"		T. by sub. in Med., 7 lost.
12.12.17 T.B.D.	"		Collision, 2 lost.
—12.17 Aux.	Stephen Furness		T. by sub., 101 lost.
12.12.17 T.B.D.	Partridge		Convoy raid, N. Sea.
12.12.17 Aux.	Arbutus		T. by sub., 9 lost.
—12.17 Aux.	Grive		T. by sub., no cas.
22.12.17 T.B.D.	Not stated		T. by sub. or mined in N. Sea on convoy duties.
22.12.17 T.B.D.	"		T. by sub. in Med.
30.12.17 T.B.D.	"		Mined in Med., 199 lost.

Any attempt to detail the enemy's losses would be hopeless. Such of the important ones as are known are mentioned in the foregoing account of the naval operations; but it may be added that well over a hundred of the enemy's small craft have come to grief in the British minefields surrounding the Bight of Heligoland. The First Lord of the Admiralty, speaking in America, on October 12, 1918, stated that the British Navy had lost 230 warships of all classes—more than twice as many as the rest of the Allies—and, in addition, 455 auxiliary vessels of the minesweeping and trawler types.

The Submarine War, 1914-1918.

THE following summary is taken from a Report issued by the First Lord of the Admiralty.

From the outbreak of war to the end of 1917, British shipyards produced 3,031,555 tons, while enemy vessels captured added 780,000 tons. A total of 3,811,555 tons has therefore to be deducted from the 7,079,492 tons lost, leaving a net wastage for this country of 3,267,937 tons.

In the memorandum the world position at the end of 1917 is thus summarised:

	BRITISH. Tons.	FOREIGN. Tons.	WORLD. Tons.
Losses	7,079,492	4,748,080	12,827,572
Gains:			
New construction	3,031,555	3,574,720	6,606,275
Enemy tonnage captured	780,000	1,809,000	2,589,000
Total gains	3,811,555	5,383,720	9,195,275
Net loss (World)	—	—	2,632,297

LOSSES AND GAINS.

Detailed figures of losses and output are given in the following tables:

Totals	780,000	1,809,000	2,589,000

The aggregate world losses of shipping through enemy action and marine risks from the outbreak of war to the end of 1917 amounted to no less than 12,827,572 tons, of which 7,079,492 tons were British. From this total has, however, to be deducted (a) new construction and (b) enemy tonnage captured, amounting to 9,195,275. Hence the net world loss at the end of 1917 was 2,632,297 tons. Up to 30 Sept., 1918, the gross tonnage of the U.K. ships lost was 8,946,000. This has been made good to the extent of 5,443,000 gross tons, leaving a net deficit of 3,503,000 gross tons. The last date on which a British ship, or ship of other nationality, was sunk by enemy submarine action was in the Mediterranean on the 2nd November, 1918.

THE development of aeronautics during 1918 was, as in the past three years, on purely military lines. All the resources of the country, both scientific and industrial, were employed in war work. Immense advances were made in the construction both of planes and engines, but this side must still remain a closed book till the end of hostilities. Speaking broadly, we can note that the stability of the aeroplane has now reached a high state, if not of perfection, at least of comparative safety. Engines, too, of much higher power and less proportionate weight have been developed, until we are now approaching the ideal of 1 lb. weight per horsepower. Speed, climb, and lifting power have been improved, but in these there is still room for progress, which is certain to be made. It is a fact that the war has developed the aeroplane; and though at present it is merely an engine of destruction, the time, we may hope, is not far distant when the air will be the chief medium of transit and transport, and the aeroplane, the child of the Titanic struggle, will become as great a boon to the human race as the railway or the steamship.

Looking back on the past year, we have to note the increase in the size of planes and engines for weight-carrying purposes. Double and even quadruple engines have been found practicable, and machines like the Caproni (Italian) and Handley-Page (British), now used for military raids, will easily form the basis of a commercial type in times of peace. That distance is no deterrent has been proved by the journey of a Handley-Page from England to Constantinople, and by the trip of two ordinary military machines to Egypt. The Alps form no barrier, for they have been conquered several times without mishap. Experts have little doubt that even the Atlantic can be crossed, and business men are now preparing for the commercial developments which are bound to come once peace has been proclaimed.

These developments, past and future, have been made possible by the co-ordination of the British Air Service. The Advisory Committee for Aeronautics, acting in close co-operation with the Royal Aircraft Establishment, the National Physical Laboratory, and the technical departments of the Royal Air Force and the Admiralty, have been incessantly dealing with experimental work and with investigations carried out on full-scale machines at the experimental stations. The experiments, also, at the National Physical Laboratory have ranged over the whole field of practical aeronautics, whilst the Royal Aircraft Factory and the manufacturers constructing machines for the Government have all added their quota to the progress which has undoubtedly been accomplished. Calculations carried out from various enemy machines have proved that neither in performance nor strength are the German equal to the British. The best German biplane is acknowledged to be the Halberstadt. A complete two-seater of this type, captured at Villers-Bocage on June 9 last, examined by the Technical Department (Aircraft Production) of the Ministry of Munitions, proved to be well and strongly built and its general behaviour in the air good. It could not, however, be considered stable, and its climb and speed were poor, judged by British standards. It took 9 min. 25 sec. to climb to 5,000 ft., 24 min. 30 sec. to 10,000 ft., 51 min. 55 sec. to 14,000 ft., and 64 min. 40 sec. to 14,800 ft., its greatest height. At 10,000 ft. its speed was 97 miles an hour with the 180-h.p. Mer-

cédès engine making 1,385 revolutions a minute. These performances are far inferior to several British types, details of which cannot be given.

As a military arm the aeroplane has proved invaluable. Its value to our forces was rendered more comprehensive by the reorganisation of the Air Service through the co-ordination of the two separate wings, naval and military, in one Air Force, and under centralised direction both in the matter of construction and command. It was found expedient also to create the Independent Air Force for the purpose of bombing raids chiefly into the enemy country. This is a separate command, with an individual policy and requirements, though it is of course subservient to the strategy of the supreme command.

The work of the Independent Air Force in carrying the war into the enemy country, and incidentally in taking reprisal for the bombing raids on England by the Germans, has had a most remarkable effect. Not merely has it had its repercussion on the fighting front, but it has been the means of putting an end to organised raids on London and the south-east counties. The Independent Air Force came into being on June 6, and between June 6 and June 11 raids were carried out on Metz-Sablon, Karthaus, and other military positions. After that the attacks developed daily, till in July of the 100 raids undertaken only four were not carried into German territory, on which 81 tons of bombs were dropped. With the aid of naval airmen on the North Sea littoral, enemy aerodromes were attacked and damaged to such an extent that the Germans had at last to construct underground hangars for their machines or to remove their aerodromes farther afield.

Some idea of the activities of the Independent Air Force may be gained from the official report for September, during which month over 178 tons of bombs were dropped on military objectives in Germany. The increasing severity of these raids is shown by the monthly weight of bombs, viz., June 66 tons, July 81 tons, August 100 tons, September 178½ tons. The September raids were on Metz-Sablon, reaching 24, Mannheim chemical factories 6, Karlsruhe 4, Ehrang 4, Kaiserlautern 3, Saarbrücken 2, Thionville 2, Frankfurt 2, Burbach 2, Hagendange, Mainz, Rombach, Stuttgart and Treves once each. German aerodromes bombed were at Bühl, Boulay, Frescaty, Moorhange, &c.

The result of this incessant policy of offence proved the best defence of our shores against raiders. The Germans had to employ so many airmen to defend their own towns that they could spare neither the men nor machines for raiding London. Whether this theory is correct or not, the fact remains that since the Independent Air Force first went into action not a single raid has been made by German airmen on London. No doubt the improved defences of the metropolis—for at the last attempt (May 19) seven of the raiders were brought down—may be responsible for some of this immunity of London, which was so severely attacked in 1917.

In the battles of the autumn, when the Hindenburg line was breached and the Belgians began the drive east of the Yser, the aeroplane showed its value as a fighting force. Airmen flew low and engaged the enemy with machine-gun fire, attacked moving columns and transport, and blocked railways and roads by bombing. They even carried rations and ammunition to our own men beyond the reach of the ordinary

transport. The aeroplane, first used as the eyes of the Army, showed itself capable of offence in a way that a year ago would have been deemed incredible. Indeed, it was claimed by experts that it was due to our supremacy in the air that the Allies were victorious in the autumn campaign. On more than one occasion squadrons numbering from 100 to 250 bombed and machine-gunned the German troops and transport.

As might be expected, aeroplane losses on the fighting fronts were increasingly heavy during the past year. Owing to the falsity of the German official reports, it is quite impossible to give perfectly accurate figures; but taking the Allied reports, we get the following totals:—March, 1,059; April, 583; May, 1,248; June, 1,235; July, 1,179; August, 1,309; Sept., 1,142—total for seven months, 7,775, or, roughly, 1,100 a month. This total includes German, British, Italian, and French, as also a few American.

Analysing the record month of August (which also includes the raids of the Independent Air Force into Germany, and naval raids and patrols), we find that the Allies claimed 1,061 and the enemy 248. The German claim, which includes French machines, is probably below the mark, as on several days in the month there was no air report, and the British authorities acknowledged the non-return of 218 machines—187 on the Western battle front, 14 from raids into Germany, and 17 naval machines. Against the loss of 218 machines, British front airmen destroyed 509 German machines, drove down out of control 170, and brought down 2 behind our lines; the Independent Air Force destroyed 11 and drove down 3 out of control; and naval airmen destroyed 35 and drove down 20—a total of 750. On the Italian front, 66 enemy aeroplanes were destroyed (35 by British airmen), with a loss of 3 machines. French airmen and gunners destroyed or put out of action 224 German machines, the Americans 6, the Belgians 1, and the Allies on the Macedonian front 14.

The record day of air fighting was Friday, Oct. 30, when on the Western Front our airmen destroyed 64 German machines, drove down 15 more out of control, and shot down one balloon in flames. In addition two machines were destroyed on the ground. This was accomplished with the loss of 18 of our machines. This total of 64 German aeroplanes destroyed by our airmen in combats is higher by 19 than the previous record of 45 made on Sept. 16 and March 24, when the air fighting was described as "the most severe so far experienced." On the first-named date 16 of our machines were reported missing, and on the latter date 10. The new record of Oct. 30 elicited a telegram of congratulation from the King to the Air Force as their General-in-Chief.

Reverting to the question of raids, which figured so largely in last year's ALMANACK, it is pleasant to note a decrease. The following list is compiled from the official reports published in the newspapers:—

Machines
brought
down.

Date.	Raiders.	Killed.	Injured.	Machines brought down.
1917. Dec. 6...	25	3	11	2
" " 18...16 to 20		10	70	2
1918. Jan. 28...	15	58	173	1
" " 29...	15	10	20	—
" Feb. 16...	6	11	4	—
" " 17...		19	34	—
" Mar. 7... 7 or 8		20	45	—
" May 19...20 to 30		44	179	7

No attacks were made by Zeppelins upon London and the southern counties, owing, no doubt, to the risk of encountering a strong defence by aeroplanes, as well as an intensive barrage. Several attempts, however, were made on the east and north-east counties, and in one instance the enemy aircraft, according to the official report, travelled across England almost to the north-west coast. The first raid was on Hartlepool on March 13, when one airship got across the coast, killing 9 persons and injuring 22. Six houses were demolished and about 30 damaged. On the night of April 12 four Zeppelins reached the Midlands, the death roll being 5 and the injured list 15. The damage was confined to the demolition of four houses in one place. The last attempt, on Aug. 6, was made by five Zeppelins, which failed to cross the coast. One, the L70, was pursued and engaged 40 miles out at sea, and brought down in flames whilst flying at a height of 17,000 feet. The L70 was a super-Zeppelin of enormous size. Since that misadventure the Zeppelins, at the time of writing, have made no further attempt.

There remain to put on record one or two notable feats accomplished during the year. Two Italian pilots flew to Friedrichshafen, on Lake Constance, and succeeded in taking photographs of the German aerial stronghold. To accomplish this feat they flew 500 miles and crossed the Alps. Another notable exploit was that of Gabriele d'Annunzio, the Italian post-airman, who led a squadron over Vienna and dropped pamphlets appealing to the Austrian people to put an end to the war. In America, Capt. Ruddy W. Schroeder on Sept. 18 secured the altitude record by flying to a height of 28,900 feet above sea level. He used a Bristol fighting plane with a 300-h.p. Hispano-Suiza engine. This record, verified by the Aero Club of America, is recognised by the U.S. Government.

Early in the year England lost her champion airman, Captain McCudden, *RFC*, after a journey across the Channel. Col. Bishop, *RFC*, the champion Canadian pilot, retired from active service on the front to organise the Canadian Air Force as a separate unit. His many victories were achieved while a member of the British Royal Air Force. Garros, the famous French pilot, was reported missing in the autumn.

The practicability of an aerial post after the war is universally acknowledged, and it is understood that active measures are being taken by the Government for its establishment as soon as machines and men can be released from war work. Such a service will entail the establishment of aerodromes in the vicinity of towns and cities for the despatch and landing of mails which could then be sent to the postal centres by motor cars. In this connexion there have also arisen the problems of aerial postal services to the Continent, and even across the Atlantic. Crossing the Channel to France has become a commonplace occurrence, though it is few years since Blériot showed the way. During the year thousands of cross-Channel flights have been made without mishap. The King and Queen of the Belgians were brought across in this way to a function in London, whilst Cabinet Ministers, including Mr. Bonar Law and Mr. Churchill, have flown from one country to the other on State business. As to the trans-Atlantic flight, aviators are merely waiting the end of the war to win the £10,000 prize offered for the first man to perform the feat.

THAT wars would be too expensive to permit of indulgence in them is a theory the experience of four and a quarter years of war has destroyed totally. Belligerents issue paper currency and pile up national debts without the slightest of qualms. It is so easy to issue promissory notes of which the redemption dates years ahead. And with the rise in the cost of living (the British Labour Department estimates the war increase at 116 per cent.) the figures of war finance have different ratios according as the statistician regards them in the light of pre-war or the present or the future value of £1. The figures that follow are mostly in terms of millions, hundreds and even thousands of millions—figures that the human mind cannot imagine in extent. Most of the money represented in the cyphers has been wasted economically, and the additional labour that will be necessary to help replace it can hardly be estimated.

UNITED KINGDOM.

For the year ended April, 1919, Mr. Bonar Law estimated the cost of war to this country would be £2,972,197,000. He proposed to raise £842,050,000 by taxation, and the balance (in Votes of Credit of £2,550,000,000) by Loans. The method of borrowing has remained almost constant throughout the year.

National War Bonds (bearer or registered) at 5 per cent. issued at par in multiples of £5, repayable in five, seven and ten years at 102, 103 and 105 per cent., and a 4 per cent. issue free from tax deduction, have provided most of the funds required. The amounts taken up weekly have varied from £9,562,390 of 3 May, 1918, upwards. The sales in the first six months (Oct.-Apr.) amounted to £635,000,000. Various means have been adopted to popularise the investments. Newspaper advertisements, public meetings, posters, postmarks and display weeks, tank tours, big gun weeks—all have been tried with success. The first £1,000,000,000 in the bond issue was reached by 17 Aug., 1918, and the idea is to keep up an average of not less than £25,000,000 weekly. The total issue on 12 Oct., 1918, was £1,181,000,000. When first issued the *Frankfurter Zeitung* referred to the bonds as "a mere provisional measure to check a disastrous increase in the floating debt." On 30 Sept., 1918, Mr. Bonar Law stated that the issue of the bonds would continue as the means for financing the war until the end.

War Savings Certificates (15s. 6d. deposited entitles a cash payment of £1 at end of five years, free from any taxation) have been continued. The W.S.C. have lately been purchased by the affixing of special 6d. stamps to cards. The number of certificates issued has grown from 123,227,977 on 13 Oct., 1917, to over £250,000,000 in Oct., 1918.

Treasury Bills at 3½ per cent. for three and six months have proved popular with the big institutions. The rate was reduced from 4½ per cent. to 4 per cent. on 27 Dec., 1917, and to 3½ per cent. on 14 Feb., 1918. The Bills are referred to generally as the Floating Debt, and have been turned over in large sums. The total current on 12 Oct., 1918, was £1,118,387,000, and the difference between the amounts falling due and newly issued for the week ended that date was an addition of £4,185,000. A large turnover has taken place weekly. For that of 1 June, 1918, £79,136,000 were repaid and £92,233,000

taken up, the balance of Bills outstanding then being £1,005,587,000. To meet unprovided for demands, i.e., when both revenue and public lending have not sufficed, the Bank of England has been called upon to aid.

Currency Notes.—The £1 and 10s. notes are to all intents and purposes loans to the Government without interest. The amount in circulation has grown from £189,944,338½ on 7 Oct., 1917, to £282,275,297½ on 9 Oct., 1918. The gold reserve kept for them has remained at the low figure of £28,500,000. Mr. Bonar Law's cheque duty increase of 1d. that came into force 1 Sept., 1918, was expected by some to be followed by a considerable increase in paper currency. The Bank of England has remained the chief reservoir of the gold bullion in the country, and there has been a gradual increase in its holding throughout the year. On 31 Oct., 1917, the gold held totalled £56,025,691, and the notes in circulation reached £42,400,340. On 9 Oct., 1918, the gold figure was £73,109,006, and the notes in circulation £62,796,935. The gold and note issues were thus £101,609,006 and £345,071,332—exclusive of small issues by private and Scotch and Irish bankers.

Exchange Rates.—We have had to buy heavily abroad, but we have maintained our position in the neutral markets. The value of the paper £ has depreciated, but nothing to the extent of that of the German mark. The percentage decreases between the rates of July, 1914, and 30 Sept., 1918, compare thus:—

	Mark.	£
Denmark	43'46	9'48
Holland	45'91	16'24
Norway.....	43'46	12'45
Sweden.....	49'37	19'61
Switzerland	45'11	13'17

Thanks to the assistance of the U.S.A. Government, the value of the British £ in America has been at only a slight discount for a very considerable period at 4'76, as compared with a pre-war 4'84.

National Debt.—It is not an easy matter to get an exact statement of the National Debt. By making due allowances for the working of the Depreciation Fund on the 5 per cent. loan (amounts bought back by the Government in the open market to maintain price) and cancellations on account of bonds returned in payment of Duties and Levies, the figures for 21 Sept., 1918, were:—

National War Bonds	£1,103,490,218
War Savings Certificates	236,362,569
Treasury Bills	1,093,404,000
Other temporary borrowing ...	328,832,604

Total

Debts incurred but not yet funded	1,248,105,174
Funded Debt	2,959,436,455

Total

Reckoning 4 per cent. as the average paid on what is practically seven thousand million pounds, the cost in interest is £280,000,000 annually.

Premium Bonds.—Following a press agitation, a Committee was appointed to consider the suggestion of a form of lottery bond to encourage war investment by the masses. No other Government has instituted that kind of borrowing

during the present war. The first meeting of the Committee was held on 15 Nov., 1917. The report against the issue of any form of lottery bond was issued on 19 Jan., 1918.

Dominions.—All the British Dominions are financing their own Expeditionary Forces.

ABROAD.

U.S.A.

Since April, 1917, when the U.S.A. entered the war, the financial help rendered can hardly be praised highly enough. The burden of financing the war had fallen heavily upon the United Kingdom, and the relief afforded by the U.S.A. was very acceptable. How fully the U.S.A. have entered into the struggle is shown from the following internal loans:—

Issued.	Dollars Accepted.	Rate. per cent.
May, 1917	3,000,000,000	3½
October, 1917	3,808,766,150	4
	(4,617,532,300 offered.)	
April, 1918	4,176,516,850	4½
October, 1918	6,000,000,000	4½

Also, War Savings Stamps have been on sale. In eight months (Dec., 1917–July, 1918) \$486,752,592 were contributed in small sums out of \$2,000,000,000 authorised. Up to the end of August, 1918, the U.S.A. Government had loaned (in addition to the loans raised from the investing public in America) £745,000,000 to the British, and £1,418,400,000 to the other Allied Governments. (The U.K. had up to this time lent £1,610,500,000 to the other Allied Governments, including Russia; whilst Japan had advanced £118,600,000 to France, Great Britain and Russia.)

FRANCE.

Four loans have been raised during the war:—

Issued.	Amount in Francs.	Rate per cent.	Issue Price.
November, 1915	15,130,000,000	5	88·0
October, 1916	11,507,000,000	5	88·75
November, 1917	10,276,000,000	4	69·20
October, 1918	In issue	4	70·80

National Defence Bonds have been issued side by side with the big loans as a means for raising money at other times. The Bank of France has

financed the State to a considerable extent. The note issue has been extraordinary:—

	1 Jan., 1918.	30 Oct., 1918.
Gold in hand	132,736,630	136,086,480
Gold abroad	81,484,320	Unchanged.
Notes	911,564,920	1,221,589,760
Advances to State	500,000,000	736,000,000

The Exchange Rates with London have improved, in favour of France, from, per £—

28 Dec., 1917	27·19 francs
to 16 Oct., 1918	26·08

The Finance Minister's declared intention is: "to ask all the contributive forces of the country to furnish their maximum effort."

GERMANY.

Eighth and ninth War Loans were issued on 18 Mar.—18 April, and 23 Sept.—23 Oct., 1918. The same rate (5 per cent.) has been maintained throughout war borrowing. There has not been any increase in the permanent direct taxation since August, 1914. The result of the new 1918 indirect taxes is estimated at £200,000,000 annually. Pre-war taxation produced £150,000,000. Total proceeds are thus £350,000,000—hardly 50 per cent. of the taxation requirements. The Imperial Bank has gradually increased its gold holding. Comparative figures are—

	7 Dec., 1917.	7 Oct., 1918.
Gold	£120,234,000	£127,368,950
Own Notes	£534,552,000	£789,902,450

Exchange rates have been at a big discount—

	Pre-war.	22 Oct., 1918.
Berne	123·45	72·00
Stockholm	89·00	47·75
Copenhagen	88·88	53·25
Christiania	88·88	51·50

OTHER COUNTRIES.

Austria.—8th War Loan ("The Last") issued May–June, 1918, had £230,520,000 subscriptions. Last published figures of the State Bank (Dec., 1917) showed note circulation of Kronen 18,440,000,000, with a gold basis of 1·6 per cent.

Russia.—State Debts were annulled by decree on 8 Feb., 1918. British Government, following lead of France, declined to honour any more Russian State bond coupons after 27 Mar., 1918. It is known that the finances of Russia are sadly disorganised.

WARTIME WEALTH.—From assessments made on April 30 last by the Inland Revenue Commissioners there are more people enjoying incomes over £5,000 in wartime than in 1914. A comparison is appended:—

	1914-15. Persons.
£3,000 to £5,000	15,524
£5,000 to £10,000	9,404
£10,000 to £15,000	2,561
£15,000 to £20,000	1,034
£20,000 to £25,000	537
£25,000 to £35,000	495
£35,000 to £45,000	229
£45,000 to £50,000	85
£50,000 to £55,000	61
£55,000 to £65,000	75
£65,000 to £75,000	47
£75,000 to £100,000	69
£100,000	90

30,211

with an aggregate income of £244,169,134.

	1916-17. Persons.
£3,000 to £5,000	14,463
£5,000 to £10,000	9,847
£10,000 to £15,000	2,579
£15,000 to £20,000	1,084
£20,000 to £25,000	606
£25,000 to £30,000	326
£30,000 to £40,000	330
£40,000 to £50,000	163
£50,000 to £75,000	161
£75,000 to £100,000	69
£100,000	95

29,723

with an aggregate income of £247,257,124.

The Cost of the War to the United Kingdom.

So far as the United Kingdom is concerned, the following figures show how the cost of the war has grown and is likely to grow until demobilisation after Peace is completed. The ultimate allocation of the cost of the war between the whole of the belligerents will depend upon the nature of the victory gained by the Allies. One suggestion has been made that the whole of the world's war and rebuilding costs be turned into an international currency. The following figures refer *only* to the United Kingdom. Every other country in the world, neutral as well as belligerent, has been called upon to meet additional charges consequent upon the war.

Total of Votes of Credit to March, 1919.....£8,792,000,000

Average cost in Votes of Credit (exclusive of amounts raised by taxation)£5,175,000

For every six months the war continues the actual increase in National Debt will be £1,250,000,000. At 5 per cent. per annum the cost to the country in interest alone will be an additional £62,500,000 every half-year. By end of March, 1919, on a 5 per cent. basis the United Kingdom will be paying £439,600,000 interest on its war borrowings, and the principal owing will not be reduced thereby. A reasonable Sinking Fund would mean an additional £200,000,000 yearly. Whether the United Kingdom will have to shoulder the whole of this debt has yet to be seen—at present it appears a fearful burden for the next few decades to bear. Other countries are piling up similar debts, and Germany will have enough to pay her own interest on internal loans without a war indemnity. If the cost of reparation and loss due to the war is to be levied on Germany, centuries will pass before the debt is paid in full. When the war is finished pensions will have to be paid, and large sums will be necessary in the transition period, whilst transfers are made from war to peace work.

Labour under War Conditions.

WHILST it has been fashionable to criticise the number of labour disputes during the past year, the praise that is due to the great majority of men and women war workers for their sacrificing and strenuous attention to duties on what has become known as the Home Front must not be forgotten. Food distribution, increased cost of living, unfair incidence in wages, the worries of loved ones in the danger zone—each sufficient to try the proverbial temper of a saint—have helped to create a general feeling of dissatisfaction; but in spite of every drawback the fighting-line—air, land, sea—has been kept bountifully supplied with material of every description. Truly, "Labour has delivered the goods." Points of outstanding interest have been as follows:—

• *Unrest.*—Most of the disputes have been on the subject of wages. The Ministry of Munitions gave certain workers a $2\frac{1}{2}$ per cent. war bonus during 1917. Agitation carried the demand into practically every trade that could be considered as on munitions. And the extension is still in progress. The outstanding disputes were the embargo, railway, textile, and shop stewards.

A misunderstanding led to engineers in the Midlands during July becoming afraid that they had been enlisted under a system of industrial conscription, and an embargo was placed upon any transfer from one employer to another. Over 35,000 men were idle for some time, and the trade union executives were ignored by the strikers. A special Committee was set up by the Government to enquire into the grievances.

A big railway dispute was narrowly averted in September. The trade union leaders had secured a further 5s. weekly (making total war increase £1 10s.) from the companies, but certain men wanted the original demand of 10s. conceded. At least 25,000 men were idle, and railway services were discontinued. The General Secretary (Mr. J. H. Thomas, M.P.) of the National Union of Railwaymen struggled hard to get work resumed, and in disgust resigned his post. Happily, he was prevailed upon to resume his duties.

The textile workers were dissatisfied with the arrangements of their own Central Cotton Control Board, and for a week 100,000 employees were idle. A Government Committee was appointed to settle the causes of the dispute.

Shop stewards have again been responsible directly and indirectly for many strikes. The S.S. movement might be productive for good. Certainly, a representative elected from the workpeople in a business is better informed of the actual conditions of employment than the delegates at a far-away chief office of a trade union.

The disputes have occurred mainly in the shipbuilding, mining, engineering and building industries. The Clyde is unfortunately associated with much of the labour trouble, like South Wales has in the past. Comparative figures of disputes are:—

Year.	Disputes.	Days lost.
1916	581	2,599,800
1917	688	5,599,800
1918 (Jan.-Sept.) ..	960	4,329,700

• *Wages.*—Official figures show an increase of 116 per cent. in the cost of living during the war. Naturally, workpeople have expected to

receive, even if they did not earn, more wages. In the meantime the soldier and the sailor faced the terrors of war at 1s. 6d. per day under strict discipline. Employers have been inclined to give war bonuses, but workpeople want increased wages—it will be easier after the war to drop a war bonus than reduce an increased wage. The tendency (voiced by Lord Leverhulme) is towards more leisure for the workman. The summary of wages increase is as follows:—

Year.	Workpeople.	Weekly increase.
1916	3,593,000	£637,000
1917	4,690,000	2,183,000
1918 (Jan.-Sept.)	5,393,000	1,847,400

This is an average of 7s. weekly per head; there were other increases that are not recorded as within the definition of labour—i.e. clerks, etc.

• *Conferences.*—The year has been a full one on war matters. The power of labour as an organised body of opinion is growing, and is tardily being recognised. Something like five million workers are organised in the trade unions, and when their leaders speak in the name of Labour the numerical strength must be realised. Generally, Labour has been solid on the crushing of the Prussian Military Autocracy. Its ideal for the future is a League of Nations. Labour is putting forward about 400 candidates in the coming General Election, and its leaders have hopes eventually of a Labour Government. Political and trade union agitation for better conditions of employment are confused. Many trade unionists belong to the old parties.

• *Whitley Committee.*—Five reports have now been issued. The theory is that disputes will be prevented if the masters and men in each industry (as a whole and in individual workshops) meet in conference and thrash out difficulties face to face and in private. Up to September eleven industrial councils had been established to deal with domestic arrangements within their respective industries on the lines suggested by the Whitley Committee, and working in conjunction with the Ministry of Labour.

In October, 1918, the Whitley Committee made its final report with: "Our recommendations have the effect of conferring upon the Joint Industrial Councils, and through them upon the several industries, a large measure of self-government." Unfortunately for the Councils, the younger men in the advanced schools of labour want the full measure of self-government without the presence of the employer, and with these Bolshevik (lately Syndicalist) theories in view the Councils will not be happily established in all trades.

• *Women.*—The agitation for equal pay for equal work, regardless of sex, is coming to a head. On piece work there has been little difference. On day work the women have usually been paid less than the men. London omnibus women led the way in getting equal pay—11,000 women were on strike with this object in August.

• *Future.*—Unemployment has been at almost zero during the war. With demobilisation, fresh labour difficulties will arise. How far reconstruction will be carried to solve questions of employment has yet to be seen. If the trade of Great Britain is to maintain its old place in the trade of the world there must be a contented body of Labour.

DURING the past twelve months women have continued to take a very active share in war work. The corps already in existence have increased their numbers, and new organisations have been formed. The V.A.D. of the British Red Cross and the Order of St. John of Jerusalem has extended its work enormously, and new hospitals have been opened in various parts of the country. The urgent demand for workers has resulted in a large increase in the number of part-time ones now accepted. Not only have the members been engaged in nursing the men on active service, but they have also done much for those who are discharged as helpless. The Red Cross uniform is to be found in the Star and Garter Home for disabled soldiers and sailors, in St. Dunstan's Hostel for those who have been blinded in the war, and in the hospitals for shell shock cases. The historic "Bishop's Palace" at Fulham, the residence of the Bishop of London, is now a hospital staffed by the Red Cross. The work abroad has grown in proportion to that at home. The *Women's Royal Naval Service*, started just at the end of 1917, has become one of the most useful of the various organisations. Its members have released a number of men of various naval ranks and ratings for more strenuous work, the women undertaking the lighter branches. The "service" consists of "mobile" and "immobile" women. The former are liable to be sent anywhere in the United Kingdom, but the latter continue to live at home, and are employed locally. The uniform is dark blue, and of quite a naval appearance. The work undertaken by the members covers a wide area. A large number do clerical and accountant work, others are in the household branch; there is a garage section, a postal branch, a signal branch, and a very large technical branch. The service is a strict one, and is kept up to a high standard of efficiency. There are officers, chief section leaders, section leaders, and ratings. The popular *W.A.A.C.* have during the year changed their name, and are now known as Queen Mary's Army Auxiliary Corps, Her Majesty having become their head. Their work has extended very much. Large numbers are engaged on work in France, and they have enabled many thousands of men to be released from the Base and to take their place in the firing line. Their work comprises practically every form of employment ever undertaken by a soldier that is of a non-combatant nature. There has during the year been a great demand for cooks to enrol in the corps, and there was a good response. There is a very large clerical branch as well as a domestic one; there are many engaged as tailors and shoemakers. There is a telephone and postal service, also a motor transport service. Some women are working as unskilled hands, but the large majority are skilled workers. The care of the graves of the men who have been killed in France is in the hands of this corps. There is a section of girl gardeners whose work it is. The khaki uniform of the *Q.M.A.A.C.* is now a familiar object in all parts of England and in many parts of France. Some have lost their lives on "Active Service."

The Navy and Army Canteen Board has done much useful work during the year. In the spring their work was increasing so rapidly an urgent appeal was made for more women to join up. This met with a ready response, and various canteens all over the country are staffed

and entirely managed by the workers of the Board. While some are engaged in towns, others are right in the heart of the big camps in the country. A neat khaki uniform is worn by the workers. The *Women's Royal Flying Corps*, one of the latest organisations, is doing useful work, and has interested many girls who, while anxious to do "war work," wished for an active life. The members do not fly, as some suppose from the title; their object is, as with several other branches of women's work, to release men for the more strenuous parts. A large and important section of the corps is that of the motor bicycles (with side cars). The girl drivers are already well known in London streets for their nerve and skill in driving. The *Women's Legion*, one of the corps to be started in the early days of the war, has continued to do useful work. Motor driving has been the chief feature of this corp. The *Women's Land Army* has gone on steadily increasing its numbers. It is to a large extent to the work of this corps that we are indebted for so much of our home-grown food. The women have been engaged winter and summer alike on the land and in the farm-yard. Even the British farmer, who at first did not look kindly on the "Land Lassie," has had to confess that their work in rearing the young animals has been wonderfully successful. The care of the stocks has proved itself a women's special sphere. The driving of motor tractors has been quite the most up-to-date work that has fallen to women. They have received special instruction before starting on their ploughing. A school has been inaugurated for teaching them, and both tractor and driver have been very successful. While thinking of the open-air war worker we must not forget those who are doing their "bit" at the Remount Stables, and a very important "bit" it has been. Other women are engaged in work where horses play an important part—e.g., the drivers of the Royal Mails. Many of those who are now driving the familiar red cart have been accustomed to their own horses in pre-war days, and have chosen this form of war work. The *Women Police* have increased in numbers. They have received numerous applications for their services from munition factories in all parts of the country, and wherever they work they have been welcomed by the employers. The women workers in the munition and aeroplane factories have increased in number, and by their labour the output of material has been enormous. In every branch of work at home, as the men have been called up, women have replaced them. One of the latest instances of this is the employment of women dust-"men" by borough councils. They have been found very satisfactory, although a larger number are required to do the work than when men were engaged. Women have recently entered (or started to train) for professions that hitherto have been left to men. The architectural profession has now opened its doors to admit women. Several of the large general hospitals now admit them as students, and numbers have already taken advantage of the co-education offered to them. There are quite a number now training to become qualified dentists. Dental mechanics has already become a woman's work, and many are engaged studying for the opticians' examination. In the majority of cases where women have been engaged on war work, they have given satisfaction, and the nation can look back with pride upon the work its women have done.

ALTHOUGH overshadowed to some extent by the proceedings of the Imperial War Cabinet, the Imperial War Conference, which met in June and July last year, arrived at many important decisions, and made considerable progress in preparing to face the great problems of peace, the immediate task set before the members. The oversea delegates to the Conference were Sir Robert Borden, the Hon. A. Meighen, the Hon. J. A. Calder, the Hon. C. C. Ballantyne, Major-Gen. S. C. Newburn, and the Hon. N. W. Rowell (representing Canada), Mr. W. M. Hughes, and Mr. J. Cook (representing Australia), Mr. W. F. Massey, and Sir Joseph Ward (representing New Zealand), Lieut.-Gen. J. C. Smuts and the Hon. H. Burton (representing South Africa), Mr. W. F. Lloyd (representing Newfoundland), and Mr. L. S. Montagu, M.P., the Maharaja of Patiala and Sir S. P. Sinha (representing India). Mr. Walter Long, as Secretary of State for the Colonies, presided over the meetings, which were held at the Colonial Office, and other members attended when their departments were concerned in the discussions, among them being Mr. Balfour, Mr. Bonar Law, Lord Robert Cecil, Sir Albert Stanley, Dr. Addison, Mr. Hewins, Mr. Clynes, Lord Beaverbrook, Sir Joseph Maclay, Mr. Illingworth, Lord Finlay and Sir George Cave. The Prime Minister addressed the delegates before the Conference opened.

A great part of the proceedings was of a highly confidential character, which could not be made public until after the war. A report of such of the discussions and resolutions as would not reveal information of service to the enemy was published after the conclusion of the Conference, and thus it is possible to outline many of the decisions reached. One of the most important subjects reviewed was that of the control of raw materials, and a resolution was unanimously adopted to the effect that it is necessary to secure, for the British Empire and the belligerent Allies, the command of certain essential raw materials in order to enable them to repair the effects of the war as soon as possible, and to safeguard their industrial requirements. The opinion was expressed that the Governments of the British Empire should make such arrangements among themselves as would ensure that essential raw materials, produced within the Empire, should be available for these purposes, and should arrange with the Allied countries to utilise for the same ends essential raw materials produced in those countries. It was also resolved that the various Governments of the different parts of the Empire should take such action as was expedient to enable these objects to be fully carried out. To assist the Governments in determining their action in this respect a Committee was appointed which reported to the Conference before its conclusion, though its recommendations were not made public, but were communicated to the various Governments in order to ascertain their views on the appropriate action to be taken in the matter. It was further agreed that the needs and the resources of the Allies in respect of the raw materials dealt with by the Committee should be ascertained.

Another important subject considered was that of shipping. The Conference accepted, in principle, the establishment of an Imperial Investigation Board composed of representatives of the shipping and trading interests of the different parts of the

Empire, to deal with freight rates, and the development of steamship services and harbours. A Committee was set up to frame a detailed scheme for such a Board, and to consider the best machinery for promoting Imperial communications to the fullest advantage. The time at the disposal of the Committee was not long enough to deal adequately with the matter, but they made recommendations, which were adopted by the Conference, to the effect that, in order to maintain satisfactorily the connexions, and to encourage commercial and industrial relations between the different countries of the British Empire, shipping on the principal routes should be brought under review by an inter-Imperial Board, and that the Imperial Investigation Board should be appointed with power to enquire into and report on all matters connected with ocean freights and facilities, and on all matters connected with the development and improvement of the sea communications between the different parts of the Empire, with special reference to the size and type of ships, and the capacities of harbours. It was added that the Board, in addition to representatives of the Governments concerned, should include persons with expert knowledge of the problems involved, including representatives of the shipping and trading interests.

The Conference agreed to the immediate establishment of a "Military Demobilisation Committee of the British Empire" to consist of representatives of the military authorities of the Dominions and Colonies, and of the War Office, India Office, and Ministry of Shipping, to consider all military questions of demobilisation affecting the various Governments concerned. They urged that the question of replacing the present dual system of appeal by the constitution of one Imperial Court of Appeal, demanded the prompt consideration of the Imperial Government, and suggested that the Lord Chancellor should prepare and circulate to the various Governments, as soon as possible, a memorandum of such proposals, as in the opinion of the Imperial Government were practicable for that purpose, with a view to decision at the next Imperial Conference. The opinion was expressed, in another resolution, that the development which has taken place in the relations between the United Kingdom and the Dominions necessitated a change in administrative arrangements, and in the channels of communication between the Governments such as would bring them more directly in touch with each other, the Imperial War Cabinet being invited to give immediate consideration to the creation of suitable machinery for this purpose.

Against the view of South Africa, and without the support of Canada, the Conference considered that legislation should be passed throughout the Empire, restricting, for a period after the war, as far as was possible, the naturalisation of citizens of present enemy countries, as well as the acquisition by them of any form of political rights, or any land or mining privileges. With a view to securing uniformity of policy and action throughout the Empire with regard to naturalisation, the Conference recommended that a special Conference, representative of all parts of the Empire, should be held at the earliest practicable date to examine and report upon any question connected with nationality or naturalisation that might be raised, and upon any suggested amendments of the existing law.

FOR some time the nation has displayed almost as much energy in preparing for peace as it has done in carrying on war. The preparations were commenced at least three years ago, though it was not until the formation of Mr. Lloyd George's Administration that the work was centralised and a special department set up to deal with the multitude of problems that must necessarily arise upon the conclusion of hostilities. In the Premiership of Mr. Asquith reconstruction was referred to a Committee of Ministers of the Crown, with a small secretariat attached. After the present Government took office there was a period of about three months during which the sub-committees of the original Cabinet Committee continued their work, but in the spring of 1917 a new authority was created, of which the Prime Minister became chairman and Mr. E. S. Montagu vice-chairman and executive head, the special inquiries already in operation being pursued and additional bodies instituted. A few months later, in July, 1917, the Government decided that the task was of sufficient importance to warrant the creation of a Ministry of Reconstruction, which should remain in existence for the duration of the war and for a further short period.

The functions of the new department, of which Dr. Addison was appointed chief, and which commenced its existence a month later, were to consider and advise upon the problems arising out of the war and requiring to be dealt with upon its termination, and to institute and conduct such inquiries, prepare such schemes, and make such recommendations as were deemed desirable; in other words, it was to be mainly advisory and not executive. The department was divided into a number of branches dealing with particular questions, and an influential committee, representative of all the leading interests concerned in reconstruction, was appointed to advise the Minister. At the beginning of last year close upon a hundred commissions and committees were hard at work examining such matters as trade development, scientific and industrial research, the varied aspects of demobilisation, education, housing, agriculture, and the conditions of employment. Investigations were even made into the exact definition of the term "the duration of the war," upon the precise meaning of which innumerable contracts of all descriptions depended. With the many new inquiries instituted week by week a vast amount of information has already been secured to assist in the administration of the country when the time comes for resuming its normal life.

Of the several bodies invited to look into the development of trade after the war the most important was that which was set up to consider the nation's commercial and industrial policy. This committee, over which Lord Balfour of Burleigh presided, presented its final report during 1918, and recommended Government action to promote and safeguard industries on which other and larger branches of important national production depended, and Government assistance to industries which are important for maintaining the kingdom's industrial position, but which are unable to develop themselves by reason of undue foreign competition or other causes. They proposed that efforts should be made to meet the declared wishes of the Dominions, the Colonies and India for the development of their economical relations with the

Mother Country, and, subject to agreement with the Allies, urged the refusal for a time of trading facilities to enemy countries on the same unrestricted terms as before the war or on terms equal to those accorded to Allies or neutrals.

While the majority of the Committee did not regard as expedient a general tariff covering the whole range of imports into the United Kingdom, they considered that producers were entitled to protection against "dumping" and the introduction of "sweated" goods, and recommended Government action on the lines adopted by Canada. "Key" industries, the Committee contended, should be maintained at all hazards, while in other industries protection, by means of customs duties or Government help in other forms, should be provided only for reasons of national safety, or on the general ground that no industry of real importance should be allowed to be weakened by foreign competition or brought to any extent under alien control. They recommended that preferential treatment should be accorded to the Oversea Dominions and Possessions in any customs duties imposed in the Mother Country, consideration being given to other forms of Imperial preference. To obviate any danger from this policy the establishment of an independent Board to examine all applications for State assistance and advise the Government as to the nature of the help to be given was suggested.

Another important proposal made by the Committee was that the present prohibition of the importation of goods of enemy origin should be continued, subject to licence in exceptional cases, for at least twelve months after peace. They also recommend that the British Empire and the Allies should adopt a policy of joint control of the export of certain important materials which will be required for the restoration of their industries. It was suggested that it will be necessary to continue for a period after the war some part of the control of home and foreign trade imposed during hostilities in order to secure adequate supplies of foodstuffs and raw materials and their fair distribution, but they considered that these restrictive measures should be kept within the narrowest possible limits and removed as soon as possible.

In an interim report, the Committee expressed the view that any general prohibition of exports to enemy countries and any continuance of the system of rationing neutral countries were impracticable and inexpedient. The Paris resolutions could be carried into effect if a policy of joint control of certain important commodities were agreed upon by the Allies for the transitional period. Priority to the British Empire and the Allies should be secured, but only materials mainly derived from those countries should be affected. Export except under licence of articles deemed expedient should be prohibited, specified articles being controlled, as well as others of which there may be danger of shortage. The Committee added that negotiations with the Allies should be entered into in order to adopt joint measures regarding selected commodities.

Coming to specified articles, the Committee declared that a policy of restriction, so far as the United Kingdom is concerned, should be applied to cotton yarn, wool tops, worsted, mohair, and alpaca yarns. It was believed that immediately after the war the output of yarns

could be absorbed in the United Kingdom and Allied countries, regard being had especially to the requirements of France. Prohibition of coal exports was not recommended, but as regards wool the Committee considered that joint measures should be devised with the Dominions to secure control of their whole output. Control of Indian jute and cotton and Egyptian cotton was also suggested.

In the exercise of right of priority, it was held, regard must be had to the imperative necessity of encouraging the general export trade of the country, and in regard to certain raw materials the supply of which is likely to be insufficient for world requirements the Committee saw serious objections to the joint purchase on behalf of the respective Governments of supplies available. The Committee were strongly of opinion that this course should be adopted only in the last resort, and were convinced that there should be as little interference as possible with the normal agencies of private trading.
